1. Standard Risk Factors

a. Standard Risk Factors for investments in Mutual Fund

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down. The value of investments may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures; the NAV is also exposed to Price/Interest-Rate Risk and Credit Risk and may be affected inter-alia, by government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee.
- Past performance of the Sponsor and their associates / AMC / Mutual Fund does not guarantee future performance of the Scheme of the PPFAS Mutual Fund.
- The name of the Schemes does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by them towards setting up the Fund.
- The present Scheme is not a guaranteed or assured return scheme.

b. Risk factors of not maintaining average AUM of Rs. 20 crores on half yearly rolling basis (Applicable only for open ended debt oriented schemes)

Open ended debt-oriented schemes shall maintain an average AUM of Rs. 20 crores on half yearly rolling basis. In case, the average AUM falls below Rs. 20 crores, the AMC shall scale up the AUM of such Scheme within a period of six months so as to maintain the average AUM of Rs. 20 crores on half yearly rolling basis, failing which the Scheme shall be wound up in accordance with the provisions of Regulation 39 (2) (c) of SEBI (Mutual Funds) Regulations, 1996 as amended from time to time.

c. Risks associated with different derivative strategies

The AMC, on behalf of the Scheme may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unit holders' interest. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include, the risk of mis-pricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and the decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative

positions for the Scheme.

Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives, trading in derivatives carry a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount.

Other risks in using derivatives include but are not limited to:

a. Credit Risk – This occurs when a counterparty defaults on a transaction before settlement and therefore, the Scheme are compelled to negotiate with another counter party, at the then prevailing (possibly unfavorable) market price, in order to maintain the validity of the hedge. For exchange traded derivatives, the risk is mitigated as the exchange provides a guaranteed settlement but one takes the performance risk on the exchange.

b. Liquidity risk - This risk arises from the inability to sell derivatives at prices that reflect the underlying assets/ rates/ indices, lack of availability of derivative products across different maturities and with various risk appetite.

c. Model Risk – This is the risk of mis–pricing or improper valuation of derivatives.

d. Basis Risk – This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying being hedged for example, when a bond is hedged using a derivative, the change in price of the bond and the change in price of the derivative may not be fully correlated leading to basis risk in the portfolio. The underlying benchmark of a floating rate security might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio. Example: Where swaps are used to hedge an underlying fixed income security, basis risk could arise when the fixed income yield curve moves differently from that of the swap benchmark curve or if there is a mismatch in the tenor of the swap and the fixed income security. Additional Risk viz. Basis Risk associated with imperfect hedging using Interest Rate Futures (IRF): The imperfect correlation between the prices of securities in the portfolio and the IRF contract used to hedge part of the portfolio leads to basis risk. Thus, the loss on the portfolio may not exactly match the gain from the hedge position entered using the IRF.

e. Market Risk: Derivatives are traded in the market and are exposed to losses due to change in the prices of the underlying and/or other assets and change in market conditions and factors. The volatility in prices of the underlying may impact derivative instruments differently than its underlying.

f. Valuation Risk: This is the risk of mis–pricing or improper valuation of derivatives due to inadequate trading data with good volumes.

g. Operational / Systemic Risk: This is the risk arising due to failure of operational processes followed by the exchanges and Over the Counter (OTC) participants for the derivatives trading.

h. Counterparty Risk: Counterparty risk is the risk that losses will be incurred due to the default by the counterparty for OTC derivatives.

i. Exposure Risk: An exposure to derivatives in excess of the hedging requirements can lead to losses. An exposure to derivatives can also limit the profits from a plain investment transaction.

j. Interest Rate Risk: This risk arises from the movement of interest rates in adverse direction. As with all the debt securities, changes in the interest rates will affect the valuation of the portfolios.

d. Other risk factors (viz. Swing pricing, investment in CDMDF, LRM etc.)

i) Liquidity Risk Management Framework: (LRM)

In accordance with SEBI circular and AMFI guidelines (issued from time to time), the AMC has put in place the Liquidity Risk Management Framework which monitors liquidity risk of schemes. As per the prescribed guidelines, the liquidity ratios are calculated, and liquid assets are maintained on a daily basis at scheme level for all open-ended schemes. These ratios address the potential liquidity risk scenarios for schemes. The guidelines also outline the action plan in case there is a difference between the actual outcome and projected outcome.

ii) Investment in CDMDF: -

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus, this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the aforementioned schemes shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

We would further like to bring to the notice of the investors that investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Investors are requested to read detailed disclosure on investment of the schemes in the CDMDF as listed in sub-section 2A. How will the Scheme allocate its assets? And sub-section 2B. Where will the Scheme Invest" in Section "Part II- Information about the scheme".

iii) Swing pricing:

Swing pricing refers to a process for adjusting a fund's net asset value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e., flows into or out of the fund) to the investors associated with that activity during the life of a fund. During market dislocation, following Swing Pricing Framework shall be applicable:

1. The Swing Pricing Framework shall apply in case of scenarios related to net outflows from the schemes.
2. SEBI will determine 'market dislocation' either based on AMFI's recommendation or suo moto.
3. Once market dislocation is declared, SEBI will notify that swing pricing will be applicable for a specified period.
4. Mandatory swing pricing will apply for Applicable Schemes which have:
 - i) High or Very High risk on the risk-o-meter (as of the most recent period at the time of declaration of market dislocation); and
 - ii) Classify themselves in cells A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix.

Impact on investors:

- a. When the swing pricing framework is triggered and swing factor is made applicable (for normal time or market dislocation, as the case may be), both the incoming and outgoing investors shall get NAV adjusted for swing factor.
- b. All redemptions above Rs. 2 lakhs and all subscriptions would be processed at the NAV after applying the swing factor on the day Swing pricing is triggered. Redemptions below 2 lakhs would be processed at the unswung NAV i.e. Normal NAV.

2. Special Considerations

- SEBI vide its Circular no. SEBI/HO/MIRSD/POD-1/P/CIR/2024/81 dated June 10, 2024 and Master Circular for Mutual Funds No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, as amended from time to time, has made it mandatory for all new investors/unitholders to provide nomination details or opt out of nomination in format prescribed by SEBI. The consequences of not furnishing the same, will be as specified by SEBI from time to time. Further, requirement for nomination details or opting out of Nomination is made optional for Unitholders (holding Mutual Folios/ Demat accounts jointly). However, all existing investors/ unitholders are encouraged, in their own interest, to provide 'choice of nomination' for ensuring smooth transmission of securities held by them as well as to prevent accumulation of unclaimed assets in the securities market.

SEBI vide its circular no. SEBI/HO/MIRSD/POD-1/P/CIR/2024/81 dated June 10, 2024, stipulated that:

1. For the existing investors/ unitholders, non-submission of 'choice of nomination shall not result in freezing of Demat Account as well as Mutual Fund folios.
2. Securityholders holding securities in physical form shall be eligible for receipt of any payment including dividend, interest or redemption payment as well as to lodge grievance or avail any service request from the RTA even if 'choice of nomination' is not submitted by these securityholders.
3. All new investors/unitholders shall continue to be required to mandatorily provide the 'Choice of nomination' for demat accounts/ MF Folios (except for jointly held Demat Accounts and Mutual Fund Folios).

Investors/Unitholders are advised to read the instructions carefully before nominating. The AMC can call for such documents from the Nominee as deemed necessary.

- Subject to the approval of Board of Directors of the AMC and Trustee Company and immediate intimation to SEBI, a restriction on redemptions may be imposed by the Scheme under certain exceptional circumstances, which the AMC / Trustee believe that may lead to a systemic crisis or event that constrict liquidity of most securities or the efficient functioning of markets. Please refer to the paragraph "Right to Limit Redemptions" for further details.
- From time to time and subject to the Regulations, the Sponsor, the mutual funds and investment companies managed by them, their associate companies, subsidiaries of the Sponsor and the AMC may invest either directly or indirectly in the Scheme. The funds managed by these associates, the sponsor, subsidiaries of the Sponsor and/or the AMC may acquire a substantial portion of the Scheme's Units and collectively constitute a major Investor in the Scheme. Accordingly, Repurchase/Redemption of Units

held by such funds, associates and Sponsor may have an adverse impact on the Units of the Scheme because the timing of such Repurchase/Redemption may impact the ability of the other Unitholders to redeem their Units.

