PART II - INFORMATION ABOUT THE SCHEME.**A. How will the scheme allocate its Assets**

Under normal circumstances, the asset allocation under the Scheme would be as follows:

Instruments	Indicative allocations (% of total assets)	
	Minimum	Maximum
Debt and Money Market Instruments*	0	100

*The Scheme may invest upto 40% in securitized debt. No investment will be made in foreign securities including foreign securitized debt.

The cumulative gross exposure through debt, derivative positions (including fixed income derivatives), repo transactions and credit default swaps in corporate debt securities and other permitted securities /assets and such other securities/assets as may be permitted by SEBI from time to time (subject to prior approval from SEBI, if any) will not exceed 100% of the net assets of the Scheme.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o- meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Investment in CDMDF

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with Chapter 16A of SEBI Master circular on Investment by Mutual Fund Schemes and AMCs in units of CDMDF, the Scheme shall invest 25 bps of its AUM. For details, refer Section II.

Investment in other schemes

The Scheme may, in line with its investment objectives, invest in another scheme under the management of AMC or of any other asset management company. The aggregate inter-scheme investment by the Mutual Fund under all its schemes, and schemes of other mutual funds, other than fund of fund schemes, shall not be more than 5% of the net assets of the Mutual Fund. No fee shall be charged by the AMC on investment in any scheme under the management of AMC or of any other asset management company.

Investments of the AMC in the Scheme

The AMC may invest in the Scheme in accordance with Regulation 28(5) of the Regulations. No investment management fees would be charged on such investment in the Scheme

For detailed definition/description of instruments and applicable regulations/guidelines for instruments please refer Section II.

Investment in overseas securities shall be made in accordance with the requirements stipulated by SEBI and RBI from time to time.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme is an actively managed Scheme

The Scheme is an open-ended ultra short term debt scheme that seeks to generate regular income by investing in a portfolio consisting of money market and debt instruments such that the Macaulay duration of the portfolio is between 3 months – 6 months, as defined below.

Macaulay duration is the weighted average term to maturity of the cash flows from an instrument. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Macaulay duration is a measure of interest rate sensitivity of a fixed income instrument. Higher the Macaulay duration, higher would be the interest rate risk.

Macaulay duration of a portfolio is the asset weighted average of the Macaulay duration of individual bonds / securities in the portfolio. The table below illustrates the calculation of Macaulay duration of the portfolio.

Instrument	Amount (Rs. in Crs.)	% of Portfolio (a)	Macaulay Duration (b)	Weighted Average (a*b)
Instrument 1	25	25%	1	0.25
Instrument 2	25	25%	2	0.50
Instrument 3	25	25%	3	0.75
Instrument 4	25	25%	4	1
	100	100%	Macaulay Duration of Portfolio	2.50

Macaulay Duration – Calculation

$$\text{Macaulay Duration} = \frac{\sum_{t=1}^n \frac{t \cdot C}{(1+y)^t} + \frac{n \cdot M}{(1+y)^n}}{\text{Current Bond Price}}$$

Where:

- t = respective time period
- C = periodic coupon payment

SCHEME INFORMATION DOCUMENT

- y = periodic yield
- n = total number of periods
- M = maturity value
- Current Bond Price = Present value of cash flows

Key Assumptions

1. Macaulay duration measures interest rate risk accurately only for instruments where cash flows do not change with change in the yield (i.e. for plain vanilla instruments and not for instruments with embedded options).
2. Macaulay duration assumes yield curve is flat and so cash flows are reinvested at constant YTM rate over the instrument's period.
3. Macaulay duration does not consider the fact that duration does not remain constant and duration changes with level of YTM rates.

Illustration

Assume a bond paying 10% coupon, matures in three years. Yield to maturity is at 10%. The bond pays coupon annually, and pays the principal on the final payment. Given this, the following cash flows are expected over the next three years:

Period	Cash flow
Year 1	Rs.100
Year 2	Rs.100
Year 3	Rs.1100

With the periods and the cash flows known, a discount factor must be calculated for each period. This is calculated as $1 / (1 + r)^n$, where r is the interest rate and n is the period number in question. Thus, the discount factors would be:

Period	Discount Factor Formula	Results
Year 1	$1 / (1 + 10\%)^1$	0.909
Year 2	$1 / (1 + 10\%)^2$	0.826
Year 3	$1 / (1 + 10\%)^3$	0.751

Next, multiply the period's cash flow by the period number and by its corresponding discount factor to find the present value of the cash flow:

Period	Weighted Present Value of cash flow	Results
Year 1	$1 * \text{Rs.100} * 0.909$	90.9
Year 2	$2 * \text{Rs.100} * 0.826$	165.3
Year 3	$3 * \text{Rs.1100} * 0.751$	2479.3
Sum		2735.5 (numerator)
Sum of PV Cash Flows = $100/(1+10\%)^1 + 100/(1+10\%)^2 + 1100/(1+10\%)^3 = 1000$ (denominator)		
Macaulay duration = $2735.5 / 1000 = 2.74$		

The key factors of the investment strategy of the Scheme are:

- a) Identifying attractive opportunities on the basis of the government policies, economic development, monetary policy, research report and overall economic conditions and development.
- b) The issuer/companies selection for investment exposure would be based on financial parameters such as fundamentals of business, quality of management, turnover, financial strength of the company and the key

SCHEME INFORMATION DOCUMENT

earnings drivers, net worth, Interest coverage ratio, profitability track record and the liquidity of the securities /instruments.

- c) Issuer/Companies, which meet the initial selection norms, are then evaluated on the financial norms for consideration in the investments. The Scheme would make investments universe based on the spread and liquidity, in such that the Macaulay duration of the portfolio of the Scheme will be between 3 to 6 months.
- d) The Scheme will emphasize on well managed, with above average growth prospects whose securities can be purchased at a good yield and whose debt securities will be mainly in securities listed as investments grade by a recognised authority like CRISIL, ICRA, CARE etc.
- e) Investment in sovereign papers would be based on the interest rate expectations arising out of macroeconomic analysis. This includes analysis of inflation data, & trends in macro variables such as credit growth, liquidity, money supply, fiscal numbers & global interest.

Risk control measures

Investments made by the Scheme would be in accordance with the investment objective of the Scheme and the provisions of the SEBI (MF) Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. While allocating and choosing securities, the Investment Manager will aim to diversify by gaining broad exposure to different industries and companies in order to reduce risk.

