I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

1. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
2. As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down.
3. Past performance of the Sponsors/AMC/Mutual Fund does not guarantee future performance of the scheme.
4. UTI-Fixed Term Income Fund - Series XXVII – VIII (1117 days) (UTI-FTIF-Series XXVII - VIII (1117 days)) is only the name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects or returns. There may be instances where no dividend distribution could be made.
5. The sponsors are not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of ₹10,000/- made by them towards setting up the Fund.
6. **The present scheme is not a guaranteed or assured return scheme.**
7. Statements/Observations made in this Scheme Information Document are subject to the laws of the land as they exist at any relevant point of time.
8. Growth, appreciation, dividend and income, if any, referred to in this Scheme Information Document are subject to the tax laws and other fiscal enactments as they exist from time to time.
9. The NAVs of the Scheme may be affected by changes in the general market conditions, factors and forces affecting capital market, in particular, level of interest rates, various market related factors and trading volumes, settlement periods and transfer procedures.
10. Mutual Funds and securities investments are subject to market risks and the NAVs of the units issued under the scheme may go up or down depending on the factors and forces affecting the capital markets.
11. **Credit Risk:** Bonds /debentures as well as other money market instruments issued by corporates run the risk of down grading by the rating agencies and even default as the worst case. Securities issued by Central/State governments have lesser to zero probability of credit/ default risk in view of the sovereign status of the issuer.
12. **Interest-Rate Risk:** Bonds/ Central Government securities which are fixed income securities, run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The level of interest rates is determined by the rates at which government raises new money through RBI and the price levels at which the market is already dealing in existing securities, rate of inflation etc. The extent of fall or rise in the prices is a function of the prevailing coupon rate, number of days to maturity of a security and the increase or decrease in the level of interest rates. The prices of Bonds/Central Government securities are also influenced by the liquidity in the financial system and/or the open market operations (OMO) by RBI. Pressure on exchange rate of the Rupee may also affect security prices. Such rise and fall in price of bonds/central government securities in the portfolio of the schemes may influence the NAVs of the schemes as and when such changes occur. For a

fixed term scheme, where the maturity of the debt securities in the portfolio are in line with the maturity period of the respective schemes, the interest rate risk may not be there, if the investment is held upto maturity.

13. **Price Risk:** As long as the scheme will be invested, their Net Asset Value (NAV) is exposed to market fluctuations, and their value can go up as well as down. The portfolio of fixed-income securities that the Scheme invest in would be exposed to price changes on a day-to-day basis. These price changes may occur due to instrument-specific factors as well as general macroeconomic conditions. In general, price of fixed-income securities go up when interest rates fall, and vice versa.
14. **Liquidity Risk:** The Indian debt market is such that a large percentage of the total traded volumes on particular days might be concentrated in a few securities. Traded volumes for particular securities differ significantly on a daily basis. Consequently, the schemes might have to incur a significant “impact cost” while transacting large volumes in a particular security. A lower level of liquidity affecting an individual security (ies) or an entire market may have an adverse bearing on the value of the Scheme’s assets. This may more importantly affect its ability to sell particular securities with minimal impact cost as and when necessary to meet requirement of liquidity or to sell stocks in response to triggers such as a specific economic/corporate event. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of a few of the investments.
15. **Risks relating to duration:** Fixed Income securities of any issuer that has higher duration could be more risky in terms of price movements relative to those with lower duration. Thus any impact of interest rate changes would be higher on securities with higher duration irrespective of the status of the issuer of the security.
16. **Non-diversification Risk:** : The scheme may pursue a reasonable degree of diversification adhering to the SEBI guidelines on limits for investments in a single sector, limits on investments in securities issued by a single issuer etc. It may invest a greater proportion of assets in the securities of one issuer / single sector (within the limit permitted by regulation) as compared to a diversified fund. This could have implications for the performance of the Scheme. The Scheme may be more sensitive to economic, business, political or other changes and this may lead to sizeable fluctuation in the Net Asset Value of the Scheme.
17. **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the “interest on interest” component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
18. **Money Market Securities** are subject to the risk of an issuer’s inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.
19. **Trading in derivatives involves certain specific risks like:**
 - a. **Credit Risk:** This is the risk on default by the counter party. This is usually to the extent of difference between actual position and contracted position. This risk is substantially mitigated where derivative transactions happen through clearing corporation.
 - b. **Market Risk:** Market movement may also adversely affect the pricing and settlement of derivative trades like cash trades.
 - c. **Illiquidity Risk:** The risk that a derivative product may not be sold or purchased at a fair price due to lack of liquidity in the market.
 - d. An exposure to derivatives can lead to losses. Success of dealing in derivatives depends on the ability of the fund manager to correctly assess the future market movement and in the