This has been recommended by SEBI in order to avoid any instance of mis-selling, particularly in advisory based transactions. This would further help tackle the problem of misselling even if the employee /relationship manager/sales person leaves the employment of the distributor. Due to this regulatory change, all employees of distributors who are involved in sale of mutual fund products are required to obtain an Employee Unique Identification Number (EUIN). Applications received without a valid EUIN and / or valid sub-broker code(should be a valid ARN and not an internal code) are subject to rejection by the fund.

ii. Systematic Investment Plan (SIP) Top-UP Facility:

It is a facility wherein an investor who is enrolling for SIP has an option to increase the amount of the SIP installment by a fixed amount at pre-defined intervals. Thus, an investor can progressively start increasing the amount invested, allowing them to gradually increase the investment corpus in a systematic manner. The salient features of this facility are as follows:

1. New investors can opt for it at the time of initiating the SIP. Existing unitholders can opt for it at the time of SIP renewal.

2. Investor can opt for an amount-based Cap whereby they can choose the amount from which the top-ups will cease (even though the SIP will continue at this final amount till the expiry date). In case the top-up amount-based cap is not chosen, the top-up will occur at the chosen frequency (half-yearly /yearly) until the SIP expiry date (Please refer to illustrations 1 - A and 2 - A below).

3. The amount of each such SIP installment cannot exceed the Daily One Time Mandate (OTM) limit for purchases in scheme(s) of PPFAS Mutual Fund from all modes (lump sum as well as SIP). In case of any conflict, such SIP installment will have precedence over any lump sum purchases undertaken on that day. Any lumpsum purchase exceeding the OTM limit will be reversed within three working days of the relevant intimation received from the unitholder's bank.

4. Minimum Top-up Amount for the said facility will be Rs. 500/- & in multiple of Re. 1/- thereafter. Forms where a specific amount is not clearly mentioned are liable to be rejected.

5. Frequency for the Top up facility: Investors can choose either 'Half-Yearly' or 'Yearly' Top-Up increments under Monthly SIP options. In case SIP Top-Up frequency is not mentioned, the default frequency will be considered as 'Yearly' for monthly SIP.

6. The facility is available only for the investors who submit "NACH / One Time Mandate (OTM) Form" mentioning the 'Maximum Amount'. This will limit the total investment to the pre-determined 'maximum amount'.

7. Once the SIP Top-Up upper limit is reached, the Top-Up will be discontinued. However, the SIP will continue at this upper limit for the remaining SIP enrollment period (subject to it not exceeding the daily OTM limit). For further clarification, please refer the illustrations as mentioned below.

8. The initial investment under the SIP Top-UP will be subject to minimum SIP investment requirement applicable from time to time (As on January 1, 2017, this figure is Rs. 1000/-).

9. Once enrolled, the Top-up details cannot be modified. However, investors can choose to cancel the Top-Up, by filling in the relevant Form and continue with the same SIP.

10. For further details and Forms, investors are requested to refer the website (<http://amc.ppfas.com>) or contact the Corporate Office of PPFAS Mutual Fund.

Detailed security/asset-wise valuation policy, procedure & methodology for Investments made by the PPFAS Mutual Fund:

I. Equity and equity related instruments including Currency Derivatives:

Security Type	Valuation Policy
Listed Shares/ Preference Shares / Warrants/Rights	Valuation will be at the closing price at the Principal stock exchange*. If security is not traded on principal stock exchange on a particular valuation day, the closing price at which it is traded on any other stock exchange will be used. If security is not traded on any stock exchange on a particular valuation day, then price at which it is traded on the principal stock exchange or any other stock exchange*, as the case may be, on the earliest previous day will be used provided such date is not more than 30 days prior to the valuation date.
Thinly traded equity shares/ equity-related security	Thinly traded securities will be valued at fair value as per procedures^ determined by the Valuation Committee.
Unlisted Shares/ Preference Shares / Warrants/Rights	Unlisted securities will be valued at fair value as per procedures** determined by the Valuation Committee.
Options	In case of Options, premium received/ paid is marked to market based on settlement price on the relevant stock exchange. If the settlement price is not available on the relevant stock exchange, then fair value as determined by the valuation committee shall be used.
Futures	Outstanding contracts in Futures are valued based on the settlement price on the relevant stock exchange. If the settlement price is not available on the relevant

	exchange, then the settlement price available on other exchange (NSE or BSE) of identical future contracts will be used for valuation. if the contracts are not identical then the fair value as determined by the valuation committee shall be used.
Initial public offering Application (IPO)	These shall be valued as below : (i) Prior to allotment – at the Bid Price. (ii) Post allotment but awaiting listing – at the allotment price
Equity shares invested as an Anchor Investor/ under lock -in	At the discretion of the AMC and with the approval of the valuation committee, post listing, equity shares invested on an Anchor basis may be valued at a price lower than the listed market price available on NSE/BSE by applying a suitable illiquidity discount (If such shares are in lock-in period).
Convertible Debentures	The non-convertible and convertible components of convertible debentures and bonds shall be valued separately. The nonconvertible component would be valued on the same basis as would be applicable to a debt instrument. The convertible component shall be valued on the same basis as would be applicable to an equity instrument. If, after conversion the resultant equity instrument would be traded pari passu with an existing instrument, which is traded, the value of later instrument can be adopted after an appropriate discount for the non-tradability of the instrument during the period preceding conversion. While valuing such instruments, the fact whether the conversion is optional will also be factored in.
Suspended Security	In case trading in an equity security is suspended upto 30 days, then the last traded price would be considered for valuation of that security. If an equity security remains suspended for trading on the stock exchange for more than 30 days, then it would be valued as non-traded security.
Security Lending & Borrowing (SLB)	Security Lending & Borrowing (SLB) will be valued on the basis of amortization.

*In case of non-availability of price from the principal stock exchange i.e. National Stock Exchange (NSE), prices as quoted on Bombay Stock Exchange (BSE) will be used for valuation purposes. For this purpose, only NSE & BSE shall be considered as the recognized stock exchanges.

i. Procedure & Methodology for valuation of thinly traded equity or non-traded equity^

Thinly traded equity/equity related securities are securities which do not have both a trading volume of 50,000 scrips and a trading amount of Rs. 5,00,000/- in a month. In order to determine whether a security is thinly traded, the volumes traded in NSE and BSE exchange shall be considered.

When a security (other than Government Securities, money market and debt securities) is not traded on any stock exchange for a period of thirty days prior to the valuation date, the security shall be treated as a non-traded security.

Thinly traded / non traded securities shall be valued in good faith on the basis of fair valuation principles as follows:

Net Worth Value per share of the company will be derived based on the latest available audited balance sheet, not more than 9 months from close of financial year, net worth per share shall be calculated as [share capital plus free reserves (excluding revaluation reserves) minus Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] divided by Number of Paid up Shares.

Capital Earning Value per share of the company will be derived by capitalization of Earnings per Share based on the latest available balance sheet, with 25% of Average capitalization rate (P/E ratio) for the industry.

Average of Net Worth Value per share and Capital Earning Value per share thus derived, shall be further discounted by 10% for illiquidity to derive fair value of the thinly traded and non-traded security.

In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.

In case where the latest Balance Sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.

In case an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5% of the total assets of the scheme, it shall be valued by the procedure above and the proportion which it bears to the total net assets of the scheme to which it belongs will be compared on the date of valuation.

ii. Procedure & Methodology for valuation of unlisted equity securities**

Valuation of unlisted equity shares of a company shall be valued "in good faith" as below:

a. Based on the latest available audited balance sheet, Net Worth shall be calculated as the lower of item (1) and (2) below:

1. Net Worth per share = [Share Capital + Free Reserves (excluding revaluation reserves) - Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] / Number of Paid up Shares.

2. After taking into account the outstanding warrants and options, Net Worth per share shall again be calculated and shall be = [Share Capital + consideration on exercise of Option and/or Warrants received/receivable by the Company + Free Reserves (excluding Revaluation Reserves) - Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] / Number of Paid up Shares plus Number of Shares that would be obtained on conversion and/or exercise of Outstanding Warrants and Options.

