Notes: NAVs of the Growth Options of the respective plans of the Scheme have been used to calculate the Returns.

^^ The units under the Schemes were allotted during the year hence there are no NAVs per unit at the beginning of the year and inception returns shown for that period are as per absolute returns.

**** PAST PERFORMANCE MAY OR MAY NOT BE SUSTAINED IN THE FUTURE.** Performance of the IDCW Option for the investor would be net of dividend distribution tax, as applicable. Pursuant to payment of IDCW, the NAV of the IDCW Option falls to the extent of IDCW payout and statutory levy (if applicable). Hence, in order to calculate total returns, the above returns are computed based on the NAV of only the Growth Option, since there are no IDCW payouts thereunder. The returns provided are Absolute Returns where the Schemes have been in existence for less than one year and Compounded annualised where the Schemes have been in existence for more than one year.

a. Standard Risk Factors for investments in Mutual Funds

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal
- As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the scheme can go up or down depending on various factors and forces affecting capital markets and money markets.
- Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee the future performance of the Scheme.
- The name of the Scheme does not in any manner indicate its quality or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme. In addition, the scheme does not guarantee or assure any Income distribution cum Capital Withdrawal (IDCW) and also does not guarantee or assure that it will make any IDCW distribution, though it has every intention to make the same in the distributions of Income Distribution cum Capital Withdrawal option. All IDCW distributions of Income Distribution cum Capital Withdrawal will be subjected to the investment performance of the Scheme.

b. Risk factors of not maintaining average AUM of Rs. 20 crores on half yearly rolling basis (Applicable only for open ended debt-oriented schemes of Mirae Asset Mutual Fund)

The Scheme(s) shall maintain an average AUM of Rs. 20 crores on half yearly rolling basis. In case, the average AUM falls below Rs. 20 crores, the AMC shall scale up the AUM of such Scheme within a period of six months so as to maintain the average AUM of Rs. 20 crores on half yearly rolling basis, failing which the Scheme shall be wound up in accordance with the provisions of Regulation 39 (2) (c) of SEBI (Mutual Funds) Regulations, 1996 as amended from time to time.

c. Risks Associated with Derivatives

The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional instruments. Such risks include mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount.

Derivative products are highly leveraged instruments that require investment techniques and risk analyses different from those associated with traditional securities such as shares or bonds. Investment in derivatives also requires the maintenance of adequate controls to monitor the transactions entered into, the

ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly.

The options buyer's risk is limited to the premium paid, while the risk of an options writer is unlimited. However, the gains of an options writer are limited to the premiums earned.

The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price. The loss can be unlimited as underlying asset can increase to any levels. The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price and the loss is limited to strike price.

Investments in futures face the same risk as the investments in the underlying securities. The extent of loss is the same as in the underlying securities. However, the risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.

The derivatives are also subject to liquidity risk as the securities in the cash markets. The derivatives market in India is nascent and does not have the volumes that may be seen in other developed markets, which may result in volatility in the values.

Risk associated with Covered Call

If the underlying price rises above the strike, the short call loses its value as much as the underlying stock gains and as a result the upside of the stock always gets capped. This is a lost opportunity risk.

a) Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strategy, the profits from call option writing is capped at the option premium, however the downside depends upon the increase in value of the underlying equity shares. This downside risk is reduced by writing covered call options.

b) The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity, or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.

c) The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is more than the option premium received the scheme would be at a loss.

d) The total gross exposure related to option premium paid and received must not exceed the regulatory limits of the net assets of the scheme. This may restrict the ability of Scheme to buy any options.

Risk Factors associated with Investments in Other Commodities and Exchange Traded Commodity Derivatives (ETCD) of various commodities:

- **Commodity risks:** The Scheme may invest in commodities markets and may therefore have investment exposure to the commodities markets and one or more sectors of the commodities markets, which may subject the Scheme to greater volatility than investments in traditional securities, such as stocks and bonds. Volatility in the commodities markets may be caused by changes in overall market movements, domestic and foreign political and economic events and policies, war, acts of terrorism, changes in domestic or foreign interest rates and/or investor expectations concerning interest rates, 15 domestic and foreign inflation rates, investment and trading activities of mutual funds, hedge funds and commodities

funds, and factors such as drought, floods, weather, livestock disease, embargoes, tariffs and other regulatory developments, or supply and demand disruptions. Because the Scheme's performance is linked to the performance of volatile commodities, investors should be willing to assume the risks of potentially significant fluctuations in the value of the Scheme's shares.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of investment strategies depends upon the ability of the fund manager(s) to identify such opportunities which may always not be available. Identification and execution of the strategies to be pursued by the fund manager(s) involve uncertainty and decision of fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies.

The AMC within the regulatory guidelines and room given in Scheme information document, may use derivative on commodities (like Futures and Options). The use of derivatives may affect the performance of the scheme.

- **Systemic risks** which may be witnessed while trading in Indian Commodities Market are Liquidity risk, Price risk in terms of volatility, Exchange Risk and counterparty risks.

- **Liquidity Risk:** While ETCDs that are listed on an exchange carry lower liquidity risk, the ability to sell these contracts is limited by the overall trading volume on the exchanges. The liquidity of the Schemes' investments is inherently restricted by trading volumes of the ETCD contracts in which it invests. Additionally, change in margin requirements or intervention by government agencies to reduce overall volatility in the underlying commodity could lead to adverse impact on the liquidity of the ETCD.

- **Price risk:** ETCDs are leveraged instruments hence, a small price movement in the underlying security could have a large impact on their value. Also, the market for ETCDs is nascent in India hence, arbitrages can occur between the price of the physical commodity and the ETCD, due to a variety of reasons such as technical issues and volatile movement in prices. This can result in mispricing and improper valuation of investment decisions as it can be difficult to ascertain the amount of the arbitrage.

- **Settlement risk:** ETCDs can be settled either through the exchange or physically. The inability to sell ETCDs held in the Schemes' portfolio in the exchanges due to the extraneous factors may impact liquidity and would result in losses, at times, in case of adverse price movement. Wherein the underlying commodity is physically delivered in order to settle the derivative contract, such settlement could get impacted due to various issues, such as logistics, Government policy for trading in such commodities.

- If the Commodities futures position passes its last square off date or the 'Intention' is missed to be provided before the Delivery Intention period, the buyer or the seller will be allocated delivery of the commodity. Thus, there emerges a risk of holding goods in physical form at the warehouses. Though the commodity is inclusive of insurance cost, there is a small deductible in each claim which is not payable by the Insurance company.

d. Other Risk Factors

Country Party Risk:

As the equity related securities such as warrants could be subjected to counter party risk as these rank equally among themselves and with all other unsecured obligations of the issuer in case of liquidation of the issuer. Therefore, the value of the Fund's assets will, and may always, depend entirely on the credit risk of the issuer held by the Fund. In the event of liquidation or default of the issuer and that a replacement issuer cannot be appointed, dealing of the Units of the ETF may be suspended and the Fund may ultimately be terminated, in which case, the Fund may redeem all outstanding Units at the Net Asset Value which may differ from the trading price on the exchange which is affected by secondary market trading factors.

Risks Associated with Equity and Equity related Investments:

- Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, changes in law/ policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors.
- Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Settlement Risk

Different segments of financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Portfolio to make purchases in intended securities due to settlement problems could cause the Portfolio to miss certain investment opportunities.

Regulatory Risk

The value of the securities may be affected by uncertainties such as changes in government policies, changes in taxation, and other developments in the laws and regulations.

Risk Associated with Unlisted Securities

Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The underlying scheme may choose to invest in unlisted domestic securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Risks Associated with Debt & Money Market Instruments

Interest Rate Risk / Price Risk

From the perspective of coupon rates, debt securities can be classified in two categories, i.e., Fixed coupon bearing securities and Floating coupon bearing securities. In Fixed coupon bearing securities, the coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the floating coupon bearing securities, on the other hand, the coupon rate changes – 'floats' – with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury bill.

Fixed income securities (such as Government Securities, bonds, debentures and money market instruments) where a fixed return is offered, run price-risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, the payment-frequency of such coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in interest rates in the financial system and liquidity. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures,

prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof.

Reinvestment Risk

Investments in fixed income securities may carry reinvestment risk as interest rates prevailing in the market may differ from the original coupon of the bond. Consequently, the proceeds from regular coupon and principal payments on due date may get invested at a lower rate.

Credit Risk

Credit Risk comprises three components.

-Default Risk

Securities carry a risk of repayment of principal or interest by the borrower. This is called as default risk. The default risk depends on micro economic factors such as financial soundness and ability of the borrower and macro-economic factors such as industry performance, competition, trade barriers etc.

- Downgrade Risk

It is the risk that credit rating agency downgrades the rating of an issuer based on earnings and cash flows generating capacity. The credit rating migration of issuance leads to increase in the credit spread and thus reduces the price of corporate bond.

- Spread Risk

Though the sovereign yield curve might remain constant, investments in corporate bonds are exposed to the risk of spread widening between corporate bonds and gilts. Typically, if this spread widens, the prices of the corporate bonds tend to fall and so could the NAV of the Debt Schemes. Similar risk prevails for the investments in the floating rate bonds, where the benchmark might remain unchanged, but the spread over the benchmark might vary. In such an event, if the spread widens, the price and the NAV could fall.

- Prepayment Risk

The Borrower may prepay the receivables prior to their respective due dates. This may result in a change in the yield and tenor for the scheme.

- Liquidity Risk

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of these investments. Different segments of the Indian financial markets have different settlement periods, and such periods may be extended significantly by unforeseen circumstances. The length of time for settlement may affect the Scheme in the event it has to meet an inordinately large number of redemption or of restructuring of the Scheme's investment portfolio.

Risk associated with investments in Overseas ETFs:

Subject to necessary approvals, in terms of all applicable guidelines issued by SEBI and RBI from time to time and within the investment objectives of the Scheme, the Scheme may invest in overseas ETFs which carry a risk on account of fluctuations in the foreign exchange rates, nature of securities market of the country concerned, repatriation of capital due to exchange controls and political circumstances.

Risks Associated with Overseas Investments:

Subject to necessary approvals, in terms of all applicable guidelines issued by SEBI and RBI from time to time and within the investment objectives of the Scheme, the Scheme shall invest in overseas markets and securities which carry a risk on account of fluctuations in the foreign exchange rates, nature of securities market of the country concerned, repatriation of capital due to exchange controls and political circumstances.

Currency risk

The foreign securities are issued and traded in foreign currencies. As a result, their values may be affected by changes in exchange rates between foreign currencies and the Indian Rupee as well as between currencies of countries other than India. Restrictions on currency trading that may be imposed by developing market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries.

Risk associated with Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes stock lending under the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

Risks associated with segregated portfolio

- Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
- Security comprises of segregated portfolio may not realize any value.
- Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risk associated with Securitized Debt

Securitized debt papers carry credit risk of the Obligors and are dependent on the servicing of the PTC/Contributions etc. However, these are offset suitably by appropriate pool selection as well as credit enhancements specified by Rating Agencies. In cases where the underlying facilities are linked to benchmark rates, the securitized debt papers may be adversely impacted by adverse movements in benchmark rates. However, this risk is mitigated to an extent by appropriate credit enhancement specified by rating agencies. Securitized debt papers also carry the risks of prepayment by the obligors. In case of prepayments of securities debt papers, it may result in reduced actual duration as compared to the expected duration of the paper at the time of purchase, which may adversely impact the portfolio yield. These papers also carry risk associated with the collection agent who is responsible for collection of receivables and depositing them. The Investment team evaluates the risks associated with such investments before making an investment decision. The underlying assets in the case of investment in securitized debt could be mortgages or other assets like credit card receivables, automobile/vehicle/ personal/commercial/corporate loans and any other receivables/ loans/debt. The risks associated with the underlying assets can be described as under:

Credit card receivables are unsecured. Automobile/vehicle loan receivables are usually secured by the underlying automobile/vehicle and sometimes by a guarantor. Mortgages are secured by the underlying property. Personal loans are usually unsecured.

Corporate loans could be unsecured or secured by a charge on fixed assets/receivables of the company or a letter of comfort from the parent company or a guarantee from a bank/financial institution. As a rule of thumb, underlying assets which are secured by a physical asset/guarantor are perceived to be less risky than those which are unsecured. By virtue of this, the risk and therefore the yield in descending order of magnitude would be credit card receivables, personal loans, vehicle/automobile loans, mortgages and corporate loans assuming the same rating.

Liquidity in Securitized Debt may be affected by trading volumes, settlement periods and transfer procedures. These factors may cause potential losses from being not able to sell the securitized debt instruments at its fair value. Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risks. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than government securities. Further, even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

Risk Associated with structured obligations and credit enhancement

The Scheme may invest in domestic structured obligations such as corporate / promoter guarantee: Securities which have a structure with a guarantee from the corporate / promoter, may see an adverse effect if there are any signs of stress at the promoter / group level, even though the standalone borrowing entity's debt servicing capability and repayments may not see any material impact, from a future cash flow perspective.

Where equity shares are provided as collateral there is the risk of sharp price volatility of underlying securities which may lead to erosion in value of collateral which may affect the ability of the fund to enforce collateral and recover capital and interest obligations. Also, there is a possibility of guarantor going insolvent which also can impact the recovery value of exposure. In case of credit enhanced structures backed by equity share the liquidity of the underlying shares may be low leading to a lower recovery and a higher impact cost of liquidation. In case of other assets provided recovery, value and enforce ability of asset can also be a risk factor which can lower the recovery value.

Risk factors associated with instruments having special features

- The scheme may invest in certain debt instruments with special features which may be subordinated to equity and thereby such instruments may absorb losses before equity capital. The instrument is also convertible to equity upon trigger of a pre-specified event for loss absorption as may be decided by the RBI.
- The debt instruments with special features are considered as Non-Convertible Debentures, may be treated as debt instruments until converted to equity.
- The instruments are subject to features that grant issuer a discretion in terms of writing down the principal/coupon, to skip coupon payments, to make an early recall etc. Thus debt instruments with special features are subject to "Coupon discretion", "Loss Absorbency", "Write down on Point of Non-viability trigger (PONV) event" and other events as more particularly described as per the term sheet of the underlying instruments.
- The instrument is also subject to Liquidity Risk pertaining to how saleable a security is in the market. The particular security may not have a market at the time of sale due to uncertain/insufficient liquidity in the secondary market, then the scheme may have to bear an impact depending on its exposure to that particular security.

