II. INTRODUCTION

A. Risk Factors

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down. The value of investments may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures; the NAV is also exposed to Price/Interest-Rate Risk and Credit Risk and may be affected inter-alia, by government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- Kotak NASDAQ 100 Fund of Fund is only name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of any of the scheme beyond the initial contribution of Rs.2,50,000 made by it towards setting up the Fund.
- The above mentioned scheme is not guaranteed or assured return scheme.

Scheme Specific Risk Factors

- The Scheme may invest predominantly in the units of overseas mutual fund(s) ETF's and or Index funds based on NASDAQ 100 Index, which invest in equity or equity related securities of top 100 domestic and international non-financial companies listed at NASDAQ Stock Market. Any change in the investment policies or the fundamental attributes of the underlying schemes could affect the performance of the Scheme.
- The Scheme will primarily invest in overseas mutual funds ETF's and or Index funds based on NASDAQ 100 Index. For every such investment, the risk factors of the underlying schemes will be relevant and must be treated as risk factors of Kotak NASDAQ 100 Fund of Fund. The risks in such underlying schemes may relate to factors such as performance of underlying stocks, bonds, derivative instruments, offshore investments, interest rates risks, and exchange risks, to name a few.
- To the extent the assets of the Scheme are invested in overseas funds, the performance, risk profile and liquidity of the Scheme will be directly related to those of the underlying funds.
- The funds in which the Scheme invests may not perform in line with the market and may also not achieve its investment objective. In such a situation, the performance of the Scheme could be affected and its ability to achieve its investment objective may be impaired.
- Investments in underlying schemes will have all the risks associated with such schemes including performance of underlying stocks, derivative investments, off shore investments, stock lending, changes in credit rating, trading volumes, settlement periods, price/interest rate risk, volatility & liquidity in money markets, basis risk, spread risk, re-investment risk, etc.
- The investors should refer to the Scheme Information Documents and the related addendum for the scheme specific risk factors and special consideration of the respective Underlying Schemes.
- Since the Scheme proposes to invest in underlying schemes, the Scheme's performance will depend upon the performance of the underlying schemes and any significant underperformance in even one of the underlying schemes may adversely affect the performance of the Scheme.
- Any change in the investment policies or the fundamental attributes of the underlying schemes may affect the performance of the Scheme.

- The Portfolio disclosure of the Scheme may be limited to providing the particulars of the underlying schemes where the Scheme has invested and may not include the investments made by the underlying schemes.
- The investors of the Scheme shall bear the recurring expenses of the Scheme in addition to the expenses of the underlying schemes. Hence the investor under the Scheme may receive lower pre-tax returns than what they may receive if they had invested directly in the underlying schemes in the same proportions.
- The Portfolio rebalancing may result in higher transaction costs.
- The Scheme's performance may be impacted by exit loads or other redemption charges that may be charged at the time of redemption from the Underlying Schemes. Since the incidence of exit loads on investments made by the Scheme in Underlying Schemes of the Fund is based on first-in, first-out principle, it is anticipated that the impact of such exit loads/redemption charges could be minimal during the normal course of functioning of the Scheme.
- Tracking error may arise due to various reasons that the Scheme has to incur expenses, regulatory policies, lack of liquidity, etc. The Scheme's returns may therefore deviate from those of its Underlying Scheme. However, the Fund would endeavour to keep the tracking error as low as possible.

