B. WHERE WILL THE SCHEME INVEST?

Subject to the Regulations and the disclosures as made under the section “How will the Scheme allocate its Assets”, the corpus of the Scheme can be invested in any (but not exclusively) of the following:

- 1) Units of BHARAT 22 ETF.
- 2) Money market instruments as defined under SEBI (Mutual Funds) Regulations, 1996, having maturities up to 91 days, or in alternative investment for the call money market.
- 3) Units of Liquid Schemes, subject to applicable regulations.
- 4) TREPSs, Cash & Cash Equivalents.

As per the SEBI guidelines, a Fund of funds scheme shall not invest in any other fund of funds scheme.

The units of the schemes of the Mutual Funds or other securities where the Scheme proposes to invest could be listed, unlisted, rated or unrated and of any maturity. The units may be acquired through subscription to the units during the New Fund Offerings (NFOs) of the schemes or by subscriptions on on-going basis in case of open-ended schemes.

The inter Scheme transfer of investments shall be in accordance with the provisions contained in paragraph 12.30 of the Master Circular pertaining to Inter-Scheme transfer of investments

C. WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme would endeavor to provide investment returns linked to BHARAT 22 ETF. The Scheme intends to achieve its investment objective by investing in BHARAT 22 ETF. The deviation from the underlying Scheme may occur mainly on account of the receipt of cash flows which on an average takes 5 days given the existing operational procedure.

The Scheme will invest in BHARAT 22 ETF directly or through secondary market.

The table shows below the impact that could happen on fund performance as a result of delay in receipt of funds and consequent investments in BHARAT 22 ETF over previous six months ending on March 31, 2025.

	2 Days	3 Days	4 Days	5 Days	6 Days	7 Days
Minimum	-3.12	-4.16	-5.12	-5.44	-5.56	-5.55
Maximum	4.05	4.72	4.92	4.60	5.52	6.77
Average	-0.08	-0.17	-0.29	-0.42	-0.47	-0.48

The assumption is that entire corpus is delayed by the number of days tabulated above. But in reality, since the daily subscription may not be material to the total corpus of the Scheme the impact would not be material. Moreover, subscriptions over periods of time would normally be expected to iron out the deviations.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The benchmark of the Scheme is BSE Bharat 22 TRI.

As the Scheme invests in BHARAT 22 ETF which tracks BSE Bharat 22 Index, the same is a suitable benchmark for the performance of the scheme.

BSE Bharat 22 Index is designed to measure the performance of selected companies disinvested by the Central Government of India according to its disinvestment program. The index employs a modified market capitalization weighting scheme, using the divisor methodology used in Dow Jones Indices' equity indices. The weight of each individual stock is capped at 15% and each BSE sector is capped at 20% of the index. Individual stock and sector weight caps are applied during the annual rebalancing.

The Trustee reserves right to change the benchmark for performance of the scheme by suitable notification to the investors to this effect.

PART III. OTHER DETAILS

A. COMPUTATION OF NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date. The Fund shall value its investments according to the valuation norms, as specified in Schedule VIII of the Regulations, or such norms as may be prescribed by SEBI from time to time and as stipulated in the valuation policy and procedures of the Fund, provided in Statement of Additional Information (SAI).

The NAV of the Scheme shall be rounded off upto four decimals

NAV of units under the Scheme shall be calculated as shown below:

NAV (Rs.) =

Market or Fair Value of Scheme's investments + Current Assets
- Current Liabilities and Provision

No. of Units outstanding under Schemes

The NAV will be calculated as of the close of every Business Day of the respective Scheme. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Illustration of computation of NAV:

If the net assets of the Scheme are Rs.10,45,34,345.34 and units outstanding are 10,000,000, then the NAV per unit will be computed as follows:

$10,45,34,345.34 / 10,000,000 = \text{Rs. } 10.4534 \text{ p.u. (rounded off to four decimals)}$

The Fund shall ensure that the repurchase price of an open ended scheme is not lower than 95 per cent of the Net Asset Value.

I. Introduction

A. Definitions

Definition for the words and expressions used in the SID are available at the following link : [SID related information \(icicipruamc.com\)](http://www.icicipruamc.com)

The words and expressions shall have the meaning as specified at the above link, unless the context otherwise requires.