Risk Factors Associated with Investments in REITs and InVITs

- **Risk of lower than expected distributions:** The distributions by the REIT or InVITs will be based on the net cash flows available for distribution. The amount of cash available for distribution principally

depends upon the amount of cash that the REIT/InvITs receives as dividends on the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate primarily based on the below, amongst other things:

- Success and economic viability of tenants and off-takers
 - Economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
 - Force majeure events related such as earthquakes, floods, etc. rendering the portfolio assets inoperable
 - Debt service requirements and other liabilities of the portfolio assets
 - Fluctuations in the working capital needs of the portfolio assets
 - Ability of portfolio assets to borrow funds and access capital markets
 - Changes in applicable laws and regulations, which may restrict the payment of dividends by portfolio assets
 - Amount and timing of capital expenditures on portfolio assets
 - Insurance policies may not provide adequate protection against various risks associated with operations of the REIT/InvITs such as fire, natural disasters, accidents, etc.
 - Taxation and regulatory factors
- **Price Risk:** The valuation of REIT/InvITs units may fluctuate based on economic conditions, fluctuations in markets (e.g. Real estate) in which the REIT/InvITs operates and resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events, etc. REITs and InvITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders' rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian Law in the event to insolvency or liquidation of any of the portfolio assets.
 - **Market Risk:** REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.
 - **Liquidity Risk:** As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.
 - **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital.

Risks Associated with Repo in Corporate Debt

Illiquidity Risk

The repo market for corporate debt securities is over the counter (OTC) and illiquid. Hence, repo obligations cannot be easily sold to other parties. Therefore, to mitigate such risks, it has been stipulated that gross exposure to Repo in corporate bonds would be limited to 10% of net assets of the concerned scheme. Further, the tenor of repo would be taken based on nature and unit holders' pattern of the scheme.

Counter-party risk

Credit risk would arise if the counter-party fails to repurchase the security as contracted or if counterparty fails to return the security or interest received on due date. To mitigate such risks, the schemes shall carry out repo transactions with only those counterparties, which has a credit rating of 'A1+' or 'AA and above'. In case of lending of funds as a repo buyer, minimum haircuts on the value of the collateral security have been stipulated, and we would receive the collateral security in the scheme's account before the money is lent to the counterparty. Overall, we would have a limited number of counter-parties, primarily comprising of Mutual Funds, Scheduled Commercial banks, Financial Institutions and Primary dealers. Similarly, in the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter-party may hurriedly dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Scheme. Thus, the Scheme may suffer losses in such cases. Sufficient funds flow management systems are in place to mitigate such risks.

Collateral Risk (as a repo buyer)

Collateral risks arise due to fall in the value of the security (change in credit rating and/or interest rates) against which the money has been lent under the repo arrangement. To mitigate such risks, we have stipulated the minimum credit rating of the issuer of collateral security.

('AA' for long-term instruments/A1+ for money market instruments), maximum duration of the collateral security (10 years) and minimum haircuts on the value of the security.

Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus, this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with Chapter 16A of SEBI Master Circular dated June 27, 2024 on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the aforementioned schemes shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

We would further like to bring to the notice of the investors that investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Risks associated with investing in Tri-Party Repo through CCIL (TREPS)

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Triparty Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus, reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to

complete the settlement. The sequence in which the above resources are used is known as the “Default Waterfall”. As per the waterfall mechanism, after the defaulter’s margins and the defaulter’s contribution to the default fund have been appropriated, CCIL’s contribution is used to meet the losses. Post utilization of CCIL’s contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus, the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower. Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

Risk Management & Liquidity Management tools:

Potential Risk Matrix (PRC) & Risk-o-meter: Investors are requested to review this scheme’s Potential Risk Matrix (PRC) to understand the maximum risk that this scheme will run as per design and & Risk-o-meter to understand periodical measurement of that risk on a regular basis. Investors are suggested to read about various disclosures under the section “PERIODIC DISCLOSURES” pertaining to “Potential Risk Class Matrix” & “Product Labelling and Risk-o-meter” to understand in detail the disclosure frequency and remedial measures in case of breaches in the boundaries

Mandatory Liquidity requirement: The scheme adopts the Liquidity Risk Management framework mandated by SEBI and AMFI which helps estimates liquidity requirement by determining liquidity risk arising from the liability side and tries to covers all potential liquidity risk scenarios up to agreed confidence interval and has mandated remedial measures both for managing the risk on an ongoing basis (LRaR & LCRaR) as well as action plan in case there is a difference between actual outcome and projected outcome. Investors can refer to the Chapter of 4 of SEBI Master Circular dated June 27, 2024 for detail understanding on the Liquidity Risk Management Framework.

Further Investment manager also evaluates and monitors the Asset Liability Mismatch (ALM) which addresses the gap in the estimated potential liquidity requirement over a 90-day period and schemes investment / assets liquidity to meet the potential requirement and best ensures that scheme has necessary liquidity to meets its liability obligations.

Stress testing the scheme portfolio: The investment manager periodically stress tests the scheme portfolio to address the asset side risk from an Interest Rate, Credit and Liquidity Risk perspective at an aggregate portfolio level and evaluate the stress in terms of its impact on the NAV of the scheme. The stress test is performed using the methodology and periodicity as mandated by AMFI in consultation to SEBI.

Swing Pricing: The AMC has a Swing Pricing policy in place to help in case of severe liquidity stress at an AMC level or a severe dysfunction at market level, the Swing Pricing offers the contingency plan in case of extreme exigencies. Investors are suggested to read the detail disclosure pertaining to this policy in “**Swing Pricing Framework**”.

RISK CONTROL:

The Investment Manager endeavours to invest in REITs/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third party research. This involves one to one meeting with the managements, attending conferences

and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions etc.

Risk Mitigation Measures

Concentration Risk

The AMC will mitigate this risk by investing in sufficiently large number of issuers spread across the sectors so as to maintain optimum diversification and keep issuer/sector specific concentration risk relatively low.

Liquidity Risk

The Schemes will invest in debt instruments and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Schemes will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.

Credit Risk - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.

2. SPECIAL CONSIDERATIONS

Mutual funds, like securities investments, are subject to market risks and there is no guarantee against loss in the Scheme or that the objective(s) of the scheme are achieved.

Know Your Customer (KYC): The need to "Know Your Customer" is vital for the prevention of money laundering. In terms of the Prevention of Money Laundering Act, 2002, the Rules issued there under and the guidelines/circulars issued by SEBI regarding the Anti Money Laundering (AML Laws), all intermediaries, including Mutual Funds, have to formulate and implement a client identification programme, verify and maintain the record of identity and address(es) of investors.

Revision in Know Your Customer (KYC) Procedure w.e.f. February 1, 2017:

For Individual Investors:

The Government of India has authorized *the Central Registry of Securitization and Asset Reconstruction and Security interest of India* (CERSAI, an independent body), to perform the function of Central KYC Records Registry including receiving, storing, safeguarding and retrieving KYC records in digital form.

Accordingly, in line with clause 16.2.4.4 of SEBI Master Circular for Mutual Funds dated June 27, 2024 read with AMFI Best Practice Guidelines circular no. 68/2016-17 dated December 22, 2016, new individual investors investing in the Schemes of the Fund are requested to note the following changes, from **February 1, 2017**:

1. New individual investors who have never done KYC under KRA (KYC Registration Agency) regime and whose KYC is not registered or verified in the KRA system will be required to fill the new CKYC form while investing with the Fund.

CKYC is currently not applicable for Non-Individual Investors. All new Non-Individual Investors will continue with the old KRA KYC form.

2. If any new individual investor uses the old KRA KYC form which does not have all the information needed for registration with CKYC, then such investor will be required to either fill the new CKYC form or provide the missing/additional information using the Supplementary CKYC form.

3. Investors who have already completed CKYC and have a KYC Identification Number (KIN) from the CKYC platform can invest in schemes of the Fund quoting their designated KIN issued by CKYC on the application form (14 digits for normal accounts and 15 digits for simplified and small accounts). Further, in case the investor's PAN is not updated in CKYC system, a self-certified copy of PAN Card will need to be provided.

Further, the investors may please note that the AMC/ Mutual Fund shall use the KIN of the investors to download the KYC information from CKYC and update its records as and when required.

The CKYC form and Supplementary CKYC form for individual investors and common application forms are available on the AMC's website.

Investors are requested to note that pursuant to the direction issued by Hon'ble Supreme Court on March 13, 2018 in Writ Petition (Civil) no. 494/2012, the last date for mandatory submission of Aadhaar in respect of the existing mutual fund folios / accounts, including accounts / folios opened up to March 31, 2018, has been deferred till further notice. Existing unitholders are however encouraged to link their Aadhaar and PAN to their mutual fund folio(s). Investors (who is investing for the first time in Mirae Asset Mutual Fund ('the Fund') and does not have any folio in the Fund), should note that it is mandatory to submit Aadhaar at the time of opening a folio/account. Accordingly, no new folio /account shall be opened without submission of Aadhaar.

For Non-Individual Investors:

Pursuant to clause 16.2.4.4 of SEBI Master Circular for Mutual Funds dated June 27, 2024 regarding uniformity in the Know Your Customer (KYC) process in the securities market and development of a mechanism for centralization of the KYC records to avoid duplication of KYC Process across the intermediaries in the securities market and further to simplify KYC norms and make it more investor friendly, SEBI has introduced a common KYC Application Form for all the SEBI registered intermediaries viz. Mutual Funds, Portfolio Managers, Depository Participants, Stock Brokers, Venture Capital Funds, Collective Investment Schemes, etc.

For this purpose, KYC registration is being centralized through KYC Registration Agencies (KRA) registered with SEBI. Thus, each investor has to undergo a uniform KYC process only once in the securities market and the details would be shared with other intermediaries by the KRA. CVL (CDSL Ventures Ltd.), who was retained by the mutual funds for centralized registration and record keeping of KYC records, has recently obtained SEBI registration as a KRA.

With effect from January 01, 2012, all investors are required to follow the new KYC compliance procedure as mentioned below while making any investments with the Fund:

- Fill up and sign the Common KYC application form [available on the Fund's web site i.e. www.miraeassetmf.co.in] (for individual investors or non-individual investors as appropriate) and carry out the KYC process including In-Person Verification (IPV) with any SEBI registered intermediaries including mutual funds.
- At the time of transacting with the Fund, submit, **in person**, the completed KYC application form along with all the necessary documents as mentioned in the KYC application form with any of the offices of the distributors (qualified as per the following note), Registrar & Transfer Agent of the Fund or the Fund; and
- Obtain a temporary acknowledgement for submission of all the documents and completion of IPV;

Note: As per the clause 16.2.4.4 of SEBI Master Circular for Mutual Funds dated June 27, 2024, it is mandatory for SEBI registered intermediaries to carry out "In-Person Verification" ("IPV") of any investor dealing with a SEBI registered intermediary. The Mutual Fund may also undertake enhanced KYC measures & due diligence based on the internal client due diligence policy to commensurate with the risk profile of the investors.

For investments in a mutual fund, the Asset Management Companies, Registrar and Transfer Agents of mutual funds and distributors which comply with the certification process of National Institute of Securities Market or Association of Mutual Funds in India and have undergone the process of "Know Your Distributors" are authorised to carry out the IPV. Unless the IPV process is completed, the investor will not be considered as KYC compliant under the new KYC compliance procedure and hence will not be permitted to make any investment in the Fund.

For investors proposing to invest with the Fund directly (i.e. without being routed through any distributor), IPV done by a scheduled commercial bank may also be relied upon by the Fund.

a. Attestation of documents and IPV shall be conducted only by the authorised employees of AMC, the RTA appointed by the AMC and the distributors who comply with the certification process of National Institute of Securities Market (NISM) or Association of Mutual Funds in India (AMFI) and have undergone the process of 'Know Your Distributor (KYD).

b. AMFI registered distributors also need to ensure that their registration is valid and have furnished necessary mandatory requirements such as self-declaration, etc.

c. The following shall be recorded on the KYC form;

I. Name of the person doing attestation of documents/IPV, his designation, organization, his signatures and date of IPV.

II. ARN code and name of the distributor in case of attestation/IPV done by a valid ARN holder.

III. In case the attestation/IPV is done by a sub broker, the sub broker conducting the attestation/IPV shall:

(i) Comply with the certification process of National Institute of Securities Market (NISM) or Association of Mutual Funds (AMFI) and have undergone the process of 'Know Your Distributor (KYD).

(ii) Affix on the KYC application form, in addition to his ARN code, the ARN code of the main distributor and the sub broker code allotted to him by the main distributor.

d. In case of attestation/IPV done by a sub broker, the main distributor under whose code the folio is opened shall also be responsible for the KYC process, including the IPV, conducted by the sub broker.

e. In case of applications received as "Direct" (not through a distributor), mutual funds may rely on attestation/IPV performed by an authorised official of a scheduled commercial bank.

f. Attested copies of the KYC documents can be accepted, if the same are attested by the list of people authorised to attest the documents, as mentioned on the KYC forms.

g. Entities / Authorised persons undertaking verification of documents and the IPV shall exercise due care and diligence while validating the documents and verifying the identity of the client in-person.

h. Various due diligences to be exercised by the distributors (including sub-brokers who are registered with AMFI) while conducting the KYC process will form part of Code of Conduct prescribed for distributors.

Once all the documents are verified by a KRA, they will send the investor a letter within 10 working days from the date of receipt of necessary documents by them from the Fund or its Registrar and Transfer Agent informing the investor either about compliance by the investor of the new KYC compliance procedure (“**final acknowledgement**”) or any deficiency in submission of details or documents.

On the basis of the temporary acknowledgement or the final acknowledgement the investor need not undergo the same process again with another intermediary including mutual funds. However, Mirae Asset Mutual Fund reserves the right to carry out fresh KYC of the investor.

New KYC form can be submitted by an investor along with an investment application (purchase / additional purchase / switch / SIP mandate form / mandate form) and not on a stand alone basis, as was possible prior to 31/12/2011. However, an investor who has investments in any mutual fund and is not KYC compliant may submit new uniform KYC form to the mutual fund by quoting the folios number.

For Micro Applications: In accordance with AMFI circular dated June 30, 2009 and final AMFI Guidelines received on July 14, 2009 and SEBI letter to AMFI dated July 24, 2012, investments in Mutual Fund (including SIP investment where the aggregate of SIP instalments in a rolling 12 months period or in a financial year i.e. April to March) of upto Rs. 50,000/- per investor per year shall be exempt from the requirement of PAN. However, eligible Investors (including joint holders) should comply with the KYC requirement through registered KRA by submitting Photo Identification documents as proof of identification and the Proof of Address [self-attested by the investor / attested by the ARN Holder/AMFI distributor]. These exempted investors will have to quote the “PERN (PAN exempt KYC Ref No) in the application form. This exemption of PAN will be applicable only to investments by individuals (including NRIs but not PIOs), joint holders, Minors and Sole proprietary firms. PIOs, HUFs and other categories of investors will not be eligible for this exemption.