event of incorrect assessment, if any, performance of the schemes could be lower.

- e. Interest Rate Swaps (IRSs) and Forward Rate Agreements (FRAs) do also have inherent credit and settlement risks. However, these risks are substantially less, as they are limited to the interest stream and not the notional principal amount.
- f. Participating in derivatives is a highly specialised activity and entails greater than ordinary investment risks. Notwithstanding such derivatives being used for limited purpose of hedging and portfolio balancing, the overall market in these segments could be highly speculative due to the action of other participants in the market.
- g. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
- h. The risk associated with the use of derivatives are different from or possibly greater than, the risk associated with investing directly in securities and other traditional investments.

20. Scheme Specific Risk Factors & Risk mitigation measures:

- a. The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments, a specific sector or all sectors including debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.
As the scheme is close ended, the assets that mature on or before the date of maturity of the scheme, are purchased immediately after the New Fund Offer and is normally held till the maturity of the scheme thereby nearly eliminating interest rate risks. Thus the impact of risk factor mentioned above would be minimal.
- b. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The inability of the Scheme to make intended securities purchases due to settlement problems could also cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Scheme's portfolio due to the absence of a well developed and liquid secondary market for debt securities would result, at times, in potential losses to the Scheme, in case of a subsequent decline in the value of securities held in the Scheme's portfolio.
- c. Though it is the endeavor of fund manager to invest in debt securities maturing in line with the maturity of the respective Scheme there could be instances of not finding debt instruments with appropriate maturity date and hence there may be reinvestment risk. Investments in debt instruments are subject to reinvestment risks as interest rates prevailing on interest or maturity due dates may differ from the original coupon of the bond, which might result in the proceeds being invested at a lower rate.
- d. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the regulatory limits, the AMC may choose to invest in unlisted securities that offer attractive yields. This may however increase the risk of the portfolio.

- e. The Scheme may use various derivative products as permitted by the Regulations. Use of derivatives requires an understanding of not only the underlying instrument but also of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Usage of derivatives will expose the Scheme to certain risks inherent to such derivatives.
- f. The scheme intends to deploy funds in money market instruments to maintain liquidity. To the extent that some assets/funds are deployed in money market instruments, the scheme will be subject to credit risk as well as settlement risk, which might effect the liquidity of the scheme.

As the said scheme is a close ended scheme with no redemption till maturity, the risk factors mentioned in Point No. b to d above, will be minimal.

Interest Rate Risk / Reinvestment Risk: Scheme would manage the interest rate risk & reinvestment risk by adequately matching the duration of assets in line with the duration of the scheme.

Credit Risk: Scheme would predominantly invest in highly rated securities where there is an internal credit comfort which would reduce the probability of credit risk.

Concentration Risk: The scheme would have modest presence of issuers with reasonable limits which would mitigate the credit concentration risk.

Portfolio Risk: By monitoring the return deviation and adequately managing all the above risks namely interest rate risk, reinvestment risk & credit cum concentration risk the scheme would mitigate the overall portfolio risk.

- g. Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. For e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
- h. Redemption will be done on the maturity date at the Net Asset Value on the date of maturity. As per SEBI guidelines, the AMC/MF shall not redeem the units of the Plan before the date of maturity. Redemption will be done on the maturity date at the Net Asset Value on the date of maturity. As per SEBI guidelines, the AMC/MF shall not redeem the units of the scheme before the date of maturity.