Risk associated with investing in NASDAQ 100 ETF's and /or Index Funds

- a. Investments in the equity shares of the Companies constituting the Index are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro-economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.
- b. As the units of underlying ETF's are listed on the Stock Exchange, trading in the units may be halted due to market conditions or for reasons that in the view of the Exchange Authorities or Regulator. There could also be trading halts caused by extraordinary market volatility and pursuant to Exchange Authorities and Regulator circuit filter rules and the underlying ETF's would not be able to buy/sell securities in case of subscriptions/redemptions, which may impact the Scheme. Further, there can be no assurance that the requirements of the exchange necessary to maintain the listing of the Underlying ETF's will continue to be met or will remain unchanged.
- c. Listing and trading of the underlying ETF's are undertaken on the Stock Exchanges within the rules, regulation and policy of the Stock Exchange and Regulator. Any change in trading rules, regulation and policy by the regulatory authority would have a bearing on the trading of the units of the underlying ETF's and its prices.
- d. The NAV of the underlying ETF's and or Index funds reflect the valuation of its investment and any changes in market value of its investments would have a bearing on its NAV. When the units are traded on the Stock Exchange, the units of the underlying ETF's may trade at prices which can be different from the NAV due to various factors like demand and supply for the units of the underlying ETF's, perceived trends in the market outlook, etc.
- e. Market Risk: The underlying ETF's and or Index funds NAV will react to stock market movements. The value of investments in the scheme may go down over a short or long period due to fluctuations in underlying ETF's and or Index funds NAV in response to factors such as performance of companies whose stock comprises the underlying portfolio, economic and political developments, changes in government policies, changes in interest rates, inflation and other monetary factors causing movement in prices of underlying investments.
- f. Index-Related Risk: The underlying ETF's and or Index funds invests in NASDAQ 100 Index securities in the same proportion as the securities have in the Index. Hence, the risk associated with the corresponding Index would be applicable to the underlying ETF's and or index funds. The Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The underlying ETF's and or Index funds would invest in the securities of the Index regardless of investment merit, research, without taking a view of the market and without adopting any defensive measures. The underlying ETF's and or

Index funds would not select securities in which it wants to invest but is guided by the Index. As such the underlying ETF's and or Index funds is not actively managed but is passively managed. There is no guarantee that the underlying ETF's and or Index funds will achieve a high degree of correlation to the Underlying Index and therefore achieve its investment objective.

- g. Management Risk. As the underlying ETF's and or Index funds may not fully replicate the Underlying Index, it is subject to the risk that investment strategy may not produce the intended results.
- h. Concentration Risk. The underlying ETF's and or Index funds may be susceptible to an increased risk of loss, including losses due to adverse occurrences affecting the underlying ETF's and or index funds more than the market as a whole, to the extent that the investments are concentrated in the securities of a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector or asset class.
- i. Currency Risk: As the underlying ETF's and or Index funds will invest in securities which are denominated in foreign currencies, fluctuations in the exchange rates of these foreign currencies may have an impact on the income and value of the underlying ETF's and or index funds. Thus, returns to investors are the result of a combination of returns from investments and from movements in exchange rates. Thus, the Indian rupee equivalent of the net assets, distribution and income may be adversely affected by changes in the exchange rates of respective foreign currencies relative to the Indian Rupee. Restrictions on currency trading that may be imposed by developing market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries. The repatriation of capital to India may also be hampered by changes in the regulations concerning exchange controls or political circumstances as well as the application to it of other restriction on investment.
- j. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the underlying ETF's and or Index funds to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the underlying ETF's and or Index funds portfolio may result, at times, in potential losses to the Scheme, and there can be a subsequent decline in the value of the securities held in the underlying ETF's and or Index funds.
- k. Passive Investments: The underlying ETF's and or Index funds is not actively managed. Since the Underlying Scheme is linked to index, it may be affected by a general decline in the stocks constituting NASDAQ Index. The Scheme as per its investment objective invests in the units of the Underlying ETF's and or Index funds regardless of their investment merit
- l. Equity Securities Risk. Equity securities are subject to changes in value and their values may be more volatile than those of other asset classes.
- m. Tracking Error Risk: Tracking error is the divergence of the underlying ETF's and or Index funds from that of the Underlying Index. Tracking error may occur because of differences between the securities held in the underlying ETF's and or Index Fund's portfolio and those included in the Underlying Index, pricing differences (including differences between a security's price at the local market close and the intrinsic value of a security at the time of calculation of the NAV), transaction costs, the underlying Fund's holding of cash, changes to the Underlying Index or the need to meet various new or existing regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions.
- n. Treaty/ Tax Risk. The Fund rely on the Double Tax Avoidance Agreement (DTAA) between India and Luxembourg/Ireland/other countries for relief from certain Indian taxes. Treaty renegotiation (particularly to introduce a limitation on benefits clause) or future legislative or regulatory changes or other administrative or legal developments, which may result in higher taxes and/or lower returns for the Fund.