Trading In Derivatives

The Scheme intend to use derivatives for the purposes, which may be permitted by SEBI from time to time, which will include hedging & portfolio balancing as permitted under the Regulations. Hedging using Interest Rate Futures could be perfect or imperfect, subject to applicable regulations. Usage of derivatives may expose the Scheme to certain risks inherent to such derivatives. Hedging does not mean maximisation of returns but only reduction of systematic or market risk inherent in the investment. As per clause 7.6 of SEBI Master circular for Mutual Funds dated June 27, 2024, SEBI has specified the guidelines pertaining to trading by Mutual Fund in Exchange Traded Derivatives.

The following information provides a basic idea as to the nature of the derivative instruments proposed to be used by the scheme and the benefits and risks attached therewith. For detailed derivative strategies, please refer to SAI.

Portfolio turnover

The Scheme is an open-ended scheme and as such, there would a number of subscriptions and redemptions on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. Nonetheless, the AMC will take advantage of opportunities that present themselves from time to time in the securities market.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The performance of the scheme will be benchmarked to the performance of **CRISIL Ultra Short Duration Debt A-I Index**.

Pursuant to Para 1.9 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, uniform structure for benchmarking of schemes has been prescribed by SEBI. These uniform benchmarking of schemes indices are termed as first tier benchmark which reflects the category of the scheme.

Justification for using the benchmark : The aforesaid Benchmark is accordingly the 1st Tier benchmark Index basis the category of the scheme and in line with the list of benchmark as notified by AMFI.

Performance comparisons for the Scheme will be made vis-à-vis the aforesaid Benchmark. However, the Scheme's performance may not be strictly comparable with the performance of the Benchmark due to the inherent differences in the construction of the portfolios. The Trustee / AMC reserve the right to change the Benchmark for evaluation of performance of the Scheme from time to time in conformity with the investment objectives and appropriateness of the Benchmark subject to the SEBI Regulations, and other prevailing guidelines, if any.

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per Unit of the options of the Plan(s) under the Scheme will be computed by dividing the net assets of the options of the Plan(s) under the Scheme by the number of Units outstanding under the options of the Plan(s) under the Scheme on the valuation date. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time. In case of any conflict between the Principles of Fair Valuation and valuation guidelines specified by SEBI, the Principles of Fair Valuation shall prevail.

The NAV of the units under each options of the Plan(s) under the Scheme shall be calculated as shown below:

$$\text{NAV per Unit (Rs.)} = \frac{\text{Market or Fair Value of the Plan's Investments} + \text{Current Assets} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under each option of the Plan(s) under the Scheme}}$$

NAV	Closing NAV per Unit	10.0294

The NAV of the units under each options of the Plan(s) under the Scheme will be calculated and declared on each Business Day. Separate NAVs will be calculated and announced for each of the Plan(s) & option(s) under the scheme. The NAVs will be rounded off up to 4 decimal places for the Scheme. The units will be allotted up to 4 decimal places.

SCHEME INFORMATION DOCUMENT

Valuation of the scheme's assets, calculation of the scheme's NAV and the accounting policies & standards will be subject to such norms and guidelines that SEBI may prescribe from time to time and shall be subject to audit on an annual basis.

Pursuant to Regulation 49 (3) the repurchase Price of the units of an open ended scheme will not be lower than 97% of the NAV. Any imposition or enhancement of Load in future shall be applicable on prospective investments only.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc, kindly refer SAI

B. NEW FUND OFFER (NFO) EXPENSES

This section does not apply to the Scheme, as the ongoing offer of the Scheme has commenced after the NFO, and the Units are available for continuous subscription and redemption.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses incurred for the respective Plan(s) under the Scheme. These expenses include but are not limited to Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee including costs related to providing accounts statement, dividend/redemption cheques/warrants etc., marketing and selling costs marketing & selling expenses including agents commission and statutory advertisement, brokerage & transaction cost pertaining to the distribution of units, audit fees, fees and expenses of trustees, costs related to investor communications, costs of fund transfer from location to location etc., listing fee, custodial fees etc.

The maximum recurring expenses including the investment management and advisory fee that can be charged to the Scheme shall be subject to a percentage limit of average daily net assets as given in the table below.

The AMC has estimated the annual recurring expenses under the Scheme as per the table below:

Particulars	% of daily Net Assets (Regular Plan)
Investment Management & Advisory Fee	Upto 2.00%
Trustee fee	
Audit fees	
Custodian Fees	
Registrar & Transfer Agent Fees	
Marketing & Selling Expenses including Agents Commission	
Costs related to investor communications

^Expenses charged under the said parameters shall be in line with the Regulation 52 of SEBI (MF) Regulations or such other basis as specified by SEBI from time to time.

*However, such additional expenses will not be charged, if exit load is not levied / not applicable to the Scheme.

SCHEME INFORMATION DOCUMENT

& Additional TER will be charged based on inflows only from retail investors (other than corporates and institutions) from B-30 cities. As per para 10.1.3 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, inflows of amount upto Rs. 2,00,000/- per transaction, by individual investors from B-30 cities, shall be considered as inflows from retail investors.

Expense Structure for Direct Plan - The annual recurring expenses will be within the limits specified under the Regulations. Commission/distribution expenses will not be charged in case of Direct Plan and hence, the TER of Direct Plan will be lower to the extent of the commission/distribution expenses vis-à-vis Regular Plan.

Types of expenses charged shall be as per the SEBI Regulations and within the 2.00% mentioned above. Investors may note that the above-mentioned limits on TER are within the limits mandated by Regulation 52 (6) of the SEBI Regulations, which are as under:

- i. 2.00% on the first Rs.500 crores of daily net assets.
- ii. 1.75% on the next Rs. 250 crores of daily net assets.
- iii. 1.50% on the next Rs. 1,250 crores of daily net assets.
- iv. 1.35% on the next Rs. 3,000 crores of daily net assets.
- v. 1.25% on the next Rs. 5,000 crores of daily net assets.
- vi. Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof on the next Rs.40,000 crores of the daily net assets.
- vii. 0.80% on the balance of the daily net assets.

The AMC will also annually set apart, for investor education and awareness initiatives, at least 0.02% on the daily net assets of each Scheme, which shall be within the maximum limit of TER as mentioned in the table above.