21. Risk associated with Close Ended Scheme

In a close ended scheme, redemption / repurchase shall not be allowed prior to maturity of the Scheme. Redemption will be allowed only on maturity of the Scheme. Scheme will mature at the end of the close ended period. For liquidity purpose units of the scheme are to be listed on Stock Exchange. Investors who wish to trade on the exchange and Investors wishing to exit / redeem before the scheduled maturity may do so through stock exchange mode where the scheme will be listed. For the units listed on the exchange it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units and investor may not get the desired return. Also there may not be sufficient liquidity on the stock exchange for the investors to exit from the stock exchange mode.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. These conditions will be complied with immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfillment with the condition of minimum 20 investors, the Scheme shall be wound up in accordance with Regulation 39 (2) (c) of SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25% holding by a single investor on the date of allotment, the application to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within 5 business days of the date of closure of the New Fund Offer.

5) Debt market in India

(i) Debt Instrument Characteristics:

A Debt Instrument is basically an obligation which the borrower has to service periodically and generally has the following features:

Face Value	:	Stated value of the paper /Principal Amount
Coupon	:	Zero; fixed or floating
Frequency	:	Semi-annual; annual, sometimes quarterly
Maturity	:	Bullet, staggered
Redemption	:	FV; premium or discount
Options	:	Call/Put
Issue Price	:	Par (FV) or premium or discount

A debt instrument comprises of a unique series of cash flows for each paper, terms of which are decided at the time of issue. Discounting these cash flows to the present value at various applicable discount rates (market rates) provides the market price.

(ii) Debt Market Structure:

The Indian Debt market comprises of the Money Market and the Long Term Debt Market.

Money market instruments are Commercial Papers (CPs), Certificates of Deposit (CDs), Treasury bills (T-bills), Repos, Inter-bank Call money deposit, CBLOs etc. They are mostly discounted instruments that are issued at a discount to face value.

Money market instruments have a tenor of less than one year while debt market instruments typically have a tenor of more than one year.

Long Term Debt market in India comprises mainly of two segments *viz.*, the Government securities market and the corporate securities market.

Government securities include central, state and local issues. The main instruments in this market are Dated securities (Fixed or Floating) and Treasury bills (Discounted Papers). The Central Government securities are generally issued through auctions on the basis of 'Uniform price' method or 'Multiple Price' method while State Govt are through on-tap sales.

Corporate debt segment on the other hand includes bonds/debentures issued by private corporates, public sector units (PSUs) and development financial institutions (DFIs). The debentures are rated by a rating agency and based on the feedback from the market, the issue is priced accordingly. The bonds issued may be fixed or floating. The floating rate debt market has emerged as an active market in the rising interest rate scenario. Benchmarks range from Overnight rates or Treasury benchmarks.

Debt derivatives market comprises mainly of Interest Rate Swaps linked to Overnight benchmarks called MIBOR (Mumbai Inter Bank Offered Rate) and is an active market. Banks and corporate are major players here and of late Mutual Funds have also started hedging their exposures through these products.

(iii) Regulators:

The RBI operates both as the monetary authority and the debt manager to the government. In its role as a monetary authority, the RBI participates in the market through open-market operations as well as through Liquidity Adjustment Facility (LAF) to regulate the money supply. It also regulates the bank rate and repo rate, and uses these rates as indirect tools for its monetary policy. The RBI as the debt manager issues the securities at the cheapest possible rate. The SEBI regulates the debt instruments listed on the stock exchanges.

(iv) Market Participants:

Given the large size of the trades, the debt market has remained predominantly a wholesale market.

Primary Dealers

Primary dealers (PDs) act as underwriters in the primary market, and as market makers in the secondary market.

Brokers

Brokers bring together counterparties and negotiate terms of the trade.

Investors

Banks, Insurance Companies, Mutual Funds are important players in the debt market. Other players are Trusts, Provident and pension funds.