Thus, submission of PAN is mandatory for all other investors existing as well as prospective investors (except the ones mentioned above) (including all joint applicants/holders, guardians in case of minors, POA holders and NRIs but except for the categories mentioned above) for investing with mutual funds from this date. Investors are required to register their PAN with the Mutual Fund by providing the PAN card copy (along with the original for verification which will be returned across the counter). All investments without PAN (for all holders, including Guardians and POA holders) are liable to be rejected.

Application Forms without quoting of PERN shall be considered incomplete and are liable to be rejected without any reference to the investors. The procedure implemented by the AMC and the decisions taken by the AMC in this regard shall be deemed final.

However, new investors will also have to fill up the new KYC form along with the IPV requirements.

Mutual Funds shall accept any of the standard specified identification instruments like Voter ID card, Government/Défense ID card, Card of Reputed employer, Driving License, Passport, etc. in lieu of PAN with effect from August 1, 2009.

In view of the above, Investors are requested to enclose copies of any of the said document(s) which shall be self-attested and also attested by the ARN Holder.

Investors with PAN are not eligible for simplified KYC Procedure.

In accordance with AMFI circular dated June 30, 2009, on exemption of PAN for Systematic Investment Plans (SIP) upto Rs. 50,000 per year per investor, with effect from August 1, 2009;

- Investors (including joint holders) must submit a photocopy of any one of the documents identified mentioned above along with Micro SIP applications.
- Supporting document must be current and valid.
- Supporting document copy shall be self-attested by the investor.
- While making subsequent Micro SIP applications with a mutual fund, investor can quote the existing folio number where a Micro SIP has been registered and therefore need not resubmit the supporting document.

Foreign Account Tax Compliance Act ("FATCA")

The Foreign Account Tax Compliance Act is a United States ("US") law aimed at prevention of tax evasion by US citizen and residents ("US Persons") as defined under the U.S. Securities Act of 1933 and corporations or other entities organized under the laws of US, through use of the offshore accounts. The FATCA provisions were included in the Hiring Incentive to Restore Employment (HIRE) Act of 2010, enacted by the US legislature. FATCA is designed to increase compliance by US taxpayers and is intended to bolster efforts to prevent tax evasion by the US taxpayers with offshore investments.

The Government of India and the United States of America (US) have reached an agreement in substance on the terms of an Inter- Governmental Agreement ("IGA") to implement FATCA and India is now treated as having an IGA in effect from April 11, 2014. FATCA provides for Foreign Financial Institutions to register with the US Internal Revenue Service ("IRS"), to obtain Global Intermediary Identification Number (GIIN). The AMC and/or the Fund/Trustee Co. are likely to be classified as a 'Foreign Financial Institution' (Investment Entity) under the FATCA provisions.

FATCA is globally applicable from July 1, 2014 and in order to comply with FATCA obligations, the Fund may seek additional information from investors while accepting applications, in order to ascertain their U.S. Person status. Further, with effect from September 15, 2014, the Fund will not accept applications which are not accompanied with information/documentation under FATCA. Investors are therefore requested to ensure that the details required in the Form "Details Under Foreign Account Tax Compliance Act (FATCA)" of the new Application Form are complete and accurate to avoid rejection of the application (updated forms are available on Fund's website -www.miraeassetmf.co.in).

Under the FATCA regime, in respect of the existing investments from U.S. citizen as on June 30, 2014, the AMC/the Fund will be required to undertake due diligence process and identify US reportable accounts and collect such information/documentary evidences of the investors/Unit holders and disclose such information as far as may be legally permitted about the holdings/investment returns to US IRS and/or the Indian Tax Authorities as and when necessary.

FATCA due diligence will have to be directed at each investor/Unit holder (including joint investor) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person.

An investor/Unit holder will therefore be required to furnish such information for the AMC/Fund to comply with the reporting requirements stated in IGA and circulars issued by SEBI/AMFI in this regard.

Investors/Unitholders should consult their own tax advisors regarding FATCA requirements with respect to their own situation.

Investors can get more details on FATCA requirements at <http://www.irs.gov/Businesses/CorporationS/Foreign-Account-Tax-Compliance-Act-FATCA>.

Systematic Transfer Plan (STP)

This facility enables Unit Holders to transfer fixed sums from their Unit accounts in the Scheme to the existing schemes or other schemes launched by the Fund from time to time. The transfer will commence from the date mentioned by the Unit Holder in the Application Form for the facility. A minimum period of 5 days shall be required for registration under STP. The Units will be allotted / redeemed at the Applicable NAV of the respective dates of the Scheme on which such transfers are sought from the

Scheme. In case the day on which the transfer is sought is a non-Business Day for the Scheme, then the application for the facility will be deemed to have been received on the immediately following Business Day. The facility of STP will not be available from any existing equity / equity oriented schemes to a non-equity scheme of the Fund. STP is not available for investments under lock-in period and for investments which are pledged.

Methodology:

The Unitholder has to ensure to maintain minimum balance in accordance with Plans selected in the Transferor Scheme on the transfer date / execution date under Systematic Transfer Plan.

In case of insufficient balance on the date of transfer in the folio, STP for that particular due date will be processed based on the clear balance available in the scheme. In such cases where STPs are processed due to insufficient balance, the criteria for minimum application amount in the transferee scheme shall not apply except in case of Mirae Asset ELSS Tax Saver Fund. However such residual transfer due to insufficient balance shall be done only once during the tenure of STP. For future STPs, in case the unitholder has sufficient balance, the amount as mentioned in the STP form shall be processed.

However, future STPs will continue to be active. This will help the investor to continue his STP facility seamlessly. Moreover, if the investor continues to have insufficient balance / unclear units for 3 consecutive months, the STP will be discontinued.

- Fixed Amount per installment OR the amount as determined by the following formula:-
- [(Fixed amount to be transferred per installment X number of installments including the current installment) - market value of the investments through Flex STP in the Target Scheme on the date of transfer] whichever is higher, on the date of transfer.
- The first Flex STP installment will be processed basis the fixed installment amount specified by the unit holder at the time of enrollment. From the second Flex STP installment onwards, the transfer amount shall be computed as per formula stated above.
- In case of Flex STP - Daily, Weekly and Fortnightly Interval, the commencement date shall be within 7 business days from the date of receipt of a valid request.
- For Daily, Weekly, Monthly, Fortnightly or Quarterly Flex STP falling on a Friday or on any business day where the next day is a non-business day, the NAV applicable shall be the Transaction date i.e. before 3.00 p.m. for both source and the target scheme.
- In order to discontinue the facility, a written request must be submitted at least 7 business days prior to the next applicable transfer date for the selected frequency.
- This facility introduced under the scheme will have the same investment objective, portfolio, liquidity and expense ratio as that of the prevailing plans of the respective schemes.

Example of Calculation of Installment of Flex STP:

Source Scheme: Mirae Asset Low Duration Fund

Target Scheme: Mirae Asset Large & Midcap Fund

Suppose an investor chose a monthly Flex STP option from Mirae Asset Low Duration Fund to Mirae Asset Large & Midcap Fund of amount Rs.5000/- and he has already transferred three installments upto date August 1, 2015.

Total units allotted upto the date of last installment i.e. August 1, 2015 is assumed as 1400. The NAV of Mirae Asset Large & Midcap Fund - Growth Option on September 2015 is assumed as Rs.9.50 - per unit.

So the market value of investment on the date of transfer is 13,300 (1400 x 9.5).The next installment as per the Flex STP will be calculated as per the following formulae: Higher of the following, Fixed Amount to be transferred per installment (Rs.5,000/-) OR [(Fixed Amount to be transferred per installment * Number of Installment including current installment) - Market Value of Target Scheme] = (Rs.5000*4) - 13,300 = Rs.6,700/-. So Rs.6,700/- will be transferred under the Flex STP.

For details on Frequency and minimum applicable amount for SIP, STP and Flex STP refer the table below:

Facility	Frequency	Day/Date	Criteria*
	Daily	Monday to Friday	

STP and Flex STP	Weekly	Every Wednesday	Minimum 5 Transfers of Rs.1000 each and in multiples of Re. 1/- thereafter.
	Fortnightly	Every Wednesday of the alternate week.	
STP and Flex STP	Monthly Quarterly	01 st , 10 th , 15 th , 21 st and 28 th .	Minimum balance amount at the time of enrolment of STP and Flex STP: NIL
SIP	Monthly Quarterly	01st to 28th except the last three calendar dates 29th, 30th and 31st.	Minimum: Rs.99 & in multiples of Re. 1 thereafter. <i>(except Mirae Asset ELSS Tax Saver Fund). For Mirae Asset ELSS Tax Saver Fund, the minimum SIP instalment is Rs. 500 and in multiples of Rs. 500 thereafter.</i>
<p>*Notes: Each STP/ Flex STP Installment 'OUT' to / of Mirae Asset ELSS Tax Saver Fund will be subject to a lock- in period of three years from the date of allotment of Units proposed to be redeemed. Hence, Mirae Asset ELSS Tax Saver Fund shall act as Source Scheme for STP/ Flex STP post completion of the said lock-in period.</p>

Interscheme Switching

The Transaction Slip can be used by investors to make inter-scheme switches (during the NFO Period and the ongoing offer period) within the Fund. All valid applications for switch-out shall be treated as Redemption and for switch-in as Purchases with the respective Applicable NAVs of the Scheme / option.

Intrascheme Switching

Investors can switch between different options under the same Plan of the Scheme, at the Applicable NAV. All valid applications for switch-out shall be treated as Redemption and for switch-in as Purchases with the respective Applicable NAVs of the option. As per current Load structure, no Entry or Exit Loads will be charged for intra-scheme switching. However, AMC may change the Loads prospectively as indicated in section on LOAD STRUCTURE FOR THE SCHEME in this Scheme information document.

Switch facility from one scheme to another scheme

In the interest of investors, it is hereby clarified that where the switch request has been made from one scheme to another specifying the number of Units or Amount (during NFO as well as ongoing), the request will be processed for the corresponding value of such units or amount and that the allotment in the resultant scheme may be done in fractional units, subject to fulfillment of the minimum purchase amount of the scheme where it is being switched.

Folio Number

Unless otherwise requested by the Unit Holder, a single folio number may be assigned if an investor invests in different schemes of the Fund, and a consolidated account statement will then be provided for investments in all the schemes.

Fractional Units

Since a request for Purchase or Redemption is generally made in rupee amounts and not in terms of a fixed number of Units of the Scheme, an investor may be left with fractional Units. Fractional Units will be computed and accounted for up to three decimal places for the Scheme.

Consolidation of folios

In case an investor holds investments in multiple folios under the Fund, the AMC reserves the right to consolidate all the folios belonging to the same investor into one folio.

Transaction through electronic mode

The AMC may from time to time offer various facilities to the unit holders through electronic mode such as internet, mobile phones, Kiosk, etc. to facilitate transactions in units of the scheme. The AMC may enter into such arrangements / agreements as it may deem fit to give effect to the above.

However, investors intending to take benefit of these facilities should note that they should use these services at their own risk. The Fund, the AMC, the Trustee, along with its directors, employees and representatives shall not be liable for any damages or injuries arising out of or in connection with the use of internet, mobile phones, Kiosk, etc. or its non-use including, without limitation, non-availability or failure of performance, loss or corruption of data, loss of or damage to property (including profit and goodwill), work stoppage, computer failure or malfunctioning, or interruption of business; error, omission, interruption, deletion, defect, delay in operation or transmission, computer virus, communication line failure, unauthorized access or use of information.

VIII. INVESTMENT VALUATION NORMS FOR SECURITIES AND OTHER ASSETS

1. EQUITY AND EQUITY RELATED SECURITIES:

1.1 Listed and Traded Equity:

Traded Securities are to be valued at the last quoted closing price on the primary Stock Exchange. Where security is not traded on the primary stock exchange, the last quoted closing price of another Stock Exchange may be used. If a security is not traded on any stock exchange on a particular valuation day, the value at which it was traded on the primary stock exchange or any other stock exchange, as the case may be, on the earliest previous day may be used, provided such date is not more than thirty days prior to the valuation date.

For valuation purposes The National Stock Exchange (NSE) has been selected as appropriate stock exchange for equity and equity related securities held by all the schemes.

Wherever equity and equity related securities are not listed on The National Stock Exchange (NSE) or are not traded on a certain day at The National Stock Exchange (NSE), the closing price at the Bombay Stock Exchange (BSE) should be considered, followed by any other regional exchange

In case selected stock exchange for valuation of any or all securities is to be changed, reasons for change have to be recorded in writing by the valuation committee and approved by the Board of AMC.

In case of securities which have been allotted under preferential / private allotment and are not listed or traded on the selected stock exchanges, the scrip is valued at last quoted price on the Stock Exchange where it is traded (provided the last quoted price is not more than thirty days prior to the valuation date.)

Similar methodology is to be used for valuation of preference shares, Equity Warrants and Partly Paid Up shares. For Index Funds / Exchange Traded Funds, exchange of underlying benchmark Index would be the primary stock exchange. In case trading in an equity security is suspended for trading on the stock exchange, the last traded price would be considered for valuation of that security up to 30 days.

If an equity security remains suspended for trading on the stock exchange for more than 30 days, then it would be considered as unlisted and valued accordingly. If the equity securities are not traded on any stock exchange for a period of thirty days prior to the valuation date, the scrip must be treated as 'non-traded' scrip and should be valued as non-traded security as per the norms.

1.2 Thinly traded Equity/Equity Related Securities:

Thinly traded equity/ equity related security is defined in SEBI (Mutual Fund) Regulations as follows:

When trading in an equity/equity related security (such as convertible debentures, equity warrants, etc.) in a month is both less than Rs.5 lacs and the total volume is less than 50,000 shares, it shall be considered as thinly traded security and valued accordingly.

In line with the guidelines issued by SEBI, non-traded / thinly traded securities should be valued as follows:

1. Net worth per share is computed as follows:

Net worth of the company = Paid up share capital + Reserves other than Revaluation reserve - Miscellaneous expenditure, debit balance in Profit and Loss account and certain contingent liabilities.

Net worth per share = (Net worth of the company / Number of paid up shares).

