Please refer to website: <https://www.sbimf.com/offer-document-sid-kim>

In accordance with Regulation 25(16A), the asset management company shall invest such amounts in such schemes of the mutual fund, based on the risks associated with the schemes, as may be specified by the Board from time to time. But the AMC shall not be entitled to charge any management fees on this investment in the scheme. Investments by the AMC will be in accordance with Regulation 25(17) of the SEBI (MF) Regulations, 1996 which states that:

"The asset management company shall not invest in any of its schemes unless full disclosure of its intention to invest has been made in the Offer Document (presently Scheme Information Document), provided that the asset management company shall not be entitled to charge any fees on its investment in the scheme."

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

NAV of the Scheme shall be computed and declared on every business day. The NAV under the Scheme would be rounded off to four decimals as follows or such other formula as may be prescribed by SEBI from time to time:

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provision}}{\text{No of Units outstanding under Scheme on the Valuation Date}}$$

NAV will be disclosed under SEBI (Mutual Funds) Regulations, 1996. NAV can also be viewed on www.sbimf.com and www.amfiindia.com.

The AMC shall update the NAVs on the website of Association of Mutual Funds in India - AMFI (www.amfiindia.com) by 11.00 p.m. on every business day. In case of any delay, the reasons for such delay would be explained to AMFI and SEBI by the next day. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs.

Whenever the Scheme also invests in foreign securities, the NAVs of Scheme shall be updated on daily basis on the website of the AMC and on the website of AMFI by 10:00 a.m. of the following business day in line with Paragraph 8.2 of Master Circular for mutual funds.

In case NAV of Corporate Debt Market Development Fund ('CDMDF') units is not available by 9:30 p.m. of same Business Day, NAV declaration timing for Mutual Fund Schemes holding units of CDMDF shall be 10 a.m. on next business day instead of 11 p.m. on same Business Day.

In case of non-availability of price/valuation for the underlying overseas investments before aforementioned timeline, consequent to which there would be inability in capturing same day price/valuation for such underlying investments, then NAV of the Scheme will be declared as and when the price/valuation for such

underlying securities/ Funds is available.

Further, as per SEBI Regulations, the repurchase price shall not be lower than 95% of the NAV.

Illustration on computation of NAV: If the net assets of the Scheme are Rs.10,45,34,345.34 and units outstanding are 10,000,000, then the NAV per unit will be computed as follows: $10,45,34,345.34 / 10,000,000 = \text{Rs. } 10.4534$ per unit. (rounded off to four decimals)

Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

Let's assume that the NAV of a Mutual Fund Scheme on April 01, 2018 is Rs. 10/-.

Purchase of mutual fund units:

The Purchase Price of the Units on an ongoing basis will be same as Applicable NAV.

Purchase Price = Applicable NAV

In the above example, purchase is done on April 01, 2018, when the Applicable NAV = Rs. 10/-
Therefore, Purchase Price = Rs. 10/-

As per existing Regulations, no entry load is charged with respect to applications for purchase / additional purchase of mutual funds units.

Redemption/Re-purchase of mutual fund units

The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any. In case of redemption, the amount payable to the investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)

Say, in the above example the exit load applicable is:

- a. For exit on or before 12 months from the date of allotment – 1.00%
- b. For exit after 12 months from the date of allotment – Nil.

Scenario 1: Redemption is done during applicability of exit load

In case the investor requests for redemption on or before 12 months i.e. on or before March 31, 2019; say December 1, 2018, when the NAV of the scheme is Rs. 12/- and the exit load applicable is 1%, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)
 $= \text{Rs. } 12 * (1 - 1\%) = \text{Rs. } 11.88/-$

Scenario 2: Redemption is done when the exit load is NIL

In case the investor requests for redemption after 12 months i.e. after March 31, 2019; say April 1, 2019, when the NAV of the scheme is Rs. 12/- and the exit load applicable is NIL, so the Redemption amount payable to investor shall be calculated as follows:

$$\begin{aligned}\text{Redemption Price} &= \text{Applicable NAV} * (1 - \text{Exit Load}) \\ &= \text{Rs. } 12 * (1-0) = \text{Rs. } 12/-\end{aligned}$$

The aforesaid example does not take into consideration any applicable statutory levies or taxes. Accordingly, the redemption amount payable to investor shall further reduce to the extent of applicable statutory levies or taxes.

Note: The aforesaid disclosure has been made pursuant to paragraph 8.1.5 of the SEBI Master Circular for mutual funds dated June 27, 2024.

D. LOAD STRUCTURE

Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.sbimf.com) or contact your distributor.