B. Risk Factors

I. **Standard Risk Factors:** Please refer to SAI.

II. Scheme specific risk factors

Investors may please note that they will be bearing the recurring expenses of the relevant Fund of Funds Scheme in addition to the expenses of the underlying schemes in which the Fund of Funds Scheme makes investment.

- As the investors are incurring expenditure at both the Fund of Funds level and the scheme into which the Fund of Funds invests, the returns that they may obtain may be materially impacted or may at times be lower than the returns that investors directly investing in such schemes obtain.
- While it would be the endeavour of the Fund Manager of the Fund of Funds scheme to invest in the underlying scheme in a manner, which will seek to maximize returns, the performance of the underlying Scheme may vary which may lead to the returns of the Fund of Funds Scheme being adversely impacted.
- The scheme specific risk factors of the underlying scheme becomes applicable where a Fund of Funds invests in any underlying scheme. Investors who intend to invest in Fund of Funds are required to and are deemed to have read and understood the risk factors of the underlying scheme relevant to the Fund of Funds scheme that they invest in. Copy of the Scheme Information Document pertaining to the underlying scheme of ICICI Prudential Mutual Fund, which disclose the relevant risk factors, are available at the Customer Service Centers or may be accessed at www.icicipruamc.com.
- A Fund Manager managing any one of the Fund of Funds scheme may also be the Fund Manager for the underlying scheme.
- The Fund of Funds Scheme as well as the underlying scheme having exposure to the fixed income securities and/ or equity and equity related securities will be subject to the following risks and in turn the Scheme's / Plan's performance will be affected accordingly.

1. Market Risk

The Scheme's NAV will react to the stock market movements. The Investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices market movements, and over longer periods during market downturns.

2. Portfolio Concentration Risk

To the extent that the underlying Scheme may concentrate its investments in the Securities of companies of certain sectors, the underlying Scheme will therefore be subject to the risks associated with such concentration. In addition, to the extent the underlying Scheme may invest in small capitalization and/or newly-established companies, the underlying Scheme may be exposed to higher levels of volatility and risk than would generally be the case in a more diverse fund portfolio of equity Securities. Such risks may impact the underlying Scheme to the extent that it invests in particular sectors even in cases where the investment objective is more generic.

3. Redemption Risk

Investors should note that even though the underlying scheme is an open ended scheme, subscription/redemptions directly with the Fund would be limited to such investors who have the ability to subscribe/redeem the units of the underlying scheme in the creation unit size. Generally, this lot size is larger as compared to normal fund. However, the scheme wishing to subscribe/redeem units in other than specific lot size can do so by buying/selling the same on the Stock Exchange. The scheme can also approach the Fund directly for redemption in other than Creation Unit Size on occurrence of various events as listed in this document.

4. Right to Limit Redemptions

The Trustee, in the general interest of the Unit holders of the Scheme offered in this Document and keeping in view the unforeseen circumstances / unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day. The same shall be in accordance with paragraph 1.12 of the Master Circular.

5. Regulatory Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the Scheme.

6. Risk associated with Investing in money market instruments

- **Interest Rate risk:** This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
- **Credit risk:** This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest
- **Liquidity risk:** The liquidity of a security may change depending on market conditions leading to changes in the liquidity premium linked to the price of the security. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio

The Scheme may also invest in units of liquid schemes of domestic mutual funds including that of ICICI Prudential Mutual Fund which may have objective to invest in debt and money market instruments and are subject to similar risks as stated above.

7. Risks associated with investing in Tri Party Repo through CCIL (TREPS):

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments.

CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the “Default Waterfall”.

As per the waterfall mechanism, after the defaulter’s margins and the defaulter’s contribution to the default fund have been appropriated, CCIL’s contribution is used to meet the losses. Post utilization of CCIL’s contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members.

Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower.

Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

8. Risks associated with ADR / GDR / Foreign Securities

The scheme will not have any exposure to ADR / GDR / Foreign Securities.

9. Risks associated with Securitized Debt

The scheme will not have any exposure to Securitized debt.

10. Risks associated with Short Selling and Stock Lending

The scheme does not intend to short sell the securities and will not engage in Securities lending.

