V. RISK FACTORS

1. Standard Risk Factors

a. Standard Risk Factors for investments in Mutual Fund

- i. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- ii. As the price / value / interest rates of the securities in which the Scheme(s) invests fluctuates, the value of your investment in the Scheme(s) may go up or down.
- iii. Past performance of the Sponsors/AMC/Mutual Fund does not guarantee future performance of the Scheme(s).
- iv. The scheme(s) does not in any manner indicate either the quality of the Scheme(s) or its future prospects and returns.
- v. The Sponsors is not responsible or liable for any loss resulting from the operation of the Scheme(s) beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Fund.
- vi. The present scheme(s) is not a guaranteed or assured return scheme(s).

b. Risk factors of not maintaining average AUM of Rs. 20 crore on half yearly rolling basis (Applicable only for open ended debt oriented schemes)

As per para 6.12 of SEBI Master Circular, in the interest of investors it is important that debt oriented schemes have an adequate corpus to ensure adherence to the investment objectives and compliance with investment restrictions specified under SEBI (MF) Regulations. The Scheme(s) shall maintain an average AUM of Rs. 20 crores on half-yearly rolling basis. In case, the average AUM falls below Rs. 20 crores, the AMC shall scale up the AUM of such Scheme(s) within a period of six months so as to maintain the average AUM of Rs. 20 crore on half-yearly rolling basis.

c. Risks associated with different derivative strategies

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with the underlying like stocks and bonds. It requires not only understanding the stocks and bonds but the derivatives as a whole. Derivatives require the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may be in the best interest of the investors but not always turn out to be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.

For detailed risk factors relating to use of Derivatives, the investors are advised to refer to Scheme Specific Risk Factors disclosed in SIDs of respective scheme(s) of the Fund.

d. Other risk factors (viz. Swing pricing, investment in CDMDF, LRM etc.)

This section must be read in conjunction with the relevant sections/disclosures made in the SID(s) of the respective Scheme(s) of the Fund.

▪ **Risk related to Swing Pricing**

‘Swing pricing’ refers to a process for adjusting a scheme’s NAV to effectively pass on transaction costs stemming from net capital activity to the investors associated with that activity during the life of a scheme, excluding ramp-up period or termination. In a liquidity-challenged environment, quoted bid/ask spreads and overall trading costs can widen and may not be representative of the executed prices that can be achieved in the market. Whenever swing pricing is invoked in accordance with the applicable regulatory requirements, the redeeming investors beyond consideration of Rs. 2 lakhs at PAN level may be subject to NAV adjusted by the swing factor which will be lower than the unswung NAV. Further, the declaration of market dislocation is a scenario that could necessitate significantly quicker action than what may occur under the current architecture. This may lead to further liquidity distress in the market.

▪ **Backstop facility in form of investment in Corporate Debt Market Development Fund (‘CDMDF’)**

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund (‘AIF’) in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 (“AIF Regulations”). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus, this backstop facility will help Fund Manager(s) of the Scheme(s) to better generate liquidity during market dislocation to help the Scheme(s) fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (MF) Regulations read with clause 16A.2 of SEBI Master circular on ‘Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund’, the Scheme shall invest 25 bps of its AUM as on December 31, 2022, in the units of the Corporate Debt Market Development Fund (‘CDMDF’). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of the Scheme(s) AUM is invested in units of CDMDF. However, if AUM decreases, there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

▪ **Risk Management framework to mitigate liquidity risk.**

Liquidity is a measure of ease with which an asset can be converted to cash without experiencing material exit barriers or considerable loss of value. Further, Liquidity Risk or mismatch for the fund could be defined as a situation where meeting its financial obligations could be uncertain. The AMC has adopted a

comprehensive liquidity risk management framework to mitigate potential mismatches between the fund's assets and liabilities in order to protect the interest of entering, exiting and residual investors of the fund.

Some of the liquidity management tools which also encompass regulatory requirements implemented by the AMC are listed below:

(a) Liquidity Ratios – One of the factors determining the liquidity of the fund is the composition of its portfolio in terms of its assets as different types of instruments exhibit different market depths. The AMC ensures that the fund is invested in securities with sufficient liquidity by maintaining prescribed liquidity ratios. The fund size, potential heightened redemptions evolving from historical redemption statistics and concentrations of investors and distributors determine these liquidity ratios thus looking at the asset side liquidity in conjunction with the liability side. The ratios are reset and monitored on timely basis by the AMC in line with the regulations.

Calculating and monitoring the Liquidity Ratios defines Liquidity Risk arising from the liability side and covers all potential liquidity risk scenarios upto 99% confidence interval. It also has remedial measures both for managing this risk on an ongoing basis (LR-RaR & LR-CRaR) as well as action plan in case there is a difference between actual outcome and projected outcome. The AMC has deployed remedial courses to address exceptions and a back-testing process to validate and reinforce effectiveness of the ratios.

(b) Potential Risk Class (PRC) Matrix and Risk-o-meter – The liquidity of the fund is also impacted by its duration and credit profile. The fund is classified in terms of the PRC matrix and risk-o-meters for the fund and its benchmark. This is done considering the allowable thresholds of interest rate risk and credit risk as per regulations. The PRC matrix and risk-o-meter of the fund are monitored on timely basis to ensure that the fund is operating within its interest rate and credit risk appetite. Remedial measures to treat exceptions have been put in place by the AMC.

(c) Stress Testing – The ability of the fund to generate liquidity is impacted by the dynamic liquidity conditions in the market. Hence it is not prudent to assume that normal stress-free environment shall always prevail in the market. The AMC monitors impact of adverse events in terms of interest rate risk, liquidity risk and credit risk on the NAV of the fund. The portfolio of the fund is subjected to stress defined by the above and the impact on the fund NAV is compared against dynamic thresholds on timely basis. Deviations if any are addressed according to the regulations to ensure the portfolio is sufficiently prepared to better handle such unprecedented shocks.

(d) Bucketing of Assets and Liabilities – Liquidity of the fund is subject to test if there is a mismatch between the residual maturity of its assets and the redemptions faced by the fund. Therefore, the assets of the fund are segregated into maturity buckets are compared against the thresholds determined in accordance with maximum drawdown experienced by the fund.

(e) Concentration Monitoring – Higher concentration of investors or distributors in a fund could culminate into sizable redemptions which may be difficult to manage if the fund portfolio is not prepared. The AMC monitors the concentration at investor and distributor level and its trend over a period of time to detect potential concerns of large redemptions.

(f) Swing Pricing – Since the nature of the market is dynamic and sensitive to macroeconomics there could be phases of extreme liquidity stress in the market. In such situations the bid-ask spreads of any of the assets could widen beyond expectations which may impact the indicative prices in the market. In such

scenarios subject to the applicable regulatory requirements, swing pricing framework could be invoked to adjust the NAVs of the Scheme(s) for fair treatment to all investors of the Scheme(s).

With all the above-mentioned tools and processes in place which aim to protect the interest of the investors of the fund, the AMC has incorporated a robust liquidity risk management framework.

▪ **Risks associated with segregated portfolio**

The unitholders may note that no redemption and subscription shall be allowed in segregated portfolio. However, in order to facilitate exit to unitholders in segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange. The risks associated in regard to the segregated portfolio are as follows:

- The investors holding units of the segregated portfolio may not be able to liquidate their holdings till the time of recovery of money from the issuer.
- The security comprising the segregated portfolio may not realize any value.
- Listing of units of the segregated portfolio on a recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units of the segregated portfolio on the stock exchange.
- The trading price of units on the stock exchange may be significantly lower than the prevailing Net Assets Value (NAV) of the segregated portfolio.

▪ **Risk associated with Securities Lending**

As with other modes of extensions of credit, there are risks inherent to securities lending. During the period when the security is lent, the Scheme(s) may not be able to sell such security and in turn cannot protect from the falling market price of the said security. Under the current securities lending and borrowing mechanism, the Scheme(s) can call back the securities lent any time before the maturity date of securities lending contract. However, this will be again the function of liquidity in the market and if there are no lenders in the specified security, the Scheme(s) may not be able to call back the security and in the process, the Scheme(s) will be exposed to price volatility. Moreover, the fees paid for calling back the security may be more than the lending fees earned by Scheme(s) at the time of lending the said security and this could result in loss to the Scheme.

2. Requirement Of Minimum Unitholders in the Scheme

For Open Ended Scheme(s): The Scheme shall have a minimum of 20 Unitholders and no single Unitholder shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 Unitholders in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at Applicable NAV. The aforesaid conditions should be complied with in each subsequent calendar quarter on an average basis. In case the Scheme does not have a minimum of 20 Unitholders on an ongoing basis for each calendar quarter, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at

Applicable NAV. If there is a breach of the 25% limit by any Unitholder over the quarter, a rebalancing period of one month would be allowed and thereafter the Unitholder who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said Unitholder to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic Redemption by the Mutual Fund on the Applicable NAV on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

- In the event of substantial investments made by the AMC or the Sponsors or its Shareholders or their associates or group companies, either directly or indirectly in the Scheme, Redemption of units by these entities may have an adverse impact on the performance of the Scheme. Calculation of Flex STP

Under the Flex STP – (as per the Frequency) unit holders will be eligible to transfer fixed amount to be transferred per installment **OR** the amount as determined by the following formula, which is higher:

(Number of installments including the current installment x Fixed amount to be transferred per installment) – market value of the investments through Flex STP in the Transferee Scheme on the date of transfer.

In case of Flex STP, if the amount (as specified by the formula) to be transferred under Flex STP is not available in the Transferor Scheme in the unit holder’s account, the residual amount will be transferred to the Transferee Scheme and Flex STP will be terminated.

Illustration 1: How to calculate the transfer amount?

Flex STP Enrollment Details:

Transferor Scheme	Mahindra Manulife “ABC” Fund – Growth option
Transferee Scheme	Mahindra Manulife “XYZ” Fund – Growth Option
Date and Frequency of Flex STP	15 th – Monthly Interval
Amount of Transfer per installment	Rs 5,000/-
Number of Installments	12
Enrollment Period	January – December

Calculation of Flex STP Installment amount on the date of the fourth installment i.e. 15th April:

- Total Units allotted upto the date of last installment i.e. 15th March is assumed as 1,363.636;
- The NAV of Mahindra Manulife XYZ Fund – Growth Option on 15th April is assumed as Rs 10.75 per unit;

- Hence the market value of the investment in the Transferee Scheme on the date of transfer is Rs 14,659.09 [1,363.636 x Rs 10.75]

The installment amount will be calculated as follows:

Fixed Amount specified at the time of enrollment	Rs 5,000/-
OR	
As determined by the formula	$(Rs\ 5,000 \times 4) - Rs\ 14,659.09 = Rs\ 5,340.91$
whichever is higher	

Hence, on 15th April, the installment amount transferred to the Transferee Scheme will be Rs 5,340.91

Illustration 2: How to calculate the transfer amount?

Flex STP Enrollment Details:

Transferor Scheme	Mahindra Manulife “ABC” Fund
Transferee Scheme	Mahindra Manulife “XYZ” Fund – Growth Option
Date and Frequency of Flex STP	15 th – Monthly Interval
Amount of Transfer per installment	Rs 5,000/-
Number of Installments	12
Enrollment Period	January – December

Calculation of Flex STP Installment amount on the date of the fourth installment i.e. 15th April:

- Total Units allotted upto the date of last installment i.e. 15th March is assumed as 1,276.981;
- The NAV of Mahindra Manulife ABC Fund – Growth Option on 15th April is assumed as Rs 12.50 per unit;
- Hence the market value of the investment in the Transferee Scheme on the date of transfer is Rs 15,962.26 [1,276.981 x Rs 12.50]

The installment amount will be calculated as follows:

Fixed Amount specified at the time of enrollment	Rs 5,000/-
OR	
As determined by the formula	$(Rs\ 5,000 \times 4) - Rs\ 15,962.26 = Rs\ 4,037.74$
whichever is higher	

Hence, on 15th April, the installment amount transferred to the Transferee scheme will be Rs 5,000/-

Note: The Flex STP installment dates in the illustrations above are assumed to be Business Days.

