## SECTION IV. INTRODUCTION

### A. RISK FACTORS

#### Standard Risk Factors:

- Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- As the price/value/interest rates of the securities in which the Schemes invest fluctuates, the value of your investment in the Schemes may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Schemes.
- The names of the Schemes do not in any manner indicate either the quality of the Schemes or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Schemes beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Mutual Fund.
- The present Schemes are not guaranteed or assured return Schemes.

#### Additional Risk Factors for Foreign Investors:

##### 1. Political Risk

Investments in mutual fund Units in India may be materially adversely impacted by Indian politics and changes in the political scenario in India either at the central, state or local level. Actions of the central government or respective state governments in the future could have a significant effect on the Indian economy, which could affect companies, general business and market conditions, prices and yields of securities in which the Schemes invest.

The occurrence of selective unrest or external tensions could adversely affect the political and economic stability of India and consequently have an impact on the securities in which the Schemes invest. Delays or changes in the development of conducive policy frameworks could also have an impact on the securities in which the Schemes invest.

##### 2. Economic Risk

A slowdown in economic growth or macro-economic imbalances such as the increase in central and state level fiscal deficits may adversely affect investments in the country. The underlying growth in the economy is expected to have a direct impact on the volume of new investments in the country.

##### 3. Foreign Currency Risk

The Schemes are denominated in Indian Rupees (INR) which is different from the home currency for Foreign Investors in the mutual fund Units. The INR value of investments when translated into home currency by Foreign Investors could be lower because of the currency movements. The AMC does not manage currency risk for foreign investors and it is the sole responsibility of the Foreign Investors to manage or reduce currency risk on their own. The Sponsor/Fund/Trustees/AMC are not liable for any loss to Foreign Investors arising from such changes in exchange rates.

##### 4. Convertibility and Transferability Risk

In the event capital and exchange controls are imposed by the government authorities, it would prevent Foreign Investors' ability to convert INR into home currency and/or transfer funds outside India. The convertibility and transferability of INR proceeds into home currency is the responsibility of the Foreign Investors.

#### Scheme Specific Risk Factors

##### • Market Liquidity Risk:

The liquidity of investments made in the Scheme may be restricted by trading volumes, settlement periods and transfer procedures.

Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are un-invested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. By the same token, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.

Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.

However, in closed ended schemes, liquidity risk on account of underlying securities' market liquidity is mitigated as intermediate liquidity is not required. Liquidity access is done through contractual maturity of the security, which is in line with the term of the schemes.

- **Credit Risk**

Fixed income securities (debt and money market securities) are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.

Different types of securities in which the Scheme would invest as given in the SID carry different levels and types of credit risk. Accordingly the Scheme's risk may increase or decrease depending upon their investment patterns. E.g. corporate bonds carry a higher amount of credit risk than Government securities. Further, even among corporate bonds, bonds which are rated AAA are comparatively less risky than bonds which are AA rated.

- **Reinvestment Risk:** Investments made by the Schemes are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the securities in the Schemes are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- **Term Structure of Interest Rates (TSIR) Risk:** The NAV of the Schemes' Units, to the extent that the Scheme is invested in fixed income securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.
- **Rating Migration Risk:** Fixed income securities are exposed to rating migration risk, which could impact the price on account of change in the credit rating. For example: One notch downgrade of a AAA rated issuer to AA+ will have an adverse impact on the price of the security and vice-versa for an upgrade of a AA+ issuer.
- **Concentration Risk:** Concentration risk arises due to concentrated investment in single security or single issuer.
- **Event Risk:** Price risk due to company or sector specific event.
- Investments in the Schemes made in foreign currency by a Unit Holder are subject to the risk of fluctuation in the value of Indian Rupee.
- The underlying benchmark of a floating rate security might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the security.

#### **Risk Factor associated with Listing of Units**

- Trading in the Units of the Schemes on the Exchange may be halted because of market conditions or for reasons in view of the Exchange Authorities or SEBI, rendering trading in the Units of the Schemes inadvisable. In addition, trading of the Units of the Schemes is subject to trading halts caused by extraordinary market volatility and pursuant to the Stock Exchange's/market regulator's 'circuit filter' rules. There can be no assurance that the requirements of the concerned Stock Exchange necessary to maintain the listing of the units of the Schemes will remain unchanged.
- Unit holders may find it difficult or uneconomical to liquidate their investments at any particular time. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. As a result, a Unit holder must be prepared to hold the units until the maturity of the Schemes.
- Although the Units of the Schemes will be listed on the Stock Exchange, there can be no assurance that an active secondary market will develop or be maintained.
- The Units of the Schemes may trade at a significant discount or premium on the Stock Exchange. The NAV of the Schemes will fluctuate in accordance with market supply and demand for the units of the Schemes as well as be affected by changes in NAV.
- **Regulatory Risk:** Any changes in trading regulations by the Stock Exchange or SEBI among other things may also result in a wider premium/ discount to the NAV of the Schemes. Although the Units are proposed to be listed on the Stock Exchange, the AMC and the Trustees will not be liable for any loss suffered by investors due to delay in listing of units of the Schemes on the Stock Exchange or due to connectivity problems with the depositories due to the occurrence of any event beyond their control.
- In case of investments by NRIs during NFO, at the time of redemption of units, TDS will be deducted at the applicable rate. However, in respect of those Unit Holders who have acquired the Units on the Stock Exchange, the Unit Holders would need to provide a certificate from a Chartered Accountant certifying the details of acquisition of Units to the Fund within two days before the maturity of the Scheme, so as to enable the Fund to

deduct TDS at the applicable rates. In the event of such details not being provided, the Fund would deduct TDS on the redemption proceeds at the highest rate of TDS applicable.