Explanatory Note on Specific Risks in Capital Markets and Debt Markets

Investments in Financial Instruments are faced with the following kinds of risks.

Risks associated with Capital Markets or Equity Markets

a. Price fluctuations and Volatility:

Mutual Funds, like securities investments, are subject to market and other risks and there can be neither a guarantee against loss resulting from an investment in the Scheme nor any assurance that the objective of the Scheme will be achieved. The NAV of the Units issued under the Scheme can go up or down because of various factors that affect the capital market in general, such as, but not limited to, changes in interest rates, government policy and volatility in the capital markets. Pressure on the exchange rate of the Rupee may also affect security prices.

b. Concentration / Sector Risk:

When a Mutual Fund Scheme, by mandate, restricts its investments only to a particular sector; there arises a risk called concentration risk. If the sector, for any reason, fails to perform, the portfolio value will plummet and the Investment Manager will not be able to diversify the investment in any other sector. Investments under this scheme will be in a portfolio of diversified equity or equity related stocks spanning across a few selected sectors. Hence the concentration risks could be high.

c. Liquidity Risks:

Liquidity in Equity investments may be affected by trading volumes, settlement periods and transfer procedures. These factors may also affect the Scheme's ability to make intended purchases/sales, cause potential losses to the Scheme and result in the Scheme missing certain investment opportunities. These factors can also affect the time taken by KMMF for redemption of Units, which could be significant in the event of receipt of a very large number of redemption requests or very large value redemption requests. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described in the SAI.

Risks associated with Debt / Money Markets (i.e. Markets in which Interest bearing Securities or Discounted Instruments are traded)

a. Credit/ Repayment Risk:

Securities carry a Credit risk of repayment of principal or interest by the borrower. This risk depends on micro-economic factors such as financial soundness and ability of the borrower as also macro-economic factors such as Industry performance, Competition from Imports, Competitiveness of Exports, Input costs, Trade barriers, Favourability of Foreign Currency conversion rates, etc.

Credit risks of most issuers of Debt securities are rated by Independent and professionally run rating agencies. Ratings of Credit issued by these agencies typically range from "AAA" (read as "Triple A" denoting "Highest Safety") to "D" (denoting "Default"), with about 6 distinct ratings between the two extremes.

The highest credit rating (i.e. lowest credit risk) commands a low yield for the borrower. Conversely, the lowest credit rated borrower can raise funds at a relatively higher cost. On account of a higher credit risk for lower rated borrowers lenders prefer higher rated instruments further justifying the lower yields.

b. Sovereign risk:

The Federal Government of a country (i.e. Central Govt. in case of India) is the issuer of the local currency in that country. The Government raises money to meet its Capital and Revenue

expenditure by issuing Debt or Discounted Securities. Since payment of interest and principal amount has a sovereign status implying no default, such securities are known as securities with sovereign credit. For domestic borrowers and lenders, the credit risk on such Sovereign credit is near zero and is popularly known as "risk-free security" or "Zero-Risk security". Thus Zero-Risk is the lowest risk, even lower than a security with "AAA" rating and hence commands a yield, which is lower than a yield on "AAA" security.

c. Price-Risk or Interest-Rate Risk:

From the perspective of coupon rates, Debt securities can be classified in two categories, i.e., Fixed Income bearing Securities and Floating Rate Securities. In Fixed Income Bearing Securities, the Coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the Floating Rate Securities, on the other hand, the coupon rate changes - 'floats' - with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury Bill.

Fixed Income Securities (such as Government Securities, bonds, debentures and money market instruments) where a fixed return is offered, run price-risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, the payment-frequency of such coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in interest rates in the financial system. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof.