3. The lower of (1) and (2) above shall be used for calculation of Net Worth per share and for further calculation in (c) below.

b. Average capitalisation rate (P/E ratio) for the industry based upon either BSE or NSE data (which shall be followed consistently and changes, if any, noted with proper justification thereof) shall be taken and discounted by 75 per cent. i.e. only 25 per cent of the industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share (EPS) of the latest audited annual accounts will be considered for this purpose.

c. The value as per the Net Worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 15 per cent for illiquidity so as to arrive at the fair value per share.

The above valuation methodology shall be subject to the following conditions:

- a. All calculations shall be based on audited accounts.
- b. If the latest Balance Sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.
- c. If the Net Worth of the company is negative, the share would be marked down to zero.
- d. In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.
- e. In case an individual security accounts for more than 5 per cent of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5 per cent of the total assets of the scheme, it shall be valued in accordance with the procedure as mentioned above on the date of valuation. The AMC's and with the approval of the Trustees, may value at a price lower than the value derived using the above methodology.

iii. Procedure & Methodology for valuation of corporate action securities

On a corporate action, the above stated valuation guidelines may be difficult to adopt due to the non-availability of the balance sheet of the restructured entities in public domain or the resultant securities come up for listing after few days while the valuation required to be carried out effective on the date of the corporate action itself. Besides, in such case there are generally no comparative parameters readily available for carrying out the valuation exercise. Following broad valuation guidelines would be used for the valuation of securities resulting from the corporate actions:.

Shares on De-merger and Other Corporate Action Events –

- a. **Both the shares are traded immediately on de-merger:** In this case both the shares to be valued at respective traded prices.
- b. **Shares of only one company continued to be traded on de-merger:** In such a scenario, the shares of Non Traded/Unlisted would be fairly valued in good faith by AMC on case to case basis. Traded share to be valued at traded price.

The shares of Resulting Company will be valued by residual price methodology which would be the closing value of the shares of De-merged Company on the day before the de-merger less opening value of the shares of De-merged Company immediately post de-merger.

If value of the shares of De-merged Company is equal or in excess of the value of pre de-merger shares, then the shares of Resulting Company will be valued at Zero.

- c. **In case there are more than one Resulting Companies along with the De-merged Company and all or some Resulting Companies are unlisted / non-traded:**

The shares of Resulting Companies will be valued by residual price methodology as explained in point (b) above. The residual value will be allocated into Resulting Companies in the ratio provided as a part of scheme of arrangement or such other ratio as decided by the Valuation Committee. If one of the Resulting Companies is listed / traded, the residual value of unlisted / non-traded Resulting Companies would be further determined by reducing the traded value of listed Resulting Companies from the residual value computed as above.

- d. **Both the shares are not traded on de-merger.**

In such a scenario, the shares of both the companies would be fairly valued in good faith by AMC on

case to case basis.

The traded value of the De-merged Company on the day before the de-merger will be allocated between De-merged Company and Resulting Companies in the ratio provided as a part of scheme of arrangement or such other ratio as decided by the Valuation Committee.

Cost allocation would be done proportionate to the derived value of the resultant scrips or other appropriate basis to be decided on case to case basis depending on the terms of de-merger.

The valuation committee may in specific cases decide to use a different method for valuation by assigning reasons therefore.

- e. In case of merger**, if the shares of the merged entity are not listed / traded, then valuation of the merged entity will be decided on case to case basis depending on the terms of merger and may be valued at previous day closing price of the respective companies prior to merger.

In case of any other type of capital corporate action event, the same to be valued at fair price on case to case basis.

iv. Preference Shares –

Preference share can be convertible or non- convertible. If the non-convertible preference shares are traded then the closing price of the day will be considered for valuation. If the same is non-traded it will be valued at the present value of all the future expected dividend payments and the maturity value, discounted at the bond yield of the issuer.

The value of convertible preference share can be expressed as follows:

Convertible preference shares shall be valued based on the underlying equity. This value shall be further discounted for illiquidity to arrive at fair valuation. Traded convertible preference shares shall be valued based on the closing price.

v. Warrants –

Warrants will be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value arrived will be reduced by appropriate discount. Traded Warrants shall be valued based on the closing price.

vi. Right entitlements –

Right entitlements will be valued as difference between the value of closing price of the underlying equity share and the rights offer price. Right entitlements if traded will be valued at the closing price on Principal stock exchange (NSE). If the entitlements are not traded on NSE but are traded on any other stock exchange the closing price of the exchange where it traded will be considered for valuation.

Non traded rights entitlement will be valued as difference between the value of the underlying equity share (determined as per valuation policy) and the rights offer price. In case the rights offer price is greater than the ex-rights price, the value of the rights share is to be taken as zero.

II. Valuation of Money Market, Debt & Debt Related Instruments

Security Type	Valuation Policy
Government securities (Including, STRIPS, State Development Loans, Treasury Bills and Cash Management Bills)	Irrespective of the residual maturity valuation shall be done at the average prices provided by AMFI approved agencies (CRISIL & ICRA) In case security level prices given by valuation agencies are not available for a new security (which is currently not held by any Mutual Fund), then such security may be valued at the purchase yield on the date of allotment / purchase.
Debt Securities/	Valuation will be done at the average prices provided by AMFI approved

Instruments (Commercial Paper/ Certificate of Deposit /Bonds/ Zero Coupon Bonds / Bills Rediscounting /Floating rate securities /PTC etc.)	agencies (CRISIL & ICRA) In case security level prices given by valuation agencies are not available for a new security (which is currently not held by any Mutual Fund), then such security may be valued at the purchase yield on the date of allotment / purchase.
Interest Rate Swaps (IRS) / Forward rate agreements (FRA)	All OTC derivatives viz. IRS/ FRA's will be valued at the average prices provided by AMFI approved agencies (<i>currently CRISIL and ICRA</i>).
Overnight Money (TREPS/Reverse Repo/ CDR)	Overnight money deployed for less than 30 days will be valued at cost plus the accrual / amortisation. Overnight money deployed for greater than 30 days will be valued at the average prices provided by AMFI approved agencies (<i>currently CRISIL and ICRA</i>). Whenever a security moves from 31 days residual maturity to 30 days residual maturity, the price as on 31st day would be used for amortization from 30th day. In case security level prices given by valuation agencies are not available for a new Reverse Repo (which is currently not held by any Mutual Fund), then such Reverse Repo may be valued at purchase yield on the date of purchase.
Investments in short-term deposits with banks	Investments in short-term deposits with banks will be valued at cost plus the accrual basis.
Interest rate future (IRF)	All IRFs will be valued at daily settlement price on exchange or any other recognized stock exchange i.e. NSE and BSE.

III. Valuation of Money market and Debt securities which are rated below investment grade:

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security assigned by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “Default” if the interest and / or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “Default” grade by a CRA. In this respect, PPFAS Mutual Fund shall promptly inform the Valuation Agencies and the CRAs, any instance of non-receipt of payment of interest and / or principal amount (part or full) in any security.

In the case of instruments with dual rating the same would be considered below investment grade if any of the rating agencies rating that instrument downgrades it to sub investment grade.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by AMFI appointed valuation agencies (CRISIL/ICRA). Till such time the valuation agencies compute the valuation of money market and debt securities classified as below investment grade, such securities shall be valued on the basis of indicative haircut provided by these agencies. These indicative haircuts shall be applied on the date of credit event i.e. migration of the security to sub-investment grade and shall continue till the valuation agencies compute the valuation price of such securities. Further these haircuts shall be updated and refined, as and when there is availability of material information which impacts the haircuts.

Consideration of traded price for valuation:

In case of trades during the interim period between date of credit event and receipt of valuation price from valuation agencies, AMC shall consider such traded price for valuation if it is lower than the price post standard haircut. The said traded price shall be considered for valuation till the valuation price is determined by the valuation agencies.

In case of trades after the valuation price is computed by the valuation agencies as referred above and where the trade price is lower than such computed price, such traded price shall be considered for the purpose of valuation and the valuation price may be revised accordingly.

The trades referred above shall be of a minimum size as determined by valuation agencies.