1. Unlisted / Non-traded/ Thinly Traded Equity Shares:

The methodology is given as under: -

- a) Based on the latest available audited Balance Sheet, net worth shall be calculated as follows:

Net Worth per share = [Share Capital + Free Reserves (excluding Revaluation Reserves) – Miscellaneous Expenditure not written off, deferred revenue expenditure, intangible assets and accumulated losses] divided by Number of Paid up Shares.

- b) Average capitalization rate (P/E ratio) for the industry based upon either BSE or NSE data (which should be followed consistently and changes, if any noted with proper justification thereof) shall be taken and discounted by 75% i.e. only 25% of the Industry Average P/E shall be taken as capitalization rate (P/E ratio). Earnings per share of the latest audited annual accounts will be considered for this purpose.

- c) The average of the net worth per share and the capital earning value calculated as above shall be further discounted by 10%, in case of thinly traded and non- traded securities and 15% in case of unlisted securities for ill-liquidity, so as to arrive at the fair value per share.
- d) In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.
- e) In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.
- f) In case an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5% of the total assets of the scheme, it should be valued by the procedure above and the proportion which it bears to the total net assets of the scheme to which it belongs would be compared on the date of valuation.
- g) An unlisted equity share may be valued at a price lower than the value derived using the aforesaid methodology, at the discretion of the AMC and with the prior approval of Trustees, the reasons of the same recorded in writing.

2. **Valuation in case of Corporate Action** – The unlisted equity shares allotted as result of corporate action of demerger/amalgamation will be valued at the intrinsic value on the ex-date. The calculation of intrinsic value shall be reviewed by the Valuation Committee periodically is given as under: -

A) Demerger of Shares: -

Scenario I: In case of demerger, where both the demerged and resulting entities are listed and traded after demerger, the valuation methodology adopted would be the same as in the case of listed equity shares.

Scenario II: In case of demerge where the demerged company is continued to be listed and traded and the resulting entity is unlisted and gets listed at a later date, the valuation of both the entities shall be done as follows: -

Demerged Entity: Valuation methodology adopted would be the same as in the case of listed equity shares.

Resulting Entity: Intrinsic Value to be derived based on market value of the original traded shares on one trading day prior to the ex-date of demerger minus market value of demerged traded shares on the ex-date. However, in case pre trading / special session closing price is available on the ex-date, the same will be used to arrive at market value of demerged traded shares on the ex-date. In case value of the traded share of the Demerged Company is equal or in excess of the value of pre - demerger share, then the non-traded share is to be valued at zero.

Scenario III: Demerger where both the entities i.e. Demerged and Resulting Companies are unlisted and shall get listed at a later date, the valuation shall be done as follows:

Shares of these companies are to be valued equal to the pre demerger value (one trading day prior to the ex-date) up to the date of listing. The market value of the shares to be bifurcated in the ratio of cost of shares as may be obtained by prescribed demerger ratio.

Example: Closing Pre Ex-date Market price* Ratio of Allocation of Assets to Demerged and Resulting Entities

The valuation of shares of these companies would be reviewed by the Valuation committee every thirty days if the security continues to remain unlisted.

B) Amalgamation:-

Scenario I: In case shares are traded on amalgamation, the valuation methodology adopted would be the same as in the case of listed equity shares.

Scenario II: In case where shares are not traded on merger, shares of merged company are to be valued equal to the pre merger value (one trading day prior to the ex-date) upto a period of thirty days from the date of merger. The valuation of shares of these companies would be reviewed by the Valuation committee every thirty days if the security continues to remain unlisted.

3. Preference Shares – Preference share can be convertible or non- convertible.

The non-convertible preference share will be valued at the present value of all the future expected dividend payments and the maturity value, discounted at the expected return on preference share

The value of convertible preference share can be expressed as follows:

$$\text{Price of convertible Preference Share} = \frac{\text{Preference shares dividend}}{\text{Expected return on Preference Share}} \times \text{Face Value}$$

If preference shares are traded on the stock exchange, then the valuation methodology adopted for Listed Preference Shares shall be adopted.

4. Warrants - Warrants will be valued at the value of the underlying equity share which would be obtained in exercise of the warrant as reduced by the amount which would be payable on the exercise of the warrant. The value arrived will be reduced by appropriate discount as decided by the Valuation Committee. If Warrants are traded on the stock exchange, then the valuation methodology adopted for listed equity shares shall be adopted.

5. Right entitlements & Right Shares-

a) Right Entitlements

The right entitlements shall be valued using the below mentioned formulae.

Valuation Price = (Closing Ex-Rights Price- Right Offer Price) of Underlying Equity Share.

In case where the closing price falls below the right offer price, right entitlements value shall be considered as becomes zero. In case the right entitlement is traded on the stock exchanges then the traded price shall be considered for valuation of entitlements.

b) Right Shares

The listed right shares are to be valued as per methodology adopted for listed equity shares. The cost price considered for the right shares would be the offer price paid for the right shares.

6. Suspended Shares:

If a listed security is suspended for a certain period, then up to thirty days the last traded price would be used for valuation and after thirty days the valuation methodology would be decided on a case to case basis and approved by the valuation committee.

- 2) As per AMFI Best Practice Circular no 83 dated Nov 18, 2019, upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of the security. Details of such upfront fees shall be shared by the AMC on the trade date to the valuation agencies as part of the trade reporting to enable them to arrive at the fair valuation for that date. For the purpose of accounting, such upfront fees shall be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, then such upfront fees shall be shared on a pro-rata basis across such schemes.
- 3) The valuation agencies generally provide the security level prices for a new security (which is currently not held by any Mutual Fund) from next business day preceding the date of allotment or purchase. The put option shall be considered as ‘in favour of the scheme’ if the yield of the valuation price ignoring the put option under evaluation is more than the contractual yield / coupon rate by 30 basis points.

- 6) The deemed maturity of perpetual bonds shall be treated as 100 years from the date of issuance of the bond for the purpose of valuation, However, the deemed residual maturity of perpetual bonds issued under Basel III framework for the purpose of valuation of existing as well as new bonds shall be as below:

Time Period	Deemed Residual Maturity of Basel III AT-1 bonds (Years)	Deemed Residual Maturity of Basel III Tier 2 Bonds (Years)

April 01, 2023 onwards	100 years from the date of issuance of the bond.	Contractual Maturity

Macaulay Duration for bonds issued under Basel III framework shall be calculated based on the deemed residual maturity as mentioned in the above table

Further, if the issuer does not exercise call option for any ISIN then the valuation and calculation of Macaulay Duration shall be done considering maturity of 100 years from the date of issuance for AT-1 Bonds and Contractual Maturity for Tier 2 bonds, for all ISINs of the issuer. In addition to the above, if the non-exercise of call option is due to the financial stress of the issuer or if there is any adverse news, the same shall be reflected in the valuation by valuation agencies. SEBI has advised AMFI to issue detailed guidelines with respect to valuation of bonds issued under Basel III framework. These indicative haircuts will be applied on the date of credit event (i.e. migration of security from investment to below investment grade) and shall continue till scrip level valuation prices are provided by the valuation agencies of such securities. Further, these haircuts will be updated and refined as and when there is availability of material information which impacts the haircuts. In case of trades during the interim period between date of credit event (if available), and receipt of valuation price from valuation agencies, the traded price will be used for valuation of such security provided it is lower than the average price obtained post standard haircut. The said traded price shall be considered thereafter for valuation till the scrip level valuation price is determined and provided by the valuation agencies.
- 4) In case of trades after the valuation price is computed by the valuation agencies as referred above and where the traded price is lower than such computed price, such traded price shall be considered for the purpose of valuation and the valuation price may be revised accordingly.

- 5) Treatment of accrued interest, future interest accrual and future recovery: The treatment of accrued interest and future accrual of interest, in case of money market and debt securities classified as below investment grade or default, is detailed below:
- a) Interest accrual: The indicative haircut provided by valuation agencies that has been applied to the principal will be applied to any accrued interest. In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.
 - b) Future recovery: Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV. Any recovery in excess of the carried value (i.e. the value recognized in NAV) will then be applied first towards amount of interest written off and then towards amount of principal written off.
- 6) Segregate Portfolio valuation: Notwithstanding the decision to segregate the debt and money market instrument in accordance with the SEBI Circular dated December 28, 2018, the valuation should consider the credit event and value the portfolio based on the principles of fair valuation. (i.e. realizable value of the assets) in terms of relevant provisions of SEBI (Mutual Funds) Regulation, 1996 and Circular(s) issued thereunder. Irrespective of the above policy, the valuation committee might adopt valuation principles to align with fair valuation norms.

Annexure IV – AMFI guidelines on waterfall approach for valuation of money market and debt securities

Background

SEBI, vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 on valuation of money market and debt securities, has laid down the broad principles for considering traded yields for the purpose of valuation of money market and debt securities. Paragraph 2.1 of the aforesaid circular prescribes that AMFI shall ensure that valuation agencies have a documented waterfall approach for valuation of money market and debt securities. Paragraph 2.3 of the aforesaid circular also prescribes that the waterfall approach shall form part of the valuation policy of individual AMCs which is uploaded on their respective websites.

AMFI has issued Best Practices Guidelines Circular no 83 dated Nov 18, 2019 providing guidelines to be followed by valuation agencies (CRISIL and ICRA) to arrive at valuation of money and debt securities. These guidelines cover following broad areas for valuation of money market and debt securities:

1. Waterfall mechanism for valuation of money market and debt securities
2. Definition of tenure buckets for similar maturity
3. Process for determination of similar issuer
4. Recognition of trades and outlier criteria
5. Process for construction of spread matrix

Part A: Valuation of Money Market and Debt Securities other than Government Securities (“G-Secs”)

1. Waterfall Mechanism for valuation of money market and debt securities:

The following shall be the broad sequence of the waterfall for valuation of money market and debt securities:

- i. Volume Weighted Average Yield (VWAY) of primary reissuances of the same ISIN (whether through book building or fixed price) and secondary trades in the same ISIN.
- ii. VWAY of primary issuances through book building of same issuer, similar maturity (Refer Note 1 below)
- iii. VWAY of secondary trades of same issuer, similar maturity

- iv. VWAY of primary issuances through fixed price auction of same issuer, similar maturity
- v. VWAY of primary issuances through book building of similar issuer, similar maturity (Refer Note 1 below)
- vi. VWAY of secondary trades of similar issuer, similar maturity.
- vii. VWAY of primary issuance through fixed price auction of similar issuer, similar maturity
- viii. Construction of matrix (polling may also be used for matrix construction)
- ix. In case of exceptional circumstances, polling for security level valuation (Refer Note 2 below)

Note 1

Except for primary issuance through book building, polling shall be conducted to identify outlier trades. However, in case of any issuance through book building which is less than INR 100 Cr, polling shall be conducted to identify outlier trades.

Note 2

Some examples of exceptional circumstance would be stale spreads, any event/news in particular sector/issuer, rating changes, high volatility, corporate action or such other event as may be considered by valuation agencies. Here stale spreads are defined as spreads of issuer which were not reviewed/updated through trades/primary/polls in same or similar security/issuers of same/similar maturities in waterfall approach in last 6 months. Further, the exact details and reasons for the exceptional circumstances which led to polling shall be documented and reported to AMCs. Further, a record of all such instances shall be maintained by AMCs and shall be subject to verification during SEBI inspections.

Note 3

All trades on stock exchanges and trades reported on trade reporting platforms till end of trade reporting time (excluding Inter-scheme transfers) should be considered for valuation on that day.

Note 4

It is understood that there are certain exceptional events, occurrence of which during market hours may lead to significant change in the yield of the debt securities. Hence, such exceptional events need to be factored in while calculating the price of the securities. Thus, for the purpose of calculation of VWAY of trades and identification of outliers, on the day of such exceptional events, rather than considering whole day trades, only those trades shall be considered which have occurred post the event (on the same day).

The following events would be considered exceptional events:

- i. Monetary / Credit Policy
- ii. Union Budget
- iii. Government Borrowing / Auction Days
- iv. Material Statements on Sovereign Rating
- v. Issuer or Sector Specific events which have a material impact on yields
- vi. Central Government Election Days
- vii. Quarter end days

In addition to the above, valuation agencies may determine any other event as an exceptional event. All exceptional events along-with valuation carried out on such dates shall be documented with adequate justification.