2. Computation of capitalised value of earning per share (EPS):

i. Determination of the Industry Price Earnings Ratio (P/E) to which the company belongs. The Industry P/E Ratio used is provided by NSE/BSE. However, if the P/E ratio data is not available from BSE/NSE, Data from external sources can be used.

ii. Compute EPS from the latest audited annual accounts. In case the EPS is negative, EPS value shall be considered as zero

iii. Compute capitalized value of EPS at 75% discount $(P/E * 0.25) * EPS$

3. Computation of fair value per share to be considered for valuation at 10 % discount for illiquidity. $[(Net\ worth\ per\ share + Capitalized\ value\ of\ EPS) / 2] * 0.90$

The fair value arrived at as per the method prescribed above is compared with the last traded price on the stock exchange and the lower of the two is considered for valuation.

4. In case the latest balance sheet i.e. balance sheet prepared within nine months from the close of the accounting year of the company, is not available (unless the accounting year is changed) the shares should be valued as zero.

5. In case an individual non-traded / thinly traded security as valued aforesaid, accounts for more than 5% of the total asset of the scheme, AMC should appoint an independent valuer. The security shall be valued on the basis of the valuation report of the valuer.

6. To determine if a security accounts for more than 5% of the total assets of the scheme, it should be valued by the procedure above and the proportion which it bears to the total net assets of the scheme to which it belongs would be compared on the date of valuation.

1.3 VALUATION OF UNLISTED EQUITY:

Unlisted equity shares of a company shall be valued "in good faith" as below:

In addition, in case trading in an equity security is suspended up to 30 days, then the last traded price would be considered for valuation of that security. If an equity security is suspended for more than 30 days, then the valuation will be done in the same following manner as for the Unlisted Equity Shares:

1. Based on the latest available audited balance sheet, Net Worth shall be calculated as the lower of item (a) and (b) below:
 - a. Net Worth per share = [Share Capital + Free Reserves (excluding revaluation reserves) - Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses]/ Number of Paid up Shares.
 - b. After taking into account the outstanding warrants and options, Net Worth per share shall again be calculated and shall be = [Share Capital + consideration on exercise of Option and/or Warrants received/receivable by the Company + Free Reserves (excluding Revaluation Reserves) - Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses]/ Number of Paid up Shares plus Number of Shares that would be obtained on conversion and/or exercise of Outstanding Warrants and Options.
2. Average capitalization rate (P/E ratio) for the industry based upon either NSE/BSE data or others in case of unavailability (which shall be followed consistently and changes, if any, noted with proper justification thereof) shall be taken and discounted by 75 per cent. I.e. only 25 per cent of the industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share (EPS) of the latest audited annual accounts will be considered for this purpose.
3. Computation of fair value per share to be considered for valuation at 15 % discount for illiquidity. [(Net worth per share + Capitalized value of EPS) / 2] * 0.85
4. If the latest Balance Sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero. If the Net Worth of the company is negative, the share would be marked down to zero. In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.
5. At the discretion of the AMC and with the approval of the trustees, unlisted equity scrips may be valued at a price lower than the value derived using the aforesaid methodology.
6. Unlisted equity security is valued at the least of the following values:
 - A) Value computed as per the SEBI guidelines
 - B) Cost of acquisition

In case an individual security accounts for more than 5 per cent of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5 per cent of the total assets of the scheme, it shall be valued in accordance with the procedure as mentioned above on the date of valuation.

This process is documented and reason if any for not considering least of these values or considering the valuation lower than the least, is also recorded in the valuation paper.

Mutual Funds shall not make Investment in unlisted equity shares at a price higher than the price obtained by using the aforesaid methodology. However, this restriction is not applicable for investment made in the Initial

Public Offers (IPOs) of the companies or firm allotment in public issues where all the regulatory requirements and formalities pertaining to public issues have been complied with by the companies.

1.4 FOREIGN EQUITY

Valuation of Investment made in Foreign Securities / Equity/ADR/GDR:

On the Valuation Day, the securities issued outside India and listed on the stock exchanges outside India shall be valued at the closing price on the stock exchange at which it is listed or at the last available traded price. However, in case a security is listed on more than one stock exchange, the AMC reserves the right to determine the stock exchange, the price of which would be used for the purpose of valuation of that security. The stock exchange once selected would be used consistently till changed by recording the reasons in writing by Board of AMC.

Due to difference in time zones of different markets, in case the closing prices of securities are not available within a given time frame to enable the AMC to upload the NAVs for a Valuation Day, the AMC may use the last available traded price for the purpose of valuation. The use of the closing price / last available traded price for the purpose of valuation will also be based on the practice followed in a particular market. In case a security is not traded on valuation day, the last traded price/last available price would be used for valuation till T – 30 days. In case security is not traded for more than 30 days, the same would be valued on a fair value basis by the Valuation Committee of the AMC.

On the Valuation Day, all assets and liabilities denominated in foreign currency will be valued in Indian Rupees at the exchange rate available at 5.00 p.m. The source for the price will be taken in the following order of preference: (a) RBI, (b) Bloomberg/Reuters, or (c) any other standard reference rate. In case any exchange rate is not available on the valuation day, the last available rate would be used for valuation.

The Trustees reserve the right to change the source for determining the exchange rate. The exchange gain / loss resulting from the aforesaid conversion shall be recognized as unrealized exchange gain / loss in the books of the Scheme on the day of valuation. Further, the exchange gain / loss resulting from the settlement of assets / liabilities denominated in foreign currency shall be recognized as realized exchange gain / loss in the books of the scheme on the settlement of such assets / liabilities.

Process to be followed at Mirae Asset Mutual Fund for valuation of Investment made in Foreign Equity:

1. For valuation purposes, exchanges mentioned in Annexure 1 for different countries, has been selected as appropriate stock exchange for equity and equity related securities held by all the schemes.
2. Due to difference in time zones of different markets, the closing prices of securities available till 5.00 p.m. will be taken for valuation. In case the closing prices of securities are not available within a given time frame as mentioned above, the last available traded price shall be used for the purpose of valuation. The source for the price will be taken in the following order of preference: (a) RBI, (b) Bloomberg/Reuters, or (c) any other standard reference rate. In case where any price of a security is not available on the valuation day, the last closing price would be used for valuation.

In addition to the above the accounting / valuation for currency rates is given below:

1. When certain portion of the fund is allocated for investment overseas, this will be accounted as purchase of foreign currency. The FX rates will be treated as cost of purchase. This will create FX position in portfolio.
2. When purchase / sales of securities are made, Purchase / sale will be recorded like normal purchase/sale transaction in the portfolio currency (in this case INR). The purchase / sale price plus/minus brokerage & other charges in the foreign currency will be converted to INR at the agreed FX rate

On the date of the settlement the difference between FX reference rates on trade date and actual FX rate used for settlement will be treated as gain / loss due to FX fluctuation.

On a Daily basis when the closing prices and the currency rates are received Closing prices and FX rate will be applied to the portfolio and unrealized capital gain and FX gain is calculated separately. The closing time for the currency will be taken as 5.00 p.m. The source for the price will be taken in the following order of preference: (a) RBI, (b) Bloomberg/Reuters, or (c) any other standard reference rate.

Converting the price in Indian Rupees (INR)

Since these prices are in foreign currency these are to be converted in Indian Rupees by applying the closing exchange rate on the date of valuation. This closing price in INR should be used for valuation of ADR/GDR. Alternatively, closing price of the security should be converted to INR at last day's closing exchange rate of that currency (i.e. the closing rate of the date of which prices are considered). The source for the price will be taken in the following order of preference: (a) RBI, (b) Bloomberg/Reuters, or (c) any other standard reference rate.

1.5 STOCK AND INDEX DERIVATIVES:

Equity / Index Options

Market values of traded open option contracts shall be determined with respect to the exchange on which contracted originally, i.e., an option contracted on the National Stock Exchange (NSE) would be valued at the settlement prices provided by the NSE. The price of the same option series on the Bombay Stock Exchange (BSE) cannot be considered for the purpose of valuation, unless the option itself has been contracted on the BSE. If the settlement price is not available, then closing price for the security will be considered for the valuation.

Equity / Index Futures

Market values of traded futures contracts shall be determined with respect to the exchange on which contracted originally, i.e., futures position contracted on the National Stock Exchange (NSE) would be valued at the settlement price provided on the NSE. The price of the same futures contract on the Bombay Stock Exchange (BSE) cannot be considered for the purpose of valuation, unless the futures contract itself has been contracted on the BSE. If the settlement price is not available, then closing price for the security will be considered for the valuation.

1.6 VALUATION OF OTHER INSTRUMENTS:

1.6.1 VALUATION OF RIGHTS ENTITLEMENTS:

When Company announces rights to the existing equity shareholders, under its Listing Agreement with Stock Exchange; it has to declare ex-right date for the purpose of trading on the Stock Exchange. Ex-right date is a date from which the underlying shares, which are traded on the Stock Exchange, will not be entitled to the rights. These rights entitlements can also be renounced in favour of a willing buyer. These renunciations are in some cases traded on the Stock Exchange. In such case these should be valued as traded equity related securities.

1.6.2 VALUATION OF NON-TRADED / UNLISTED / THINLY TRADED RIGHTS ENTITLEMENTS:

(As per Schedule VIII of SEBI (Mutual Fund) Regulations)

In case right Entitlements are not traded for more than 30 days or unlisted or thinly traded, the same shall be valued as below

When Company announces rights to the existing equity shareholders, under its Listing Agreement with Stock Exchange; it has to declare ex-right date for the purpose of trading on the Stock Exchange. Ex-right date is a date from which the underlying shares, which are traded on the Stock Exchange, will not be entitled to the rights. These rights entitlements can also be renounced in favor of a willing buyer. These renunciations are in some cases traded on the Stock Exchange. In such case these should be valued as traded equity related securities as detailed at Section I above.

Till the rights are subscribed, the entitlements as per Regulations have to be valued as under:

Valuations of non-traded/thinly traded/Unlisted rights entitlement, SEBI Regulations have explained this with the help of following formula:

$V_r = n/m * (P_{ex} - P_{of})$ Where V_r = Value of Rights

n = Number of rights offered

m = Number of original shares held P_{ex} = Ex-right price

P_{of} = Rights offer price

Non-Traded / Thinly traded / Unlisted rights entitlements are valued as under:

- In case original shares on which the right entitlement accrues are not traded on the Stock Exchange, right entitlement should be valued at zero.
- When rights are not treated pari passu with the existing shares such as, restrictions with regard to dividend etc., suitable adjustment should be made by way of a discount to the value of rights at the last dividend announced rate.
- Where right entitlements are not subscribed to but are to be renounced, and where renouncements are being traded, the right entitlements have to be valued at traded renunciation value.
- Where right entitlements are not traded and it is decided not to subscribe the rights, the right entitlements have to be valued at zero.
- In case the Rights Offer Price is greater than the ex-rights price, the value of the rights share is to be taken as zero.

1.6.3 VALUATION OF NON -TRADED WARRANTS:

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the equity share which would be obtained on the exercise of the warrant, as reduced by the amount which would be payable on exercise of the warrant. An appropriate discount for non-tradeability of the equity shares shall be duly considered. If the amount payable on exercise of the warrants is higher than the value of the share, the value of the warrants should be taken as zero.

Value of Warrant = [Value of underlying shares - exercise price].

1.6.4 VALUATION OF SHARES ON DE-MERGER:

On de-merger following possibilities arise which influence valuation and these are:

- i. Shares of both the companies (De-merged Company and Resulting Company are traded immediately on de-merger: In this case both the companies' shares would be valued at respective traded prices.
- ii. In case there is only one Resulting Company along with the De-merged Company and such Resulting Company is unlisted / non-traded:

In case where one entity is demerged into two or more entities and one of those entities continues to be listed, the value of unlisted entity will be calculated as the difference between the closing price of the security that continues to be listed on the previous trading day (before demerger) and Adjusted Price derived in exchange special trading session on ex-date (after demerger). The difference in price of two dates will be the valuation price of the unlisted entity/entities proportionately, till they are listed and traded on a stock exchange. The benefit of this method of valuation is that it is not a subject matter and is determined based on the market price.

The valuation of the unlisted company would be reviewed by the valuation committee every 30 days if the security is not listed.

- iii. In case there are more than one Resulting Companies along with the De-merged Company and all or some Resulting Companies are unlisted / non-traded:

The shares of Resulting Companies will be valued by residual price methodology as explained in point (ii) above. The residual value will be allocated into Resulting Companies in the ratio provided as a part of scheme of arrangement or such other ratio as decided by the Valuation Committee. If one of the Resulting Companies is listed / traded, the residual value of unlisted / non-traded Resulting Companies

would be further determined by reducing the traded value of listed Resulting Companies from the residual value computed as above.

- iv. In case shares of both the companies (De-merged Company and Resulting Companies) are not traded on de-merger:

The traded value of the De-merged Company on the day before the de-merger will be allocated between De-merged Company and Resulting Companies in the ratio provided as a part of scheme of arrangement or such other ratio as decided by the Valuation Committee. If the equity securities are not traded on any stock exchange for a period of thirty days, the scrip must be treated as 'non-traded' scrip and should be valued as non-traded security as per the norms.

- v. Cost allocation would be done proportionate to the derived value of the resultant scrips or other appropriate basis to be decided on case to case basis depending on the terms of demerger.
- vi. The valuation committee may in specific cases decide to use a different method for valuation by assigning reasons therefor.

Any extension in the maturity of a money market or debt security shall result in the security being treated as "Default", for the purpose of valuation. If the maturity date of a money market or debt security is shortened and then subsequently extended, the security shall be treated as "Default" for the purpose of valuation. In this respect, Mutual Funds shall promptly inform to the valuation agencies and the CRAs, any instance of non-receipt of payment of interest and / or principal amount (part or full) in any security.

The treatment of accrued interest and future accrual of interest, in case of money market and debt securities classified as below investment grade or default, is detailed below:

- a. All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies as appointed by AMFI.

these agencies The indicative haircut that has been applied to the principal should be applied to any accrued interest. These indicative haircuts shall be applied on the date of credit event i.e. migration of the security to sub-investment grade and shall continue till the valuation agencies compute the valuation price of such securities.

- c. In case of trades during the interim period between date of credit event and receipt of valuation price from valuation agencies, AMC shall consider such traded price for valuation if it is lower than the price post standard haircut. The said traded price shall be considered for valuation till the valuation price is determined by the valuation agencies.
- d. In case of trades after the valuation price is computed by the valuation agencies as referred above and where the traded price is lower than such computed price, such traded price shall be considered for the purpose of valuation and the valuation price may be revised accordingly.
- e. The trades referred above shall be of a minimum size as determined by valuation agencies.
- f. In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

The following shall be the treatment of how any future recovery should be accounted for in terms of principal or interest:

- a) Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.
- b) Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

AMC may deviate from the indicative haircuts and/or the valuation price for money market and debt securities rated below investment grade provided by the valuation agencies subject to the following:

- i. The detailed rationale for deviation from the price post haircuts or the price provided by the valuation agencies shall be recorded by the AMC.
- ii. The rationale for deviation along-with details such as information about the security (ISIN, issuer name, rating etc.), price at which the security was valued vis-a-vis the price post haircuts or the average of the price provided by the valuation agencies (as applicable) and the impact of such deviation on scheme NAV (in amount and percentage terms) shall be reported to the Board of AMC and Trustees

2.4 VALUATION OF INTEREST RATE SWAP (IRS):

Irrespective of the residual maturity, valued at average of security level prices obtained from valuation agencies appointed by AMFI.