AMC may deviate from the indicative haircuts and/or the valuation price for money market and debt securities rated below investment grade provided by valuation agencies subject to the following:

- The detailed rationale for deviation from the price post haircut or price provided by the valuation agencies shall be recorded by the AMC.
- The rationale for deviation along with details such as information about the security (ISIN, issuer name, rating etc), price at which security was valued vis-a vis the price provided by the valuation agencies (as applicable) and the impact of such deviation on scheme NAV (in amount and percentage terms) shall be reported to the Board of AMC and Trustees.
- The rationale for deviation along with details as mentioned above shall also be disclosed to the investors

In abnormal situations, market disruptions etc. where current market information may not be obtainable and in case CRISIL and ICRA are unable to provide a security level price for any security on particular day(s), the fund manager(s) will, with the prior approval of Valuation Committee, value the securities appropriately to ensure true and fair valuation.

In case price is not provided by designated agencies, on the date of allotment of security, then:

- a. In case of discounted securities, valuation shall be done at price derived by adding one-day amortisation to the allotment price;
- b. In case of coupon bearing securities, valuation shall be done at allotment price

Beyond 3 business days from the date of allotment of the security, the valuation price would be determined by the Valuation Committee using principle of fair valuation. Necessary documentation shall be maintained in this regard, including the method adopted along with the detailed computation of the fair price.

Brokerage shall be added to the Deal price to compute amortisation.

Treatment of accrued interest, future interest accrual and future recovery:

(i) The treatment of accrued interest and future accrual of interest, in case of money market and debt securities classified as below investment grade or default, is detailed below:

- a. The indicative haircut that has been applied to the principal should be applied to any accrued interest.
- b. In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Treatment of any future recovery in terms of principal or interest:

- a. Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.
- b. Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

(CCIL).

Marketable lot defined by AMFI in consultation with SEBI is as under: -

The following volume criteria shall be used for recognition of trades by valuation agencies :

B. Valuation of securities with Put/Call Options

The option embedded securities would be valued as follows:

i) Securities with Call Option:

The securities with call option shall be valued at the lower of the value as obtained by valuing the security to final maturity and valuing the security to call option.

In case there are multiple call options, the lowest value obtained by valuing to the various call dates and valuing to the maturity date is to be taken as the value of the instrument.

ii) Securities with Put Option:

The securities with put option shall be valued at the higher of the value as obtained by valuing the security to final maturity and valuing the security to put option.

In case there are multiple put options, the highest value obtained by valuing to the various put dates and valuing to the maturity date is to be taken as the value of the instruments.

iii) Securities with both Put and Call Option:

Only securities with put / call options on the same day and having the same put and call option price, shall be deemed to mature on such put / call date and shall be valued accordingly. In all other cases, the cash flow of each put / call option shall be evaluated and the security shall be valued on the following basis:

- Identify a 'Put Trigger Date', a date on which 'price to put option' is the highest when compared with price to other put options and maturity price.
- Identify a 'Call Trigger Date', a date on which 'price to call option' is the lowest when compared with price to other call options and maturity price.
- In case no Put Trigger Date or Call Trigger Date ('Trigger Date') is available, then the valuation would

be done to maturity price. In case one Trigger Date is available, then valuation would be done as to the said Trigger Date. In case both Trigger Dates are available, then valuation would be done to the earliest date.

If a put option is not exercised by a Mutual Fund when exercising such put option would have been in favour of the scheme, in such cases the justification for not exercising the put option shall be provided to the Board of AMC and Trustees.

d) Any put option inserted subsequent to the issuance of the security shall not be considered for the purpose of valuation and original terms of the issue will be considered for valuation.

C. Treatment of Upfront Fees on Trades:

- i) Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.
- ii) Details of such upfront fees should be shared by the AMC on the trade date to the valuation agencies as part of the trade reporting to enable them to arrive at the fair valuation for that date.
- iii) For the purpose of accounting, such upfront fees should be reduced from the cost of the investment in the scheme that made the investment.
- iv) In case upfront fees are received across multiple schemes, then such upfront fees should be shared on a pro-rata basis across such schemes.

D. Segregate Portfolio valuation:

Notwithstanding the decision to segregate the debt and money market instrument in accordance with SEBI Master Circular for Mutual Funds No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, the valuation should consider the credit event and value the portfolio based on the principles of fair valuation. (i.e. realizable value of the assets) in terms of relevant provisions of SEBI (Mutual Funds) Regulation, 1996 and Circular(s) issued thereunder.

Irrespective of the above policy, the valuation committee might adopt valuation principles to align with fair valuation norms.

 - (b) Any extension in the maturity of a money market or debt security shall result in the security being treated as "Default", for the purpose of valuation.
 - (c) If the maturity date of a money market or debt security is shortened and then subsequently extended, the security shall be treated as "Default" for the purpose of valuation.
 - (d) Any put option inserted subsequent to the issuance of the security shall not be considered for the purpose of valuation and original terms of the issue will be considered for valuation.

G. Waterfall mechanism for valuation of money market and debt securities to be used by the valuation agencies (Effective from February 16, 2020):

For arriving at security level pricing, a waterfall mechanism to be used by valuation agencies as provided by AMFI in consultation with SEBI (refer **Annexure II**).

- H. (i) In case the valuation committee is of the opinion that the price feeds provided by AMFI appointed agencies are not provided or prices are not reflective of fair value/ realizable value of the security, the same shall be valued on the basis of guidelines provided by the valuation committee. In approving such valuations, the valuation committee shall follow the principles of fair valuation and provide suitable justification for the same.

(ii) The rationale for deviation along-with details such as information about the security (ISIN, issuer name,

rating etc.), price at which the security was valued vis-a-vis the price as per the valuation agencies and the impact of such deviation on scheme NAV (in amount and percentage terms) shall be reported to the Board of AMC and Trustees. The rationale shall also be disclosed immediately and prominently, under a separate head on the website of AMC.

IV. Valuation of Foreign Securities:

The security issued outside India and listed on the stock exchanges outside India shall be valued as follows:

The security issued outside India and listed on the stock exchanges outside India shall be valued at the closing price on the stock exchange at which it is listed. However, in case a security is listed on more than one stock exchange, the AMC reserves the right to determine the stock exchange, the price of which would be used for the purpose of valuation of that security. Any subsequent change in the reference stock exchange used for valuation will be backed by reasons for such change being recorded in writing by the AMC. Further in case of extreme volatility in the overseas markets, the securities listed in those markets may be valued on a fair value basis.

For valuation of securities registered in the USA, NYSE has been selected as principal stock exchange. If any security is not listed on NYSE, security prices as quoted on NASDAQ will be considered. For securities registered in the UK, LSE (London Stock Exchange) has been selected as principal stock exchange. Securities prices quoted on LSE will be used for valuation purposes.

If a significant event has occurred after security prices were established for the computation of NAV of the Scheme, the AMC reserves the right to value the said securities on fair value basis. When on a particular valuation day, a security has not been traded on the selected stock exchange; the security will be valued in accordance with SEBI guidelines applicable for security listed in India.

Foreign securities shall be valued based on the same day closing price.

On the valuation day, all assets and liabilities denominated in foreign currency will be valued in Indian Rupees at the exchange rate available on Bloomberg. If the exchange rate is not available on Bloomberg, then the RBI reference rate will be considered. The Trustees reserve the right to change the source to determine the exchange rate.

V. Valuation of IDR/ADR/ GDR:

IDR/ADR/GDRs are exchange traded securities and hence closing price of the IDR/ADR/ GDR on the exchange where it is listed will be taken for valuation purpose.

If any American Depository Receipt (ADR)/ Global Depository Receipt (GDR) is traded in OTC (Over the Counter) market, in such cases closing price in OTC market will be considered for valuation of ADR/GDR.

IDR/ADR/GDRs securities shall be valued based on the same day's closing price.

Annexure I

Policy on Inter scheme transfer(s):

Security Type	Inter scheme Policy
Listed Equity Shares	Last traded price to be considered for Inter scheme security quoted on primary stock exchange. In case the last traded price is not available on primary stock exchange then secondary stock exchange price will be considered.
Debt & Money Market Securities (Government Securities/ Treasury bills/ Commercial Paper/ Certificate of Deposit / Bonds/Zero Coupon Bonds/ Bills/Floating rate securities/Securitization, etc.)	<ul style="list-style-type: none">i. IST of Securities will be done as per the average prices provided by AMFI approved agencies currently CRISIL & ICRA.ii. If prices from the valuation agencies are received within the pre agreed TAT as per AMFI, an average of the prices so received shall be used for IST pricing.iii. If price from only one valuation agency is received, that price may be used for IST pricing.iv. If prices are not received from any of the valuation agencies, AMC may determine the price for the IST, in accordance with Clause 3 (a) of Seventh Schedule of SEBI (Mutual Funds) Regulations, 1996

Annexure II

Waterfall Mechanism for Valuation of Money market, Debt and Government securities:

SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019, has laid down broad principles for considering the traded yields for valuation of Debt, money market and government securities. The said circular prescribes AMFI shall ensure valuation agencies have a documented waterfall approach for valuation of Debt & money market securities.