2. Definition of tenure buckets for Similar Maturity

When a trade in the same ISIN has not taken place, reference should be taken to trades of either the same issuer or a similar issuer, where the residual tenure matches the tenure of the bond to be priced. However, as it may not be possible to match the exact tenure, it is proposed that tenure buckets are created and trades falling within such similar maturity be used as per table below

Residual Tenure of Bond to be priced	Criteria for similar maturity
Upto 1 month	Calendar Weekly Bucket
Greater than 1 month to 3 months	Calendar Fortnightly Bucket
Greater than 3 months to 1 year	Calendar Monthly Bucket
Greater than 1 year to 3 years	Calendar Quarterly Bucket
Greater than 3 years	Calendar Half Yearly or Greater Bucket

In addition to the above:

- a. In case of market events, or to account for specific market nuances, valuation agencies may be permitted to vary the bucket in which the trade is matched or to split buckets to finer time periods as necessary. Such changes shall be auditable. Some examples of market events / nuances include cases where traded yields for securities with residual tenure of less than 90 days and more than 90 days are markedly different even though both may fall within the same maturity bucket, similarly for less than 30 days and more than 30 days or cases where yields for the last week v/s second last week of certain months such as calendar quarter ends can differ.
- b. In the case of illiquid/ semi liquid bonds, it is proposed that traded spreads be permitted to be used for longer maturity buckets (1 year and above). However, the yield should be adjusted to account for steepness of the yield curve across maturities.
- c. The changes / deviations mentioned in clauses a and b, above, should be documented, along with the detailed rationale for the same. Process for making any such deviations shall also be recorded. Such records shall be preserved for verification.

3. Process for determination of similar issuer

Valuation agencies shall determine similar issuers using one or a combination of the following criteria. Similar issuer do not always refer to issuers which trade at same yields, but may carry spreads amongst themselves & move in tandem or they are sensitive to specific market factor/s hence warrant review of spreads when such factors are triggered.

- i. Issuers within same sector/industry and/or
- ii. Issuers within same rating band and/or
- iii. Issuers with same parent/ within same group and/or
- iv. Issuers with debt securities having same guarantors and/or
- v. Issuers with securities having similar terms like Loan Against Shares (LAS)/ Loan Against Property (LAP)

The above criteria are stated as principles and the final determination on criteria, and whether in combination or isolation shall be determined by the valuation agencies. The criteria used for such determination should be

documented along with the detailed rationale for the same in each instance. Such records shall be preserved for verification. Similar issuers which trade at same level or replicate each other's movements are used in waterfall approach for valuations. However, similar issuer may also be used just to trigger the review of spreads for other securities in the similar issuer category basis the trade/news/action in any security/ies within the similar issuer group.

4. Recognition of trades and outlier criteria

i. Volume criteria for recognition of trades (marketable lot)

Paragraph 1.1.1.1(a) of SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 on Valuation of money market and debt securities, prescribes that the marketable lots shall be defined by AMFI, in consultation with SEBI. In this regard, marketable lot is defined as under. The following volume criteria shall be used for recognition of trades by valuation agencies:

Parameter	Minimum Volume Criteria for marketable lot
Primary	INR 25 cr for both Bonds/NCD/CP/ CD and other money market Instruments
Secondary	INR 25 cr for CP/ CD, T-Bills and other money market instruments
Secondary	INR 5 Cr for Bonds/NCD/ G-secs

Trades not meeting the minimum volume criteria i.e. the marketable lot criteria as stated above shall be ignored.

ii. Outlier criteria

It is critical to identify and disregard trades which are aberrations, do not reflect market levels and may potentially lead to mispricing of a security or group of securities. Hence, the following broad principles would be followed by valuation agencies for determining outlier criteria.

- a. Outlier trades shall be classified on the basis of liquidity buckets (Liquid, Semi-liquid, Illiquid). Price discovery for liquid issuers is generally easier than that of illiquid issuers and hence a tighter pricing band as compared to illiquid issuers would be appropriate.
- b. The outlier trades shall be determined basis the yield movement of the trade, over and above the yield movement of the matrix. Relative movement ensures that general market movements are accounted for in determining trades that are outliers. Hence, relative movement over and above benchmark movement shall be used to identify outlier trades.
- c. Potential outlier trades which are identified through objective criteria defined above will be validated through polling from market participants. Potential outlier trades that are not validated through polling shall be ignored for the purpose of valuation.
- d. The following criteria shall be used by valuation agencies in determining Outlier Trades

Liquidity Classification	Bps Criteria (Yield movement over Previous Day yield after accounting for yield movement of matrix)		
	Upto 15 days	15-30 days	Greater than 30 days
Liquid	30 bps	20 bps	10 bps
Semi-liquid	45 bps	35 bps	20 bps
Illiquid	70 bps	50 bps	35 bps

The above criteria shall be followed consistently and would be subject to review on a periodic basis by valuation agencies and any change would be carried in consultation with AMFI.

- e. In order to ensure uniform process in determination of outlier trades the criteria for liquidity classification shall be as detailed below.
- f. Criteria for liquidity classification shall be as detailed below.

Liquidity classification criteria — Liquid, semi-liquid and Illiquid definition

Valuation agencies shall use standard criteria for classifying trades as Liquid, Semi-Liquid and illiquid basis the following two criteria

- a. Trading Volume
- b. Spread over reference yield

Such criteria shall be reviewed on periodic basis in consultation with AMFI.

Trading Volume (Traded days) based criteria:

Number of unique days an issuer trades in the secondary market or issues a new security in the primary market in a calendar quarter

- Liquid - $\geq 50\%$ of trade days
- Semi liquid - $\geq 10\%$ to 50% trade days
- Illiquid - $< 10\%$ of trade days

Spread based criteria:

Spread over the matrix shall be computed and based on thresholds defined, issuers shall be classified as liquid, semi liquid and illiquid. For bonds thresholds are defined as upto 15 bps for liquid; $> 15-75$ bps for semi-liquid; > 75 bps for illiquid. (Here, spread is computed as average spread of issuer over AAA Public Sector Undertakings/Financial Institutions/Banks matrix), For CP/ CD- upto 25 bps for liquid; $> 25-50$ bps for semiliquid; > 50 bps for illiquid. (Here, spread is computed as average spread of issuer over A1+/AAA CD Bank matrix). The thresholds shall be periodically reviewed and updated having regard to the market.

The best classification (liquid being the best) from the above two criteria (trading volume and spread based) shall be considered as the final liquidity classification of the issuer. The above classification shall be carried out separately for money market instruments (CP/ CDs) and bonds.

5. Process for construction of spread matrix

Valuation agencies shall follow the below process in terms of calculating spreads and constructing the matrix:

Steps	Detailed Process
Step 1	<p>Segmentation of corporates- The entire corporate sector is first categorised across following four sectors i.e. all the corporates will be catalogued under one of the below mentioned bucket:</p> <ol style="list-style-type: none"> 1. Public Sector Undertakings/Financial Institutions/Banks; 2. Non-Banking Finance Companies -except Housing Finance Companies; 3. Housing Finance Companies; 4. Other Corporates
Step 2	<p>Representative issuers — For the aforesaid 4 sectors, representative issuers (Benchmark Issuers) shall be chosen by the valuation agencies for only higher rating (i.e. "AAA" or AA+). Benchmark/Representative Issuers will be identified basis high liquidity, availability across tenure in AAA/AA+ category and having lower credit/liquidity premium. Benchmark Issuers can be single or multiple for each sector.</p> <p>It may not be possible to find representative issuers in the lower rated segments, however in case of any change in spread in a particular rating segment, the spreads in lower rated segments should be suitably adjusted to reflect the market conditions. In this respect, in case spreads over benchmark are widening at a better rated segment, then adjustments should be made across lower rated segments, such that compression of spreads is not seen at any step. For instance, if there is widening of spread of AA segment over the AAA benchmark, then there should not be any compression in spreads between AA and A rated segment and so on.</p>
Step 3	<p>Calculation of benchmark curve and calculation of spread —</p> <ol style="list-style-type: none"> 1. Yield curve to be calculated for representative issuers for each sector for maturities ranging from 1 month till 20 years and above. 2. Waterfall approach as defined in Part A (1) above will be used for construction of yield curve of each sector. 3. In the event of no data related to trades/primary issuances in the securities of the representative issuer is available, polling shall be conducted from market participants 4. Yield curve for Representative Issuers will be created on daily basis for all 4 sectors. All other issuers will be pegged to the respective benchmark issuers depending on the sector, parentage and characteristics. Spread over the benchmark curve for each security is computed using latest available trades/primaries/polls for respective maturity bucket over the Benchmark Issuer. 5. Spreads will be carried forward in case no data points in terms of trades/primaries/polls are available for any issuer and respective benchmark movement will be given
Step 4	<ol style="list-style-type: none"> 1. The principles of VWAY, outlier trades and exceptional events shall be applicable while constructing the benchmark curve on the basis of trades/primary issuances. 2. In case of rating downgrade/credit event/change in liquidity or any other material event in Representative Issuers, new Representative Issuers will be identified. Also, in case there are two credit ratings, the lower rating to be considered. 3. Residual tenure of the securities of representative issuers shall be used for construction of yield curve.

Part B : Valuation of G-Secs (T-Bill, Cash management bills, G-Sec and SDL)

The following is the waterfall mechanism for valuation of Government securities:

- VWAY of last one hour, subject to outlier validation
- VWAY for the day (including a two quote, not wider than 5 bps on NDSOM), subject to outlier validation
- Two quote, not wider than 5 bps on NDSOM, subject to outlier validation
- Carry forward of spreads over the benchmark
- Polling etc.

Note:

1. VWAY shall be computed from trades which meet the marketable lot criteria stated in Part A of these Guidelines.
2. Outlier criteria: Any trade deviating by more than +/- 5 bps post factoring the movement of benchmark security shall be identified as outlier. Such outlier shall be validated through polling for inclusion in valuations. If the trades are not validated, such trades shall be ignored.

Annexure V – AMFI guidelines on valuation of AT-1 Bonds and Tier 2 Bonds issued under Basel III framework

1. Currently a bond is considered traded, if there is at least one trade in market lot in that particular ISIN. If the bond does not get traded there is a defined waterfall mechanism for valuation of that bond as per AMFI Best Practice Guideline circular no. NO.83 / 2019-20 dated November 18, 2019.
2. The said waterfall requires grouping of same issuer with similar maturity and similar issuers with similar maturity. However, in case any ISIN of issuer has not traded, the valuation of AT-1 Bonds is currently done based on adjusting spread directly to the benchmark security.
3. In order to improve existing valuation of these bonds and implement the defined waterfall, following is proposed to be done:
 - i. Form two types of ISINs:
 - a) Benchmark ISINs (a non-benchmark ISIN can be linked to only one benchmark ISIN. Currently, SBI ISINs happens to be the benchmark ISINs across all maturities for AT-1 Bonds.)
 - b) Non-benchmark ISINs (Will be divided into multiple groups based on similar issuer and similar maturity).
 - c) The groups will be decided in consultation with valuation agencies. The two main criteria envisaged to be used here would be Tier 1 / Tier 2 ratings of the ISINs / Issuers, and the spread range in which the group of ISINs / Issuer's trade over the benchmark.
 - ii. Take a look back period for trade recognition as under:
 - a) 15 working days for benchmark ISINs
 - b) 30 working days for non-benchmark ISINs
 - c) This will be revised to 7 working days for benchmark ISIN and 15 working days for non-benchmark ISINs from October 01, 2021.
4. If the ISIN gets traded, the traded YTM will be taken for the purpose of valuation. Further, if 1 ISIN of the issuer trades all other ISINs of issuers will be considered as traded but with necessary adjustment of spread to

YTM. If none of the ISIN of the issuer gets traded, the trade of similar issuer in the group will be taken to valuation however with necessary adjustment of spread to YTM of similar issuer similar maturity. If none of the ISIN in a group gets traded on any particular day, an actual trade in a look back period will be seen. If there is an actual trade in look back period, the security will be considered as traded and valued with necessary adjustment of spread to YTM. According to this valuation will be done based on the trade of issuer, trade of similar issuer and as an additional layer a look back period of is requested. It is confirmed that spread over YTM will be taken without any adjustment of modified duration to call.