In case it is not available with the valuation agencies, following methodology shall be adopted:

Interest Rate swaps will be valued separately than the underlying asset or a portfolio of assets. If the tenure of the IRS is less than 6 months then value of IRS contract would be present value of the difference between the fixed and floating interest to be received/paid on maturity of the contract.

If the tenure is more than 6 months, value of IRS contract would be present value of the difference between the fixed and floating interest to be received/paid on maturity of the contract. Floating rate interest till maturity is the interest accrued till the valuation date plus the interest on remaining period at reversal rate.

Reversal rate for the day would be obtained from Bloomberg/Reuters for different maturities. The relevant rate is taken on the basis of maturity of the contract. However, if the maturity date falls between the two years, the reversal rate is arrived by interpolation on valuation date. Detailed methodology would be worked out by CRISIL for valuation of Interest Rate Swap and the same would become part of the Bond Valuer software.

Interpolation time period for valuation of securities shall be 15 days on either side of the bucket.
Methodology of IRS valuation is tabulated below: In case of Receive Fixed and Pay Floating:

FIXED Receivable (A)	Notional Contract value * Fixed interest rate * period of contract	XXXXXX
REVERSAL RATE	Interest rate as per Bloomberg/Reuters	XXX
FLOATING Payable (B)	Accumulated interest till date + (Reversal rate* Compounded face value * No. of days remaining/365)	XXXXXX
NO. OF DAYS REMAINING		XXXX
UNRAELISED GAIN/(LOSS) (C)	(A) – (B)	XXXXXX
BALANCE DAYS For NEXT RESET DATE/MATURITY DATE		XXXX
PV ON UNRELIASED G/(L)	(C)/(1+REVERSAL RATE/365*Balance days to maturity/interest reset date	XXXX

If prices from the valuation agencies are received within the pre-agreed TAT, an average of the prices so received shall be used for IST pricing. If price from only one valuation agency is received within the agreed TAT, that price may be used for IST pricing. If prices are not received from any of the valuation agencies within the agreed TAT, The AMC may determine the price for the IST in the following manner:

- 8.1 In case of transfer of securities between Schemes, to ensure fair treatment of investors in both schemes, such transfers would be done at the Weighted average price or yield at which it is traded up to the time of transfer of such security; subject to the market trade criteria of minimum 3 trades aggregating to Rs.100 Crores.
- 8.2 If no such Trades, then at previous day's valuation Price.

9. GUIDELINES FOR VALUATION OF INTER SCHEME TRADES OF EQUITY SECURITIES:

Inter-scheme transfer of equity securities would be affected at the prevailing spot market price of the security at the time the transfer is affected. For this purpose, at the time of affecting the inter-scheme transfer, a record of the prices for the security quoted in the relative stock exchange (i.e. NSE/BSE) or through the Bloomberg Terminal would be obtained, which would indicate the date, time and the currently quoted price. If security level valuation (SLV) price of CCD is provided by the valuation agencies, appointed by AMFI, then the same will be used for valuation.

If not, then following method shall be used:

- i) Ascertain
 - The number of shares to be received after conversion.
 - Whether the shares would be pari passu for dividend on conversion.
 - The rate of last declared dividend.
 - Whether the shares are presently traded or non-traded/thinly traded.
 - Market rate of shares on the date of valuation
- ii) In case the shares to be received are, on the date of valuation, are thinly traded / non-traded, these shares to be received on conversion are to be valued as thinly traded / non-traded shares.
- iii) In case the shares to be received on conversion are not non-traded or thinly traded on the date of valuation and would be traded pari passu for dividend on conversion:
 - Number of shares to be received on conversion, per convertible debenture, multiplied by the present market rate of the share.
 - Determine the discount for non-tradability of the shares on the date of valuation.
(This discount should be determined in advance and to be used uniformly for all the convertible securities. Rate of discount should be documented and approved by the Board of AMC)
Value = (a)*market rate [1-(b)]
- iv) In case the shares to be received on conversion are not non-traded or thinly traded on the date of valuation but would not be traded pari passu for dividend on conversion:

 - b) Arrive at the market value of the shares on the date of valuation by reducing the amount of last paid dividend.
 - c) Determine the discount for non-tradability of the shares on the date of valuation.
(This discount should be determined in advance and to be used uniformly for all the convertible securities. Rate of discount should be documented and approved by the Board of AMC)

Value = (a)*{b- [1- (c)]}
- v) In case of optionally convertible debentures, two values must be determined assuming both, exercising the option and not exercising the option.
 - If the option rests with the issuer, the lower of the two values shall be taken as the valuation of the optionally convertible portion, and;
 - If the option rests with the investor, the higher of the two values shall be taken.
Any security held by a fund has to be valued according to the prevalent valuation guidelines and norms for that category of security irrespective of mode of acquisition of such security. In view of this, debentures received on account corporate action should also be valued as per the valuation methodology prescribed by SEBI.

10. REPO INSTRUMENTS:

Eighth Schedule to SEBI (Mutual Fund) Regulation has spelt out briefly the methodology for valuation of Repo Instruments. Mirae Asset Mutual Fund Value Reverse Repo (Purchase and sale back) in line with this regulation as follows:

10.1 REVERSE REPURCHASE TRANSACTION (REVERSE REPO):

A Reverse Repurchase Transaction is an agreement under which on payment of a purchase price, the fund receives (purchases) securities from a seller who agrees to repurchase them at a specified time at a specified

price. A repurchase agreement is similar in effect to a loan by the fund to the seller collateralized by the securities. The Mutual Fund does not record the purchase of securities received but records the repo transactions as if it were a loan. Repo instruments have to be valued at the resale price after deduction of applicable interest rate up to the date of resale. To put it differently, it is at the net consideration paid i.e., loan given plus interest accrued every day. The difference between repurchase and sale prices is accounted as interest income.

10.2 REPURCHASE TRANSACTION (REPO):

A Repurchase Transaction is an agreement, which provides for the Mutual Fund to transfer (sale) security to a buyer for cash. The Fund does not record sale of security and it agrees to later repay cash plus interest in exchange for return (repurchase) of the same securities. The transaction is thus similar in effect to a borrowing by the Mutual Fund collateralized by the security.

Presently repo can be carried out by specified Mutual Funds only with Reserve Bank of India and not with any other party. While valuing such instruments adjustment must be made for the difference between repurchase price and the value of instrument. Repurchase price has to be arrived at after deducting applicable interest rate up to the date of repurchase. However, it should be noted that if repurchase price exceeds the value, depreciation must be provided for and if repurchase price is lower than the value, credit must be taken for appreciation. In effect for the purpose of valuation the difference between liability towards repayment of borrowing (as increased by interest payable daily and the market price of such security in the portfolio of the Fund is considered as appreciation or depreciation accounted separately). The difference between sale and repurchase prices is accounted as interest expense.

To elaborate further, appreciation/depreciation in the instruments sold on `repo' basis is as follows:

If the repurchase price, after deduction of applicable interest up to the date of repurchase from the valuation date, exceeds the market value as on the valuation date depreciation must be considered for valuation.

If the repurchase price, after deduction of applicable interest up to the date of repurchase from the valuation date is lower than the market value as on the valuation date appreciation must be consider for valuation.

11. FLOATING RATES SECURITIZED DEBT (FRN PTCs):

11.1 Valuation of such instruments is not covered by Crisil Bond Valuer. Such papers have Cap and Floor rates with various compounding options and periodic repayment structure. Generally, issuer also gives cash flow attached to the paper at Cap rate.

11.2 Valuation of such papers shall be done by taking cash flow at cap rate as base and shall be valued like a normal PTC. In case any other type of FRN PTC structure, valuation methodology shall be provided by AMC on case to case basis.

12. VALUATION OF SECURITIES NOT COVERED UNDER THE CURRENT VALUATION POLICY:

In case of securities purchased by mutual funds do not fall within the current framework of the valuation of securities then such mutual fund shall report immediately to AMFI regarding the same. Further, at the time of investment AMCs shall ensure that the total exposure in such securities does not exceed 5% of the total AUM of the scheme. AMFI has been advised that the valuation agencies should ensure that the valuation of such securities gets covered in the valuation framework within six weeks from the date of receipt of such intimation

from mutual fund. In the interim period, till AMFI makes provisions to cover such securities in the valuation of securities framework, the mutual funds shall value such securities using their proprietary model which has been approved by their independent trustees and the statutory auditors.

13. VALUATION OF EQUITY- LINKED DEBENTURES / NOTES (ELNS)

To continue the current practice of valuing these instruments on the basis of bid offer price provided by issuer and internal documentation of the methodology for the same signed off by respective investment committees/Trustees.

14. MULTIPLE PUT/CALL PAPERS WITH VARIABLE PREMIUMS

The securities having Put and Call Options on the same day but at different prices would not be treated as maturity date of the instrument and would be valued at Put and Call dates. Lower of the best of Put and worst of Call would be taken as the price for valuation Securities with Call Option within 30 days and maturity beyond 30 days would be valued at two of the lower prices viz. Amortization price (based on Call date) and Valuation price (as on maturity date).

Changes in terms of investments:

While making any change to terms of an investment, Mutual Funds shall adhere to the following conditions: Any changes to the terms of investment, which may have an impact on valuation, shall be reported to the valuation agencies immediately.

Any extension in the maturity of a money market or debt security shall result in the security being treated as "Default" for the purpose of valuation.

If the maturity date of a money market or debt security is shortened and then subsequently extended, the security shall be treated as "Default" for the purpose of valuation.

15.2 When on a particular valuation day, units of InvIT/ReIT has not been traded on the principal stock exchange; the value at which it is traded on the secondary stock exchange may be considered for valuation

15.3 When units of InvITs/ReITs is not traded on any stock exchange on a particular valuation day, the value at which it was traded on the principal stock exchange or any other stock exchange, as the case may be, on the earliest previous day may be used provided such date is not more than 30 days prior to valuation date.

15.4 Where units of InvIT and ReIT are not traded on any stock exchange for a continuous period of 30 days than the valuation for such units of InvIT and ReIT will be determined based on the price provided by an independent valuation agency(ies) or at latest NAV declared by Investment managers of the trust, as the case may be. The selection of the independent valuation agency(ies) will be approved by the Valuation Committee.

15.5 Where the valuation of units of InvIT and ReIT is not available from any independent valuation agency(ies), the valuation will be determined by the Fund Manager on the principles of fair valuation.

16. VALUATION OF INVESTMENT IN CORPORATE DEBT MARKET DEVELOPMENT FUND (CDMDF):

Units of Corporate Debt Market Development Fund would be valued at Net Asset Value (NAV) as on the valuation date.

As per the Principles of Fair Valuation specified in Eighth Schedule of SEBI (Mutual Funds) Regulations, 1996, AMC's are responsible for true and fairness of valuation and correct NAV. Considering the same, in case an AMC decides to deviate from the valuation price given by the valuation agencies, the detailed rationale for each instance of deviation shall be recorded by the AMC. The rationale for deviation along-with details such as information about the security (ISIN, issuer name, rating etc.), price at which the security was valued vis-a-vis the price as per the valuation agencies and the impact of such deviation on scheme NAV (in amount and percentage terms) shall be reported to the Board of AMC and Trustees.

The rationale for deviation along-with details as shall be disclosed immediately and prominently, under a separate head on the website of AMC. Further, while disclosing the total number of instances of deviation in the monthly and half-yearly portfolio statements, The AMC shall also provide the exact link to their website for accessing the above information.

Annexure 1:

Detailed approach by the valuation agencies:

It is decided that for arriving at security level pricing, a waterfall approach shall be followed for the valuation of money market and debt securities.

The following broad principles should be adopted as part of the aforesaid waterfall approach, for arriving at the security level prices:

All traded securities shall be valued on the basis of traded yields, subject to identification of outlier trades by the valuation agencies.

Volume Weighted Average Yield (VWAY) for trades in the last one hour of trading shall be used as the basis for valuation of Government Securities (including T-bills). Valuation of all other money market and debt securities (including Government securities not traded in last one hour) shall be done on the basis of VWAY of all trades during the day.

All trades on stock exchanges and trades reported on trade reporting platforms till end of the trade reporting time (excluding Inter-scheme transfers), should be considered for valuation on that day.

In case of any exceptional events on a day (An indicative list of exceptional events shall form part of the documented waterfall approach), only VWAY of trades post such event may be considered for valuation. Further, all exceptional events along-with valuation carried out on such dates shall be documented with adequate justification.

AMFI GUIDELINES ON VALUATION APPROACH FOR TRADED AND NON-TRADED MONEY MARKET AND DEBT SECURITIES:

SEBI, vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 on Valuation of money market and debt securities, has laid down the broad principles for considering traded yields for the purpose of valuation of money market and debt securities. Paragraph 2.1 of the aforesaid circular prescribes that AMFI shall ensure that valuation agencies have a documented waterfall approach for valuation of money market and debt securities. In this regard, the following are the areas identified for issuing standard guidelines.

1. Waterfall mechanism for valuation of money market and debt securities
2. Definition of tenure buckets for similar maturity
3. Process for determination of similar issuer
4. Recognition of trades and outlier criteria
5. Process for construction of spread matrix

PART A: VALUATION OF MONEY MARKET AND DEBT SECURITIES OTHER THAN G-SECS

Waterfall Mechanism for valuation of money market and debt securities:

The following shall be the broad sequence of the waterfall for valuation of money market and debt securities:

- i. Volume Weighted Average Yield (VWAY) of primary reissuances of the same ISIN (whether through book building or fixed price) and secondary trades in the same ISIN
- ii. VWAY of primary issuances through book building of same issuer, similar maturity (Refer Note 1 below)
- iii. VWAY of secondary trades of same issuer, similar maturity
- iv. VWAY of primary issuances through fixed price auction of same issuer, similar maturity
- v. VWAY of primary issuances through book building of similar issuer, similar maturity (Refer Note 1 below)
- vi. VWAY of secondary trades of similar issuer, similar maturity.
- vii. VWAY of primary issuance through fixed price auction of similar issuer, similar maturity
- viii. Construction of matrix (polling may also be used for matrix construction)
- ix. In case of exceptional circumstances, polling for security level valuation (Refer Note 2 below)

Note 1

Except for primary issuance through book building, polling shall be conducted to identify outlier trades. However, in case of any issuance through book building which is less than INR 100 Cr, polling shall be conducted to identify outlier trades.