Further, the following costs or expenses shall be charged to the Scheme (in addition to the limits specified as per Regulation 52(6)(c) of SEBI Regulations):

- a) Brokerage costs which are incurred for the purpose of execution of trades may be capitalised to the extent of 12 bps in case of cash market transactions and 5 bps in case of derivatives transactions. Any payment towards brokerage and transaction cost, over and above the aforesaid limits may be charged to the Scheme within the maximum limit of TER mandated by Regulation 52(6) of the SEBI Regulations;
- b) Additional TER will be charged based on inflows only from retail investors (other than corporates and institutions) from B-30 cities. As per para 10.1.3 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, inflows of amount upto Rs. 2,00,000/- per transaction, by individual investors from B-30 cities, shall be considered as inflows from retail investors.
- c) additional expenses, incurred towards different heads, not exceeding 0.05% of the daily net assets of the Scheme. However, such expenses will not be charged if exit load is not levied / not applicable to the Scheme.
- d) @Brokerage costs which are incurred for the purpose of execution of trade shall be charged to the Scheme, not exceeding 0.12% in case of cash market transactions and 0.05% in case of derivative transactions;

Any payment towards brokerage costs, over and above the said 12bps and 5bps for cash market and derivatives transactions respectively, shall be charged to the Scheme within the total recurring expenses limit specified under Regulation 52 of SEBI Mutual Fund Regulations, 1996. Any expenditure in excess of the said limit will be borne by the AMC/Trustees/Sponsors.

Investors may note that GST on investment and advisory fees may be charged to the Scheme in addition to the maximum limit of TER as mentioned in the table above. GST on expenses other than investment and advisory fees, if any, shall be borne by the Scheme within the maximum limit of TER as mentioned in the table above. GST on brokerage and transaction costs paid for execution of trade, if any, shall be within the limit prescribed under Regulation 52 of the SEBI Regulations.

Any expenditure in excess of the said prescribed limit (including brokerage and transaction cost, if any) shall be borne by the AMC or by the Trustee or Sponsor.

SCHEME INFORMATION DOCUMENT

For the actual current expenses being charged, the investor should refer to the website of the mutual fund at the following link <<https://www.barodabnpparibasmf.in/downloads/total-expense-ratio-of-mutual-fund-schemes>>. Any change proposed to the current expense ratio will be updated on the website and communicated to the investors via e-mail or SMS at least three working days prior to the effective date of the change (in accordance with para 10.1.8 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024). Further, the disclosure of the expense ratio on a daily basis shall also be made on the website of AMFI viz. www.amfiindia.com.

These estimates have been made in good faith as per the information available to the Investment Manager based on past experience and are subject to change inter-se. Types of expenses charged shall be as per SEBI (Mutual Funds) Regulations, 1996. The purpose of the above table is to assist the investor in understanding the various costs and expenses that an investor in the scheme will bear directly or indirectly.

Actual expenses for the financial year 2024-25:

Total recurring expense as a % to daily net assets:

- Regular Plan - 0.49%
- Direct Plan - 0.31%

An Illustration of impact of expense ratio on Scheme's returns:

If an investor A invests in a regular plan of a Scheme with an expense of 2% p.a. and an investor B invests in Direct Plan of the same scheme with an expense of 1% p.a. Assuming the gross return of this fund is 10% for that given year, investor A will make a return of 8% (post expense) for that year, whereas investor B will make 9% return for same period.

Also, please take a look at below illustration which shows impact of different expense ratio:.

Particulars	Regular Plan	Direct Plan
Amount Invested at the beginning of the year	10,000	10,000
Returns before Expenses (@15%pa)	1,500	1,500
Expenses other than Distribution Expenses	150	150
Distribution Expenses	50	-
Returns after Expenses at the end of the Year	1,300	1350
% Returns on Investment (Post Expenses)	13%	13.5%

Note:

- The purpose of the above illustration is to purely explain the impact of expense ratio charged to the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments, without considering any impact due to taxation.
- Investors are requested to note that NAV declaration made by AMC/Mutual Fund on every business day is net of expenses, and consequently scheme performance disclosures made by Mutual Fund, which are based on NAV values of the scheme are also net of expenses but does not consider impact of load and taxes, if any.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. (This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses.) Load amounts are variable and are subject to change from time to time. For the current applicable structure please refer to the website of the AMC (www.barodabnpparibasmf.in) or call on the number, 1800-2670-189 or may call your distributor.

TYPE OF LOAD	LOAD CHARGEABLE (% of NAV)
Exit Load	Nil

The above Exit Load will be applicable to all subscription transactions, excluding switch-ins.

There shall be no exit load levied in case of switch investments:

SCHEME INFORMATION DOCUMENT

- i) between the plans (i.e. Regular and Direct Plans) and/or
- ii) between the options (i.e. IDCW and Growth options),
within the Scheme/Plan

In accordance with the requirements specified by the para 10.4.1 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 no entry load will be charged for purchase/additional purchase/ switch-in accepted by the Fund. The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder. The exit load charged, if any, net of Goods and Services Tax (GST), shall be credited to the Scheme. No load will be charged on units issued upon re-investment of amount of distribution under same IDCW option and bonus units.

For any change in load structure, the AMC will issue an addendum and display it on the website/ISCs.

I. Introduction

A. Definitions/interpretation

Investors may refer to <https://www.barodabnpparibasmf.in/assets/pdf/Definitions.pdf> for definitions/interpretations.

B. RISK FACTORS

Scheme Specific Risk Factors

The Scheme specific risk factors are summarized as follows:

- Market Risk:

All mutual funds and securities investments are subject to market risk and there can be no assurance / guarantee that the scheme's objectives will be achieved. The securities that the scheme invests in would be exposed to price changes on a day-to-day basis. These price changes may occur due to instrument-specific factors as well as general macroeconomic conditions.

Markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market or economic developments. The scheme may be subject to price volatility due to factors such as interest sensitivity, market perception, and creditworthiness of issuer and market liquidity.

Different parts of the market can react differently to these developments. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole.

- Concentration Risk

The scheme may pursue only a limited degree of diversification. It may invest a greater proportion of assets in the securities of very few issuers (within the limits permitted by regulation) or be concentrated on a few market sectors. This could have implications on the performance of the scheme. The scheme may be more sensitive to economic, business, political or other changes and this may lead to sizeable fluctuation in the Net Asset Value of the scheme.