5. Further, as the valuation is based on trade during the look back period, it is confirmed that a spread will be adjusted to reflect adverse news, change in credit rating, interest rate etc., which has bearing on the yield of ISIN being valued.

6. However, if there is no actual trade of any ISIN of the issuer as well as similar issuer during look back period also then valuation will be done by taking spread over matrix and/or polling in line with the waterfall mechanism prescribed by AMFI. Points 4, 5 & 6 have been further elaborated in the detailed in illustration provided at the end of these guidelines.

7. AMCs shall adopt maturity of 100 years for perpetual bond issued by banks. There will be a glide path for smooth implementation. The Deemed Residual Maturity for the Purpose of Calculation of valuation as well as Macaulay Duration for existing as well as new perpetual bonds issued:

Time Period	Deemed Residual Maturity (Years)
Till March 31, 2022	10
April 01, 2022 – September 31, 2022	20
October 01, 2022 – March 31, 2023	30
March 31, 2023 onwards	100

the residual maturity will always remain above the deemed residual maturity proposed above.

8. Hitherto, Mutual Fund industry used to value Tier II bonds considering first call date as a deemed maturity date. Therefore, a glide path is required for valuation as well as calculation of Macaulay Duration for tier II bonds also. Accordingly, valuation methodology, as mentioned above, for AT-1 Bonds is to be followed for the valuation of tier II bonds also. Further, the Macaulay Duration is proposed to be calculated as under for Tier II bonds:

Time Period	Deemed Residual Maturity for all securities (Years)
April 01, 2021 – March 31, 2022	10 years or contractual maturity whichever is earlier
April 01, 2022 onwards	Actual Maturity

9. Besides, AT-1 bonds and Tier 2 bonds being different categories of bonds, the valuation of these bonds will be done separately (i.e.) ISIN of AT-1 bond traded will not mean that ISIN of Tier-2 bonds of the same issuer have also traded. However, if any issuer does not exercise call option for any ISIN, then the valuation and calculation of Macaulay Duration should be done considering maturity of 100 years from the date of issuance for AT-1 Bonds and Contractual Maturity for Tier 2 bonds, for all ISINs of the issuer.

10. It is confirmed that the Macaulay Duration of ISINs will be calculated based on the deemed residual maturity proposed in para 7 and 8 above to reflect the duration risk.

11. Further, henceforth mutual funds will disclose both Yield to Call and Yield to Maturity.

Illustration for point 4 to 6

ABC and XYZ are similar issuer and similar maturity:

Maturity of ISIN 1 of ABC is near to maturity of ISIN 1 of XYZ & Maturity of ISIN 2 of ABC is near to maturity to ISIN 2 of XYZ

Issuers	ABC		XYZ		Valuation of ABC
	ISIN 1	ISIN 2	ISIN 1	ISIN 2	
Traded Today	Y	-	-	-	Take price and arrive at YTM
Traded Today	N	Y	-	-	Take price of ISIN 2 of ABC and compute YTM of ISIN 2. Then adjust the YTM spread of ISIN 1 and ISIN 2 and compute value of ISIN 1 of ABC.
Traded Today	N	N	Y	N	From the price of ISIN 1 of XYZ compute YTM. The spread between YTM of ABC ISIN 1 and XYZ ISIN 1 is to be adjusted to derive YTM of ABC ISIN 1. The spread should further be adjusted to reflect adverse news, change in credit rating, interest rate etc., which has bearing on the yield of ISIN being valued and final YTM and price of the security should be computed.
Traded Today	N	N	N	Y	From the price of ISIN 2 of XYZ compute YTM of ISIN 2 of XYZ. Then derive YTM of ISIN 1 of XYZ by adjusting spread of YTM. Then by adjusting difference in spread between ISIN 1 of XYZ and ISIN 1 of ABC trade (which happens to be nearest maturity) arrive at YTM of ISIN 1 of ABC. The spread should be adjusted to reflect adverse news, change in credit rating, interest rate etc., which has bearing on the yield of ISIN being valued.
No trade today. Check for actual trade during look back	Y	-	-	-	Take YTM of traded day and adjust spread to the movement of benchmark ISIN over the period. Also adjust to reflect adverse news, change in credit rating, interest rate etc., which has bearing on the yield of ISIN being valued.
No trade today. Check for actual trade during look back	N	Y	-	-	Arrive at YTM of ISIN 2 by adjusting spread to the movement of benchmark ISIN over the period. COMPUTATION OF NAV

C. Policy of computation of NAV

The Net Asset Value (NAV) per unit of the Scheme for each option will be computed by dividing the net assets of the Scheme by the number of units outstanding on the valuation day. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The NAV of the Units under the Scheme will be calculated on a daily basis as shown below:

$$\text{NAV per unit (Rs.)} = \frac{\text{(Market / Fair Value of Scheme's Investments + Current Assets including Accrued Income - Current Liabilities and Provisions)}}{\text{No. of units outstanding under the Scheme / Option on the valuation day}}$$

The NAV shall be calculated/rounded off up to four decimal places. However, the AMC reserves the right to declare the NAVs up to additional decimal places as it deems appropriate. Separate NAV will be calculated and disclosed for each Plan/Option. The NAVs of the Growth Option and the Income Distribution cum Capital Withdrawal/IDCW Option will be different after the declaration of the first IDCW. The AMC will calculate and disclose the NAV of the Scheme on all the Business Days.

Illustration on Computation of NAV for a Scheme has been provided below:

Particulars	Amount in Rs
Market or Fair Value of Scheme's investments	2,00,00,000.00
Current Assets including accrued income	15,00,000.00
Current Liabilities and Provisions	5,00,000.00

No. of Units outstanding under the Scheme = 6,80,000

The NAV per unit will be computed as follows:

$$\text{NAV per unit (Rs.)} = \frac{2,00,00,000.00 + 15,00,000.00 - 5,00,000.00}{6,80,000}$$

NAV per unit (Rs.) = 30.8824

Note : The aforesaid provisions pertaining to “Calculation of NAV” shall apply in respect of each individual Scheme and/or plan as the case may be. The NAV per unit above is rounded off to four decimals.

- **Methodology of calculating the sale price**

The price or NAV a unitholder is charged while investing in an open-ended scheme is called sale / subscription price. Pursuant to clause 10.4.1.a of the SEBI Master circular, no entry load will be charged by the Scheme to the unitholders.

Therefore, Sale / Subscription price = Applicable NAV

- **Methodology of calculating the repurchase price**

Repurchase or redemption price is the price or NAV at which an open-ended scheme purchases or redeems its units from the Unitholders. It may include exit load, if applicable. The exit load, if any, shall be charged as a percentage of Net Assets Value (NAV) i.e. applicable load as a percentage of NAV will be deducted from the “Applicable NAV” to calculate the repurchase price.

Therefore, Repurchase / Redemption Price = Applicable NAV *(1 – Exit Load, if any)

For example, If the Applicable NAV of the Scheme is Rs. 10 and the Exit Load applicable at the time of investment is 2% if redeemed before completion of 1 year from the date of allotment of units and the Unitholder redeems units before completion of 1 year, then the repurchase/redemption price will be:

$$\begin{aligned} &= \text{Rs. } 10 * (1 - 0.02) \\ &= \text{Rs. } 9.80 \end{aligned}$$

As per regulation 49 (3) of the SEBI (MF) Regulations, while determining the price of the units, the mutual fund shall ensure that the repurchase price of an open ended scheme is not lower than 95 per cent of the Net Asset Value.

D. Policy for computation of NAV in foreign securities

In case the Scheme(s) invests in foreign securities, the NAV of the Scheme(s) for a business day will be based on the closing price of the stock exchange on which the foreign security is listed. If the security is listed in a time zone ahead of Indian Standard Time (IST) than the same day’s closing price would be used for Valuation. If the security is listed in the time zone behind IST then the previous day’s closing price would be used for valuation.

The closing price of a foreign security will be converted into Indian Rupees based on methodology provided in the Valuation Policy. On valuation date, all assets and liabilities in foreign currency shall be valued in Indian Rupees at the Financial Benchmarks India Pvt. Ltd. (FBIL) reference rate as at the close of banking hours on the relevant business day in India. If on any day FBIL reference rate is not available due to holiday, then the previous day's prices will be used. If the security is listed in currency for which reference rate is not provided by FBIL, the exchange rates available from Reuters (at 5.00 P.M IST) will be used. In case the direct exchange rates are not available on Reuters, then cross currency rate with USD would be considered and converted as per the INR/USD FBIL reference rate.

The Trustees/AMC reserves the right to change the source for determining the exchange rate. The reasons for the change in the source for determining the exchange rate will be recorded in writing.

In case of fund of funds investing in overseas mutual fund units, last published Net Asset Value (NAV) will be used for valuation and the same will be converted into Indian Rupees based on methodology provided in the Valuation Policy as detailed above.

The exchange gain / loss resulting from the aforesaid conversion shall be recognized as unrealized exchange gain / loss in the books of the Scheme(s) on the day of valuation. Further, the exchange gain / loss resulting from the settlement of assets / liabilities denominated in foreign currency shall be recognized as realized exchange gain / loss in the books of the Scheme on the settlement of such assets / liabilities.

If the prices of foreign securities are available either late in the evening of the business day or on the following business day, the Scheme(s) will declare the NAV for a Business Day on the next Business Day by 10:00 am.

E. Procedure in case of delay in disclosure of NAV

The NAV of the scheme(s) shall be declared as per timelines stated in the respective SID of the schemes. In case of any delay, the reasons for such delay would be explained to AMFI in writing. If the NAVs are not available before the commencement of Business Hours on the following day (or following day of the next Business Day, if applicable) due to any reason, the Mutual Fund shall issue a press release giving reasons and explaining when the Mutual Fund would be able to publish the NAV.

A capital asset other than a short term capital asset is considered as long term capital asset. With effect from July 23, 2024, listed securities held for 12 months or less shall qualify as short-term capital asset or else shall qualify as long-term capital asset.

Equity oriented fund is a fund where the investible funds are invested by way of equity shares in domestic companies to the extent of more than 65% of the total proceeds of such fund.

The Finance Act, 2023 has introduced section 50AA, providing for computation of capital gains in relation to unit of a Specified Mutual Fund acquired on or after the 1 April 2023. The gain so computed shall be deemed to be capital gains arising from transfer of a short-term capital asset.

Specified Mutual Fund means a Mutual Fund by whatever name called, where not more than 35% of its total proceeds is invested in the equity shares of domestic companies. The % of equity shareholding held in respect of the Specified Mutual Fund shall be computed with reference to the annual average of the daily closing figures.

The long-term capital gains are required to be computed without giving effect to the first and second provisos to section 48 of the Act i.e. benefit of computation of capital gains in foreign currency and indexation in respect of cost of acquisition and improvement.

The following amounts would be deductible from the full value of consideration, to arrive at the amount of capital gains:

- Cost of acquisition of units.
- To provide relief on gains already accrued upto 31 January 2018, a mechanism has been provided to “step up” the COA of securities. Under this mechanism, COA is substituted with the Fair Market Value (FMV), where sale consideration is higher than the FMV. Where sale value is higher than the COA but not higher than the FMV, the sale value is deemed as the COA. FMV is defined as the highest price quoted for the unit on 31 January 2018 on a “recognized stock exchange”, or Net Asset Value of the unit as on 31 January 2018 where unit is not listed.
- Expenditure incurred wholly and exclusively in connection with such transfer (excluding any sum paid on account of STT). - In case of resident individuals and HUFs, where taxable income as reduced by long-term capital gains, is below the basic exemption limit, the long-term capital gains will be reduced to the extent of the shortfall and only the balance long-term capital gains will be subjected to the flat rate of income-tax (plus applicable surcharge and health & education cess).

(b) Short Term Capital Gains

- As per section 111A of the Act, short-term capital gains on sale of units of an equity oriented fund where such transaction of sale is chargeable to STT shall be subject to tax at a rate of 20% / 15% upto July 22, 2024 (plus applicable surcharge and health & education cess).