(v) Types of security issuance and eligible investors:

Issuer	Instruments	Yields (as on 31.07.2017)	Maturity	Investors
Central Government	Dated Securities	6.30% - 7.08%	1-30 years	Banks, Insurance Co, PFs, MFs, PDs, Individuals, FPI
Central Government	T-Bills	6.30% - 6.12%	364/91 days	Banks, Insurance Co, PFs, MFs, PDs, Individuals, FPI

Corporates	Commercial Papers	6.25% - 6.95%	15 days to 1 yr	Banks, MFs, Fin Inst, Corporates, Individuals, FPIs
Banks	Certificates of Deposit	6.15% - 6.55%	15 days to 1 yr	Banks, Insurance Co, PFs, MFs, PDs, Individuals
Banks	Bonds	7.60% - 7.80%	10-15 years	Banks, Companies, MFs, PDs, Individuals

(vi) Trading Mechanism:

Government Securities and Money Market Instruments

Currently, G-Sec trades are predominantly routed through NDS-OM which is a screen based anonymous order matching systems for secondary market trading in Government Securities owned by RBI. Corporate Debt is basically a phone driven market where deals are concluded verbally over recorded lines. The reporting of trade is done on the NSE Wholesale Debt Market segment.

D. WHERE WILL THE SCHEME INVEST?

- As per Regulation 43(1) of SEBI (Mutual Fund) Regulations, the corpus of the scheme can be invested in any (but not exclusively) of the following instruments.
 - ★ Securities issued /guaranteed by the Central, State, and Local governments (including but not limited to coupon bearing bonds, Zero coupon bonds and treasury bills).
 - ★ Corporate debt (Public & private sector).
 - ★ Debt instruments of domestic government agencies and statutory bodies which may or may not carry a central /state govt guarantee[including but not limited to Municipalities, Public Sector Undertakings, and State Electricity Boards(SEBs)
 - ★ Bonds issued by Banks (public & private sector) and Financial Institutions.

- ★ Any other instruments as may be permitted by RBI/SEBI/other Regulatory authorities from time to time.

The securities as mentioned above could be listed, unlisted, privately placed, secured, unsecured, rated or unrated (post investment in portfolio) and of any maturity. The securities may be acquired through initial public offers, private placements, secondary market transactions, rights offer or negotiated deals.

2. Participating in Derivative Products:

- (i) The scheme may use hedging techniques including dealing in derivative products - like futures and options, warrants, interest rate swaps (IRS), forward rate agreement (FRA) as may be permissible under SEBI (MFs) Regulations.
- (ii) The scheme may take derivatives position based on the opportunities available and in line with the overall investment objective of the scheme. These may be taken to hedge the portfolio and rebalance the same.
- (iii) As per the current norms of UTI AMC, the value of derivative contracts outstanding at any point of time will be limited to 25% of the net assets of the scheme. Such derivative position will comply with overall limits and norms of SEBI Circular No Cir / IMD / DF / 11 / 2010 dated August 18, 2010.
- (iv) Derivatives: A derivative instrument, broadly, is a financial contract whose payoff structure is determined by the value of an underlying security, fixed income index (if any), interest rate etc. Thus a derivative instrument derives its value from some underlying variable.

Swaps:

The exchange of a sequence of cash flows that derive from two different financial instruments. For example, the party receiving fixed in an ordinary Interest Rate Swap receives the excess of the fixed coupon payment over the floating rate payment. Of course, each payment depends on the rate, the relevant day count convention, the length of the accrual period, and the notional amount.

Illustration for Interest Rate Swap:

In a plain vanilla fixed-to-floating interest rate swap, party A makes periodic interest payments to party B based on a variable interest, say MIBOR plus 50 basis points. Party B in turn makes periodic interest payments based on a fixed rate of say 6%. The payments are calculated over the notional amount. The first rate is called variable, because it is reset at the beginning of each interest calculation period to the then current reference rate, such as say MIBOR.

The scheme may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions will be an entity recognised as a market maker by RBI. Further the value of the notional principal in such cases will not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counter party in such transactions will not exceed 10% of the net assets of the scheme.