Risks associated with investing in fixed income securities:

1. **Credit and Counterparty risk:** Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security or honor its contractual obligations).

Counterparty risk refers to the counterparty's inability to honor its commitments (payment, delivery, repayment, etc.) and to risk of default. This risk relates to the quality of the counterparty to which the scheme has exposures. Losses can occur in particular for the settlement/delivery of financial instruments or the conclusion of financial derivatives contracts.

The value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit and counterparty risk as well as any actual event of default. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security value.

2. **Liquidity Risk:** The liquidity of the scheme's investment is inherently restricted by trading volumes in the securities in which the scheme invests.

A lower level of liquidity affecting an individual security or an entire market at the same time, may have an adverse bearing on the value of the scheme's assets. More importantly, this may affect the Fund's ability to sell particular securities quickly enough to minimise impact cost, as and when necessary to meet requirements of liquidity or to sell securities in response to triggers such as a specific economic/corporate event.

Trading volumes, settlement periods and transfer procedures may restrict the liquidity of a few or all of the investments and may affect the liquidity of the investments of the scheme.

The scheme may be unable to implement purchase or sale decisions when the markets turn illiquid, missing some investment opportunities or limiting ability to face redemptions. The lack of liquidity could also lead to the risk that the sale price of a security could be substantially lower than the fair value of the security.

3. **Interest Rate Risk & Re-investment Risk:** The value of an investment may be affected by interest rate fluctuations. Interest rates may be influenced by several elements or events, such as monetary policy, the discount rate, inflation, etc. The value of debt and fixed income securities held by the Scheme generally will vary inversely with the changes in prevailing interest rates. In general, price of debt and fixed income securities go up when interest rates fall, and vice versa. Securities of any issuer that has higher duration could be more risky in terms of price movements relative to those with lower duration. Thus any impact of interest rate changes would be higher on securities with higher duration irrespective of the status of the issuer of the security. The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
4. **Sovereign risk:** The Central Government of India is the issuer of the local currency debt in India. The Government raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since payment of interest and principal amount has a sovereign status implying least probability of a default, such securities are known as securities with sovereign credit. It also implies that the credit risk on such Government securities is even lower than that on non-government securities with "AAA" rating and hence yields on government securities are even lower than yields on non-government securities with "AAA" rating.

Scheme Specific Risk factors:

It also implies that the credit risk on such Government securities is even lower than that on non-government securities with "AAA" rating and hence yields on government securities are even lower than yields on non-government securities with "AAA" rating.

Risk Factors associated with Investments in Derivatives

The Scheme(s) may use various derivative instruments and techniques, permitted within SEBI (Mutual Funds) Regulations, 1996 from time to time including but not limited for portfolio balancing and hedging purpose, which may increase the volatility of Scheme's performance. Usage of derivatives will expose the Scheme(s) to certain risks inherent to such derivatives.

Derivative products are specialized instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.

The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. There is a possibility that a loss may be sustained by the Scheme(s) as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, interest rates and indices. Even a small price movement in the underlying instrument could have a large impact on their value. This could increase the volatility of the Scheme's performance.

In case of hedge, it is possible that derivative positions may not be perfectly in line with the underlying assets they are hedging. As a consequence the derivative cannot be expected to perfectly hedge the risk of the underlying assets. This also increases the volatility of the Scheme's performance. Some of the risks inherent to derivatives investments include:

1. **Price Risk:** Despite the risk mitigation provided by various derivative instruments, there remains an inherent price risk which may result in losses exceeding actual underlying.
2. **Default Risk:** This is the risk that losses will be incurred due to default by counter party. This is also known as credit risk or counterparty risk.
3. **Basis Risk:** This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying being hedged for e.g. mismatch between the maturity date of the futures and the actual selling date of the asset.
4. **Limitations on upside:** Derivatives when used as hedging tool can also limit the profits from a genuine investment transaction.
5. **Liquidity risk:** This risk pertains to how saleable a security is in the market. All securities/instruments irrespective of whether they are equity, bonds or derivatives may be exposed to liquidity risk (when the sellers outnumber buyers) which may impact returns while exiting opportunities.

SCHEME INFORMATION DOCUMENT

Risk factors associated with investments in repo transactions in corporate debt:

The Scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo transactions, the collateral may be sold, and a loss is realized only if the sale price is less than the repo amount. The risk is further mitigated through over-collateralization (the value of the collateral being more than the repo amount).

Risk factors associated with investments in Credit Default Swaps:

Credit default swap is the most common form of credit derivative where the buyer of the swap makes payments to the swap's seller until the maturity date of a contract. In return, the seller agrees that – in the event that the debt issuer defaults or experiences another credit event – the seller will pay the buyer the security's value as well as all interest payments that would have been paid between that time and the security's maturity date. The Scheme may participate in credit Default Swaps (CDS) as a buyer (protection buyer) to hedge/offset credit risk related to fixed income instruments. It is important to note that the credit risk isn't completely eliminated – it has been shifted to the CDS seller. The risk is that the CDS seller defaults at the same time the credit event occurs. In case the debt issuer does not default or no credit event occurs till maturity of CDS contract, the buyer will end up losing money through the payments on the CDS.

Risk Factors associated with investments in debt instruments having Structured Obligations / Credit Enhancements:

The risks factors stated for debt instruments having Structured Obligations / Credit Enhancements are in addition to the risk factors associated with fixed income instruments:

- Credit rating agencies assign CE rating to an instrument based on any identifiable credit enhancement for the debt instrument issued by an issuer. The credit enhancement could be in various forms and could include guarantee, shortfall undertaking, letter of comfort, etc. from another entity. This entity could be either related or non-related to the issuer like a bank, financial institution, etc. Credit enhancement could include additional security in form of pledge of shares listed on stock exchanges, etc. SO transactions are asset backed/ mortgage backed securities, securitized paper backed by hypothecation of car loan receivables, securities backed by trade receivables, credit card receivables etc. Hence, for CE rated instruments evaluation of the credit enhancement provider, as well as the issuer is undertaken to determine the issuer rating. In case of SO rated issuer, the underlying loan pools or securitization, etc. is assessed to arrive at rating for the issuer

- SO rated securities are often complex structures, with a variety of credit enhancements. Debt securities lack a well-developed secondary market in India, and due to the credit enhanced nature of CE securities as well as structured nature of SO securities, the liquidity in the market for these instruments is adversely affected compared to similar rated debt instruments. Hence, lower liquidity of such instruments, could lead to inability of the scheme to sell such debt instruments and generate liquidity for the scheme or higher impact cost when such instruments are sold.