Such short term capital gains in the hands of individuals will be included in their Gross Total Income and will be taxed at the rate applicable to them. Further in case of resident individuals and HUFs where taxable income as reduced by short-term capital gains, is below the basic exemption limit, the short-term capital gains will be reduced to the extent of the shortfall and only the balance short-term capital gains will be subjected to the flat rate of income-tax (plus health & education cess).

Short-term capital gains would be taxed at 30% (plus applicable surcharge and health & education cess) in other cases which are not subject to STT, under section 115 AD of the Act.
- Deductions under Chapter VI-A of the Act cannot be claimed against the short-term capital gains and long-term capital gains, covered under section 111A or section 112 or section 112A of the Act.

Exemption of capital gain from income tax

As per the provisions of section 54F of the Act and subject to the conditions specified therein, in the case of an individual or a HUF, capital gains arising on transfer of a long term capital asset (not being a residential house) are not chargeable to tax if the entire net consideration received on such transfer is invested within the prescribed period in a residential house. If part of such net consideration is invested within the prescribed period in a residential house, then such gains would not be chargeable to tax on a proportionate basis. For this purpose, net consideration means full value of the consideration received or accruing as a result of the transfer of the capital asset as reduced by any expenditure incurred wholly and exclusively in connection with such transfer.

Finance Act, 2023 with effect from FY 2023-24 has amended the provision imposing a limit of INR 10 crores on the value of investment in residential house. Thus, any investment exceeding INR 10 crores shall not be taken into account while determining the exemption available under section 54F of the Act.

Bonus Stripping

Under the provisions of Section 94(7) of the Act, loss arising on sale of units, which are bought within 3 months prior to the record date (i.e. the date fixed by the Mutual Fund for the purposes of entitlement of the unit holders to receive income or additional units without any consideration, as the case may be) and sold within 9 months after the record date, shall be ignored for the purpose of computing income chargeable to tax to the extent of exempt income received or receivable on such units.

Under the provisions of Section 94(8) of the Act, where any person purchases units ('original units') within a period of 3 months prior to the record date, who is allotted additional units without any payment and sells all or any of the original units within a period of 9 months after the record date, while continuing to hold all or any of the additional units, then any loss arising on sale of the original units shall be ignored for the purpose of computing income chargeable to tax. The amount of loss so ignored shall be deemed to be the cost of purchase of the additional units as are held on the date of such sale.

Switching between options

Switching from one option to another option of a Scheme will be effected by way of redemption of units of the relevant option and reinvestment of the redemption proceeds in the other option selected by the Unit holder. Hence switching will attract the same implications as applicable on transfer / redemption of such units.

iv. Tax Deduction at Source

- a. Resident Unit holders: As per section 194K of the Act, any person responsible for paying to a resident any income in respect of units of a Mutual Fund specified under clause (23D) of section 10 shall, at the time of credit of such income to the account of the payee or at the time of payment thereof by any mode, whichever is earlier, deduct income-tax thereon at the 10%.

In the case of foreign companies the rate of tax to be deducted at source on short-term capital gains referred to in section 111A would be 20% / 15% upto July 22, 2024 (plus applicable surcharge and health & education cess) and at the rate of 35% / 40% upto July 22, 2024 (plus applicable surcharge and health & education cess) in case of short-term capital gains (other than under section 111A), unless a lower withholding tax certificate is obtained from the tax authorities, and at the rate of 12.50% / 10% upto July 22, 2024 (plus applicable surcharge and health & education cess) in case of long-term capital gains referred to in section 112(1)(c)(iii) of the Act and at the rate of 12.50% / 10% upto July 22, 2024 (plus applicable surcharge and health & education cess) in case of long-term capital gains referred to in section 112A of the Act and at the rate of 12.50% / 20% upto July 22, 2024 (plus

The income tax at the rate of 20% will be deducted on dividend or income distribution received on units of a Mutual Fund specified under clause (23D) of section 10.

The higher rate of TDS may apply in following cases: -

II. Know Your Customer (KYC) Compliance

In terms of the Prevention of Money Laundering Act, 2002, the Rules issued there under and the guidelines/circulars issued by SEBI regarding the Anti Money Laundering (AML Laws), all intermediaries, including Mutual Funds, have to formulate and implement a client identification programme, verify and maintain the record of identity and address(es) of investors.

In order to bring about uniformity in the KYC process in the securities market, Common KYC Application form and supporting documents shall be used by all SEBI registered intermediaries viz. intermediaries viz. Mutual Funds, Portfolio Managers, Depository Participants, Stock Brokers, Venture Capital Funds, Collective

Investment Schemes, etc. Further, to avoid duplication of KYC process across SEBI registered intermediaries, a mechanism for centralization of the KYC records in the securities market has been developed. Accordingly, an intermediary shall perform the initial KYC of its clients and upload the details on the system of the Central KYC Records Registry (CKYCR)/ KYC Registration Agency (KRA). When the client approaches another intermediary, the intermediary can verify and download the client's details from the system of the CKYCR/KRA. As a result, once the client has done KYC with a SEBI registered intermediary, he need not undergo the same process again with another intermediary provided the KYC status is 'KYC Validated'.

For individual investors, AMFI vide its Best Practices Guidelines Circular No.68 / 2016-17 dated December 22, 2016 on 'Implementation of Central KYC (CKYC) norms', has prescribed new CKYC norms which shall be applicable with effect from February 1, 2017, for prospective individual investors who has never done KYC under KRA regime and whose KYC is not registered or verified in the KRA system. For details, please refer the section "How to apply for KYC".

For regulating KRAs, SEBI has formulated the KYC Registration Agency (KRA) Regulations, 2011 which covers the registration of KRAs, functions and responsibilities of the KRAs and intermediaries, code of conduct, data security, etc. KRA system centralizes KYC records in the securities market. To expand the centralized database of the KYC records of the entire securities market, KRAs are required to upload the KYC details of the existing clients of the intermediaries in the current KRA & CKYCR system, in a phased manner. Guidelines in this regard have been issued by SEBI in consultation with the major Stock Exchanges, Depositories, KRAs, AMFI, Brokers' Associations and market participants.

In-Person' Verification (IPV) of clients has been made mandatory for all SEBI registered intermediaries. Asset Management Companies (AMCs) and the distributors who comply with the certification process of National Institute of Securities Market (NISM) or AMFI and have undergone the process of 'Know Your Distributor (KYD)' can perform the IPV for mutual fund investors. However, where applications are received by the mutual funds directly from the clients (i.e. not through any distributor), the IPV performed by the scheduled commercial banks can be relied on. The IPV carried out by any SEBI registered intermediary can be relied upon by the Mutual Fund. For details, please refer sections "How to apply for KYC" and "Who are required to be KYC compliant" of this document. Since PAN is not mandatory for

- a. Investment (including SIP) upto Rs. 50,000 per year per investor; and
- b. Investors residing in state of Sikkim; should mandatorily mention their PEKRN for investments and attach copy of PEKRN acknowledgement issued by the KRA's.

KYC Acknowledgement Letter* (*for those investors who have completed KYC formalities through SEBI registered KYC registration authorities) downloaded from the websites of the KRA's using the PAN; OR (ii) provide KYC Identification Number (KIN) issued by the Central KYC Registry (CKYCR)

^Third Party means any person making payment towards subscription of units in the name of the Beneficial Investor.

As and when any individual investor wishes to invest on the basis of KIN, the AMC or its Registrar will use the KIN provided by the investor along with the PAN/PEKRN for downloading KYC information from CKYCR and KRA system and update its records.

Any new individual or non-individual investor wishing to invest in the scheme(s) of the Fund shall use the “CKYC & KRA KYC Form” to complete the KYC formalities. The “CKYC and KRA KYC Application Form” is available on the website of the Fund viz., www.mahindramanulife.com.

Post completion of the KYC formalities using the above referred KYC form, the investor will be allotted a unique 14 digit KIN by CKYCR, which can be used by the investor at the time of making any future investments. However, the Fund reserves the right to carry out additional KYC / ask any additional information/documents from the investor to meet the requirements of its KYC Policy.

New non-individual investors shall use the common CKYC & KRA KYC Application Form prescribed by SEBI and carry out the KYC process including In-Person Verification (IPV) with any SEBI registered intermediaries including mutual funds. The CKYC & KRA KYC Application Forms are also available on the website of the Fund viz., www.mahindramanulife.com.

In the event of non compliance of KYC requirements, the Trustee / AMC reserves the right to freeze the folio of the investor(s) and affect mandatory redemption of unit holdings of the investors at the applicable NAV, subject to payment of exit load, if any.

All investors (both individual and non-individual) can apply for KYC compliance as per the abovementioned process using the prescribed forms. However, applicants should note that minors cannot apply for KYC compliance and any investment in the name of minors should be through a Guardian, who should be KYC compliant for the purpose of investing with a Mutual Fund. Also, applicants / unit holders intending to apply for units / currently holding units and operating their Mutual Fund folios through a Power of Attorney (PoA) must ensure that the issuer of the PoA and the holder of the PoA must attach proof of KYC Compliance / provide KIN at the time of investment PoA holders are not permitted to apply for KYC compliance on behalf of the issuer of the PoA. Separate procedures are prescribed for change in name, address and other KYC related details, should the applicant desire to change such information.

For applicants who subscribe to the Units through Stock Exchange facility as detailed in this document, the KYC performed by the Depository Participant of the applicants will be considered as KYC verification done by the Trustee / AMC.

Units held in Electronic (Demat) mode

For units held in demat form, the KYC performed by the Depository Participant of the applicants will be considered as KYC verification done by the Trustee / AMC.

Permanent Account Number

SEBI has made it mandatory for all applicants (in the case of application in joint names, each of the applicants) to mention his/ her permanent account number (PAN) irrespective of the amount of purchase* [Except as given

Also, investors residing in the state of Sikkim are exempt from the mandatory requirement of PAN, subject to the AMC verifying the veracity of the claim of the investors that they are residents of Sikkim, by collecting sufficient documentary evidence.

In order to verify that the PAN of the applicants (in case of application in joint names, each of the applicants) has been duly and correctly quoted therein, the applicants shall attach along with the purchase* application, a photocopy of the PAN card duly self-certified along with the original PAN Card. The original PAN Card will be returned immediately across the counter after verification. The photocopy of the PAN card is not required if KYC acknowledgement issued by any KRA is made available.

Since IDCW reinvestment/ transfer of Rs. 50,000 or more qualifies as purchase of units for aforesaid Notification, PAN is required to process such reinvestment/ transfer, failing which IDCW reinvestment/ transfer shall be automatically converted into payout option.

However, the requirement of PAN is exempted in respect of investments in Mutual Fund Scheme(s) [including Systematic Investment Plan (SIP) upto Rs. 50,000/- per year per investor per mutual fund. Please refer "PAN Exempt investments" as stated below for more details.

Once a person's PAN becomes inoperative, TDS at the higher rate of 20% shall be applicable in addition to other consequences for not furnishing, intimating or quoting of PAN under the Act. However, PAN will again become operative as and when the taxpayer links it with the Aadhaar number.

Additionally, in the event of any application form being subsequently rejected for mismatch of applicant's PAN details with the details fetched from the Income-Tax database through the PAN-Name validation facility offered by NSDL, the investment transaction will be cancelled and the amount will be refunded to the investor. Please contact any of the Investor Service Centres/ CAMS/ Distributors or visit our website www.mahindramanulife.com for further details.

* HUFs and other categories are not eligible for such investments.