Floating rate securities issued by a government (coupon linked to treasury bill benchmark or a real return inflation linked bond) have the least sensitivity to interest rate movements, as compared to other securities. The Government of India has already issued a few such securities and the Investment Manager believes that such securities may become available in future as well. These securities can play an important role in minimizing interest rate risk on a portfolio.

d. Risk of Rating Migration:

The following table illustrates the impact of change of rating (credit worthiness) on the price of a hypothetical AA rated security with a maturity period of 3 years, a coupon of 10.00% p.a. and a market value of Rs. 100. If it is downgraded to A category, which commands a market yield of, say, 11.50% p.a., its market value would drop to Rs. 98.76 (i.e. 1.24%) If the security is up-graded to AAA category which commands a market yield of, say, 9.60% p.a. its market value would increase to Rs.103.48 (i.e. by 3.48%). The figures shown in the table are only indicative and are intended to demonstrate how the price of a security can be affected by change in credit rating.

Rating	Yield (% p.a.)	Market Value (Rs.)
AA	11.00	100.00
If upgraded to AAA	9.60	103.48
If downgraded to A	11.50	98.76

e. Basis Risk:

During the life of floating rate security or a swap the underlying benchmark index may become less active and may not capture the actual movement in the interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio. Where swaps are used to hedge an underlying fixed income security, basis risk could arise when the fixed income yield curve moves differently from that of the swap benchmark curve.

f. Spread Risk:

In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However depending upon the market conditions the spreads may move adversely or favourably leading to fluctuation in NAV.

g. Reinvestment Risk:

Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently the proceeds may get invested at a lower rate.

h. Liquidity Risk:

The corporate debt market is relatively illiquid vis-a- vis the government securities market. There could therefore be difficulties in exiting from corporate bonds in times of uncertainties. Liquidity in a scheme therefore may suffer. Even though the Government Securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described elsewhere in the SAI.

Risk envisaged and mitigation measures for repo transactions:

Credit risks could arise if the counterparty does not return the security as contracted or interest received by the counter party on due date. This risk is largely mitigated, as the choice of counterparties is largely restricted and their credit rating is taken into account before entering into such transactions. Also operational risks are lower as such trades are settled on a DVP basis.

In the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to us. Thus the scheme may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.

Risk Factors Associated with investing in Foreign Securities:

Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.

To manage risks associated with foreign currency and interest rate exposure, the Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated under the Regulations or by the RBI from time to time.

Overseas investments will be made subject to any/all approvals, conditions thereof as may be stipulated under the Regulations or by RBI and provided such investments do not result in expenses to the Fund in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing.

The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs and overseas regulatory costs.

To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely

affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

Legal and Regulatory Risk - Legal and regulatory changes could occur during the term of the Scheme which may adversely affect it. If any of the laws and regulations currently in effect should change or any new laws or regulations should be enacted, the legal requirements to which the Scheme and the investors may be subject could differ materially from current requirements and may materially and adversely affect the Scheme and the investors. Legislation/ Regulatory guidelines could also be imposed retrospectively.

Taxation Risk - Investment in Offshore Funds poses additional challenges based on the tax laws of each respective country or jurisdiction. The scheme may be subject to a higher level of taxes than originally anticipated and or dual taxation. The Scheme may be subject to withholding or other taxes on income and/or gains arising from its investment portfolio. Further, such investments are exposed to risks associated with the changing / evolving tax / regulatory regimes of all the countries where the Scheme invests. All these may entail a higher outgo to the Scheme by way of taxes, transaction costs, fees etc. thus adversely impacting its NAV; resulting in lower returns to an Investor.

Risks associated with Segregated Portfolio

- Investor holding units of segregated portfolio may not be able to liquidate their holding till the time realisable value is recovered.
- Security comprising of segregated portfolio may realise lower value or may realise zero value.
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

B. Requirement of Minimum Investors in the Scheme

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Creation of segregated portfolio

In accordance with SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2018/160, dated December 28, 2018, and SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2019/127 dated November 07, 2019, provisions have been included for creation of segregated portfolio and enabling fund manager to invest in various instruments / securities available in the securities market in the interest of investors.

Explanations:

1. The term 'segregated portfolio' shall mean a portfolio, comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme.
2. The term 'main portfolio' shall mean the scheme portfolio excluding the segregated portfolio.
3. The term 'total portfolio' shall mean the scheme portfolio including the securities affected by the credit event.

Note 1: As per SEBI circular dated December 28, 2018, credit event is considered for creation of segregated portfolio, however for the purpose of SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2019/127 dated November 07, 2019, 'actual default' by the issuer of such instruments shall be considered for creation of segregated portfolio.