- The credit risk of debt instruments which are CE rated derives rating is based on the combined strength of the issuer as well as the structure. Hence, any weakness in either the issuer or the structure could have an adverse credit impact on the debt instrument. The weakness in structure could arise due to inability of the investors to enforce the structure due to issues such as legal risk, inability to sell the underlying collateral or enforce guarantee, etc. In case of SO transactions, comingling risk and risk of servicer increases the overall risk for the securitized debt or assets backed transactions. Therefore apart from issuer level credit risk such debt instruments are also susceptible to structure related credit risk.

In addition to above and to the extent of the corpus of the Scheme investments in certain securities, the Scheme shall be subject to various risk factors. The Scheme shall also be subject to other risks including risk associated with inflation, legal risk, taxation risk, valuation risk, operational risk & risk factors associated with processing of transaction, in case of investors investing in mutual fund units, through Stock Exchange Mechanism as provided in SID.

Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk. The above are some of the common risks associated with investments in various securities.

Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e. before making a decision to invest/redeem Units.

Risks associated with segregated portfolio:

1. Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
2. Security comprises of segregated portfolio may not realise any value.
3. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.
4. Trading in the units of segregated portfolio on the Exchange may be halted because of market conditions, including any halt in the operations of Depository Participants or for reasons that in view of the Exchange Authorities or SEBI, trading in the units is suspended and / or restricted. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange rules of 'circuit filter'. There can be no assurance that the requirements of Stock Exchange necessary to maintain the listing of units of scheme will continue to be met or will remain unchanged.

- Other Risks:

- (a) **Risk associated with inflation:** Over time, yields of short-term investments may not keep pace with inflation, leading to a reduction in an investment's purchasing power.
- (b) **Legal risk:** The scheme may be affected by the actions of government and regulatory bodies. Legislation could be imposed retrospectively or may be issued in the form of internal regulations which the public may not be aware of. Legislation (including legislation relating to tax) or regulation may be introduced which inhibits the scheme from pursuing their strategies or which renders an existing strategy less profitable than anticipated. Such actions may take any form, for example nationalization of any institution or restrictions on investment strategies in any given market sector or changing requirements and imposed without prior warning by any regulator.
- (c) **Taxation risk:** The value of an investment may be affected by the application of tax laws, including withholding tax, or changes in government or economic or monetary policy from time to time. As such, no guarantee can be given that the financial objectives will actually be achieved. The tax information described in this Scheme Information Document (SID) is as available under the prevailing taxation laws. This could be changed at any moment by regulation. Further, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the scheme will endure indefinitely.
- (d) **Operational Risk:** Operational risk addresses the risk of trading and back office or administration issues that may result in a loss to the Scheme. This could be the result of oversight, ineffective securities processing procedures, computer systems problems or human error. There could also be risk associated with grouping of orders. For instance, at the time of placing the trades, the fund manager shall group orders on behalf of all schemes managed by him, provided it is unlikely to be detrimental overall for any of the schemes whose orders have been included. However, such grouping may have a detrimental effect to the scheme compared to the execution of an individual order for the scheme.
- (e) **Valuation risk:** This risk relates to the fact that markets, in specific situations and due to lack of volumes of transactions, do not enable an accurate assessment of the fair value of invested assets. In such cases, valuation risk represents the possibility that, when a financial instrument matures or is sold in the market, the amount received is less than anticipated, incurring a loss to the portfolio and therefore impacting negatively the NAV of the scheme.

Risk factors associated with processing of transaction in case of investors investing in mutual fund units through Stock Exchange Mechanism: The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognized stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing / settlement, etc. upon which the Fund and the AMC have no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s) upon which the Fund and the AMC have no control. Accordingly, there could be negative impacts to the investors such as delay or failure in allotment / redemption of Units. The Fund and the AMC are not responsible for the negative impacts.

SCHEME INFORMATION DOCUMENT

Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as Category I Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes including Conservative Hybrid Fund to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with Chapter 16A of SEBI Master circular on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the aforementioned schemes shall invest 25 bps of its AUM as on December 31, 2022 in the units of

the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

We would further like to bring to the notice of the investors that investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Investors are requested to read details disclosure on investment of the schemes in the CDMDF as listed in sub-section "C. How will the Scheme allocate its assets? And sub-section D. Where will the Scheme Invest" in Section "Section II- Information about the scheme".

Risk Management:

In accordance with SEBI & AMFI guidelines (issued from time to time), the AMC has implemented the following measures to manage various risk in the schemes.

Potential Risk Matrix:

The Potential Risk Class Matrix reflects the maximum risk fund manager can take in the scheme in terms of maximum interest rate risk (measured by Macaulay duration of scheme) and maximum credit risk (measured by Credit Risk value of the scheme). The threshold for values of interest rate risk & credit risk would determine the maximum risk the scheme can take.

i. Maximum Weighted Average Interest Rate Risk of the scheme (measured in terms of Macaulay Duration):

1. Class I: MD ≤ 1 year;
2. Class II: MD ≤ 3 years;
3. Class III: Any Macaulay duration

ii. Maximum Weighted Average Credit Risk of the scheme (measured in terms of Credit Risk Value assigned to each security in portfolio):

1. Class A: CRV ≥ 12
2. Class B: CRV ≥ 10
3. Class C: CRV < 10

Liquidity Risk Management Framework: It takes into account the Liquidity Risk arising from the liability side & covers all potential liquidity risk scenarios upto 99% confidence interval. Two types of liquid assets shall be maintained by Open ended debt schemes. Both these ratios are calculated & liquid assets are maintained on a daily basis at a scheme level for all open-ended debt schemes (except Overnight Fund, Gilt Fund and Gilt Fund

SCHEME INFORMATION DOCUMENT

with constant duration). In the case where liquid assets in a scheme fall below the minimum required threshold then portfolio manager cannot buy any other assets apart from liquid assets till time the liquid assets are replenished, as per the SEBI guidelines.