Joint Holders

If an application has more than one investor (maximum three permitted) the investors are required to specify the ‘mode of holding’ in the initial application form as either ‘Joint’ or ‘Anyone or Survivor’. In the event, the investors fail to specify the mode of holding, then by default, the mode of holding will be treated as ‘joint’ for all future purposes by the AMC in respect of the folio. In case the mode of holding is specified as ‘Joint’, the financial and non-financial transaction requests and instructions should be signed by all the Unitholders of the folio. In case the mode of holding is specified as ‘Anyone or Survivor’, any one of the Unitholders as mentioned in the initial application form may sign the financial and non-financial transaction requests and instructions except for lien requests, where all the Unitholders are required to sign the lien request letter. In case of death/insolvency of any one or more of the Unit holder/s in the folio, the AMC shall not recognise any person(s) other than the remaining Unitholder/s. In all such cases, the redemptions, IDCW and other distributions as may be declared by the Mutual Fund from time to time shall be paid to the first-named of the remaining Unit holder/s. - 1) The request for conversion of units from demat to SoA (Physical) mode and vice versa shall be made for all the units held by an investor. Request for conversion of partial units shall be rejected.
- 2) The provisions laid down in the SIDs of the scheme(s) of the Fund and guidelines/procedural requirements as prescribed / amended by the Depositories (NSDL/CDSL) from time to time, shall be applicable.

iii. Redemption of the units held in Demat mode:

- Unitholders of mutual fund units held in demat form can redeem the units through Depository Participant or stock broker/distributor through stock exchange platforms i.e. BSE (BSE STAR MF Platform) and NSE (Mutual Fund Service System (MFSS))
- The Investor would be required to submit all requisite information/documents as requested by the Depository / stock broker.
- After receipt of such redemption request, the AMC/RTA will process the redemption request post due validations.
- Further, in case an investor desires to redeem units through the mutual fund, the dematerialized units first have to be converted into physical form i.e. remat mode as per the procedure described above and then a redemption request shall be submitted to the AMC/ RTA. In such cases, application for redemption would be considered on the date when physical duly signed redemption request is provided to the AMC / RTA and duly time-stamped in accordance with the applicable regulatory requirements.

iv. Switch by investors who hold Units in dematerialized Form

Switch transactions for Units held in Demat mode can be done through Exchange platforms like NSE MFSS/ BSE STAR MF platform. If investor desires to submit the Switch transaction to Mutual Fund directly, first the investor will have to convert the demat units into remat mode as per the procedure described above, and then submit the switch transaction slip to the AMC/RTA.

v. Conversion of the scheme Unit holdings to demat if a lien is marked on those Units:

Units requested for dematerialization should be free from credit hold, lien or any other hold. In case any units are under hold for want of credit status, conversion will be processed only after clearance of such hold. Dematerialization request should not be submitted if the units are lien marked or locked or placed under any encumbrances.

vi. Procedure for change in investor's profile / bank account details etc. in respect of units held in demat mode (i.e., To whom the investor is required to approach, in case of such requests)

If investor holding units in demat form wishes to change the bank account, or any change in his/her profile etc., then the investor shall contact his DP (Depository Participant) and the process laid down by the DP should be followed in this regard.

4. ASBA disclosures

Pursuant to clause 14.8 of SEBI Master Circular an investor can subscribe to the New Fund Offers (NFOs) launched through ASBA facility by applying for the Units offered under the Option(s)/Plan(s) of the scheme(s) in the ASBA Application Form and following the procedure as prescribed in the form. Hence, all the NFOs to be launched by the Mutual Fund shall have ASBA facility, which will co-exist with the existing mode of subscription. ASBA is an application containing an authorization given by the Investor to block the application money in his/her specified bank account towards the subscription of Units offered during the NFO of the scheme of the Fund.

Thus, for an investor who applies through ASBA facility, the application money towards the subscription of Units shall be debited from his/her specified bank account only if his/her application is selected for allotment of Units.

Benefits of Applying through ASBA facility

- i. Writing cheques and demand drafts is not required, as investor needs to submit ASBA application Form accompanying an authorization to block the account to the extent of application money towards subscription of Units. The balance money, if any, in the account can be used for other purposes by the investors.
- ii. Release/Unblocking of blocked funds after allotment is done instantaneously.
- iii. Unlike other modes of payment, ASBA facility prevents the loss of interest income on the application money towards subscription of Units as it remains in the bank account of the investor till the allotment is made.
- iv. Refunds of money to the investors do not arise as the application money towards subscription of Units gets blocked only on the allotment of Units.

- v. The investor deals with the known intermediary i.e. his/her own bank.
- vi. The application form is simpler as the application form for ASBA will be different from the NFO application form.

ASBA Procedure

- a. An Investor intending to subscribe to the Units of the NFO through ASBA, shall submit a duly completed ASBA Application Form to a Self Certified Syndicate Bank (SCSB), with whom his/her bank account is maintained.
- b. An ASBA investor shall submit a duly filled up ASBA Application form, physically or electronically to the SCSB with whom the investors holds the bank account which is to be blocked.
 - i. In case of ASBA application in physical mode, the investor shall submit the ASBA Application form at the bank branch of SCSB, which is designated for the purpose and the investor must be holding a bank account with such SCSB.
 - ii. In case of ASBA application in electronic form, the investor shall submit the ASBA Application form either through the internet banking facility available with the SCSB, or such other electronically enabled mechanism for subscribing to units of Mutual Fund schemes authorizing to block the subscription money in a bank account.
- c. An acknowledgement will be given by the SCSB in the form of the counter foil or specifying the application number for reference. Such acknowledgement does not guarantee, in any manner that the investors will be allotted the Units applied for.

Note: If the bank account specified in the ASBA Application Form does not have sufficient credit balance to meet the application money towards the subscription of Units, the Bank shall reject the ASBA Application form.

- d. On acceptance of Physical or Electronic ASBA, the SCSB shall block funds available in the bank account specified to the extent of the application money specified in the ASBA Application Form.
- e. ASBA application form will not be accepted by any of the offices of the Fund or its Registrar & Transfer Agent, i.e. CAMS.
- f. The application money towards the Subscription of Units shall be blocked in the account until
 - i. Allotment of Units is made or
 - ii. Rejection of the application or
 - iii. Winding up of the Scheme, as the case may be.
- g. SCSBs shall unblock the bank accounts for
 - i. Transfer of requisite money to the Mutual Fund / Scheme bank account against each valid application on allotment or
 - ii. in case the application is rejected.

- h. During processing of the ASBA application Forms by RTA, if the application is found to be incomplete or incorrect, the SCSB will be informed on the same who will then unblock the investor account with appropriate remarks in the investor account.
- i. The list of SCSBs and their DBs where ASBA application form can be submitted is available on the websites of BSE (www.bseindia.com), NSE (www.nseindia.com) and SEBI (www.sebi.gov.in) and shall also be given in the ASBA application form.

Note: No request for withdrawal of ASBA application form will be allowed after the closure of New Fund Offer Period.

5. Portfolio Turnover Details

Portfolio turnover is defined as the lower of purchases and sales after reducing all subscriptions and redemptions and derivative transactions there from and calculated as a percentage of the average assets under management of the Scheme during a specified period of time.

The AMC's portfolio management style is conducive to a low portfolio turnover rate. However, the AMC will take advantage of the opportunities that present themselves from time to time because of the inefficiencies in the securities markets. The AMC will endeavour to balance the increased cost on account of higher portfolio turnover with the benefits derived there from. Please refer respective SID, for Portfolio Turnover Ratio.

D. Information pertaining to Investments by the Schemes of the Fund

1. Derivatives Strategies

For applicability of the Derivative Strategies outlined below in this section, investors/unitholders are advised to refer the respective SID(s) of the Scheme(s) of the fund.

a) Equity Derivative strategies

The Schemes may invest in various derivative instruments which are permissible under the applicable regulations. Derivatives will be used for the purpose of hedging, and portfolio balancing or such other purpose as may be permitted under the regulations and Guidelines from time to time. Such investments shall be subject to the investment objective and strategy of the Scheme and the internal limits if any, as laid down from time to time. These include but are not limited to futures (both stock and index) and options (stock and index). Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument such as interest rates, exchange rates, commodities and equities.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

The following section describes the concepts and examples of derivatives that may be used by the fund manager. The strategies and illustrations provided below are only for the purpose of understanding the concept and uses of derivative instruments.

i. Index Futures

Index Futures may be used by the Fund to hedge against market downturns (shorting the index) or benefit from a bullish outlook on the market (going long on the index).

Example on how it could be used: Assume Nifty near month future contract is trading at Rs. 22,500, and the fund manager has a view that nifty will depreciate going forward; the Scheme can initiate a sale transaction of Nifty futures at the above said rate without holding a underlying long equity position. Once the price falls and let's assume after 15 days the Nifty falls to 22,400, the Scheme can initiate a square-up transaction by buying the said futures and book a profit of Rs. 100.

In a similar way, if the fund manager has a view that nifty will appreciate going forward, the Scheme can initiate a long transaction without an underlying cash/ cash equivalent subject to the extant regulations.

Index Options

Index options offers the Fund the opportunity to either capitalize on an expected market move or to protect holdings in the underlying instruments. The underlying in the case of Index options are indices.

A. Buy Call

The fund, to benefit from anticipated uptrend in broad markets, from time to time can buy call options. A long call option will give the Fund the option but not the obligation to buy the Index at the strike price. Stop loss is not defined and will be monitored by the investment team.

Example on how it could be used

Suppose an investor buys a Call option on 1 lot of Nifty 50- Nifty (Lot Size: 25 units)

- Nifty index (European option).
- Nifty 1 Lot Size: 25 units
- Spot Price (S): 22500
- Strike Price (x): 22550 (Out-of-Money Call Option)
- Premium: 80

Total Amount paid by the investor as premium $[25*80] = 2000$

There are two possibilities i.e. either the index moves up over the strike price or remains below the strike price.

1. Scenario 1- The Nifty index goes up before expiry

An investor sells the Nifty Option described above before expiry:

Suppose the Nifty index moves up to 22600 in the spot market and the premium has moved to Rs 150 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty call option as the option now is In the Money.

His gains are as follows:

- Nifty Spot: 22600
- Current Premium: Rs.150
- Premium paid: Rs.80
- Net Gain: $\text{Rs.150} - \text{Rs.80} = \text{Rs.70}$ per unit
- Total gain on 1 lot of Nifty = Rs.1750 (25×70)

2. Scenario 2 - The Nifty index declines before expiry

An investor sells the Nifty Option described above before expiry:

Suppose the Nifty index declines to 22400 in the spot market and the premium has moved to Rs 40 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty call option as the option now is In the Money.

His losses are as follows:

- Nifty Spot: 22400
- Current Premium: Rs.40
- Premium paid: Rs.80
- Net Loss: $\text{Rs.80} - \text{Rs.40} = \text{Rs.40}$ per unit

Total loss on 1 lot of Nifty = Rs.1000 (25×40)

3. Simple Scenario for holding on to expiry:

The fund buys a call option at the strike price of say 22500 and pays a premium of say Rs. 80, the fund would earn profits if Nifty index at the time of expiry of the option is more than 22580 ($22500 + 80$) being the total of the strike price and the premium thereon. If on the date of expiry of the option the Nifty index is below 22500, the fund will not exercise the option while it loses the premium of Rs 80

B. Buy Put

The Fund may buy index put options to hedge existing portfolios. The put option will give the Fund the flexibility to sell the underlying index at the strike price if the index falls below the strike price. The Fund will have to pay a premium to the option writer to buy this put option. There is no defined stop loss. However, as the same will be monitored by the investment team.

Example on how it could be used

Suppose an investor buys a Put option on 1 lot of Nifty 50- Nifty (Lot Size: 25 units)

- Nifty index (European option).
- Nifty 1 Lot Size: 25 units
- Spot Price (S): 22500
- Strike Price (x): 22450 (Out-of-Money Call Option)
- Premium: 80

Total Amount paid by the investor as premium $[25*80] = 2000$

There are two possibilities i.e. either the index moves down from the strike price or goes above the strike price.

1. Scenario 1- The Nifty index goes down

An investor sells the Nifty Option described above before expiry:

Suppose the Nifty index moves down to 22400 in the spot market and the premium has moved to Rs 150 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty put option as the option now is In the Money.

His gains are as follows:

- Nifty Spot: 22400
- Current Premium: Rs.150
- Premium paid: Rs.80
- Net Gain: $Rs.150 - Rs.80 = Rs.70$ per unit
- Total gain on 1 lot of Nifty = $Rs.1750 (25*70)$

2. Scenario 2 - The Nifty index moves down

Suppose the Nifty index moves down to 22600 in the spot market and the premium has moved to Rs 40 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty put option as the option now is In the Money.