The following table illustrates the expenses that the investors will incur on their purchases/ sales of Units during the NFO and on an ongoing basis (including Systematic Investment Plan) under this scheme:

Load	As a % of the NAV
Entry Load	Not Applicable
Exit Load	➤ For exit within 1 year from the date of allotment – - For 10% of Investment – Nil - For remaining Investment – 1.00% ➤ For exit after 1 year from the date of allotment – Nil

Please note that no Exit Load shall be levied for switching between Plans within the said Scheme.

The AMC reserves the right to introduce a load structure, levy a different load structure or remove the load structure in the scheme at any time after giving notice to that effect to the investors.

The upfront commission on investment, if any, shall be paid to the ARN Holder directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder. - i. The AMC shall be required to issue an addendum and display the same on its website immediately.
- ii. The addendum shall be circulated to all the distributors/brokers/Investor Service Centre (ISC) so that the same can be attached to all KIM and SID already in stock till it is updated.
- iii. Latest applicable addendum shall be a part of KIM and SID. (E.g. in case of changes in load structure the addendum carrying the latest applicable load structure shall be attached to all KIM and SID already in stock till it is updated).
- iv. Further, the account statements shall continue to include applicable load structure.

In accordance with SEBI Regulations, the repurchase price will not be lower than 95% of the NAV

The investor is requested to check the prevailing load structure of the Scheme before investing.

Section II

I. Introduction

A. Definitions/interpretation

Please refer to website: <https://www.sbimf.com/offer-document-sid-kim>

B. Risk factors

- a) SBI Conservative Hybrid Fund will be investing in Debt instruments (including debt derivatives) and Money Market instruments (including triparty repo, Reverse repo and equivalent), Equity and Equity related Instruments (including derivatives), Units issued by REITs and InVITs including securitized debt, ADR/GDR/Foreign securities. The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant.
- b) Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels of risk. Accordingly the scheme's risk may increase or decrease depending upon the investment pattern. For e.g. corporate bonds carry a higher amount of risk than Government Securities. Further even among corporate bonds, AAA rated bonds, are comparatively less riskier than AA rated bonds.
- c) Subject to necessary approvals, the Scheme may invest in securities in overseas markets, which could be exposed to currency risk, sovereign risk, economic and political risks. Prices of ADR/GDR may not move in consonance with the domestic underlying stock due to currency movements and the prices could also be trading at a discount/premium to the underlying stocks
- d) Stock Lending:
Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in which case the securities might go in for auction. In the event of exceptional circumstances resulting in non-availability of securities in auction, such transactions would be financially closed-out at appropriate rates as per exchange regulations. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned.
- e) Investments under the scheme may also be subject to the following risks:
 - i. Equity and equity related risk: Equity instruments carry both company specific and market risks and hence no assurance of returns can be made for these investments.
 - ii. Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.
 - iii. Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
 - iv. Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
 - v. Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may

be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.

f) Investment in Equity & Equity related investments may also be subject to the following risks:

- Equity and Equity related instruments are volatile in nature and are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro-economic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.
- The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme, should there be a subsequent decline in the value of the securities held in the schemes portfolio.
- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.
- The AMC may invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

g) The risks involved in derivatives are:

1. The cost of hedge can be higher than adverse impact of market movements
2. The derivatives will entail a counter-party risk to the extent of amount that can become due from the party.
3. An exposure to derivatives in excess of the hedging requirements can lead to losses.
4. An exposure to derivatives can also limit the profits from a genuine investment transaction.
5. Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities and also on the suitable and acceptable benchmarks.
6. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

h) Risks associated with Investing in Securitized Debt

- **Liquidity risk:** There is no assurance that a deep secondary market will develop for the instrument. This could limit the ability of the investor to resell them.
- **Limited Recourse:** The instruments represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the buyer of the security against the Investors' Representative.
- **Delinquency and Credit Risk:** Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Monthly Investor Payouts to the Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of an Obligor to repay his obligation, the Servicer may repossess and sell the Vehicle/ Asset. However many factors may affect, delay or prevent the repossession of such

Vehicle/Asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such Vehicle/Asset may be sold may be lower than the amount due from that Obligor.

- **Risks due to possible prepayments:** Full prepayment of a contract may lead to an event in which investors may be exposed to changes in tenor and yield.
- **Bankruptcy of the Originator or Seller:** If the service provider becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that either the sale from each Originator was not a sale then an Investor could experience losses or delays in the payments due under the instrument.

i) Risk factors associated with repo transactions in corporate debt securities

Corporate Bond Repo transactions are currently done on OTC basis and settled on non guaranteed basis. Credit risks could arise if the counterparty does not return the security as contracted on due date. The liquidation of underlying bonds in case of counterparty default would depend on the liquidity of the bond and market conditions at that time. This risk is largely mitigated, as the choice of counterparties is largely restricted and also haircuts are applicable on the underlying bonds depending on credit ratings. Also operational risks are lower as such trades are settled on a DVP basis.