The extract from AMFI best practices circular (135/BP/83/2019-20) dated November 18, 2019 pertaining to the waterfall mechanism is as under:

Part A: Valuation of Money Market and Debt Securities other than Government Securities (“G-Secs”):

1. Waterfall Mechanism for valuation of money market and debt securities:

The following shall be the broad sequence of the waterfall for valuation of money market and debt securities:

- i. Volume Weighted Average Yield (VWAY) of primary reissuances of the same ISIN (whether through book building or fixed price) and secondary trades in the same ISIN;
- ii. VWAY of primary issuances through book building of same issuer, similar maturity (**Refer Note 1 below**);
- iii. VWAY of secondary trades of same issuer, similar maturity;
- iv. VWAY of primary issuances through fixed price auction of same issuer, similar maturity;
- v. VWAY of primary issuances through book building of similar issuer, similar maturity (**Refer Note 1 below**);
- vi. VWAY of secondary trades of similar issuer, similar maturity;
- vii. VWAY of primary issuance through fixed price auction of similar issuer, similar maturity;
- viii. Construction of matrix (polling may also be used for matrix construction);
- ix. In case of exceptional circumstances, polling for security level valuation (**Refer Note 2 below**)

Note 1

Except for primary issuance through book building, polling shall be conducted to identify outlier trades. However, in case of any issuance through book building which is less than INR 100 Cr, polling shall be conducted to identify outlier trades.

Note 2

Some examples of exceptional circumstance would be stale spreads, any event/news in particular sector/issuer, rating changes, high volatility, corporate action or such other event as may be considered by valuation agencies. Here stale spreads are defined as spreads of issuer which were not reviewed/updated through trades/primary/polls in same or similar security/issuers of same/similar maturities in waterfall approach in last 6 months.

Further, the exact details and reasons for the exceptional circumstances which led to polling shall be documented and reported to AMCs. Further, a record of all such instances shall be maintained by AMCs and shall be subject to verification during SEBI inspections.

Note 3

All trades on stock exchanges and trades reported on trade reporting platforms till end of trade reporting time (excluding Inter-scheme transfers) should be considered for valuation on that day.

Note 4

It is understood that there are certain exceptional events, occurrence of which during market hours may lead to significant change in the yield of the debt securities. Hence, such exceptional events need to be factored in while calculating the price of the securities. Thus, for the purpose of calculation of VWAY of trades and identification of outliers, on the day of such exceptional events, rather than considering whole day trades, only those trades shall be considered which have occurred post the event (on the same day).

The following events would be considered exceptional events:

- i. Monetary/Credit Policy
- ii. Union Budget

- iii. Government Borrowing/ Auction Days
- iv. Material Statements on Sovereign Rating
- v. Issuer or Sector Specific events which have a material impact on yields
- vi. Central Government Election Days
- vii. Quarter end days

In addition to the above, valuation agencies may determine any other event as an exceptional event. All exceptional events along-with valuation carried out on such dates shall be documented with adequate justification.

2. Definition of tenure buckets for Similar Maturity

When a trade in the same ISIN has not taken place, reference should be taken to trades of either the same issuer or a similar issuer, where the residual tenure matches the tenure of the bond to be priced. However, as it may not be possible to match the exact tenure, it is proposed that tenure buckets are created and trades falling within such similar maturity be used as per table below.

Residual Tenure of Bond to be priced	Criteria for similar maturity
Upto 1 month	Calendar Weekly Bucket
Greater than 1 month to 3 months	Calendar Fortnightly Bucket
Greater than 3 months to 1 year	Calendar Monthly Bucket
Greater than 1 year to 3 years	Calendar Quarterly Bucket
Greater than 3 years	Calendar Half Yearly or Greater Bucket

In addition to the above:

- a. In case of market events, or to account for specific market nuances, valuation agencies may be permitted to vary the bucket in which the trade is matched or to split buckets to finer time periods as necessary. Such changes shall be auditable. Some examples of market events / nuances include cases where traded yields for securities with residual tenure of less than 90 days and more than 90 days are markedly different even though both may fall within the same maturity bucket, similarly for less than 30 days and more than 30 days or cases where yields for the last week v/s second last week of certain months such as calendar quarter ends can differ.
- b. In the case of illiquid/ semi liquid bonds, it is proposed that traded spreads be permitted to be used for longer maturity buckets (1 year and above). However, the yield should be adjusted to account for steepness of the yield curve across maturities.
- c. The changes / deviations mentioned in clauses (a) and (b) above, should be documented, along with the detailed rationale for the same. Process for making any such deviations shall also be recorded. Such records shall be preserved for verification.

3. Process for determination of similar issuer

Valuation agencies shall determine similar issuers using one or a combination of the following criteria. Similar issuer do not always refer to issuers which trade at same yields, but may carry spreads amongst themselves & move in tandem or they are sensitive to specific market factor/s hence warrant review of spreads when such factors are triggered.

- i. Issuers within same sector/industry and/or
- ii. Issuers within same rating band and/or
- iii. Issuers with same parent/ within same group and/or
- iv. Issuers with debt securities having same guarantors and/or
- v. Issuers with securities having similar terms like Loan Against Shares (LAS)/ Loan Against Property (LAP)

The above criteria are stated as principles and the final determination on criteria, and whether in combination or isolation shall be determined by the valuation agencies. The criteria used for such determination should be documented along with the detailed rationale for the same in each instance. Such records shall be preserved for verification. Similar issuers which trade at same level or replicate each other's movements are used in waterfall approach for valuations. However, similar issuer may also be used just to trigger the review of spreads for other securities in the similar issuer category basis the trade/news/action in any security/ies within the similar issuer group.

4. Recognition of trades and outlier criteria

i. Volume criteria for recognition of trades (marketable lot)

As required under Para 1.1.1.1(a) of SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 on Valuation of money market and debt securities, prescribes that the marketable lots shall be defined by AMFI, in consultation with SEBI. In this regard, marketable lot is defined as under.

The following volume criteria shall be used for recognition of trades by valuation agencies:

Parameter	Minimum Volume Criteria for marketable lot
Primary	INR 25 cr for both Bonds/NCD/CP/ CD and other money market instruments
Secondary	INR 25 cr for CP/ CD, T-Bills and other money market instruments
Secondary	INR 5 Cr for Bonds/NCD/ G-secs

Trades not meeting the minimum volume criteria i.e. the marketable lot criteria as stated above shall be ignored.

ii. Outlier criteria

It is critical to identify and disregard trades which are aberrations, do not reflect market levels and may potentially lead to mispricing of a security or group of securities. Hence, the following broad principles would be followed by valuation agencies for determining outlier criteria.

- a. Outlier trades shall be classified on the basis of liquidity buckets (Liquid, Semi-liquid, Illiquid). Price discovery for liquid issuers is generally easier than that of illiquid issuers and hence a tighter pricing band as compared to illiquid issuers would be appropriate.
- b. The outlier trades shall be determined basis the yield movement of the trade, over and above the yield movement of the matrix. Relative movement ensures that general market movements are accounted for in determining trades that are outliers. Hence, relative movement over and above benchmark movement shall be used to identify outlier trades.
- c. Potential outlier trades which are identified through objective criteria defined below will be validated through polling from market participants. Potential outlier trades that are not validated through polling shall be ignored for the purpose of valuation.
- d. The following criteria shall be used by valuation agencies in determining Outlier Trades:

Liquidity Classification	Bps Criteria (Yield movement over Previous Day yield after accounting for yield movement of matrix)		
	Upto 15 days	15-30 days	Greater than 30 days
Liquid	30 bps	20 bps	10 bps

Semi-liquid	45 bps	35 bps	20 bps
Illiquid	70 bps	50 bps	35 bps

The above criteria shall be followed consistently and would be subject to review on a periodic basis by valuation agencies and any change would be carried in consultation with AMFI.

e. In order to ensure uniform process in determination of outlier trades the criteria for liquidity classification shall be as detailed below.