11. RISK FACTORS ASSOCIATED WITH UNDERLYING SCHEME (BHARAT 22 ETF):

9.1 Market Trading Risks

The Scheme's NAV will react to the stock market movements. The Investors could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices and market movements, and over longer periods during market downturns.

- **Absence of Prior Active Market:** Although units of the underlying Scheme are listed on the Exchange, there can be no assurance that an active secondary market will develop or be maintained.
- **Lack of Market Liquidity:** Trading in units of the underlying Scheme on the Exchange may be halted because of market conditions or for reasons that in the view of the Market Authorities or SEBI, trading in units is not advisable. In addition, trading in units of the underlying Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI "circuit filter" rules. There can be no assurance that the requirements of the Market necessary to maintain the listing of units of the underlying Scheme will continue to be met or will remain unchanged.
- **Units of the underlying Scheme may trade at Prices Other than NAV:** Units of the underlying Scheme may trade above or below its NAV. The NAV will fluctuate with changes in the market value of underlying Scheme's holdings. The trading prices of the underlying Scheme will fluctuate in accordance with changes in their NAVs as well as market supply and demand of units of the underlying Scheme. However, given that units of the underlying scheme can be created and redeemed only in Creation Units directly with the fund, it is expected that discounts or premiums to the NAVs of the underlying scheme will not sustain due to arbitrage possibility available.
- **Regulatory Risk:** Any changes in trading regulations by the Stock Exchange/s or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.
- **Settlement Risk:** In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the underlying Scheme to make intended securities purchases due to settlement problems could cause the underlying Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the underlying Scheme portfolio may result, at times, in potential losses to the underlying Scheme, and there can be a subsequent decline in the value of the securities held in the underlying Scheme's portfolio.
- **Redemption Risk**
Investors should note that even though the underlying scheme is an open ended scheme, subscription/redemptions directly with the Fund would be limited to such investors who have the ability to subscribe/redeem the units of the underlying scheme in the creation unit size. Generally, this lot size is larger as compared to normal fund. However, the scheme wishing to subscribe/redeem units in other than specific lot size can do so by buying/selling the same on the Stock Exchange. The scheme can also approach the Fund directly for redemption in other than Creation Unit Size on occurrence of various events as listed in this document.

- **Right to Limit Redemptions:** The Trustee, in the general interest of the Unit holders of the Scheme offered in this Document and keeping in view the unforeseen circumstances / unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day.

1.1. Tracking Error Risk of Underlying scheme (BHARAT 22 ETF)

The AMC would monitor the tracking error of the underlying scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, the AMC will endeavour that the tracking error of the underlying Scheme does not exceed 2% per annum. However, this may vary due to various reasons mentioned below or any other reasons that may arise and particularly when the markets are very volatile.

Factors such as the fees and expenses of the underlying Scheme, corporate actions, cash balance, changes to the Underlying Scheme and regulatory policies may affect the AMC's ability to achieve close correlation with the Underlying Index of the Scheme. The underlying scheme's returns may therefore deviate from those of their Underlying Index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying Index and the NAV of the underlying Scheme. Tracking Error may arise due to the following reasons: -

- Expenditure incurred by the Underlying Scheme.
- Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and realization of sale proceeds and the registration of any securities transferred and any delays in receiving cash and IDCW and resulting delays in reinvesting them.
- Securities trading may halt temporarily due to circuit filters.
- The underlying index reflects the prices of securities at close of business hours. However, the Fund may buy or sell the securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the exchange.
- Index service provider undertakes the periodical review of the stocks that comprise the underlying index and may either drop or include new securities, in consultation with the DIPAM. In such an event, the Fund will endeavour to reallocate its portfolio but the available investment/ disinvestment opportunities may not permit precise mirroring of the Index immediately.
- The potential for trades to fail which may result in the underlying scheme not having acquired shares at a price necessary to track the underlying index.
- The holding of a cash position (0-5% of the Net Assets to meet the redemptions and other liquidity requirements) and accrued income prior to distribution and accrued expenses.
- Disinvestments to meet redemptions, recurring expenses, IDCW payouts etc.

The underlying scheme would endeavor to maintain a low tracking error by actively aligning the portfolio in line with the index.