Stress Testing: Stress testing in open-ended debt schemes addresses the asset side risk from an Interest Rate Risk, Credit Risk & Liquidity Risk perspective at an aggregate portfolio level in terms of its impact on Net Asset Value of the scheme. The AMC conducts Stress testing for all open-ended debt schemes (except overnight Fund) on a fortnightly basis. The model portfolio for each category of fund is defined. In case the stress in the actual portfolio is greater than stress in model portfolio then corrective action is taken within the defined timeline.

Asset Liability Mismatch: The AMC monitors the Asset Liability Mismatch (ALM) requirement which address potential liquidity risk. The liability side covers all possible outflow scenarios with a 95% confidence interval over 90 days period. The asset side is rigoured based on Risk-o-meter liquidity scores in an exponential manner, to penalize assets with higher Risk-o-meter scores more than proportionately. With the above liquidity management tools, the redemption risk in the scheme can be addressed to a certain extent. However, for extraneous scenarios like 2008- financial crisis, 2019 covid crisis, or during market dislocation a swing pricing mechanism has been introduced at industry level which covers all types of investors (existing, new & outgoing investors).

C. RISK MITIGATION STRATEGIES

The investments in debt and Money Market instruments would be undertaken after assessing the associated credit risk, interest rate risk and liquidity risk. The AMC shall undertake credit evaluation of each investment opportunity and invest in rated papers of companies having a sound background, strong fundamentals and quality of management and financial strength. In addition, the Scheme would endeavor to invest in instruments with a relatively higher liquidity and will seek to manage the duration of the debt assets on proactive basis to manage interest rate risk and to optimize returns. The following table summarizes the risk mitigation/management strategy for the Debt assets of the Scheme

Risk & description specific to Debt	Risk Mitigation/ management strategy
Interest Rate Risk	The duration of a portfolio is one of the means of measuring the interest rate risk of the portfolio. Hence portfolios with higher duration will have higher interest rate risk. The duration of the Scheme will be actively managed based on prevailing macroeconomics condition, political environment, liquidity position in system, inflationary expections and other economic considerations.
Credit Risk	The credit evaluation of the AMC entails evaluation of credit fundamentals of each investment opportunity. Some of the factors that are evaluated inter-alia may include outlook on the sector, parentage, quality of management, and overall financial strength of the credit. The AMC will utilize ratings of recognized rating agencies as an input in the decision making process. To reduce credit risk, the scheme shall Invest in debt and money market instruments that have been assigned high investment grade ratings by a recognized rating agency.
Liquidity Risk	Liquidity risk is the risk of not being able to sell / liquidate a security at short notice at prevailing market prices or without incurring impact cost. Liquidity Risk can be partly mitigated by creating portfolios that are diversified across maturities, ratings, types of securities, etc. in line with the fund objectives, regulations and investment strategy. The Scheme shall follow the asset allocation pattern in Scheme Information Document under normal circumstances and residual cash may be invested in the Tri-party repo on Government Securities and treasury bills, repo market, units of mutual fund which seeks to ensure liquidity in the scheme under normal circumstances.
Volatility Risk	There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The Scheme will manage volatility risk through diversification. To that extent, the Volatility risk will be mitigated in the Scheme.
Concentration Risk	The AMC will attempt to mitigate this risk by maintaining adequate diversification across issuers/ sectors / instrument type in line with the scheme objectives,

SCHEME INFORMATION DOCUMENT

Risk & description specific to Debt	Risk Mitigation/ management strategy
	investment strategy and applicable regulations. This will also be managed by keeping prudent investment limits on any particular industry or issuer or issuer group based on the size, credit profile, etc. to reduce issuer or industry specific risk.

The scheme may utilize derivative instruments for hedging & portfolio balancing purposes. All Interest Rate Swaps will be undertaken with approved counter parties under pre-approved International Swaps and Derivatives Association (ISDA) agreements. The scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI/RBI for the purpose of hedging and portfolio rebalancing.

The above risk control measures shall be implemented by the AMC on best effort basis however there can be no guarantee that such measures can completely mitigate the risks involved in Scheme.

II. Information about the scheme:

A. Where will the scheme invest?

The funds available under the Scheme will primarily be invested in debt and Money Market Instruments such that the Macaulay duration of the portfolio is between 3 months and 6 months (please refer to page no. 29).

The Scheme may invest its funds in the following securities:

1. Securities created and issued by the Central and State Governments and/or reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and T-Bills).
2. Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and T-Bills).
3. Debt issuances of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee.
4. Corporate debt (of both public and private sector undertakings).
5. Debentures (of both public and private sector undertakings) including non-convertible and cumulative.
6. Term Deposits of banks (both public and private sector) and development financial institutions.
7. Debt and money market instruments (reverse repo, Tri-Party Repo etc.) permitted by SEBI/RBI or in alternative investment for the call money market as may be provided by RBI to meet the liquidity requirements.
8. Certificate of Deposits (CDs).
9. Commercial Paper (CPs).
10. Securitised debt.
11. Units of mutual fund schemes.

Position of debt & money market in India

The Indian debt market is today one of the largest in Asia and includes securities issued by the Government (Central & State Governments), public sector undertakings, other government bodies, financial institutions, banks and corporates. Government and public sector enterprises are the predominant borrowers in the markets. The major players in the Indian debt markets today are banks, financial institutions, mutual funds, insurance companies, primary dealers, trusts, pension funds and corporates. The Indian debt market is the largest segment of the Indian financial markets. The debt market comprises broadly two segments, viz. Government Securities market or G-Sec market and corporate debt market. The latter is further classified as market for PSU bonds and private sector bonds.

The G-Sec market is the oldest and the largest component of the Indian debt market in terms of market capitalization, outstanding securities and trading volumes. The G-Sec market plays a vital role in the Indian economy as it provides the benchmark for determining the level of interest rates in the country through the yields on the Government Securities which are referred to as the risk-free rate of return in any economy. Over the years, there have been new products introduced by the RBI like zero coupon bonds, floating rate bonds, inflation indexed bonds, etc.