Liquidity classification criteria — Liquid, semi-liquid and Illiquid definition

Valuation agencies shall use standard criteria for classifying trades as Liquid, Semi-Liquid and illiquid basis the following two criteria

- a. Trading Volume
- b. Spread over reference yield

Such criteria shall be reviewed on periodic basis in consultation with AMFI.

Trading Volume (Traded days) based criteria:

Number of unique days an issuer trades in the secondary market or issues a new security in the primary market in a calendar quarter

- Liquid → >= 50% of trade days
- Semi liquid → > = 10% to 50% trade days
- Illiquid → <10 % of trade days

Spread based criteria:

Spread over the matrix shall be computed and based on thresholds defined, issuers shall be classified as liquid, semi liquid and illiquid. For bonds thresholds are defined as upto 15 bps for liquid; >15-75 bps for semi-liquid; > 75 bps for illiquid. (Here, spread is computed as average spread of issuer over AAA Public Sector Undertakings/Financial Institutions/Banks matrix), For CP/ CD- upto 25 bps for liquid; >25-50 bps for semiliquid; > 50 bps for illiquid. (Here, spread is computed as average spread of issuer over A1+/AAA CD Bank matrix).

The thresholds shall be periodically reviewed and updated having regard to the market.

The best classification (liquid being the best) from the above two criteria (trading volume and spread based) shall be considered as the final liquidity classification of the issuer. The above classification shall be carried out separately for money market instruments (CP/ CDs) and bonds.

5. Process for construction of spread matrix:

Valuation agencies shall follow the below process in terms of calculating spreads and constructing the matrix.

Step 1	<p>Segmentation of corporates –</p> <p>The entire corporate sector is first categorised across following four sectors i.e. all the corporates will be catalogued under one of the below mentioned bucket:</p> <ol style="list-style-type: none"> 1. Public Sector Undertakings/Financial Institutions/Banks; 2. Non-Banking Finance Companies -except Housing Finance Companies; 3. Housing Finance Companies; 4. Other corporates
---------------	---

<p>Step 2</p>	<p>Representative issuers – For the aforesaid 4 sectors, representative issuers (Benchmark Issuers) shall be chosen by valuation agencies for only higher rating {I.e. "AAA" or AA+}. Benchmark/Representative Issuer will be identified basis high liquidity, availability across tenure in AAA/AA+ category and have lower credit/liquidity premium. Benchmark Issuers can be single or multiple for each sector.</p> <p>It may not be possible to find representative issuers in the lower rated segments, however in case of any change in spread in a particular rating segment, the spreads in lower rated segments should be suitably adjusted to reflect the market conditions. In this respect, in case spreads of benchmark are widening at a better rated segment, then adjustments should be made across lower rated segments, such that compression of spreads is not seen at any step. For instance, if there is widening of spread of AA segment over the AAA benchmark, then there should not be any compression in spreads between AA and A rated segment and so on.</p>
<p>Step 3</p>	<p>Calculation of benchmark curve and calculation of spread —</p> <ol style="list-style-type: none"> 1. Yield curve to be calculated for representative issuers for each sector for maturities ranging from 1 month till 20 years and above. 2. Waterfall approach as defined in Part A (1) above will be used for construction of yield curve of each sector. 3. In the event of no data related to trades/primary issuances in the securities of the representative issuer is available, polling shall be conducted from market participants. 4. Yield curve for Representative Issuers will be created on daily basis for all 4 sectors. All other issuers will be pegged to the respective benchmark issuers depending on the sector, parentage and characteristics. Spread over the benchmark curve for each security is computed using latest available trades/primaries/polls for respective maturity bucket over the Benchmark Issuer. 5. Spreads will be carried forward in case no data points in terms of trades/primaries/polls are available for any issuer and respective benchmark movement will be given.
<p>Step 4</p>	<ol style="list-style-type: none"> 1. The principles of VWAY, outlier trades and exceptional events shall be applicable while constructing the benchmark curve on the basis of trades/primary issuances. 2. In case of rating downgrade/credit event/change in liquidity or any other material event in Representative Issuers, new Representative Issuers will be identified. Also, in case there are two credit ratings, the lower rating to be considered. 3. Residual tenure of the securities of representative issuers shall be used for construction of yield curve.

Part B: Valuation of G-Secs (T-Bill, Cash management bills, G-Sec and SDL)

The following is the waterfall mechanism for valuation of Government securities:

- VWAY of last one hour, subject to outlier validation
- VWAY for the day (including a two quote, not wider than 5 bps on NDSOM), subject to outlier validation
- Two quotes, not wider than 5 bps on NDSOM, subject to outlier validation
- Carry forward of spreads over the benchmark.
- Polling etc.

Note:

1. VWAY shall be computed from trades which meet the marketable lot criteria stated in Part A of these Guidelines.

Outlier criteria: Any trade deviating by more than +/- 5 bps post factoring the movement of

benchmark security shall be identified as outlier. Such outlier shall be validated through polling for inclusion in valuations. If the trades are not validated, such trades shall be ignored.

COMPUTATION OF NAV

A. Policy of computation of NAV

The Net Asset Value (NAV) per Unit of the Scheme(s) will be computed by dividing the net assets of the Scheme(s) by the number of Units outstanding under the Scheme on the valuation date. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time. NAV of Units under each Scheme / Plan shall be calculated as shown below:

$$\text{NAV (Rs) per unit} = \frac{\begin{array}{l} \text{Market or Fair Value of the Scheme's Investments} \\ + \text{Current Assets including Accrued income} \\ - \text{Current Liabilities and Provisions} \end{array}}{\text{No. of Units outstanding under the Scheme / Plan/ Option on the Valuation day}}$$

The AMC will calculate and disclose the NAV of the Scheme(s) at the close of every Business Day.

The AMC will calculate and disclose the first NAV of the Scheme within a period of 5 business days from the date of allotment. Subsequently, the NAVs will be calculated for all the Business Days. Separate NAV will be declared for Direct and Regular Plan (Please refer to SEBI Master circular for Mutual Funds no. SEBI/HO/IMD/IMD-PoD1/P/CIR/2024/90 dated June 27, 2024.

The NAV of the Scheme(s) will be calculated up-to 4 decimals. Units will be allotted up-to 3 decimals.

NAV will also be displayed on the website of the Mutual Fund. In addition, the ISCs would also display the NAV.

The Fund will ensure the repurchase price of the scheme shall not be lower than 95% of the NAV as provided for under the regulations.

B. Policy for computation of NAV in foreign securities

The security issued outside India and listed on the stock exchanges outside India shall be valued as follows:

The security issued outside India and listed on the stock exchanges outside India shall be valued at the closing price on the stock exchange at which it is listed. However, in case a security is listed on more than one stock exchange, the AMC reserves the right to determine the stock exchange, the price of which would be used for the purpose of valuation of that security. Any subsequent change in the reference stock exchange used for valuation will be backed by reasons for such change being recorded in writing by the AMC. Further in case of extreme volatility in the overseas markets, the securities listed in those markets may be valued on a fair value basis.

For valuation of securities registered in the USA, NYSE has been selected as principal stock exchange. If any security is not listed on NYSE, security prices as quoted on NASDAQ will be considered. For securities registered in the UK, LSE (London Stock Exchange) has been selected as principal stock exchange. Securities prices quoted on LSE will be used for valuation purposes.

If a significant event has occurred after security prices were established for the computation of NAV of the Scheme, the AMC reserves the right to value the said securities on fair value basis. When on a particular valuation day, a security has not been traded on the selected stock exchange; the security will be valued in accordance with SEBI guidelines applicable for security listed in India.

Foreign securities shall be valued based on the same day closing price.

On the valuation day, all assets and liabilities denominated in foreign currency will be valued in Indian Rupees at the exchange rate available on Bloomberg. If the exchange rate is not available on Bloomberg then the RBI reference rate will be considered. The Trustees reserve the right to change the source for determining the exchange rate.

Valuation of IDR/ADR/ GDR:

IDR/ADR/GDRs are exchange traded securities and hence closing price of the IDR/ADR/ GDR on the exchange where it is listed will be taken for valuation purpose.

If any American Depository Receipt (ADR)/ Global Depository Receipt (GDR) is traded in OTC (Over the Counter) market, in such cases closing price in OTC market will be considered for valuation of ADR/GDR.