Note 2

Some examples of exceptional circumstance would be stale spreads, any event/news in particular sector/issuer, rating changes, high volatility, corporate action or such other event as may be considered by valuation agencies. Here stale spreads are defined as spreads of issuer which were not reviewed/updated through trades/primary/polls in same or similar security/issuers of same/similar maturities in waterfall approach in last 6 months.

Further, the exact details and reasons for the exceptional circumstances which led to polling shall be documented and reported to AMCs. Further, a record of all such instances shall be maintained by AMCs and shall be subject to verification during SEBI inspections.

Note 3

All trades on stock exchanges and trades reported on trade reporting platforms till end of trade reporting time (excluding Inter-scheme transfers) should be considered for valuation on that day.

Note4

It is understood that there are certain exceptional events, occurrence of which during market hours may lead to significant change in the yield of the debt securities. Hence, such exceptional events need to be factored in while calculating the price of the securities. Thus, for the purpose of calculation of VWAY of trades and identification of outliers, on the day of such exceptional events, rather than considering whole day trades, only those trades shall be considered which have occurred post the event (on the same day).

The following events would be considered exceptional events:

- i. Monetary/ Credit Policy
- ii. Union Budget
- iii. Government Borrowing/ Auction Days
- iv. Material Statements on Sovereign Rating
- v. Issuer or Sector Specific events which have a material impact on yields
- vi. Central Government Election Days
- vii. Quarter end days

In addition to the above, valuation agencies may determine any other event as an exceptional event. All exceptional events along-with valuation carried out on such dates shall be documented with adequate justification.

Definition of tenure buckets for Similar Maturity

When a trade in the same ISIN has not taken place, reference should be taken to trades of either the same issuer or a similar issuer, where the residual tenure matches the tenure of the bond to be priced. However, as it may not be possible to match the exact tenure, it is proposed that tenure buckets are created and trades falling within such similar maturity be used as per table below.

Residual Tenure of Bond to be priced	Criteria for similar maturity
Up to 1 month	Calendar Weekly Bucket
Greater than 1 month to 3 months	Calendar Fortnightly Bucket
Greater than 3 months to 1 year	Calendar Monthly Bucket
Greater than 1 year to 3 years	Calendar Quarterly Bucket
Greater than 3 years	Calendar Half Yearly or Greater Bucket

In addition to the above:

- In case of market events, or to account for specific market nuances, valuation agencies may be permitted to vary the bucket in which the trade is matched or to split buckets to finer time periods as necessary. Such changes shall be auditable. Some examples of market events / nuances include cases where traded yields for securities with residual tenure of less than 90 days and more than 90 days are markedly different even though both may fall within the same maturity bucket, similarly for less than 30 days and more than 30 days or cases where yields for the last week v/s second last week of certain months such as calendar quarter ends can differ.
- In the case of illiquid/ semi liquid bonds, it is proposed that traded spreads be permitted to be used for longer maturity buckets (1 year and above). However, the yield should be adjusted to account for steepness of the yield curve across maturities.
- The changes/ deviations mentioned in clauses above, should be documented, along with the detailed rationale for the same. Process for making any such deviations shall also be recorded. Such records shall be preserved for verification.

Process for determination of similar issuer

Valuation agencies shall determine similar issuers using one or a combination of the following criteria. Similar issuers do not always refer to issuers which trade at same yields, but may carry spreads amongst themselves & move in tandem or they are sensitive to specific market factor/s hence warrant review of spreads when such factors are triggered.

- Issuers within same sector/industry and/or
- Issuers within same rating band and/or
- Issuers with same parent/ within same group and/or
- Issuers with debt securities having same guarantors and/or
- Issuers with securities having similar terms like Loan Against Shares (LAS)/ Loan Against Property (LAP)

The above criteria are stated as principles and the final determination on criteria, and whether in combination or isolation shall be determined by the valuation agencies. The criteria used for such determination should be documented along with the detailed rationale for the same in each instance. Such records shall be preserved for verification. Similar issuers which trade at same level or replicate each other's movements are used in waterfall approach for valuations. However, similar issuer may also be used just to trigger the review of spreads for other securities in the similar issuer category basis the trade/news/action in any security/ies within the similar issuer group.

Recognition of trades and outlier criteria

Volume criteria for recognition of trades (marketable lot):

Paragraph 1.1.1.1(a) of SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 on Valuation of money market and debt securities, prescribes that the marketable lots shall be defined by AMFI, in consultation with SEBI. In this regard, marketable lot is defined as under.

The following volume criteria shall be used for recognition of trades by valuation agencies:

Parameter	Minimum Volume Criteria for marketable lot
Primary	INR 25 Cr for both Bonds/NCD/CP/ CD and other money market instruments
Secondary	INR 25 Cr for CP/ CD, T-Bills and other money market instruments
Secondary	INR 5 Cr for Bonds/NCO/ G-secs

Trades not meeting the minimum volume criteria i.e. the marketable lot criteria as stated above shall be ignored.

Outlier criteria

It is critical to identify and disregard trades which are aberrations, do not reflect market levels and may potentially lead to mispricing of a security or group of securities. Hence, the following broad principles would be followed by valuation agencies for determining outlier criteria.

Outlier trades shall be classified on the basis of liquidity buckets (Liquid, Semi-liquid, Illiquid). Price discovery for liquid issuers is generally easier than that of illiquid issuers and hence a tighter pricing band as compared to illiquid issuers would be appropriate.

The outlier trades shall be determined basis the yield movement of the trade, over and above the yield movement of the matrix. Relative movement ensures that general market movements are accounted for in determining trades that are outliers. Hence, relative movement over and above benchmark movement shall be used to identify outlier trades.

Potential outlier trades which are identified through objective criteria defined above will be validated through polling from market participants. Potential outlier trades that are not validated through polling shall be ignored for the purpose of valuation.

The following criteria shall be used by valuation agencies in determining Outlier Trades:

Liquidity Classification	Bps Criteria (Yield movement over Previous Day yield after accounting for yield movement of matrix)		
	Upto 15 days	15-30 days	Greater than 30 days
Liquid	30 bps	20 bps	10 bps
Semi-liquid	45 bps	35 bps	20 bps
Illiquid	70 bps	50 bps	35 bps

The above criteria shall be followed consistently and would be subject to review on a periodic basis by valuation agencies and any change would be carried in consultation with AMFI.

In order to ensure uniform process in determination of outlier trades the criteria for liquidity classification shall be as detailed below.

Liquidity classification criteria - liquid, semiLiquid and Illiquid definition

Valuation agencies shall use standard criteria for classifying trades as Liquid, Semi-Liquid and illiquid basis the following two criteria

- Trading Volume
- Spread over reference yield

Such criteria shall be reviewed on periodic basis in consultation with AMFI

Trading Volume (Traded days) based criteria:

Number of unique days an issuer trades in the secondary market or issues a new security in the primary market in a calendar quarter

Liquid >=50% of trade days

Semi Liquid >=10% to 50% of trade days

Illiquid < 10% of trade days

1. Process for construction of spread matrix

Valuation agencies shall follow the below process in terms of calculating spreads and constructing the matrix

Steps	Detailed Process
-------	------------------

Step 1	<p>Segmentation of corporates-</p> <p>The entire corporate sector is first categorised across following four sectors i.e. all the corporates will be catalogued under one of the below mentioned bucket:</p> <p>Public Sector Undertakings/Financial Institutions/Banks; Non-Banking Finance Companies -except Housing Finance Companies; Housing Finance Companies; Other Corporates</p>
Step 2	<p>Representative issuers -</p> <p>For the aforesaid 4 sectors, representative issuers (Benchmark Issuers) shall be chosen by the valuation agencies for only higher rating {I.e. "AAA" or AA+}. Benchmark/Representative Issuers will be identified basis high liquidity, availability across tenure in AAA/AA+ category and having lower credit/liquidity premium. Benchmark Issuers can be single or multiple for each sector.</p> <p>It may not be possible to find representative issuers in the lower rated segments, however in case of any change in spread in a particular rating segment, the spreads in lower rated segments should be suitably adjusted to reflect the market conditions. In this respect, in case spreads over benchmark are widening at a better rated segment, then adjustments should be made across lower rated segments, such that compression of spreads is not seen at any step. For instance, if there is widening of spread of AA segment over the AAA benchmark, then there should not be any compression in spreads between AA and A rated segment and so on.</p>
Step 3	<p>Calculation of benchmark curve and calculation of spread -</p> <ol style="list-style-type: none"> 1. Yield curve to be calculated for representative issuers for each sector for maturities ranging from 1 month till 20 years and above. 2. Waterfall approach as defined in Part A (1) above will be used for construction of yield curve of each sector. 3. In the event of no data related to trades/primary issuances in the securities of the
	<p>representative issuer is available, polling shall be conducted from market participants</p> <ol style="list-style-type: none"> 4. Yield curve for Representative Issuers will be created on daily basis for all 4 sectors. All other issuers will be pegged to the respective benchmark issuers depending on the sector, parentage and characteristics. Spread over the benchmark curve for each security is computed using latest available trades/primaries/polls for respective maturity bucket over the Benchmark Issuer. <p>Spreads will be carried forward in case no data points in terms of trades/primaries/polls are available for any issuer and respective benchmark movement will be given</p>
Step 4	<ol style="list-style-type: none"> 1. The principles of VWAY, outlier trades and exceptional events shall be applicable while constructing the benchmark curve on the basis of trades/primary issuances. 2. In case of rating downgrade/credit event/change in liquidity or any other material event in Representative Issuers, new Representative Issuers will be identified. Also, in case there are two credit ratings, the lower rating to be considered. <p>Residual tenure of the securities of representative issuers shall be used for construction of yield curve.</p>

- VWAY of last one hour, subject to outlier validation

Part B: Valuation of G-Secs {T-Bill, Cash management bills, G-Sec and SOL}

The following is the waterfall mechanism for valuation of Government securities

- VWAY for the day (including a two quote, not wider than 5 bps on NDSOM), subject to outlier validation
- Two quote, not wider than 5 bps on NDSOM, subject to outlier validation
- Carry forward of spreads over the benchmark

- Polling etc.

Note:

1. VWAY shall be computed from trades which meet the marketable lot criteria stated in Part A of these Guidelines.
2. Outlier criteria: Any trade deviating by more than +/- 5 bps post factoring the movement of benchmark security shall be identified as outlier. Such outlier shall be validated through polling for inclusion in valuations. If the trades are not validated, such trades shall be ignored.

AMFI GUIDELINES ON POLLING PROCESS FOR MONEY MARKET AND DEBT SECURITIES

Please refer to Paragraph 2.2.5 of SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 on Valuation of money market and debt securities, which prescribes that considering the importance of polling in the valuation process, guidelines shall be issued by AMFI on polling by valuation agencies and on the responsibilities of Mutual Funds in the polling process, as part of the waterfall approach for valuation of money market and debt securities. In this regard, the following Guidelines were approved by the Board of AMFI, in consultation with SEBI.

POLLING GUIDELINES:

1. Valuation agencies shall identify the Mutual Funds who shall participate in the polling process on a particular day, considering factors such as diversification of poll submitters and portfolio holding of the Mutual Funds. Mutual Funds who are identified by the valuation agencies shall necessarily participate in the polling process. However, in case any Mutual Fund does not participate in the polling process, detailed reason for the same shall be recorded at the time and subsequently made available during SEBI inspections. In this respect, since a Mutual Fund may have investments in similar securities, a security not forming part of investment universe may not be considered as an adequate reason for not participating in the polling process.
2. Polling will be carried out on a daily basis by the valuation agencies, in terms of points below.
3. Each valuation agency needs to take polls from at least 5 unique Mutual Funds on a daily basis. Hence, between the two valuation agencies 10 unique Mutual Funds to be polled. They may cover more Mutual Funds, over and above this. For benchmark securities a poll constituting at least 5 responses will be considered as valid. In case of non-benchmark securities, a poll constituting at least 3 responses will be considered as valid. The responses received by each valuation agency will be shared with the other agency also.
4. Median of polls shall be taken for usage in valuation process.
5. The valuation agencies will also need to cover as many non- Mutual Fund participants as possible, over and above the Mutual Funds, to improve on the polling output quality.
6. Endeavour would be made to have adequate representation of both holders and non-holders of the same bond/same issuer for non-benchmark securities in the poll process. Where this is not possible, valuation agencies may seek polls from holders of bonds with a similar structure.
7. In the case of issuers with multiple notch rating upgrades / downgrades over short periods of time, valuation agencies shall:
 - a. Conduct polls with a larger universe of pollers.
 - b. Increase the frequency of polling
8. Suo moto feedback on valuations should be entertained only through formal mails from persons designated by AMC for said purpose, and the same shall be validated through repolling. Any such feedback shall be duly recorded by the valuation agencies, including the reason for the challenge, results of repolling and subsequent changes in valuation on repolling, if any. Such records shall be preserved by the valuation agencies, for verification.
9. Polling will be done for two sets of securities, Benchmark & Others.
10. Benchmark will be defined for the following categories across tenors .
 - Treasury Bills
 - Central Government Securities
 - State Government Securities
 - AAA PSU / PFI / PSU Banks
 - AAA Private
 - NBFC
 - HFC

- Any other as required for improving fair valuations.
11. Polling shall be conducted in the following two scenarios:
 - a) Validation of traded levels if they are outlier trades.
 - b) Non-traded Securities (in exceptional circumstances as defined in the waterfall mechanism for valuation of money market and debt securities).
 12. Best efforts should be made by poll submitters to provide fair valuation of a security.
 13. The polling process will be revalidated by external audit of the valuation agencies with at least an annual frequency
 14. AMCs shall have a written policy, approved by the Board of AMC and Trustees, on governance of the polling process. The aforesaid policy shall include measures for mitigation of potential conflicts of interest in the polling process and shall identify Senior Officials, with requisite knowledge and expertise, who shall be responsible for polling. Further, the policy should outline the following aspects:
 - a. The process of participating in a polling exercise.
 - b. Identify the roles and responsibilities of persons participating in the polling.
 - c. Include policies and procedures for arriving at the poll submission
 - d. Cover the role of the Board of AMC and Trustees, and the periodic reporting that needs to be submitted to them.
 - e. All polling should be preferably over email. In case for any reason, the polling is done by way of a telephonic call then such a call should be over recorded lines, followed subsequently by an email.
 - f. AMCs should have adequate business continuity arrangements for polling, with the necessary infrastructure/ skill to ensure that consistent delivery of poll submissions is made without material interruption due to any failure, human or technical.
 15. All polling done will have to be documented and preserved in format approved by the Board of AMC, for a period of eight years, along-with details of the basis of polling (such as market transactions, market quotes, expert judgement etc.).
 16. AMCs shall ensure that participation in the polling process is not mis-used to inappropriately influence the valuation of securities. The officials of the AMC who are responsible for polling in terms of point no. 14 above, shall also be personally liable for any misuse of the polling process.
 17. AMCs shall maintain an audit trail for all polls submitted to valuation agencies.