SCHEME INFORMATION DOCUMENT

The corporate bond market, in the sense of private corporate sector raising debt through public issuance in capital market, is only an insignificant part of the Indian Debt Market. A large part of the issuance in the non-Government debt market is currently on private placement basis.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). In a predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates. In money market, activity levels of the Government and nongovernment debt vary from time to time. Instruments that comprise a major portion of money market activity include but not limited to:

- Overnight Call
- Tri-party repo on Government Securities or treasury bills (TREPS).
- Repo/Reverse Repo Agreement
- Treasury Bills
- Government securities
- Commercial Paper
- Certificate of Deposit

Apart from these, there are some other options available for short tenure investments that include MIBOR linked debentures with periodic exit options and other such instruments. Though not strictly classified as money market instruments, PSU / DFI / corporate paper with a residual maturity of < 1 year, are actively traded and offer a viable investment option. The market has evolved in past 2-3 years in terms of risk premia attached to different class of issuers. Bank CDs have clearly emerged as popular asset class with increased acceptability in secondary market. PSU banks trade the tightest on the back of comfort from majority government holding. Highly rated manufacturing companies also command premium on account of limited supply. However, there has been increased activity in papers issued by private/foreign banks/NBFCs/companies in high-growth sector due to higher yields offered by them. Even though companies across these sectors might have been rated on a same scale, the difference in the yield on the papers for similar maturities reflects the perception of their respective credit profiles.

Instruments	Current yield as on October 31, 2025 (% per annum)
TREPS	5.50-5.75
3M T-Bill	5.40-5.50
1 Y T-Bill	5.55-5.60
10 Y G Sec	6.50-6.60
3M PSU Bank CD	5.95-6.05
3M NBFC CP	6.40-6.50
1 Y PSU Bank CD	6.40-6.50
1 Y NBFC CP	6.75-6.85
1Y Manufacturing Company CP	6.50-6.60
5 Y AAA Institutional Bond	6.80-6.85
10 Y AAA Institutional Bond	7.10-7.15

These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing consequent to changes in macro-economic conditions and RBI policy. The price and yield on various debt instruments fluctuate from time to time depending upon the macro economic situation, inflation rate, overall liquidity position, foreign exchange scenario etc. Also, the price and yield vary according to maturity profile, credit risk etc.

B. What are the investment restrictions?

Pursuant to the SEBI Regulations, the following investment restrictions are applicable to the scheme:

- i. The Scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer, which are rated not below investment grade by a credit rating agency authorized to carry out such activities under the SEBI Act, 1992.

SCHEME INFORMATION DOCUMENT

Such investment limit may be extended to 12% of the NAV of the Scheme with the prior approval of the Board of Directors of the Trustee and AMC.

Provided that such limit shall not be applicable for investment in Government Securities, treasury bills and triparty repo on Government securities or treasury bills.

Provided further that investments within such limit can be made in the mortgaged backed securitised debt, which are rated not below investment grade by a credit rating agency, registered with SEBI.

- ii. The Scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities and other money market instruments, provided that the Scheme may invest in unlisted non-convertible debentures up to a maximum of 10% of the debt portfolio of the scheme subject to such conditions as may be specified by the SEBI from time to time. Provided further that scheme shall comply with these norms within the time and in the manner as may be specified by SEBI. Provided further that the Scheme will adhere to the norms for investments by mutual fund schemes in unrated debt instruments as specified by SEBI from time to time.
- iii. Debentures, irrespective of any residual maturity period (above or below one year), shall attract the investment restrictions as applicable for debt instruments as specified under clauses (i) and (ii) above.
- iv. Transfer of investments from one scheme to another scheme in the same Mutual Fund is permitted provided:
 - a. Such transfers are done at the prevailing market price for quoted instruments on spot basis (spot basis shall have the same meaning as specified by a Stock Exchange for spot transactions); and
 - b. The securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made. Further the inter scheme transfer of investments shall be in accordance with the provisions contained in clause Inter-Scheme transfer of investments, contained in SAI.
- v. The Scheme may invest in other schemes under the same AMC or any other mutual fund without charging any fees, provided the aggregate inter-scheme investment made by all the schemes under the same management or in schemes under management of any other asset management company shall not exceed 5% of the Net Asset Value of the Mutual Fund. No investment management fees shall be charged for investing in other schemes of the Fund or in the schemes of any other mutual fund.
- vi. The Mutual Fund shall buy and sell securities on the basis of deliveries and shall in all cases of purchases, take delivery of relevant securities and in all cases of sale, deliver the securities:

Provided that the Mutual Fund may engage in short selling of securities in accordance with the framework relating to short selling and securities lending and borrowing specified by SEBI.

Provided further that the Mutual Fund may enter into derivatives transactions in a recognized stock exchange subject to the framework specified by SEBI.

Provided further that sale of government security already contracted for purchase shall be permitted in accordance with the guidelines issued by RBI in this regard.

SCHEME INFORMATION DOCUMENT

- vii. The Fund shall get the securities purchased transferred in the name of the Fund on account of the Scheme, wherever investments are intended to be of a long-term nature.
- viii. No loans for any purpose can be advanced by the Scheme.
- ix. A scheme shall not make any investments in:

Such investment limit may be extended to 25% of the net assets of the scheme with the prior approval of the Board of Trustees.

The investments by the Scheme in debt and money market instruments of group companies of both the sponsor and the AMC shall not exceed 10%. Such investment limit may be extended to 15% with the prior approval of the Board of Trustees.

For this purpose, a group means a group as defined under regulation 2 (mm) of SEBI (Mutual Funds) Regulations, 1996 and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