Note 2: Portfolio referred herewith will include interest accrued as well.

Terms and conditions in respect of Creation of segregated portfolio in the scheme:

AMC may create segregated portfolio in the scheme and it shall be subject to guidelines specified by SEBI from time to time including the following:

1. Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:
 - a. Downgrade of a debt or money market instrument to 'below investment grade', or
 - b. Subsequent downgrades of the said instruments from 'below investment grade', or
 - c. Similar such downgrades of a loan rating.
2. In case of difference in rating by multiple CRAs, AMC shall consider the most conservative rating. Creation of segregated portfolio shall be based on issuer level credit events as per above point no. 1 and shall be implemented at the ISIN level.
3. Creation of segregated portfolio shall be optional and at the discretion of Kotak Mahindra Asset Management Company Ltd ('AMC'). It should be created only if the Scheme Information Document (SID) of the scheme has provisions for segregated portfolio with adequate disclosures.

Further, in accordance with SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2019/127 dated November 07, 2019, creation of segregated portfolio in mutual fund schemes has been permitted in respect of unrated debt or money market instruments by mutual fund schemes of an issuer that does not have any outstanding rated debt or money market instruments, subject to the following terms:

- a. Segregated portfolio of such unrated debt or money market instruments may be created only in case of actual default of either the interest or principal amount. As per SEBI circular dated December 28, 2018, credit event is considered for creation of segregated portfolio, however for

the purpose of SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2019/127 dated November 07, 2019, 'actual default' by the issuer of such instruments shall be considered for creation of segregated portfolio.

- b. AMCs shall inform AMFI immediately about the actual default by the issuer. Upon being informed about the default, AMFI shall immediately inform the same to all AMCs. Pursuant to dissemination of information by AMFI about actual default by the issuer, AMCs may segregate the portfolio of debt or money market instruments of the said issuer in terms of SEBI circular dated December 28, 2018.
- c. All other terms and conditions as stated in SEBI circular dated December 28, 2018 shall remain the same.

Process for creation of segregated portfolio:

On the date of the Credit Event the Investment Committee of AMC shall first approve the creation of segregated portfolio and their decision will be recommended to the Board of AMC and the Trustee company for approval.

- a. Once AMC decides to segregate portfolio, it shall
 - seek approval of trustees prior to creation of the segregated portfolio.
 - immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. Kotak Mahindra Mutual Fund should also disclose that the segregation shall be subject to Trustees approval. Additionally, the said press release shall be prominently disclosed on the website of the AMC.
 - ensure that till the time the trustees approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.
- b. Once trustees approval is received by the AMC:
 - i. Segregated portfolio shall be effective from the day of credit event
 - ii. AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.
 - iii. An e-mail or SMS should be sent to all unit holders of the concerned scheme.
 - iv. The NAV of both segregated and main portfolio will be disclosed from the day of the credit event.
 - v. All existing investors in the scheme as on the day of the credit event shall be allotted equal number of units in the segregated portfolio as held in the main portfolio.
 - vi. No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.
- c. If the trustees do not approve the proposal to segregate portfolio, AMC shall issue a press release immediately informing investors of the same.

Valuation and processing of subscriptions and redemptions:

The valuation of the instruments/portfolio shall be done based on the Board approved valuation policy for securities which are rated below investment grade.

All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing circular on applicability of NAV as under:

i. Upon trustees' approval to create a segregated portfolio -

- Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
- Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.

ii. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of 'Total portfolio'.

TER for the Segregated Portfolio

1. AMC shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
2. The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
3. The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
4. The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Risks associated with segregated portfolio

- 1) Investor holding units of segregated portfolio may not be able to liquidate their holding till the time realisable value is recovered.
- 2) Security comprising of segregated portfolio may realise lower value or may realise zero value.
- 3) Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Disclosure Requirements

In order to enable the existing as well as the prospective investors to take informed decision, the following shall be adhered to:

- a. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
- b. Adequate disclosure of the segregated portfolio shall appear in the scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the schemes.
- c. The Net Asset Value (NAV) of the segregated portfolio shall be declared on daily basis.
- d. The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.
- e. The scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The scheme performance should clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery (ies), if any, shall be disclosed as a footnote to the scheme performance.