These Guidelines shall be effective from February 17, 2020

AMFI GUIDELINES ON UPFRONT FEES ON TRADES

1. Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of the security.
2. Details of such upfront fees should be shared by the AMCs on the trade date to the valuation agencies as part of the trade reporting to enable them to arrive at the fair valuation for that date.
3. For the purpose of accounting, such upfront fees should be reduced from the cost of the investment in the scheme that made the investment.
4. In case upfront fees are received across multiple schemes, then such upfront fees should be shared on a pro-rata basis across such schemes.

AMFI GUIDELINES ON INVESTMENT IN PARTLY PAID DEBENTURES

1. Mutual Fund schemes shall make investment in partly paid debentures only when payment of the remaining amount is linked to clear, pre-defined events (i.e. is subject to conditions precedent). For avoidance of doubt any event which is purely time based shall not be considered as a pre-defined event. Such conditions precedent should be clearly outlined in the Agreement for subscription of the debentures/ Offer Document for the issue, as the case may be. Conditions precedent mean the clearly defined obligations/ events that need to be fulfilled before calling upon the investor to make payment for the remaining portion of the subscription. Such obligations/events, to name a few, could include achievement of certain milestones linked with the object for which the debentures were issued or linked to the enhancement of credit rating of the Issuer or linked to other financial or operating parameters of the Issuer or linked to the happening of an event. AMCs shall not resort to the practice of investing in partly paid debentures without any condition precedent

2. There should not be any linkages across schemes while investing in partly paid debentures. For example: if the agreement for partly paid debentures also envisages investment in any other type of instrument such as a commercial paper then the AMC should ensure that subscription to the residual part of the issue/ the investment in the other instrument is made by the scheme which made the original investment in partly paid debentures.
3. While investing in partly paid debentures, AMCs shall ensure that interest of one set of unitholders/ schemes is not compromised at the cost of another.
4. All regulatory limits have to be complied with at the time of each such part payment.
5. In order to avoid a situation where a MF scheme is unable to honor future part payments, AMCs should avoid excessive concentration in partly paid debentures.

Any investment in partly paid debentures has to be disclosed in the monthly portfolio disclosures of the scheme. This should include, inter-alia, the amount that has been contracted but not yet paid by the scheme, the dates of such future pay-ins, triggers for future pay-ins as well as any other detail that in the fund house's view may be of material interest to its investors.

COMPUTATION OF NAV

A. POLICY ON COMPUTATION OF NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

NAV of Units under the Options there under can be calculated as shown below:

NAV = (Market or Fair Value of Scheme's investments + Current assets including Accrued Income - Current Liabilities and provisions including accrued expenses)

No. of Units outstanding under the Scheme/Option.

The NAV, the sale and repurchase prices of the Units will be calculated and announced at the close of each working day. The NAVs of the Scheme will be computed and units will be allotted upto 4 decimals.

Computation of NAV will be done after taking into account Income Distribution Cum Capital Withdrawal paid, if any, and the distribution tax thereon, if applicable.

The valuation of the Schemes' assets and calculation of the Schemes' NAVs shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Illustration on Computation of NAV:

If the net assets of the Scheme are Rs.10,65,44,345.34 and units outstanding are 1,00,00,000 then the NAV per unit will be computed as follows:

$10,65,44,345.34 / 1,00,00,000 = \text{Rs. } 10.6544 \text{ p.u. (rounded off to four decimals)}$

The Mutual Fund may charge the load within the stipulated limit of 5% and without any discrimination to any specific group. The Repurchase Price however, will not be lower than 95% of the NAV.

B. COMPUTATION OF NAV FOR FOREIGN SECURITIES

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

NAV of Units under the Options there under can be calculated as shown below:

NAV = (Market or Fair Value of Scheme's investments + Current assets including Accrued Income - Current Liabilities and provisions including accrued expenses)

No. of Units outstanding under the Scheme/Option.

Since the scheme invests predominantly in units of foreign securities, the NAV of the Scheme for a business day (Day T) will be based on the prices of the underlying securities for that day (Day T). Since the NAV of the underlying securities for a business day (Day T) would normally be available either late in the evening of the business day (Day T) or on the following business day (T+1), the Scheme will declare the NAV for a Business day on the next Business Day by 10.00 a.m, based on the prices of the underlying securities for the business day for which the NAV is declared (Day T).

Computation of NAV will be done after considering IDCW paid, if any, and the distribution tax thereon, if applicable.

Valuation of Foreign Exchange Conversion: On the valuation day, all the assets and liabilities in foreign currency will be valued in Indian Rupees on the basis of Foreign Exchange rate quoted on Bloomberg/Reuters around India markets close time (which is currently around 3:30 p.m. IST) or at the RBI Reference rate as at the close of the Banking hours on that day in India. The Trustees/AMC reserves the right to change the source for determining the exchange rate. The reasons for the change in the source for determining the exchange rate will be recorded in writing. The Rupee value of Investments valued in the manner described above and other assets and liabilities represented in foreign currency shall be obtained by multiplying the aforesaid rate.

The valuation of the Schemes' assets and calculation of the Schemes' NAVs shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Illustration on Computation of NAV:

If the net assets of the Scheme are Rs.10,65,44,345.34 and units outstanding are 1,00,00,000 then the NAV per unit will be computed as follows:

$10,65,44,345.34 / 1,00,00,000 = \text{Rs. } 10.6544 \text{ p.u. (rounded off to four decimals)}$

C. PROCEDURE IN CASE OF DELAY IN DISCLOSURE OF NAV

The NAV of the schemes shall be declared as per timelines stated in the respective SID on AMC and AMFI website. In case of any delay, the reasons for such delay would be explained to AMFI by the next business day. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs.

IX. TAX & LEGAL & GENERAL INFORMATION

A. TAX TREATMENT OF INVESTMENTS IN MUTUAL FUND

The following information is provided only for general information purpose. In view of the individual nature of tax benefits each investor is advised to consult with his or her own tax consultant with respect to the specific tax implications arising out of their participation in the scheme.

Based on the law in force and after considering the amendments made in the Income-tax Act, 1961 ("the Act"), certain tax benefits are available to the investors in mutual funds and mutual fund itself. The same are stated below:

A.1 TAX TREATMENT FOR MUTUAL FUNDS

As per the current tax rules, the applicable tax treatment of mutual fund is as mentioned below:

11.1.1 Income of MF is exempt

Mirae Asset Mutual Fund is registered with Securities and Exchange Board of India (SEBI) as a Mutual Fund as per SEBI (Mutual Funds) Regulations, 1996 and therefore, is eligible for the tax benefits u/s 10(23D) of the Act. Accordingly, all income of the Mirae Asset Mutual Fund is exempt from income tax.

There is no TDS on income received by Mirae Asset Mutual Fund as per the provisions of section 196(iv) of the Act.

11.1.2 Tax on Income Distributed by a Mutual Fund

Finance Act, 2020 had amended the provision of section 115R of the Act (Dividend Distribution Tax) to provide that the income distributed on or before 31st March 2020 shall only be covered under the provision of this section.

With effect from 1st April, 2020, dividend or income distribution by mutual fund on units shall be taxable in the hands of unit holders at the applicable rates

According to Section 194K of the Act, any person responsible for paying to a resident any income in respect of units of a Mutual Fund specified under clause (23D) of section 10, shall at the time of credit of such income to the account of the payee or at the time of payment thereof by any mode, whichever is earlier, deduct income-tax there on at the rate of 10%. Further, as per section 195 of the Act, any person responsible for paying to a non-resident, not being a company, or to a foreign company, any interest or any other sum chargeable under the provisions of this Act shall, at the time of credit of such income to the account of the payee or at the time of payment thereof by any mode, whichever is earlier, deduct income-tax thereon at the “rates in force”.

11.2.1 Securities Transaction Tax

Securities Transaction Tax ('STT') is applicable in respect of sale of units of Equity-oriented funds (EOFs) on a recognized stock exchange and on repurchase (redemption) of units of EOFs by the mutual fund. STT is not applicable in respect of purchase/ sale/ redemption of units of other schemes (other than EOFs).

Securities Transaction Tax (“STT”) is applicable on the taxable value of securities transactions as follows:

Particulars	STT Rate	Payable By
Purchase of units of equity oriented mutual fund (delivery based)	Nil	Purchaser
Sale of unit of an equity oriented mutual fund on recognized stock exchange (delivery based)	0.001%	Seller
Sale of unit of an equity oriented mutual fund (non-delivery based)	0.025%	Seller
Sale of unit of an equity oriented fund to Mutual Fund	0.001%	Seller

11.2.2 Income Received from Mutual Fund

According to section 10(35) of the Act, any income (other than income arising from transfer of units) received in respect of units of Mutual Fund specified under section 10(23D) of the Act is exempt from income tax in the hands of the unit holders.

Finance Act, 2020 had amended the provision of section 10(35) of the Act to provide that this clause shall not apply to any income, in respect of units, received on or after 1st April 2020.

Hence, with effect from 1st April, 2020, dividend or income distribution by a mutual fund on units is taxable in the hands of unit holders at the applicable rates.

11.2.3 Capital Gains

Rates of tax and tax deducted at source (TDS) under the Act for Capital Gains from transfer of units of Equity Oriented Fund:

Type of Capital Gain	Condition		Income Tax Rates		TDS Rates	
			Resident/ PIO/ NRI/ Other non FII non- residents	FII	Resident	NRI/OCBs/ FII & others
+ Short Term Capital Gain (redemption before completing one year of holding)	STT has been paid on redemption	Sale upto 22nd July, 2024	15%	15%	Nil	15%
		Sale on or after 23rd July, 2024	20%	20%	Nil	20%

+ With respect to an Equity Oriented Fund of Fund, units acquired post 1 April 2023 and sold prior to 31 March 2025 would be considered as units sold of a Specified Mutual Fund (SMF) as mentioned below and hence, any gains arising on transfer of such units would be deemed to be short-term capital gains. However, with respect to units acquired prior to 1 April 2023, gains arising on transfer of such units would not be considered as units sold of a Specified Mutual Fund (SMF) as mentioned below and would continue to be governed by the normal provisions (i.e., long-term or short-term, depending upon period of holding) as mentioned in the table above.

++ As per the amended Finance Bill 2023, a Specified Mutual Fund (SMF) acquired on or after April 1, 2023, shall be deemed to be short-term capital asset and hence, the gains arising on such transfer will be regarded as short-term capital gains (STCG) irrespective of period of holding. SMF is a Mutual Fund holding less than 35% of its total investment in equity shares of domestic companies. Accordingly, Equity Fund of Fund investing in Equity ETF shall fall within the ambit of SMF and the gains arising on its transfer will be regarded as STCG and would be taxable at the rate of 15% (where transfer takes place before 23 July 2024) or 20% (where transfer takes place on or after 23 July 2024) (plus applicable surcharge and cess) and no indexation benefit will be available on transfer of such investments. However, effective 01 April 2025, the definition of ‘Specified Mutual Fund’ has been proposed to be amended as under:

- A mutual fund wherein more than 65% of total proceeds are invested in the debt and money market instruments; or
- Fund which invests 65% or more of its total proceeds in units of a fund referred in clause (a) above, calculated basis the annual average of the daily closing figures

As a result of the proposed amendment, Equity Fund of Fund investing in Equity ETF which were earlier covered under the definition of Special Mutual Fund will now get excluded from the definition. Thus, for Equity Fund of Fund investing in Equity ETF sold on or after 1 April 2025, the above provisions of specified mutual funds would not apply. However, capital gains on sale of mutual Funds investing more than 65% in debt and money market instruments or Fund which invests 65% or more of its total proceeds in units of such fund (hereinafter referred to as “Debt and Money Market Mutual Funds”) would continue to be deemed to be short-term capital gains.

Lien on Units for Loans

In conformity with the guidelines and notifications issued by SEBI / Government of India / any other regulatory body from time to time, Units under the Scheme may be offered as security by way of a lien / charge in favor of scheduled banks, financial institutions, non-banking finance companies (NBFCs) or any other body. The Registrar will note and record the lien against such Units. A standard form for this purpose is available on request with the Registrar.

The Unit Holder will not be able to redeem / switch Units under lien until the Lien Holder provides written authorization to the Fund that the lien / charge may be vacated. As long as Units are under lien, the Lien Holder will have complete authority to exercise the lien, thereby redeeming such Units and receiving payment proceeds. In such instance, the Unit Holder will be informed by the Registrar through an account statement. In no case will the Units be transferred from the Unit Holder to Lien Holder. All benefits accruing on the Units under lien during the period of the lien in the form of bonus, IDCW or otherwise shall be subject to lien.

A. Information pertaining to Investments by the Schemes of the Fund

1. Investment in Derivatives:

Concepts and Examples of investing into Derivatives

Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index, such as: interest rates, exchange rates, commodities and equities.

- **Futures**

A futures contract is an agreement between the buyer and the seller for the purchase and sale of a particular asset at a specific price on a specific future date. The price at which the underlying asset would change hands in the future is agreed upon at the time of entering into the contract. The actual purchase or sale of the underlying asset involving payment of cash and delivery of the instrument does not take place until the contracted date of delivery. A futures contract involves an obligation on both the parties to fulfill the terms of the contract.

Currently, futures contracts have a maximum expiration cycle of 3-months. Three contracts are available at any time for trading, with 1 month, 2 months and 3 months expiry respectively. Futures contracts typically expire on the last Thursday of the month. For example, a contract with the January expiration expires on the last Thursday of January.

A futures contract on the stock market index gives its owner the right and obligation to buy or sell the portfolio of stocks characterized by the index. Stock index futures are cash settled; there is no delivery of the underlying stocks.

Let us assume that the Nifty Index at the beginning of the month October 2018 was 5070 and three index futures as under were available:

Expiry Month	Bid Price	Offer Price
October 18	5075	5080
November 18	5085	5090
December 18	5095	5100

The Scheme could buy an index future of October, 2018 at the offer price of Rs. 5080. The Fund will be required to pay the initial margin as required by the exchanges.