1.2. Risk relating to loyalty units

The AMC, in consultation with the Seller (THE PRESIDENT OF INDIA, acting through and represented by Department of Investment and Public Asset Management, Ministry of

Finance, Government of India), reserves the right to offer Loyalty Units to the investors of BHARAT 22 ETF (underlying scheme). Loyalty units are units allotted to eligible investors of underlying scheme for continuously holding units from the Allotment Date to the Loyalty Unit Record Date in accordance with the criteria set out in the SID of underlying scheme. If the underlying scheme does not receive the underlying securities from the Seller for any reason whatsoever, the underlying scheme will not allot Loyalty Units to the Unit holders. Further, the underlying scheme will allot only whole Units to eligible Investors, and any fractional units which the unit holder may be eligible to would be paid by way of cash to the unit holders based on the applicable NAV as on the Loyalty Unit Record Date. In the event of delay in receipt of the underlying shares for the Loyalty Units from the Seller or any decline in market value of such underlying shares on the date of sale of such underlying shares by the Scheme may result in dilutive effect to all Unit holders.

1.3. Risk relating to underlying securities

Since the underlying companies in underlying Scheme are substantially owned by the Seller, the agenda of the Seller may at times be focused on the social good and therefore may not always be aimed at profit maximization for the Unit holder. The interests of the Seller may be different from the interests of Unit holders and as a result, the Seller may take actions that may not be in the best interests of Unit holders. There can be no assurance that such incidents would not result in a fall in price of the underlying securities constituting the underlying Index and correspondingly the NAV of the underlying Scheme.

1.4. Risks associated with Stock Lending and Borrowing by the Underlying scheme:

The underlying Scheme may engage in Stock Lending activity.

Stock lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

Subject to the Regulations and the applicable guidelines, the underlying Scheme may; if the Trustee permits, engage in stock lending. The securities lent will be returned by the borrower on expiry of the stipulated period. The underlying Scheme shall not have exposure of more than 20% of its net assets in stock lending. The AMC shall report to the Trustee on a quarterly basis as to the level of lending in terms of value, volume and the names of the intermediaries and the earnings/losses arising out of the transactions, the value of collateral security offered etc. The Trustees shall offer their comments on the above aspect in the report filed with SEBI under sub-regulation 23(a) of Regulation 18.

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the underlying Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

1.5. Risks relating to the discount (if any) on the Reference Market Price

Investors should note that the Reference Market Price for each of the constituents of the underlying Index of underlying scheme would be determined based on the full day volume weighted average price (VWAP) of the constituents of the underlying Index on the BSE during the Additional Offering Period or the Allotment Date, as the case may be. This price could be different from the closing market price for each of the constituents of the underlying Index as on the last day of the Additional Offering Period or the Allotment Date, as the case may be. Since the AMC would be applying the discount offered by the Seller to the Scheme on the Reference Market Price, the discounted price for each of the constituents may or may not be lower than the closing market price for each of the constituents as on the last day of the Additional Offering Period or the Allotment Date, as the case may be.

1.6. Risks associated with investing in Derivatives:

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

The various factors which impact the value of the Scheme investments include but are not limited to fluctuations in the equity and bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of securities, tax laws, liquidity of the units of the underlying Scheme, settlements periods, trading volumes etc.

For more information on the underlying Scheme and risks factors thereof, investors are requested to refer to the Scheme Information Document of the Underlying Scheme. The Scheme Information Document of the underlying scheme is available at the Customer Service Centers and is also available on the website of the AMC i.e. www.icicipruamc.com.

C. RISK MITIGATION STRATEGIES

The Fund of Funds schemes having exposure to the fixed income securities and/ or equity and equity related securities may be subject to the following risks and in turn the Scheme's/ Plans' performance will be affected accordingly.