- xv. In terms of para 12.3 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, the investment of mutual fund schemes in the following instruments shall not exceed 10% of the debt portfolio of the schemes and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the schemes: a. Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade and b. Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade by a single issuer. For the purpose of this provision, 'Group' shall have the same meaning as defined in para = of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 which states a group means a group as defined under regulation 2 (mm) of SEBI (Mutual Funds) Regulations, 1996 and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates. Further, investment in debt instruments, having credit enhancements backed by equity shares directly or indirectly, shall have a minimum cover of 4 times considering the market value of such shares.
- xvi. Participation by the Scheme in CDS transactions shall be subject to and as per the guidelines issued by RBI and SEBI from time to time. As per SEBI circular no SEBI/HO/IMD/PoD2/P/CIR/2024/125 dated September 20, 2024 has prescribed the following conditions:
 - (a) Schemes may buy CDS only for the purpose of hedging their credit risk on debt securities they hold in various schemes. The exposure of CDS shall not exceed respective debt security exposure, and such exposure may not be added to gross exposure of the scheme.
 - (b) In case the protected debt security is sold, schemes shall ensure that the respective CDS position is closed within fifteen working days of selling the above protected debt security.
 - (c) MF schemes shall buy CDS only from such sellers that have instruments with lowest long-term rating of investment grade and above.
 - (d) Schemes may buy CDS for investment grade and existing below investment grade debt securities in the portfolio, if any.
 - (e) MF Schemes may sell CDS only as part of investment in synthetic debt securities, i.e., sell CDS on a reference obligation covered with Cash/GSec/ T-bills. (f) Cash, G-Sec and T-bills can act as cover. Government securities with maturity within +/- 6 months of the maturity of respective debt security (reference obligation) shall act as cover and such cover may be used for maintaining margin requirements on respective CDS.
 - (g) Exposure through CDS (Notional amount of both CDS bought and sold) shall not exceed 10% of AUM of scheme and shall be within the overall limit of derivatives exposure as prescribed in Scheme Information Documents.

SCHEME INFORMATION DOCUMENT

(h) Further provided that the exposure in interest rate derivatives and CDS shall not exceed 50% of debt assets

All investment restrictions shall be applicable at the time of making investment.

Further, pursuant to SEBI circular dated June 26, 2025, deviation of prudential limits due to passive breaches (occurrence of instances not arising out of omission and commission of AMC) should be rebalanced within 30 business days. If such passive deviations of prudential limits are not rebalanced within 30 business days, justification in writing, including details of efforts taken to rebalance the passive breach shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing of passive breach up to sixty (60) Business Days from the date of completion of mandated rebalancing period. In case the passive deviation of prudential limits is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, reporting and disclosure requirements as specified in para 2.9 of SEBI Master Circular dated June 27, 2024.

Apart from the investment restrictions prescribed under the SEBI Regulations, internal risk parameters for limiting exposure to a particular scrip or sector may be prescribed from time to time to respond to the dynamic market conditions and market opportunities. The AMC / Trustee may alter the above investment restrictions from time to time to the extent that changes in the SEBI Regulations may allow and as deemed fit in the general interest of the unit holders.

The policy regarding reissue of repurchased units, including the maximum extent, the manner of reissue, the entity (the Scheme or the AMC) involved in the same	As the Scheme is an open-ended Scheme, this provision may not be applicable.
Restrictions, if any, on the right to freely retain or dispose of units being offered	Restriction of Repurchase/Redemption (including switch-out) facility under the Scheme: In terms of para 1.12 of SEBI Master circular dated June 27, 2024, the repurchase/redemption (including switch-out) of units of the Scheme may be restricted under any of the following circumstances: • Liquidity issues - When market, at large, becomes illiquid affecting almost all securities rather than any issuer specific security. • Market failures, exchange closures: when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies

	• Operational issues: when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out) Further, such restriction on redemption (including switch-out) may be imposed for a specified period of time not exceeding 10 working days in any 90 days period. Restriction of repurchase/redemption facility under the Scheme shall be made applicable only after the approval from the Board of Directors of the AMC and the Trustees. The approval from the AMC Board and the Trustees giving details of circumstances and justification for the proposed action shall also be informed to SEBI immediately. Further, where such restriction of repurchase/redemption facility under the Scheme is imposed, the Trustee / AMC may, in the interest of the Unit holders of the Scheme, keeping in view the unforeseen circumstances / unsure conditions, limit the total amount of redemption which may be redeemed on any business day as the Trustee / AMC may decide in any particular case, provided: 1. No redemption requests upto Rs. 2 lakh shall be subject to such restriction. 2. Where redemption requests are above Rs. 2 lakh, AMCs shall redeem the first Rs. 2 lakh without such restriction and remaining part over and above Rs. 2 lakh shall be subject to such restriction. Subject to provisions of aforesaid para 1.12 of SEBI Master circular dated June 27, 2024 and SEBI (Mutual Funds) Regulations, 1996, Trustee / AMC reserves the right to determine the operational procedure concerning such restriction on redemption and the same shall be notified to the investors by display of public notice at various investor service centres of AMC and its website (www.bnpparibasmf.in). The AMC / Trustee reserve the right to change / modify the aforesaid provisions pertaining to Restriction of Repurchase/Redemption (including switch-out) facility under the Scheme. Freezing / Seizure of Accounts: Investors may note that under the following circumstances the Trustee / AMC may at its sole discretion (and without being responsible and/or liable in any manner whatsoever) freeze/seize a unit holder's account (or deal with the same in the manner the Trustee / AMC is directed and/or ordered) under a Scheme: • Under any requirement of any law or regulations for the time being in force. • Under the direction and/or order (including interim orders) of any regulatory/statutory authority or any judicial authority or any quasi-judicial authority or such other competent authority having the powers to give direction and/or order. Suspension of Sale of the Units: The Sale of units of the Scheme may be suspended temporarily or indefinitely under any of the following circumstances: • During the period of book closure, if any • Stock markets stop functioning or trading is restricted • Periods of extreme volatility in the stock markets, which in the opinion of the Investment Manager is prejudicial to the interest of the unit holders.

Based on the para 16.6 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, to comply with the requirements of RTA inter-operable Platform for enhancing investors' experience in Mutual Fund transactions / service requests, the Qualified RTAs (QRTA's), Kfin Technologies Limited (Kfintech) and

SCHEME INFORMATION DOCUMENT

Computer Age Management Services Limited (CAMS) have jointly developed MFCentral - A digital platform for Mutual Fund investors.

MFCentral is created with an intent to be a one stop portal / mobile app for all Mutual fund investments and service-related needs that significantly reduces the need for submission of physical documents by enabling various digital / phygital services to Mutual fund investors across fund houses subject to applicable Terms & Conditions of the MFCentral platform. MFCentral will be enabling various features and services in a phased manner. MFCentral may be accessed using link <https://mfcentral.com/> (or its app in future).

With a view to comply with all provisions of the aforesaid circular, AMC/the Fund designates MFCentral as its Official Points of Acceptance of Transactions (OPAT) w.e.f. September 23, 2021.

Any registered user of MFCentral, requiring submission of physical document as per the requirements of MFCentral, may do so at any of the designated Investor Service centres or collection centres of Kfintech or CAMS.