The following is a hypothetical example of a typical trade in index future and the costs associated with the trade.

Particulars	Index Future	Actual Purchase of Stocks
Index as on beginning October 2018	5070	5070
October 2015 Futures Price	5080	-
1.Carry Cost associated with Futures	10 (5080-5070)	
2.Brokerage Cost @ 0.02% for Index Future and 0.03% for Cash Markets	1.016 (0.02% of 5080)	1.521 (0.03% of 5070)
3.Securities Transaction Tax (STT) STT on purchase of index futures – NIL STT on purchase of stocks – 0.025%	NIL (0% of 5080)	1.2675 (0.025% of 5070)
4.Gain on Surplus Funds (Assumed 6% returns on 75% of the money left after paying margin of 25%)	18.74 (6%*(100% of 5070 – 25% of 5080)*30/365)	NIL
Spot Market Price at the expiry of October Contract	5569	5569
5.Brokerage Cost on Sale @ 0.02% for Index Future and 0.03% for Cash Markets	1.114 (0.02% of 5569)	1.671 (0.03% of 5569)
6.Securities Transaction Tax STT on sale of index future – 0.025% STT on sale of stocks – 0.025%	1.114 (0.025% of 5569)	1.392 (0.025% of 5569)
Total Cost (1+2+3-4+5+6)	-5.50	5.85

Please note that the above example is based on assumptions and is used only for illustrative purposes (including an assumption that there will be a gain pursuant to investment in index futures). As can be seen

in the above example, the costs associated with the trade in futures are less than that associated with the trade in actual stock. Thus, in the above example the futures trade seems to be more profitable than the trade in actual stock. However, buying of the index future may not be beneficial as compared to buying stocks if the execution and brokerage costs on purchase of index futures are high and the return on surplus funds are low. The actual returns may vary based on actuals and depends on final guidelines / procedures and trading mechanism as envisaged by stock exchanges and other regulatory authorities.

- **Options**

An option is a contract which provides the buyer of the option (also called the holder) the right, without the obligation, to buy or sell a specified asset at an agreed price on or upto a particular date. For acquiring this right the buyer has to pay a premium to the seller. The seller on the other hand has the obligation to buy or sell that specified asset at the agreed price. The premium is determined considering number of factors such as the underlying asset's market price, the number of days to expiration, strike price of the option, the volatility of the underlying asset and the risk less rate of return. The strike price, the expiration date and the market lots are specified by the exchanges.

An option contract may be of two kinds, viz., a call option or a put option. An option that provides the buyer the right to buy is a call option. The buyer of the call option (known as the holder of the option) can call upon the seller of the option (known as writer of the option) and buy from him the underlying asset at the agreed price at any time on or before the expiry date of the option. The seller of the option has to fulfill the obligation on exercise of the option.

The right to sell is called a put option. Here, the buyer of the option can exercise his right to sell the underlying asset to the seller of the option at the agreed price.

Options are of two types: European and American. In a European option, the holder of the option can only exercise his right on the date of expiration. In an American option, he can exercise this right anytime between the purchase date and the expiration date.

Example of options

Buying a Call option: Assume that the Scheme buys a call option at the strike price of Rs. 5,000 and pays a premium of Rs. 100. If the market price of the underlying stock on the date of expiry of the option is Rs. 5,400 (i.e. more than Rs. 5,000 which is the strike price of an option), the Scheme will exercise the option. However, it may not result into profit. The profit is made only in those circumstances when the intrinsic value (5400 (spot price)-5000(strike price)) is greater than cost paid i.e. option premium (100). If on the date of the expiry of the option, the market price of the underlying stock is Rs. 4,900, the Scheme will not exercise the option and it shall lose the premium of Rs. 100.

Thus, in the above example, the loss for the Scheme, as the buyer of the option, is limited to the premium paid by him while the gains are unlimited.

Writing a Call Option: Assume that the Scheme writes a call option at the strike price of Rs. 5,000 and earns a premium of Rs. 100. If the market price of the underlying stock on the date of expiry increases to Rs. 5,400 (i.e. more than Rs. 5,000) then the option is exercised. The Scheme earns the premium of Rs. 100/- but loses the difference between the market price and the exercise price i.e. Rs. 400/-. In case the market price of the underlying stock decreases to Rs. 4,900, the Scheme gets to keep the premium of Rs.100.

Buying a Put Option: Assume that the Scheme buys a put option at the strike price of Rs. 5,000 and pays a premium of Rs. 100. If the market price of the underlying stock decreases to Rs. 4,850 (i.e. less than strike price of 5000) the Scheme would be protected from the downside and would exercise the put option. However, it may not result into profit. The profit is resulted only when the intrinsic value (5000 (strike price)- 4850(spot price)) is greater than the cost paid i.e. option premium of 100. Whereas if the stock price moves up to say Rs. 5,150 the Scheme may let the option expire and forego the premium.

A forward contract is a transaction in which the buyer and the seller agree upon the delivery of a specified quality (if commodity) and quantity of underlying asset at a predetermined rate on a specified future date.

Please note that the above examples are based on assumptions and are used only for illustrative purposes.

Covered Call Option:

A call option gives the holder (buyer) the right but not the obligation to buy an asset by a certain date for a certain price. Covered calls are an options strategy where a person holds a long position in an asset and writes (sells) call options on that same asset.

Benefits of using Covered Call strategy in Mutual Funds:

The covered call strategy can be followed by the Fund Manager in order to hedge risk thereby resulting in better risk adjusted returns of the Scheme. The strategy offers the following benefits: a) Hedge against market risk - Since the fund manager sells a call option on a stock already owned by the mutual fund scheme, the downside from fall in the stock price would be lower to the extent of the premium earned from the call option. b) Generating additional returns in the form of option premium in a range bound market. Thus, a covered call strategy involves gains for unit holders in case the strategy plays out in the right direction

Illustration:

As on 01st Mar 2019		Prices in INR
Strategy	Total Quantity	Price
Stock XYZ in the portfolio	10000	500
Sold Call Option (Mar 2019 Expiry on the stock XYZ with the strike price at 550)	500	10

Payoffs	Payoff from the Call option	Impact on the portfolio due to the covered call strategy
On the day of Expiry of Options Contract if the stock price is less than or equal to 550	$500 \times 10 = 5000$	Extra Income of INR 5000 other than the stock return
On the day of Expiry of Options Contract if the stock price is between 550-560	$500 \times (10 - \text{price more than } 550)$	Extra Income between INR 0 to 5000 other than the stock return depending on the price above 550 and below 560
On the day of Expiry of Options Contract if the stock price is more than 560	$500 \times (560 - \text{stock price})$	Loss on Call options would be such that price appreciation for 500 stock in the portfolio would be negated for the price above 560

The Scheme may take derivatives position based on the opportunities available subject to the guidelines issued by SEBI from time to time and in line with the overall investment objective of the Scheme. These may be taken to hedge the portfolio, rebalance the same or to undertake any other strategy as permitted under the SEBI Regulations. Covered call can benefit generation of income without added market risk. If we make a comparison between covered call and simply owning shares of stock, it demonstrates that income from added covered call discounts the basis in stock, thus reducing market risk.

Risks associated with investment strategy which may be followed by the fund managers for investment in derivatives:

Execution of investment strategies depends upon the ability of the fund manager to identify such opportunities which may not be available at all times. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable.

The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.

2. Swing Pricing Framework

A. Swing Pricing Framework for market dislocation:

Swing pricing refers to a process for adjusting a fund's Net Asset Value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e. flows into or out of a scheme) to the investors associated with that activity. It is aimed at reducing the impact of large redemptions on existing investors by reducing dilution of the value of a fund's units.

Accordingly, mandatory full swing during market dislocation times shall apply as under:

- Swing pricing framework will be applicable only for scenarios related to net outflows from the schemes.
- Market dislocation will be determined by SEBI either based on AMFI's recommendation or suo moto. Once market dislocation is declared, it will be notified by SEBI that swing pricing will be applicable for a specified period.
- Thereafter, mandatory swing pricing will be applicable to Schemes which:
 - a. have 'High' or 'Very High' risk on the risk-o-meter (as of the most recent period at the time of declaration of market dislocation); AND
 - b. classify themselves in the cells A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix
- **Swing factor** as per below matrix shall be made applicable to the above mentioned schemes and the NAV will be adjusted for the swing factor.

Swing factor			
Max Credit Risk of the scheme→	Class A (CRV>=12)	Class B (CRV>=10)	Class C (CRV<10)
Max Interest Rate Risk of the scheme↓			
Class I: (Macaulay Duration <=1 year)	--	--	1.5%
Class II: (Macaulay Duration <=3 years)	--	1.25%	1.75%
Class III: Any Macaulay Duration	1%	1.5%	2%
*CRV – Credit Risk Value			

- Once swing pricing framework is triggered and swing factor is made applicable, both the incoming and outgoing investors shall get NAV adjusted for swing factor.
- Swing pricing shall be made applicable to all unitholders at PAN level with an exemption for redemptions upto Rs. 2 lacs for each scheme of MAMF.
- The scheme performance shall be computed based on unswung NAV.
- **Disclosures:** Disclosures pertaining to NAV adjusted for swing factor along with the performance impact shall be made by the AMC in the SID, Scheme wise Annual Reports and Abridged summary and on website prominently if swing pricing framework has been made applicable for the said mutual fund scheme.

- **Illustration:** Below is the example on how the swing pricing framework works, under which circumstances it is triggered and the effect on the NAV for incoming and outgoing investors:

Impact of Swing Pricing on incoming and outgoing unitholders/investors:

1. Unswung NAV – Rs.100/- (This is before applying the swing factor).
2. Mandatory Swing Factor - 1.50%
3. NAV after Adjustment of swing factor : $(100 - 1.5\% \text{ of } 100) = (100 - 1.50) = \text{Rs. } 98.50$

Subscription Amount	Rs.100,00,000/-
No of units to be allotted	$(100,00,000/98.50) = 101,522.843$
Redemption Amount	Rs.100,00,000/-
No of units to be redeemed	$(100,00,000/98.50) = 101,522.843$

Further, in line with the aforesaid SEBI circular, the inclusion of above-mentioned provisions pertaining to mandatory swing factor would not be considered as a Fundamental Attribute change. However, optional swing factor or higher than as specified in the Table above shall be considered as a Fundamental Attribute change of the Scheme in terms of Regulation 18(15A) of SEBI (Mutual Funds) Regulations, 1996.

Swing Pricing during normal times (applicable for Mirae Asset Nifty SDL June 2028 Index Fund, Mirae Asset Nifty AAA PSU Bond Plus SDL Apr 2026 50:50 Index Fund, Mirae Asset CRISIL IBX Gilt Index – April 2033 Index Fund):

The threshold for Triggering Swing Pricing is 10% net flow from the Scheme on a business day. The amount of Swing factor based on the PRC matrix of the Scheme is 0.10%.

The AMC shall use its discretion to trigger swing pricing during normal times.

B. Introduction of Mandatory Swing Pricing in case of ‘Re-opening of the scheme after announcement of winding up’

SEBI vide its letter No. SEBI/HO/IMD/PoD-1/OW/P/2024/24219/1 dated July 30, 2024 (“SEBI Letter”) advised AMFI to add ‘Re-opening of scheme after announcement of winding up’ as one of the parameters for mandatorily triggering swing pricing and to prescribe an indicative range of swing factor for the same. AMFI has announced the norms for the same vide its Best Practice Guideline No. 135/ BP/96-A/ 2024-25 dated October 25, 2024 (“AMFI Best Practice Circular”).

In accordance with the aforementioned AMFI Guidelines, the below mentioned provision’s reference shall be added be included in the Scheme Information Documents (SID) of open-ended debt schemes (except Mirae Asset Overnight Fund) of MAMF:

Re-opening of Scheme after announcement of Winding Up:

In case a scheme which had earlier decided to wind up and subsequently decides to re-open, should apply swing pricing for a minimum period of 7 (seven) working days.

The minimum swing factor would be higher of swing factor suggested by the Board of AMC or as per Swing factor during Normal Times.

Further, in line with the aforesaid SEBI circular, the inclusion of above-mentioned provisions pertaining to enablement of swing pricing on re-opening of Scheme after announcement of Winding Up, would not be construed as a Fundamental Attribute change.

3. Provisions on Creation of Segregated Portfolio/Side Pocketing

Creation of segregated portfolio shall be subject to guidelines specified by SEBI from time to time and includes the following:

1) Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

- a) Downgrade of a debt or money market instrument to 'below investment grade', or
- b) Subsequent downgrades of the said instruments from 'below investment grade', or
- c) Similar such downgrades of a loan rating

2) Segregated portfolio of unrated debt or money market instruments may be created only in case of actual default of either the interest or principal amount.

3) In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as mentioned above and implemented at the ISIN level.

- e) All existing investors in the scheme as on the day of the credit event will be allotted equal number of units in the segregated portfolio as held in the main portfolio.
- f) No redemption and subscription will be allowed in the segregated portfolio. However, upon recovery of any money from segregated portfolio, it will be immediately distributed to the investors in proportion to their holding in the segregated portfolio.
- g) AMC should enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests
- h) Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.

3) If the trustees do not approve the proposal to segregate portfolio, AMC will issue a press release immediately informing investors of the same.

4) In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

Benefits & Features of Creation of Segregated Portfolio:

- 1) Creation of Segregated portfolio helps ensuring fair treatment to all investors in case of a credit event and helps in managing liquidity risk during such events;
- 2) Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio;

Valuation and Processing of Subscription and Redemption Proceeds for which NAV of the day of credit event or subsequent day is applicable will be processed as follows:

Notwithstanding the decision to segregate the debt and money market instrument, the valuation shall take into account the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder.

i. Upon trustees' approval to create a segregated portfolio -

- Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.

4. Short selling/Stock Lending

Short-selling is the sale of shares that the seller does not own at the time of trading. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock he shorted and returns the stock to close out the loan. If the price of the stock has fallen, he can buy the stock back for less than he received for selling it and profits from it (the difference between higher short sale price and the lower purchase price).

However, Short positions carry the risk of losing money and these losses may grow theoretically unlimited if the price increases without limit and shall result into major losses in the portfolio.

In addition, the short selling will also have the risk of inability to borrow the securities by the seller. Then, it might be possible that the short seller will be required to purchase the securities sold short to cover the short even if the price of the security is higher at the time of the short sale.

If a stock starts to rise and a large number of short sellers try to cover their positions at the same time, it can quickly drive up the price even further. This phenomenon is known as a short squeeze. This might result in major losses in the portfolio.