The Fund may use derivative instruments like Fixed Income Index (if any), Futures, Interest Rate Swaps and Forward Rate Agreements or such other derivative instruments as may be

introduced from time to time for the purpose of hedging and portfolio balancing, as permitted under the Regulations and guidelines from time to time.

Some of the derivative techniques/ strategies that may be used are:-

- (i) The scheme may use hedging techniques including dealing in derivative products - like futures and options, warrants, interest rate swaps (IRS), forward rate agreement (FRA) as may be permissible under SEBI (MFs) Regulations.
- (ii) The scheme may take derivatives position based on the opportunities available and in line with the overall investment objective of the scheme. These may be taken to hedge the portfolio and rebalance the same.
- (iii) As per the current norms of UTI AMC, the value of derivative contracts outstanding at any point of time will be limited to 25% of the net assets of the scheme.

Exposure limits:

- a. The cumulative gross exposure through debt and derivative positions should not exceed 100% of the net assets of the scheme.
- b. Mutual Funds shall not write options or purchase instruments with embedded written options.
- c. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
- d. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
- e. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following
 - (i) Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - (ii) Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point a.
 - (iii) Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - (iv) The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
- f. Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
- g. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point a.

Definition of Exposure in case of Derivative Positions

- h. Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain

derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts.

The AMC retains the right to enter into such derivative transactions as may be permitted by the Regulations from time to time. For risks associated with investments in derivatives investors are requested to refer to Risk Factors of this Scheme Information Document.

E. WHAT ARE THE INVESTMENT STRATEGIES?

The scheme would invest in a diversified portfolio of various rated papers i.e., corporate bonds, debentures, etc which mature on or before the date of maturity of the scheme. As the scheme is a close ended fund with no regular inflows and as redemption is not allowed till maturity, the portfolio normally constructed in the beginning for the tenure of the scheme would have low portfolio turnover. The locked-in portfolio would nearly eliminate interest rate risks providing a potential opportunity for better returns.

Portfolio Turnover Policy:

Definition of Portfolio Turnover - Portfolio Turnover is defined as the least of purchase or sales as a percentage of average size of a fund during any specified period of time. As sales and purchases of securities can be made on daily basis, it would be difficult to estimate with reasonable level of accuracy the likely turnover in portfolios. There could be instances of churning of portfolio to take advantage of trading opportunity existing in the market. But it would be difficult to set the target for the portfolio turnover as it would be a function of purchases/redemptions, general market conditions, trading opportunities, creation of liquidity to meet income distribution etc. The portfolio turnover shall be targeted so as to have return maximisation for the unitholders. At the same time, expenses such as brokerage and transaction cost shall be kept at low level so that it does not affect the earnings of the scheme.

For this Scheme

In view of the nature of the Scheme as there are no purchases/redemptions during the tenure of the Scheme and as the portfolio of the Scheme is maturing on or before the duration of the scheme, there will be low portfolio turnover for the Scheme.

Bank of Baroda

- (a) Bank of Baroda was one of the bankers to the public issue of shares of Jaltarang Motels Limited (“Jaltarang”). The issue opened for public subscription on December 21, 1995 and closed on December 26, 1995.

The prospectus issued by the Company categorically stated that the company’s shares would be listed on the stock exchanges at Ahmedabad and Bombay but permission for listing could be obtained only from Ahmedabad Stock Exchange (ASE).

While ASE accorded approval on March 4, 1996, Bombay Stock Exchange (BSE) rejected the request of the company (Jaltarang) for listing of shares. However, the Bank (Bank of Baroda), on March 25, 1996 transferred a sum of Rs.38,89,218/- collected from the public, to the company’s (Jaltarang) account.

Since BSE had refused to list the company’s shares, the public issue became void in terms of section 73 of the Companies Act necessitating refund of the application money forthwith to the applicants.

The matter came to the notice of SEBI. To protect the interest of applicants SEBI, after holding an inquiry, by its order dated January 19, 2000 directed the bank to refund the sum of Rs.4,031,018/- being the application money with interest at 15% from March 25, 1996 i.e. the day the bank allowed withdrawal of the funds by Jaltarang in respect of funds collected from the public issue.