His losses are as follows:

- Nifty Spot: 22600
- Current Premium: Rs.40
- Premium paid: Rs.80
- Net Loss: $Rs.80 - Rs.40 = Rs.40$ per unit
- Total gain on 1 lot of Nifty = $Rs.1000 (25*40)$

3. Simple Scenario for holding on to expiry: The fund buys a Put Option on Nifty index with strike 22500 by paying a premium of say Rs 80. If the index goes down to 22400, the fund would protect its downside and would only have to bear the premium of Rs 80 instead of a loss of Rs 100 whereas if the index moves up to say 22600 the fund may let the Option expire worthless and forego the premium thereby capturing Rs. 100 upside after bearing the premium of Rs. 80. In this scenario, perfect hedging of the portfolio with the usage of Nifty put option is assumed.

ii. Stock Futures

Buy Stock Futures

The Fund can buy stock futures to realize a positive outlook on the stock or to rebalance sector positions. There will be no defined stop loss given the high volatility and the same will be monitored by the investment team.

iii. Stock Options

A. Buy Call

To capitalize positive view on a stock or to rebalance sector positions, the Fund may buy call options on the stock against the payment of a premium. Buying a call option provides the Fund the option but not the obligation to buy the stock at the strike price on the day of expiry. Alternatively, the option could be sold in the market before expiry. There will be no defined stop loss and the same shall be monitored by the investment team.

B. Buy Put

To implement a negative view on the stock or to hedge against downside in an existing stock holding or to rebalance sector positions, the Fund may purchase stock put options against payment premium. This gives the option but not the obligation to the Fund to sell the stock at the strike price on the day of expiry. Alternatively, the option could be sold in the market before expiry.

Certain risks are inherent to Derivative strategies viz. lack of opportunities, inability of Derivatives to correlate perfectly with the underlying and execution risks, whereby the rate seen on the screen may not be the rate at which the transaction is executed. For details of risk factors relating to use of Derivatives, the investors are advised to refer to Scheme Specific Risk Factors.

b) Fixed Income Derivative strategies

The eligible Schemes may use Derivative instruments like interest rate swaps like Overnight Indexed Swaps (“OIS”), forward rate agreements, interest rate futures or such other Derivative instruments as may be permitted under the applicable regulations. Derivatives will be used for the purpose of hedging, and portfolio balancing or such other purpose as may be permitted under the regulations and Guidelines from time to time.

The Schemes will be allowed to take exposure in interest rate swaps only on a non-leveraged basis. A swap will be undertaken only if there is an underlying asset in the portfolio. In terms of Circular No. MFD.BC.191/07.01.279/1999-2000 and MPD.BC.187/07.01.279/1999-2000 dated November 1, 1999 and July 7, 1999 respectively issued by RBI permitting participation by Mutual Funds in interest rate swaps and forward rate agreements, the Fund will use Derivative instruments for the purpose of hedging and portfolio balancing. The Fund may also use derivatives for such purposes as maybe permitted from time to time. Further, the guidelines issued by RBI from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to by the Mutual Fund.

IRS and FRA do also have inherent credit and settlement risks. However, these risks are substantially reduced as they are limited to the interest streams and not the notional principal amounts.

Investments in Derivatives will be in accordance with the extant Regulations / guidelines. Presently Derivatives shall be used for hedging and / or portfolio balancing purposes, as permitted under the Regulations. The circumstances under which such transactions would be entered into would be when, for example using the IRS route it is possible to generate better returns / meet the objective of the Scheme at a lower cost. e.g. if buying a 2 Yr FBIL Mibor based instrument and receiving the 2 Yr swap rate yields better return than the 2 Yr AAA corporate, the Scheme would endeavor to do that. Alternatively, the Scheme would also look to hedge existing fixed rate positions if the view on interest rates is that it would likely rise in the

future.

The following information provides a basic idea as to the nature of the Derivative instruments proposed to be used by the Fund and the benefits and risks attached therewith. Please note that the examples have been given for illustration purposes only.

Interest Rate Swaps:

The Indian markets have faced high volatility in debt markets. An interest rate swap is a contractual agreement between two counter-parties to exchange streams of interest amount on a notional principal basis. In this, one party agrees to pay a fixed stream of interest amount against receiving a variable or floating stream of interest amount. The variable or floating part is determined on a periodical basis.

Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme.

Example

Entity A has a Rs.50 crores, 3 month asset which is being funded through call. Entity B, on the other hand, has deployed in overnight call money market Rs.50 crores, 3 month liability. Both the entities are taking on an interest rate risk.

To hedge against the interest rate risk, both the entities can enter into a 3 month swap agreement based on say FBIL MIBOR (Financial Benchmarks India Private Limited Mumbai Inter Bank Offered Rate). Through this swap, entity B will receive a fixed pre-agreed rate (say 7%) and pay FBIL MIBOR (“the benchmark rate”) which will neutralize the interest rate risk of lending in call. Similarly, entity A will neutralize its interest rate risk from call borrowing as it will pay 7% and receive interest at the benchmark rate.

Assuming the swap is for Rs.50 crores 1 January to 1 April, Entity A is a floating rate receiver at the overnight compounded rate and Entity B is a fixed rate receiver. On a daily basis, the benchmark rate fixed by NSE will be tracked by them.

On April 1, they will calculate as explained below:

Entity A is entitled to receive daily compounded call rate for 91 days and pay 7% fixed.

Entity B is entitled to receive interest on Rs.50 crores @ 7% i.e. Rs. 87.26 lacs, and pay the compounded benchmark rate.

Thus on December 1, if the total interest on the daily overnight compounded benchmark rate is higher than Rs. 87.26 lacs, entity B will pay entity A the difference and vice versa.

The above example illustrates the use of Derivatives for hedging and optimizing the investment portfolio. Swaps have their own drawbacks like credit risk, settlement risk. However, these risks are substantially reduced as the amount involved is interest streams and not principal.

Forward Rate Agreement (FRA)

A FRA is referred to by the beginning and end dates of the period covered in the transaction. A 2x5 FRA means the 3 month rate starting 2 months from now.

For example, a corporate has a three month fixed liability three months from now. To meet this liability the company enters into a 3x6 FRA where it receives 7.25% for 100 crore and fixes the interest cost for the 3-6 months period. If the actual three month rate three months from now is 7% the corporate has gained 25 bps through interest cost. As the settlement is done at the beginning of the period, the net present value of the savings needs to be calculated using the 3 month rate as the discount rate.

Interest savings = INR 100 crores * 25 bps * 92/365 (assuming 92 days in the 3 month period and 365 days for the year) = INR 6,30,137.

Settlement Amount = INR 6,30,137 / (1 + 7% * 92/365) = INR 6,19,212

Interest Rate Futures

Interest Rate Futures (IRF) means a standardized interest rate derivative contract traded on a recognized stock exchange to buy or sell a notional security or any other interest bearing instrument or an index of such instruments or interest rates at a specified future date, at a price determined at the time of the contract.

Hedging using interest rate futures could be perfect or imperfect, subject to applicable regulations.

IRFs give an opportunity in the fixed income market to hedge interest rate risk or rebalance the portfolio by using them. By locking into a price, the IRF contract can help to eliminate the interest rate risk. Thus, in order to protect against a fall in the value of the portfolio due to falling bond prices, one can take short position in IRF contracts.

Assume that ABC hold GOI securities, hence is exposed to the risk of rising interest rates, which in turn results in the reduction in the value of their portfolio. So in order to protect against a fall in the value of their portfolio due to falling bond prices, they can take short position in IRF contracts.

Example:

Date: 01-April-2022

Spot price of GOI Security: Rs 100.05

Futures price of IRF Contract: Rs 100.12

On 01-April-2022 ABC bought 2000 GOI securities from spot market at Rs 100.05. He anticipates that the interest rate will rise in near future. Therefore to hedge the exposure in underlying market he may sell May 2022 Interest Rate Futures contracts at Rs. 100.12.

On 16-May-2022 due to increase in interest rate:

Spot price of GOI Security: Rs 99.24

Futures Price of IRF Contract: Rs 99.28

Loss in underlying market will be $(99.24 - 100.05) * 2000 = \text{Rs } 1620$

Profit in the Futures market will be $(99.28 - 100.12) * 2000 = \text{Rs } 1680$

Illustration for Imperfect Hedging

Scenario 1 and 2

Assumption: Portfolio whose duration is 3 years, is being hedged with an IRF whose underlying securities duration is 10 years

Portfolio Duration: 3 year
Market Value of Portfolio: Rs 100 cr
Imperfect Hedging cannot exceed 20% of Portfolio

Maximum extent of short position that may be taken in IRFs is as per below mentioned formula:

Portfolio (security) Modified Duration * Market Value of Portfolio (security) / (Futures Modified Duration * Futures Price/PAR)

Consider that we choose to hedge 20% of portfolio
 $(3 * (0.2 * 100)) / (10 * 100 / 100) = \text{Rs } 6 \text{ cr}$

So we must Sell Rs 6 cr of IRF with underlying duration of 10 years to hedge Rs 20 cr of Portfolio with duration of 3 years.

Scenario 1

If the yield curve moves in a way that the 3 year moves up by 10 bps and the 10 year moves up by 5bps, which means that the short end has moved up more than the long end.

Amount of Security in Portfolio (LONG): Rs 20cr

If yields move up by 10 bps then the price of the security with a modified duration of 3 years will move down by;

Formula: (Yield movement * Duration) * Portfolio Value
 $(0.001 * 3) * 20,00,00,000 = - 6,00,000$

Underlying IRF (SHORT): Rs 6crs

If yields move up by 5bps then the price of the security with a duration of 10 years will move down by;

Formula: (Yield movement * Duration) * Portfolio Value

$(-0.0005 * 10) * 6,00,00,000 = 3,00,000$

Since we have sold the IRF, this movement is positive and hence the total loss will be reduced to:

$-6,00,000 + 3,00,000 = -3,00,000$

Due to IRF, the overall impact on the portfolio due to interest rate movement has been reduced.

Scenario 2

If the yield curve moves in a way that the 3 year does not move and the 10 year moves down by 5 bps, which means that the yield curve has flattened.

If yield does not move then the price of the security with a duration of 3 years will remain flat:

Formula: (Yield movement * Duration) * Portfolio Value

$(0 * 3) * 20,00,00,000 = 0$

Underlying IRF (SHORT): Rs 6cr

If yields moves down by 5bps then the price of the security with a duration of 10 years will move up by;

$(0.0005 * 10) * 6,00,00,000 = 3,00,000$

In this scenario, the imperfect hedge created on the portfolio would create a loss on the total position.

Certain risks are inherent to Derivative strategies viz. lack of opportunities, inability of Derivatives to correlate perfectly with the underlying and execution risks, whereby the rate seen on the screen may not be the rate at which the transaction is executed. For details of risk factors relating to use of Derivatives, the investors are advised to refer to Scheme Specific Risk Factors.

2. Swing Pricing

Pursuant to the provisions of clause 4.10 of the SEBI Master Circular on “Swing pricing framework for mutual fund schemes” SEBI had introduced swing pricing framework for open ended debt mutual fund schemes (except Overnight funds, Gilt funds and Gilt with 10-year maturity funds).

‘Swing pricing’ refers to a process for adjusting a scheme’s net asset value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e., flows into or out of the scheme) to the investors associated with that activity during the life of a scheme, excluding ramp-up period or termination. In a liquidity-challenged environment, quoted bid/ask spreads and overall trading costs can widen and may not be representative of the executed prices that can be achieved in the market.