IDR/ADR/GDRs securities shall be valued based on the same day closing price.

C. Procedure in case of delay in disclosure of NAV

In case of any delay, the reasons for such delay would be explained to AMFI in writing. If the NAVs are not available before commencement of Business Hours on the following day due to any reason, the Mutual Fund shall issue a press release giving reasons and explaining when the Mutual Fund would be able to publish the NAVs.

- **Capital Gains Tax**

Note: Period of holding for short term capital asset in respect of units of equity oriented mutual fund schemes is less than or equal to 12 months and in case of other than equity oriented mutual fund units (other than specified mutual funds) where the units are transferred before 23 July 2024, it is less than or equal to 36 months whereas if the units are transferred on or after 23 July 2024 it is less than or equal to 12 months for listed units and less than or equal to 24 months for unlisted units. The MLI, amongst others, includes a "principal purpose test", wherein Tax Treaty benefits can be denied if one of the principal purpose of an arrangement or a transaction was to, directly or indirectly, obtain tax benefit. The MLI has also expanded the scope of permanent establishment to include agent (excluding an independent agent) playing principal role, leading to routine conclusion of contracts without material modification. Know Your Customer (KYC) Compliance

In terms of the Prevention of Money Laundering Act, 2002, the Rules issued there under and the guidelines/circulars issued by SEBI regarding the Anti Money Laundering (AML Laws), all intermediaries, including Mutual Funds, have to formulate and implement a client identification programme, verify and maintain the record of identity and address(es) of investors. In order to bring about uniformity in the Know Your Customer (KYC) process in the securities market, Common KYC Application form and supporting documents shall be used by all SEBI registered intermediaries viz. Mutual Funds, Portfolio Managers, Depository Participants, Stock Brokers, Venture Capital Funds, Collective Investors Schemes, etc. Further, to avoid duplication of KYC process across SEBI registered intermediaries, a mechanism for centralization of the KYC records in the securities market has been developed.

Accordingly, an intermediary shall perform the initial KYC of its clients and upload the details on the system of the KYC Registration Agency (KRA). When the client approaches another intermediary, the intermediary can verify and download the client's details from the system of the KRA. As a result, once the client has done KYC with a SEBI registered intermediary, he need not undergo the same process again with another intermediary. For regulating KRAs, SEBI has formulated the KYC Registration Agency (KRA) Regulations, 2011 which covers the registration of KRAs, functions and responsibilities of the KRAs and intermediaries, code of conduct, data security, etc. KRA system centralizes KYC records in the securities market. To expand the centralized database of the KYC records of the entire securities market, KRAs are required to upload the KYC details of the existing clients of the intermediaries in the current KRA system, in a phased manner. Guidelines in this regard have been issued by SEBI in consultation with the major Stock Exchanges, Depositories, KRAs, AMFI Brokers'

Associations and market participants.

In-Person' Verification (IPV) of clients has been made mandatory for all SEBI registered intermediaries. Asset Management Companies (AMCs) and the distributors who comply with the certification process of National Institute of Securities Market (NISM) or Association of Mutual Funds (AMFI) and have undergone the process of 'Know Your Distributor (KYD)' can perform the IPV for mutual fund investors. However, where applications are received by the mutual funds directly from the clients (i.e. not through any distributor), the IPV performed by the scheduled commercial banks can be relied on. The IPV carried out by any SEBI registered intermediary can be relied upon by the Mutual Fund.

For more details please refer to the section 'How to apply for KYC?' and 'Who can apply for KYC?'.

Since PAN is not mandatory for (a) Micro Systematic Investment Plan (SIP) upto Rs. 50,000 per year per investor and (b) Investments from Investors residing in state of Sikkim, KYC through CVL will not apply. In such cases, KYC will be performed by the AMC/R&TA directly.

In reference to AMFI communication dated January 14, 2020, wherein SEBI has clarified that the AMCs are required to complete the KYC in all cases and obtain PAN in all non-PAN exempt cases before any transaction including redemptions. It was further advised by SEBI to all AMCs/Mutual Funds that it is mandatory to complete the KYC requirements for all unitholders, including for all joint holders and the guardian in case of folio of a minor investor.

Accordingly, financial transaction (including redemptions, switches and all type of systematic plans) and non-financial requests will not be processed if the unit holders have not completed KYC requirements.

Unitholders are further advised to use applicable KYC Form for completing the KYC requirements and submit the form at the point of acceptance. Further, upon updation of PAN details with KRA (KRA-KYC)/CERSAI(CKYC), the unitholders are requested to intimate PPFAS AMC or Registrar and Transfer Agent (RTA i.e. CAMS) their PAN information along with the folio details for updation in our records.

Effective 1 April 2024, investors have to ensure that Name and Date of birth in the application of all holder including Guardian in case of Minor needs to match with the PAN to avoid any impact on financial and non-financial transaction.

If a transferee becomes a holder of the Units by operation of law or upon enforcement of a pledge, then the AMC shall, subject to production of such evidence and submission of such documents, which in their opinion is sufficient, proceed to effect the transfer, if the intended transferee is otherwise eligible to hold the Units.

In case the Unit holder holds Units in a single name, Units shall be transmitted in favour of the nominee where the Unit holder has appointed a nominee upon production of death certificate or any other documents to the satisfaction of the Mutual Fund/AMC. If the Unit holder has not appointed a nominee or in the case where the nominee dies before the Unit holder, the Units shall be transmitted in favour of or as otherwise directed by the Unit holder's legal representative(s) on production of the death certificate and / or any other documents to the satisfaction of the Mutual Fund/AMC. If Units are held by more than one registered Unit holder, then, upon death of one of the Unit holders, the Units shall be transmitted in favour of the remaining Holder(s) (in the order in which the names appear in the register of Unit holders with the Registrar) on production of a death certificate and / or any other documents to the satisfaction of the Mutual Fund/AMC and to the nominee only upon death of all the Unit holders, upon the nominee producing a Death Certificate and / or any other document to the satisfaction of the Mutual Fund / AMC.

B. Information pertaining to Investments by the Schemes of the Fund

1. Derivative strategies

The Scheme may use Derivative instruments like interest rate swaps, Overnight Indexed Swaps ("OIS"), forward rate agreements, interest rate futures (as and when permitted) or such other Derivative instruments as may be permitted under the applicable regulations. Derivatives will be used for the purpose of hedging, and portfolio balancing or such other purpose as may be permitted under the regulations and Guidelines from time to time.

The Fund will be allowed to take exposure in interest rate swaps only on a non-leveraged basis. A swap will be undertaken only if there is an underlying asset in the portfolio. In terms of Circular No. MFD.BC.191/07.01.279/1999-2000 and MPD.BC.187/07.01.279/1999-2000 dated November 1, 1999 and July 7, 1999 respectively issued by RBI permitting participation by Mutual Funds in interest rate swaps and forward rate agreements, the Fund will use Derivative instruments for the purpose of hedging and portfolio balancing. The Fund may also use derivatives for such purposes as may be permitted from time to time. Further, the guidelines issued by RBI from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to by the Mutual Fund.

IRS and FRA do also have inherent credit and settlement risks. However, these risks are substantially reduced as they are limited to the interest streams and not the notional principal amounts.

Investments in Derivatives will be in accordance with the extant Regulations / guidelines. Presently, Derivatives shall be used for hedging and / or portfolio balancing purposes, as permitted under the Regulations. The circumstances under which such transactions would be entered into would be when, for example using the IRS route it is possible to generate better returns / meet the objective of the Scheme at a lower cost. e.g. if buying a 2 Yr FBIL Mibor based instrument and receiving the 2 Yr swap rate yields better return than the 2 Yr AAA corporate, the Scheme would endeavour to do that. Alternatively, the Scheme would also look to hedge existing fixed rate positions if the view on interest rates is that it would likely rise in the future.

The following information provides a basic idea as to the nature of the Derivative instruments proposed to be used by the Fund and the benefits and risks attached therewith. Please note that the examples have been given for illustration purposes only.

2. Swing Pricing

Pursuant to SEBI Master Circular for Mutual Funds No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 ("the Circular"), following provisions pertaining to Mandatory Swing Pricing Framework ('the Swing Framework') shall stand inserted in all open ended debt scheme of PPFAS Mutual Fund with effect from December 28, 2021. However, these provisions were applicable with effect from **March 1, 2022**.