- f. The disclosures at paragraph 7(d) and 7(e) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
- g. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Monitoring by Trustees

- a. In order to ensure timely recovery of investments of the segregated portfolio, trustees shall ensure that:
- The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
 - Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
 - An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every trustees meeting till the investments are fully recovered/ written-off.
 - The trustees shall monitor the compliance of aforesaid SEBI circular and disclose in the half-yearly trustees reports filed with SEBI, the compliance in respect of every segregated portfolio created.
- b. In order to avoid mis-use of segregated portfolio, trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

If the first SIP investment is through a demand draft or pay order or the initial investment cheque is drawn from a bank account, other than the bank account mentioned in the SIP mandate, the investor has to ensure that the bank details and signatures are attested by the banker of the bank from where the SIP is initiated. Alternatively the investors should provide a copy of the cancelled cheque leaf of the bank account from where the investor intends to do the SIP.

Systematic Transfer Plan (STP)

This facility enables the Unitholders to switch an amount from their existing investments in a Scheme/Plan/Option to another Scheme/Plan/Option of the Fund, which is available for investment at that time, at periodic intervals through a one-time request. The switch can be made Daily, weekly, monthly or quarterly. Under this facility the switch by the Unitholders should be within the same account/ folio number. Investors can select date as any date from 1st to 30th of a given month/ quarter. In case the chosen date is not available /non-business day, the STP will be processed on the immediate next Business Day. The amount so switched shall be reinvested in the other scheme / plan and accordingly, to be effective, the systematic transfer must comply with the redemption rules of transferor scheme and the issue rules of transferee scheme (e.g. exit / entry load etc)

STP registration needs to be submitted to the Registrar/ AMC 7 days prior to the date of commencement of STP. In case the STP commencement date is less than 7 days from the date of submission of registration form and the date opted for, then the same would be registered for the next cycle. The AMC reserves the right to process the STP registration request received for a period lesser than 7 days in the interest of unit holders.

Example: for Monthly STP if the STP date opted is 7th of every month from 7th January and submitted on 3rd January then the registration of this STP will be from 7th February onwards.

This facility offers two options to the Unitholders:

Fixed Option: Under this option, the Unitholder can switch fixed amount of not less than Rs. 1000/- from his Unit account. In this option the switch will commence from the Start Date mentioned by the Unitholder in the application form for the facility. The Units in the Scheme/Plan/Option from which the switch - out is sought will be redeemed at the Applicable NAV of the Scheme/Plan/Option on the respective dates on which such switches are sought and the new Units in the Scheme/Plan/Option to which the switch - in is sought will be created at the Applicable NAV of such Scheme/Plan/Option on the respective dates. If the net asset value of the units outstanding on the transfer date is insufficient to process the withdrawal request, then the entire outstanding units will be processed. And if the available balance falls below Rs 1000 after processing of the last STP installment, then the entire amount will be processed along the last STP installment.

Appreciation Option: Under this option, the Unitholder can seek switch of an amount equal to the periodic appreciation on the investment. Under this option the Unit holder switches only proportionate number of Units, which when multiplied by the applicable NAV is, in amount terms equal to the appreciation in the investment over the last month/quarter.

For both Fixed and appreciation option the provision of minimum redemption and minimum investment amount will not be applicable for transfer / switch transactions made under this facility for both switch out and switch in schemes.

The investor has to mention a "Start Date". The first switch will happen after one month/quarter from the start date. In case the investor purchases additional Units, the amount to be switched would be equal to the appreciation generated on such Units. In the absence of any appreciation as mentioned above, the switch under this option will not be made. The Units in the Scheme/Plan/Option from which the switch - out is sought will be redeemed at the Applicable NAV of the Scheme/Plan/Option on the respective dates on which such switches are sought and the new Units in the Scheme/Plan/Option to which the switch - in is sought will be allotted at the Applicable NAV of such Scheme/Plan/Option on the respective dates.