The swing pricing framework would currently be applicable only for scenarios related to net outflows from the eligible debt scheme categories as referred above (“eligible debt scheme(s)”), in accordance with the guidelines provided hereunder:

Swing pricing framework for market dislocation:

1. Market dislocation criteria will be determined by SEBI based on AMFI’s recommendation or suo moto. Once the market dislocation is declared, the period for which the swing pricing would be applicable, will be notified by SEBI.
2. Subsequent to the announcement of market dislocation by SEBI, the swing pricing factor as tabulated below shall be applicable to the eligible debt scheme(s), only if as on the date of declaration of market dislocation by SEBI, the eligible debt scheme(s) is:
 - a. High or Very High risk on the risk-o-meter in terms clause 17.4 of the SEBI Master Circular (as of the most recent period at the time of declaration of market dislocation); and
 - b. classified in the cells A-III, B-II, B-III, C-I, C-II and C-III of the PRC Matrix in terms of 17.5 of the SEBI Master Circular

Pursuant to the above, a minimum swing factor as under shall be made applicable to the eligible debt scheme(s) and the NAV will be adjusted for stated swing factor:

Minimum swing factor for the eligible debt scheme(s)			
Max Credit Risk of scheme →	Class A (CRV* \geq 12)	Class B (CRV \geq 10)	Class C (CRV <10)
Max Interest Rate Risk of the scheme ↓			
Class I: (MD \leq 1 year)	-	-	1.5%
Class II: (MD \leq 3 years)	-	1.25%	1.75%
Class III: Any Macaulay duration	1%	1.5%	2%
*CRV: Credit Risk Value			

Further, in accordance with the current Potential Risk Class (PRC) Matrix classification of the eligible debt scheme(s) in terms of clause 17.5 of the SEBI Master Circular and subject to the eligible debt scheme(s) having a High or Very High risk-o-meter at the time of declaration of market dislocation, the mandatory minimum swing factor as applicable to the eligible debt scheme(s) of the Fund would be as under:

Scheme Name	PRC Matrix Classification	Minimum Swing Factor
Mahindra Manulife Liquid Fund	B-I	-
Mahindra Manulife Ultra Short Duration Fund	B-I	-
Mahindra Manulife Low Duration Fund	B-I	-
Mahindra Manulife Short Duration Fund	B-II	1.25%
Mahindra Manulife Dynamic Bond Fund	B-III	1.50%

- During the period when swing pricing framework is triggered and swing factor is made applicable for market dislocation, both the incoming and outgoing investors shall get NAV adjusted for swing factor.

Illustration on impact of Swing pricing:

When swing pricing is triggered due to market dislocation resulting in net outflows from the eligible debt scheme(s), the NAVs of the eligible debt scheme(s) shall be adjusted downwards as under:

Risk-O-Meter	PRC	Computed / Unswung NAV (Rs per unit)	Swing factor applied	Swing NAV (Rs per unit)
High / Very High	A-III	20.0000	1.00%	19.8000
	B-II	20.0000	1.25%	19.7500
	B-III	20.0000	1.50%	19.7000
	C-I	20.0000	1.50%	19.7000
	C-II	20.0000	1.75%	19.6500
	C-III	20.0000	2.00%	19.6000

- Swing pricing shall be made applicable to all unitholders at PAN level with an exemption for redemptions upto Rs. 2 lacs.
- The eligible debt scheme(s) performance shall be computed based on unswung NAV.
- Disclosures pertaining to NAV adjusted for swing factor along with the performance impact shall be made by the AMC in the prescribed format in the SID of the eligible debt scheme(s) and in scheme wise Annual Reports and Abridged summary thereof and on the website of the AMC, in case swing pricing framework has been made applicable for the eligible debt scheme(s).

Swing Pricing in case of ‘Re-opening of the scheme(s) after announcement of winding up’:

1. There may be instances where the AMC, after making an announcement to wind up a scheme, decides to roll-back the decision to wind up the scheme. Such situations may trigger large scale redemptions. In such circumstances, in terms of the requirements stated under the AMFI Best Practices Guidelines Circular No.135/ BP / 96B / 2024-25 dated November 4, 2024, the AMC shall mandatorily invoke the swing pricing upon reopening of the relevant scheme(s) for subscriptions and redemptions.
2. In the above circumstances / situations, the minimum swing factor to be applied would be higher of the swing factor as suggested by the Board of the AMC or the swing factor threshold(s) prescribed by AMFI for triggering swing pricing during normal times, as provided in the matrix below:

Minimum swing factor for the eligible debt scheme(s)			
Max Credit Risk of scheme→	Class A (CRV* \geq 12)	Class B (CRV* \geq 10)	Class C (CRV* <10)
Max Interest Rate Risk of the scheme ↓			
Class I: (Macaulay duration \leq 1 year)	-	0.05%	0.20%
Class II: (Macaulay duration \leq 3 years)	0.05%	0.10%	0.40%
Class III: Any Macaulay duration	0.10%	0.20%	0.60%
*CRV: Credit Risk Value			

Note: The above are floor swing amounts and the Board of the AMC may set higher limits, depending on the dynamics of the concerned scheme(s) both on liability side and on asset side.

3. The swing pricing in the above situations shall be applicable for higher of swing period as may be decided by the Board of the AMC or for a minimum of 7 working days as per the AMFI Best Practices Circular, upon reopening of the concerned scheme(s) for subscriptions and redemptions.

3. Provisions on creation of Segregated portfolio/Side pocketing

For applicability of the provisions on creation of segregated portfolio/side pocketing as outlined below in this section, investors/unitholders are advised to refer the respective SID(s) of the Scheme(s) of the fund.

Segregated Portfolio:

In case of a credit event at issuer level, the AMC may create a segregated portfolio of debt and money market instruments under the Scheme in compliance with clause 4.4 of the SEBI Master Circular.

Key definitions

Segregated Portfolio	A portfolio, comprising of debt or money market instrument affected by a credit event that has been segregated in a mutual fund Scheme.
Main Portfolio	The Scheme portfolio excluding the segregated portfolio.
Total Portfolio	The Scheme portfolio including the securities affected by the credit event.

Conditions for creation of a segregated portfolio

As per the policy on segregation of Scheme portfolios approved by the Board of Directors of the AMC and Trustees, creation of a segregated portfolio is optional and may be created at the discretion of the AMC, in case of a credit event at issuer as provided below:

Credit Event:

A. Rated debt and money market instruments:

In case of rated debt and money market instruments the credit event at issuer level shall be downgrade in credit rating by a Credit Rating Agency (CRA) as provided below:

1. Downgrade of a debt or money market instrument to ‘below investment grade’; or
2. Subsequent downgrades of the said instruments from ‘below investment grade’; or
3. Similar such downgrades of a loan rating.

In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as mentioned above and implemented at the ISIN level.

B. Unrated debt and money market instruments:

In case of unrated debt or money market instruments, Segregated Portfolio may be created only in case of actual default of either the interest or principal amount by the issuer of such instruments; Provided that such issuer shall not have any outstanding rated debt or money market instruments. In case of default of unrated debt or money market instruments, the AMC shall inform AMFI immediately about the actual default by the issuer. Upon being informed about the default, AMFI shall immediately inform the same to all AMCs. Pursuant to dissemination of information by AMFI about actual default by the issuer, AMCs may segregate the portfolio of debt or money market instruments of the said issuer in terms of the applicable regulatory requirements.

Process for creation of segregated portfolio

The AMC shall decide on creation of segregated portfolio of the Scheme on the day of Credit Event. Once the AMC decides to segregate portfolio, the AMC shall:

- i. Seek approval from the Board of Directors of the Trustees, prior to creation of the segregated portfolio;
- ii. immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors of the Scheme. The AMC shall also disclose that the segregation shall be subject to the Trustees’ approval. Additionally, the said press release shall be prominently disclosed on the website of the AMC.
- iii. ensure that till the time the approval from the Trustees is received, which in no case shall exceed 1 (one) business day from the day of credit event, the subscription and redemption in the concerned Scheme shall be suspended for processing with respect to creation of units and payment on redemptions.

Once the approval from the Trustees is received by the AMC:

- i. The segregated portfolio shall be effective from the day of Credit Event.
The AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio of the Scheme. The said information shall also be submitted to SEBI.
- ii. An email or SMS shall be sent to all unitholders of the concerned Scheme

Valuation and processing of subscriptions and redemptions

Notwithstanding the decision to segregate the debt and money market instrument, the valuation process shall take into account the Credit Event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (MF) Regulations and Circular(s) issued thereunder.

All subscription and redemption requests for which NAV of the day of Credit Event or subsequent day is applicable, will be processed as per the existing circular on applicability of NAV as under:

However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- d. The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Monitoring by Trustee

In order to ensure timely recovery of investments of the segregated portfolio, Trustees shall ensure that:

- The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
- Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the

segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.

- An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every meeting of the Trustees till the investments are fully recovered/ written-off.
- The Trustees shall monitor the compliance of the SEBI circular in respect of creation of the segregated portfolio and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, Trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the Scheme.

Illustration of segregated portfolio:

The below table shows how a security affected by a Credit Event will be segregated and its impact on investors. Whether the distressed security is held in the original portfolio or the segregated portfolio, the value of the investors' holdings will remain the same on the date of the Credit Event. Over time, the NAVs of the portfolios are subject to change.

Key Assumptions: We have assumed a scheme holds 4 securities (A, B, C & D) in its portfolio. It has two investors with total of 10,000 units. (Investor 1 – 6,000 units, Investor 2- 4,000 units).

Total Portfolio Value of Rs. 32 Lakhs (Each security invested is valued at Rs. 8 Lakh)

Current NAV: $32,00,000/10,000 = \text{Rs. } 320 \text{ Per Unit}$

Suppose Security D is downgraded to below investment grade and consequently the value of the security falls from Rs. 8,00,000 to Rs. 3,00,000 and the AMC decides to segregate the security into a new portfolio. Investors will be allotted the same number of units in the segregated portfolio as they hold in the main portfolio. So, Investor 1 will get 6,000 Units and Investor 2 will get 4,000 units in the segregated portfolio.

With segregation, the portfolio value is Rs. 27,00,000 (Now A, B & C Securities worth Rs. 24 Lakh and Security D, which has fallen from Rs . 8,00,000 to Rs. 3,00,000).

	Main Portfolio (Security of A,B & C)	Segregated Portfolio (Security D)
Net Assets	Rs. 24,00,000	Rs. 3,00,000
Number of Units	10,000	10,000
NAV per Unit	$\text{Rs. } 24,00,000/ 10,000 = \text{Rs. } 240$	$\text{Rs. } 3,00,000/ 10,000 = \text{Rs. } 30$

With respect to Investors:

Particulars	Investor 1	Investor 2
Units held in the Main portfolio	6,000	4,000
NAV of the Main portfolio	Rs. 240 per unit	Rs. 240 per unit
Value of Holding in Main portfolio (A) in Rs.	14,40,000	9,60,000
Units held in Segregated Portfolio	6,000	4,000
NAV of Segregated Portfolio	Rs. 30 per unit	Rs. 30 per unit
Value of holding in Segregated Portfolio (B) in Rs.	1,80,000	1,20,000
Total Value of holding (A) + (B) in Rs	16,20,000	10,80,000

In case the portfolio is not segregated, the Total Portfolio after marking down the value of security D would be:

Net Assets of the Portfolio: Rs. 27,00,000	No. of Units :10,000	NAV per unit Rs. 27,00,000 / 10,000= Rs. 270
---	-------------------------	---

Particulars	Investor 1	Investor 2
Units held in the Original Portfolio (No. of units)	6,000	4,000
NAV of the Main portfolio	Rs. 270 per unit	Rs. 270 per unit
Value of Holding in Main portfolio (A) in Rs.	16,20,000	10,80,000

Investors may note the essential difference between a segregated portfolio and non-segregated portfolio as follows:

- Where the portfolio is not segregated, the transactions will continue to be processed at NAV based prices. There will be no change in the number of units remaining outstanding.
- Where the portfolio is segregated, equal number of units are created and allotted to reflect the holding for the portion of portfolio that is segregated.
- Once the portfolio is segregated, the transactions will be processed at NAV based prices of main portfolio.
- Since the portfolio is segregated for distressed security, the additional units that are allotted cannot be redeemed. The units will be listed on the recognised stock exchange to facilitate exit to unit holders.
- Upon realisation of proceeds under the distressed security either in part or full, the proceeds will be paid accordingly. Based on the circumstances and developments, the AMC may decide to write off the residual value of the segregated portfolio.

Investors may also note that the process followed by the AMC/Trustees regarding creation of segregated portfolios shall be in accordance with the provisions laid down by SEBI in this regard, from time to time.

Investors who claim the unclaimed amounts during a period of three years from the due date shall be paid initial unclaimed amount along-with the income earned on its deployment. Investors, who claim these amounts after 3 years, shall be paid initial unclaimed amount along-with the income earned on its deployment till the end of the third year. After the third year, the income earned on such unclaimed amounts shall be used for the purpose of investor education.

The details of such unclaimed redemption/IDCW amounts, if any, shall be disclosed in the Abridged Scheme wise Annual Report sent to the Unit Holders.