- The Trustee reserves the right to list the Units of the Schemes on any other recognized Stock Exchange in India, as may be deemed fit, in which case the investors may face risks related to an undeveloped market, delay in settlements etc.
- There may be acts/omissions on the part of the Stock Exchange resulting in the cancellation of Unit Holder's orders or the execution of orders on erroneous terms.

#### **Risk Factor associated with Close-ended Schemes**

Investing in close-ended Schemes is more appropriate for seasoned investors. A close-ended Scheme endeavors to achieve the desired returns only at the scheduled maturity of the Scheme. Investors who wish to exit/redeem before the scheduled maturity date may do so through the stock exchange mode, if they have opted to hold Units in a demat form, by mentioning their demat details on the NFO application form. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. Hence, Unit Holders who sell their Units in a Scheme prior to maturity may not get the desired returns.

#### **B. RISK MANAGEMENT STRATEGIES**

**(i) Interest Rate Risk:** Fall in the value of the portfolio due to upward movement of interest rates - Although this risk exists in a fixed income portfolio, the closed ended nature of the Scheme mitigates the risk as portfolio construction at the time of inception leads to creation of a portfolio with securities whose maturity date is in line with the maturity date of the Scheme.

**(ii) Credit Risk:** Credit Risk associated with fixed income securities will be managed by making investments in securities issued by borrowers, which have a good credit profile. The credit research process includes a detailed in-house analysis and due diligence. Limits are assigned for each of the issuer (other than government of India); these limits are for the amount as well as maximum permissible tenor for each issuer. The credit process ensures that issuer level review is done at inception as well as periodically by taking into consideration the balance sheet and operating strength of the issuer.

**(iii) Rating Migration Risk:** The endeavour is to invest in high grade/quality securities. The due diligence performed by the fixed income team before assigning credit limits and the periodic credit review and monitoring should address company-specific issues.

**(iv) Liquidity Risk:** High impact costs for liquidation of securities held in the portfolio - In a closed ended product, liquidity risk on account of underlying securities' market liquidity is mitigated as intermediate liquidity is not required. Liquidity access is done through contractual maturity of the security, which is in line with the term of the closed ended Scheme.

**(v) Concentration Risk:** Concentrated investment in a single security or a single issuer - we follow SEBI prescribed norms on maximum concentration to single issuers.

**(vi) Event Risk:** Price risk due to company or sector specific event - The endeavour is to invest in securities of issuers, which have high balance sheet strength in the investment horizon to eliminate single company risk.

#### **C. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEMES**

### **Overview of Debt Market in India**

The Indian bond market comprises mainly of Government securities; bonds issued by Public Sector Undertakings (PSU), Development Financial Institutions (DFI) and Infrastructure-related agencies; debentures and money market instruments issued by corporate sectors and banks. The Government of India routinely issues Government securities and Treasury bills for liquidity and fiscal management. While the Government issues Treasury bills for 91 days, 182 days and 364 days in a discounted form, coupon-bearing Government securities are issued for maturity ranging from 1 year to as high as 30 years. Both Treasury bills and coupon-bearing securities are auctioned by the RBI on behalf of the Government of India. The Indian bond market has also witnessed increased issuance of bonds from Government-sponsored institutions, DFIs, and infrastructure-related agencies since 1995. These bonds are rated by credit rating agencies like CRISIL, ICRA, CARE and India Ratings. They are widely held by market participants because of their liquidity and reduced risk perception due to the government stake in some of them.

The Indian corporate sector has also been frequently raising capital through issuance of non-convertible debentures and commercial papers. Most of the money is raised through the "Private placement" route. These debentures are mostly rated by rating agencies. While some of them trade very actively, most of them are not very liquid. Because of this, they normally trade at a marginally higher yield than bonds issued by PSU and other government-sponsored agencies.

As the schemes are close ended scheme with fixed maturity dates, they will not use fixed income derivatives.

### **Overview of Money Market in India**

Money market assets comprise Treasury Bills, Cash Management Bills, Call Money, Triparty Repo (TREPS), Clearcorp Repo Order Matching System (CROMS), Fixed Deposits, Commercial Papers, Certificate of Deposits, BRDS and any other assets approved by the Reserve Bank of India from time to time. Money market assets are liquid and actively traded segment of fixed income markets.

Treasury bills are issued by the Government of India through regular weekly auctions, while Cash Management Bills are issued on an ad-hoc basis. They are mostly subscribed by banks, state governments and other entities. As on 15 Feb 2019, total outstanding treasury bills (including cash management bills) are Rs. 5,27,270 crore.

Certificate of Deposits are issued by scheduled banks for their short-term funding needs. They are normally available for up to 365 days tenor. Certificate of deposits issued by public sector banks are normally rated A1+ (highest short-term rating) by various rating agencies. As on 01 Feb 2019, outstanding Certificate of Deposits are Rs. 1,77,280 crore\*. Certificate of deposits currently trade at a spread of around 117 basis points\*\* over comparable treasury bills as on 25 Feb 2019, for a one year tenor.

Commercial Papers are issued by corporate entities for their short-term cash requirements. Commercial Papers are normally rated A1+ (highest short-term rating). As on 15 Feb 2019, total outstanding Commercial Papers are Rs. 5,24,230 crore\*. Commercial papers trade at around 197 basis points\*\* over comparable treasury bills as on 25 Feb 2019, for a one year tenor.

Call Money, TREPS and CROMS are mainly used by the borrowers to borrow a large sum of money on an over-night basis. While Call Money is an unsecured mode of borrowing, TREPS and CROMS are secured borrowing backed by collaterals approved by the Clearing Corporation of India.