Mandatory Swing Pricing Framework for market dislocation

Swing pricing refers to a process for adjusting a fund's Net Asset Value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e. flows into or out of a scheme) to the investors associated with that activity. This would help to ensure fairness of treatment to all the investors i.e. whether entering, exiting or remaining invested in mutual fund schemes, particularly during market dislocation.

Accordingly, mandatory full swing during market dislocation times shall apply as under:

- The Swing Framework shall apply in case of scenarios related to net outflows from the schemes.
- SEBI will determine 'market dislocation' either based on AMFI's recommendation or suo moto.
- Once market dislocation is declared, SEBI will notify that swing pricing will be applicable for a specified period.
- Thereafter, mandatory swing pricing will apply to Eligible Scheme(s) which:
 - a. have 'High' or 'Very High' risk on the risk-o-meter (as of the most recent period at the time of declaration of market dislocation); **AND**
 - b. classify themselves in the cells A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix
- **Swing factor** as per below matrix shall be made applicable to the eligible schemes and the NAV will be adjusted for the swing factor.

Swing factor			
Max Credit Risk of scheme →	Class A (CRV* >=12)	Class B (CRV* >=10)	Class (CRV* <10)
Max Interest Rate Risk (CRV* <10) of the scheme ↓			
Class I: (Macaulay duration <=1 year)	-	-	C-I : 1.50%
Class II: (Macaulay duration <=3 years)	-	B-II : 1.25%	C-II : 1.75%
Class III: Any Macaulay duration	A-III : 1%	B-III : 1.50%	C-III : 2.00%
* CRV - Credit Risk Value			

Impact on investors: When the Swing Framework is triggered and swing factor is made applicable, both the incoming (unit holders who submit purchase / switch-in requests) and outgoing investors (unit holders who submit redemption / switch out requests) shall get NAV adjusted downwards for swing factor.

Swing pricing shall be made applicable to all unitholders at PAN level with an exemption for redemptions upto Rs. 2 lacs for each scheme.

If there is any exit load applicable as per scheme provisions, the same will be applied on swung NAV.

The swing pricing framework is subject to the operational guidelines issued by SEBI / AMFI from time to time.

Illustration: For e.g. When swing pricing is triggered, the NAV will be adjusted downwards as follows:

Risk-o-meter	PRC	Computed NAV (Rs.)	Swing Applied	Fac	Swing NAV (Rs.)
High /	A-III	.0000	.00%		4.8500
	B-II	.0000	.25%		4.8125
	B-III	.0000	.50%		4.7750
	C-I	.0000	.50%		4.7750
Very High	C-II	.0000	.75%		4.7375
	C-III	.0000	.00%		4.7000

Periodic Disclosures: Disclosures pertaining to NAV adjusted for swing factor shall be made by the AMC in the prescribed format in the Scheme Information Document and in scheme wise Annual Reports and Abridged summary thereof and on the website in case swing pricing framework has been made applicable for a mutual fund scheme.

Further, SEBI vide its letter no. SEBI/HO/IMD/PoD-1/OW/P/2024/24219/1 dated July 30, 2024 and AMFI vide its Best Practices Guidelines Circular No.96-B/2024-25 dated November 04, 2024, has issued a guideline for Swing Pricing Framework for mutual fund schemes during (i) Normal times and (ii) Upon re-opening of a scheme after announcement of winding up.

In view of the above, if Parag Parikh Liquid Fund winds up in future and the AMC reverses the decision of such winding up post announcement, Parag Parikh Liquid Fund shall mandatorily invoke the swing pricing upon re-opening subscriptions and redemption.

3. Provisions on creation of Segregated portfolio/Side pocketing

Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

- Downgrade of a debt or money market instrument to 'below investment grade', or
- Subsequent downgrades of the said instruments from 'below investment grade', or
- Similar such downgrades of a loan rating.

The most conservative rating shall be considered, if there is difference in rating by multiple CRAs, Creation of segregated portfolio shall be based on issuer level credit events as detailed at "Credit Events" and implemented at the ISIN level.

Actual default (for unrated debt or money market instruments)

In case of unrated debt or money market instruments, the actual default of either the interest or principal amount by the issuer.

On occurrence of any default, the AMC shall inform AMFI immediately about the actual default by the issuer. Subsequent to dissemination of information by AMFI about actual default by the issuer, the AMC might segregate the portfolio of debt or money market instruments of the said issuer.

Process of creation of segregated portfolio:

PPFAS AMC will decide on creation of a segregated portfolio on the day of credit event/actual default and will seek approval of PPFAS Trustee. Post that PPFAS AMC will immediately issue a press release disclosing its intention to segregate such debt and money market instruments and its impact on the investors. PPFAS AMC will also disclose that the segregation shall be subject to trustee approval. Additionally, the said press release will be prominently disclosed on the website of the AMC. PPFAS AMC will ensure that till the time the trustee approval is received, which in no case shall exceed 1(one) business day from the day of credit event/actual default, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.

The segregated portfolio shall be effective from the day of credit event/actual default, post approval of Trustee.

PPFAS AMC will issue a press release immediately post approval of PPFAS Trustee with all relevant information pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.

An e-mail or SMS will be sent to all unit holders of the concerned Scheme. The NAV of both the segregated and main portfolio will be disclosed from the day of the credit event. All existing unit holders in the Scheme as on the day of the credit event shall be allotted an equal number of units in the segregated portfolio as held in the main portfolio.

No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolios, PPFAS AMC will enable listing of units of segregated portfolio on recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer request.

If the trustees do not approve the proposal to segregate the portfolio, AMC shall issue a press release immediately informing investors of the same.

Valuation and processing of subscription and redemptions:

The valuation will take into account the credit event and the portfolio will be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder.

All subscription and redemption requests for which NAV of the day of credit event/actual default or subsequent day is applicable will be processed as per the existing circular on applicability of NAV. However, in case of segregated portfolio, applicability of NAV will be as under:

- Investors redeeming their units will get redemption proceeds based on the NAV of the main portfolio and will continue to hold the units of the segregated portfolio.
- Investors subscribing to the Scheme will be allotted units only in the main portfolio based on its NAV.

In case, PPFAS Trustee does not approve the above valuation process, all subscription and redemption applications will be processed based on the NAV of the total portfolio.

Disclosure Requirements:

A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event will be communicated to the investors within 5 working days of creation of the segregated portfolio. Further, adequate disclosure of the segregated portfolio will also appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the Scheme. Further, the NAV of the segregated portfolio will be declared on a daily basis.

The information regarding the number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisements, AMC and AMFI websites, etc. The scheme performance required to be disclosed at various places will include the impact of creation of a segregated portfolio. The scheme performance will clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the

said fall in NAV along with recovery(ies), if any, will be disclosed as a footnote to the scheme performance. These disclosures regarding the segregated portfolio will be carried out for a period of at least 3 years after the investments in the segregated portfolio are fully recovered/ written-off.

The investors of the segregated portfolio will be duly informed of the recovery proceedings of the investments of the segregated portfolio and status update will be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities. Upon recovery of money, whether partial or full, it will be immediately distributed to the investors in proportion to their holding in the segregated portfolio.

Total Expense Ratio (TER) for segregated portfolio:

AMC shall not charge investment and advisory fees on the segregated portfolio. TER (including legal charges and excluding the investment and advisory fees) shall be charged pro- rata basis only on upon recovery of investment in the segregated portfolio. The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. The maximum TER limit shall be same as applicable to the main portfolio. TER in excess of limit shall be borne by AMC. However, the costs related to segregated portfolio shall in no case be charged to the main portfolio. TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.

Monitoring by Trustees:

In order to ensure timely recovery of investments of the segregated portfolio, Trustees will ensure that, PPFAS AMC puts in sincere efforts to recover the investments of the segregated portfolio. Upon recovery of money, whether partial or full, it will be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio. Further, an Action Taken Report (ATR) on the efforts made by PPFAS AMC to recover the investments of the segregated portfolio will be placed in every Trustee meeting till the investments are fully recovered/ written-off.

The Trustees will monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, trustees will ensure that there is a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

Creation of a segregated portfolio will be optional and at the discretion of PPFAS AMC.

Illustration of portfolio segregation:

The below table shows how a security affected by a credit event will be segregated and its impact on investors