The Bank preferred an appeal before the Securities Appellate Tribunal against the aforesaid order of SEBI. The tribunal, by its order dated July 27, 2000, rejected the appeal of the Bank. On which the bank filed an appeal (Appeal No.2 of 2000) before the High Court, Mumbai against the said order of the Tribunal. The High Court, Mumbai, on November 13, 2000, granted interim relief of stay of the operation of the orders dated July 27, 2000 of the Securities Appellate Tribunal and January 19, 2000 of SEBI and has further directed that the matter be placed on the board for final hearing.

Present Status: The matter is still pending with High Court Mumbai.

There are no further communication/queries from any regulatory authority to BOBCAPS in the matter.

- (b) The merchant banking division of the Bank of Baroda was the pre-issue lead manager for the public issue of shares of Trident Steels Limited (“Trident”) in November, 1993.

SEBI issued a show cause notice dated April 29, 2004 calling upon the merchant banking division of the Bank to show cause why action should not be taken against it for failing in its duty to exercise due diligence in the above mentioned public issue. SEBI alleged that the merchant banking division of the Bank did not disclose the material fact that 750,000 shares out of the pre issue capital of Trident had been pledged by the directors and shareholders of those shares to the Industrial Finance Branch of the Bank towards enhancement of various credit facilities extended by the Bank to Trident.

In October 1989, the directors and holders of those shares have given an undertaking that as long as the dues of Trident to the Bank are not paid in full, they will not transfer, deal with or dispose off equity or preference shares held by them in the company or any shares that might be acquired in future, without prior written consent of the Bank.

BOBCAPS, in its reply to the show cause notice of SEBI, has submitted that it was the obligation of Trident to give true disclosures and that any punitive action will lie solely against Trident Steels Ltd., its promoters and directors.

Present Status: There are no further communication/queries from SEBI to BOBCAPS in the matter.

The enquiry has been dropped by SEBI.

- (c) The Bank of Baroda had acted as lead managers to the public issue of Kraft Industries Limited (“Kraft”) in May 1995. It is alleged that the Managing Director and Promoter of Kraft Industries Ltd. did not possess the qualifications as mentioned in the prospectus filed for raising the funds.

SEBI required from the Bank being merchant banker to the issue, the copies of qualification certificates of the company’s Managing Director.

On enquiring, the Managing Director of Kraft Industries Ltd. informed the Bank of having lost the certificates in transit. The bank has replied accordingly to SEBI.

The inquiry is still pending.

Present Status: There are no further communication/queries from SEBI to BOBCAPS in the matter.

- (d) M. S .Shoes East Limited (MS Shoes) came out with a public issue of 17,584,800 zero interest unsecured fully convertible debentures in February 1995. The Bank of Baroda was one of the Lead Managers to the issue with responsibility for post issue management and had underwritten the issue up to Rs.150,000,000.

After the closure of the issue, MS Shoes complained to the underwriters that some of the cheques accompanying the application for subscription were returned unpaid resulting in the collected amount falling short of the minimum subscription amount. Therefore MS Shoes called upon the underwriters to discharge their underwriting liability to the extent of proportionate devolution and raised a claim on the bank for Rs.116,665,043 towards devolution of underwriting liability.

The bank declined the claim on the ground that since the issue was declared oversubscribed by the Registrars to the issue no liability can devolve on the Bank under its underwriting commitment.

SEBI has issued an enquiry notice dated July 20, 1995 to the bank, but closed the matter without imposing any penalty on the bank.

Complaint was filed on behalf of MS Shoes, at Vikaspuri Police Station against SBI Capital Markets Limited, the bank, its principal officers including the then CMD and others alleging cheating and breach of trust. The High Court, New Delhi, by order dated December 11, 2000 ordered transfer of the case to Central Bureau of Investigation (CBI).

The investigation by the CBI is still pending.

Present Status: There are no further communication/queries from CBI or SEBI to BOBCAPS in the matter.

The enquiry has been dropped by SEBI.