Systematic Withdrawal Plan:

This facility enables the Unitholders to withdraw (subject to deduction of tax at source, if any) sums from their investments in Scheme at periodic intervals through a one-time request. The withdrawals can be made either Monthly (on 1st, 7th, 14th, 21st or 25th of every month) or Quarterly (on 1st, 7th, 14th, 21st or 25th, as the case may be. In case any of these days fall on non-business day the transaction will be effected on the next business day of the scheme. SWP registration needs to be submitted to the Registrar/ AMC 7 days prior to the date of commencement of SWP. In case the SWP commencement date is less than 7 days from the date of submission of registration form and the date opted for, then the same would be registered for the next cycle. The AMC reserves the right to process the SWP registration request received for a period lesser than 7 days in the interest of unit holders.

Example: for Monthly SWP if the SWP date opted is 7th of every month from 7th January and submitted on 3rd January then the registration of this SWP will be from 7th February onwards.

This facility is available in two options to the Unitholders:

Fixed Option: Under this option, the Unitholder can seek redemption of a fixed amount of not less than Rs. 1000 from his Unit account. In this option the withdrawals will commence from the Start Date (being one of the dates indicated above) mentioned by the Unitholder in the Application Form for the facility. The Units will be redeemed at the Applicable NAV of the respective dates on which such withdrawals are sought. If the net asset value of the units outstanding on the withdrawal date is insufficient to process the withdrawal request, then the entire outstanding units will be processed. And if the available balance falls below Rs. 1000 after processing of the last SWP installment then the entire amount will be processed along the last SWP installment.

Appreciation Option: Under this option, the Unitholder can seek redemption of an amount equal to a periodic appreciation on the investment. The Unitholder redeems only such number of Units, which when multiplied by the Applicable NAV is, in amount terms equal to the appreciation in his investment over the last month / quarter. The investor

would need to indicate in his systematic withdrawal request, the commencement / start date from which the appreciation in investment value should be computed. The withdrawal will commence after one month/quarter (as requested by the investor) from the commencement / start date mentioned by the Unitholder in the Application Form and can, at the investor's discretion be on 1st, 7th, 14th, 21st or 25th of the month / quarter. The Units will be redeemed at the Applicable NAV of the respective dates on which such withdrawals are sought. In case the investor purchases additional Units, the withdrawal amount would include the appreciation generated on such Units as well. In the absence of any appreciation, the redemption under this option will not be made.

For both fixed and appreciation option the provision of minimum redemption amount will not be applicable for redemption made under this facility.

Switching

Unitholders of the Scheme have the option of switching in or out all or part of their investment in the Scheme/ Plan/ Option to any other Option of the Scheme or to any other Scheme / Plan/ Option of the Fund.

A switch has the effect of redemption from a Scheme/Plan/ Option and a purchase in the other Scheme/Plan/Option to which the switching has been done and all the terms and conditions pertaining to redemption and purchase of the Units of the respective Scheme shall apply to a switch, unless otherwise specified.

Switch is affected by redeeming Units from the Scheme/ Plan/Option and investing the net proceeds in the other Scheme/Plan/Option.

D. Computation of NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

The Fund shall value its investments according to the valuation norms (Valuation Policy includes computation of NAV in case of investment in foreign securities), as specified in the Eighth Schedule of the Regulations, or such guidelines / recommendations as may be specified by SEBI from time to time. The broad valuation norms are detailed in the Statement of Additional Information.

NAV of Units under the Scheme will be calculated as shown below:

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current assets including Accrued Income} - \text{Current Liabilities and provisions including accrued expenses}}{\text{No. of Units outstanding under the Scheme/Option.}}$$

The first NAV will be calculated and announced within a period of 5 Business Days from the closure of the NFO period. Subsequently, the NAV for the Schemes and the repurchase prices of the Units will be calculated and announced at the close of each Business Day. The NAV shall be computed upto four decimals for each scheme.

Since this Scheme invests in International Markets, there would be time zone differences between transactions by investors and investments in/sale of securities. As a result, the AMC shall update the NAV of the scheme by 10 am on the subsequent business day.

Illustration: Relating to computation and publication of NAV of the Scheme for a business day (Day T)

Day T	Business day for which NAV is to be declared