Risk and Description	Risk mitigants / management strategy
<u>Risks associated with Equity investment</u>	
<u>Market Risk</u> The Scheme is vulnerable to movements in the prices of securities invested by the Scheme, which could have a material bearing on the overall returns from the Scheme. The value of the underlying Scheme investments, may be affected generally by factors affecting securities markets, such as price and volume, volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets.	Market risk is inherent to an equity scheme. Being a passively managed scheme, it will invest in the underlying scheme.
<u>Liquidity risk</u> The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which they invests.	As such the liquidity of securities that the scheme invests into could be relatively low. The fund will try to maintain a proper asset-liability match to ensure redemption payments are made on time.
<u>Derivatives Risk</u> As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives since derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds.	The underlying scheme may invest in derivative for the purpose of hedging, portfolio balancing and other purposes as may be permitted under the Regulations. Derivatives will be used in the form of Index Options, Index Futures, Stock Options and Stock Futures and other instruments as may be permitted by SEBI. All derivatives trade will be done only on the exchange with guaranteed settlement. Exposure with respect to derivatives shall be in line with regulatory limits and the limits specified in the SID. No OTC contracts will be entered into.

<u>Risks associated with Debt investment</u>

Market Risk/ Interest Rate Risk As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.	The Scheme may invest only in money market instruments having a residual maturity upto 91 days thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities.
Liquidity or Marketability Risk This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM).	The Scheme may invest only in units of liquid schemes, money market instruments, TREPSs, cash and cash equivalents. The liquidity risk for these instruments is generally low.
Credit Risk Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).	Management analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken.

Note: The information contained herein is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

POSITION OF DEBT MARKET IN INDIA

There are three main segments in the debt markets in India, viz., Government Securities, Public Sector Units (PSU) bonds, and corporate securities. Benchmark: The performance of the Scheme would be benchmarked against BSE Bharat 22 TRI.

The BSE Bharat 22 Index is designed to measure the performance of selected companies disinvested by the Central Government of India according to its disinvestment program.

Investment Objective:

The investment objective of the Scheme is to invest in constituents of the underlying Index in the same proportion as in the underlying Index, and endeavor to provide returns before expenses, which closely correspond to the total returns of the underlying Index.

However, the performance of the Scheme may differ from that of underlying index due to tracking error.

There can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

Investment Strategy:

The corpus of the Scheme will be invested predominantly in stocks constituting the underlying index in the same proportion as in the Index and endeavor to track the benchmark index. A very small portion (0-5% of the Net Assets) of the Scheme may be kept liquid to meet the liquidity and expense requirements. The performance of the Scheme may not commensurate with the performance of the underlying index on any given day or over any given period. Such variations are commonly referred to as the tracking error. The Scheme intends to maintain a low tracking error by closely aligning the portfolio in line with the index. The stocks comprising the underlying index are periodically reviewed by Index Service Provider. A particular stock may be dropped or new securities may be included as a constituent of the index, subject to approval from DIPAM. In such an event, the scheme will endeavor to reallocate its portfolio but the available investment/ disinvestment opportunities may not permit precise mirroring of the underlying index immediately but not later than 7 calendar days from the date of such event. Similarly, in the event of a constituent stock being demerged / merged / delisted from the exchange or due to a major corporate action in a constituent stock, the Scheme may have to reallocate the portfolio and seek to minimize the variation from the index. The Scheme shall follow a passive investment strategy.

Equities and equity related instruments:

The Scheme would invest in stocks comprising the underlying index and endeavor to track the benchmark index.

Fixed Income Securities:

The Scheme may also invest in money market instruments (with maturity not exceeding 91 days), including TREPS, cash & cash equivalents, in compliance with Regulations to meet liquidity requirements. The scheme may also invest in liquid schemes/ money market schemes of the Fund. Money Market Instruments include commercial papers, commercial bills, treasury bills, and Government securities having maturity upto 91 days,

call or notice money, certificate of deposit, usance bills, TREPS and any other like instruments as specified by the Reserve Bank of India from time to time.

Implementation of Policies

The Scheme, in general, will hold all of the securities that comprise the Underlying Index in the same proportion as the index. Expectation is that, over time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low.

The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.

Investment Process

The Scheme will track the Underlying Index and is a passively managed scheme. The investment Decisions will be determined as per the Underlying Index. In case of any change in the index due to corporate actions or change in the constituents of the Underlying Index (as communicated by the Index Service Provider), relevant investment decisions will be determined considering the composition of the Underlying Index.

The Investment decision of the Scheme will be carried out by the designated Fund Manager.