In the event of the scheme(s) being unable to pay back the money to the counterparty as contracted in case of transactions as a borrower, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Mutual Fund. Thus, the scheme(s) may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.

j) RISK FACTORS ASSOCIATED WITH INVESTING IN FOREIGN SECURITIES:

a. Currency Risk:

Moving from Indian Rupee (INR) to any other currency entails currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee.

b. Interest Rate Risk:

The pace and movement of interest rate cycles of various countries, though loosely co-related, can differ significantly. Hence by investing in securities of countries other than India, the Scheme stand exposed to their interest rate cycles.

c. Credit Risk:

Investment in Foreign Debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer. This is substantially reduced since the SEBI (MF) Regulations stipulate investments only in debt instruments with rating not below investment grade by accredited/registered credit rating agency. To manage risks associated with foreign currency and interest rate exposure, the Mutual Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/RBI from time to time.

d. Country Risk:

The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests. In addition, country risks would include events such as introduction of

extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilisation of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.

To manage risks associated with foreign currency and interest rate exposure, the Mutual Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/RBI from time to time.

k) RISK FACTORS ASSOCIATED WITH INVESTMENTS IN REITs AND InvITs:

Risk of lower than expected distributions: The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/InvIT receives as dividends or the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate primarily based on the below, among other things:

- success and economic viability of tenants and off-takers
- economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
- force majeure events related such as earthquakes, floods etc. rendering the portfolio assets inoperable
- debt service requirements and other liabilities of the portfolio assets
- fluctuations in the working capital needs of the portfolio assets
- ability of portfolio assets to borrow funds and access capital markets
- changes in applicable laws and regulations, which may restrict the payment of dividends by portfolio assets
- amount and timing of capital expenditures on portfolio assets
- insurance policies may not provide adequate protection against various risks associated with operations of the REIT/InvIT such as fire, natural disasters, accidents
- taxation and other regulatory factors

Price-Risk: The valuation of the REIT/InvIT units may fluctuate based on economic conditions, fluctuations in markets (eg. real estate) in which the REIT/InvIT operates and the resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events etc. REITs & InvITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian law in the event of insolvency or liquidation of any of the portfolio assets

Interest-Rate Risk: Generally, there would be an inverse relationship between the interest rates and the price of units. Generally, when the interest rates rise, prices of units fall and when interest rates drop, such prices increase.

Liquidity Risk: This refers to the ease with which REIT/InvIT units can be sold. There is no assurance that an active secondary market will develop or be maintained. Hence there would be times when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities for which a liquid market exists.

l) Risks associated with writing covered call options for equity shares:

In addition to the risks associated with derivative instruments, listed below are the risks associated with writing covered call options.

- **Market Risk:**
Appreciation in the underlying equity shares could lead to loss of opportunity in case of writing of covered call option. In case if the appreciation in equity share price is more than the option premium received, the appreciation in the scheme would be capped
- **Liquidity Risk:**
This strategy of writing covered call in a scheme will be used, provided the scheme has adequate number of underlying equity shares as per regulatory requirement. Subsequently, the scheme will have to set aside a portion of investment in the underlying equity shares. Further, in case the covered call options are sold to the maximum

extent as allowed under the purview of regulations, the scheme would be unable to sell the shares of the respective stock, to the extent that would be blocked under the covered call. Hence, if the call option contracts which have been written become illiquid, it may lead to a loss of opportunity or can cause exit issues.

As a result, it may happen that the scheme is not able to sell the underlying equity shares immediately, which can lead to temporary illiquidity of the underlying equity shares and may result in loss of opportunity.

- a) The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the scheme is wound up for the reasons and in the manner provided under the Scheme Information Document & Statement of Additional Information.
- b) Redemption by the unit holders due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund their directors or their employees shall not be liable for any tax consequences that may arise.
- c) The tax benefits described in this Scheme Information Document are as available under the present taxation laws and are available subject to relevant condition. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors and Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unit holder is advised to consult his/her/its own professional tax advisor.
- d) Investors in the Scheme are not being offered any guaranteed / assured returns.
- e) **Investment in Equity & Equity related investments may also be subject to the following risks:**
 - Equity and Equity related instruments are volatile in nature and are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro economic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.
 - The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme, should there be a subsequent decline in the value of the securities held in the schemes portfolio.
 - Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.
- f) **Risk factors associated with investing in Foreign Securities:**
 - Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in Foreign Securities including foreign equities, ADRs, GDRs, mutual funds and exchange traded funds, unlisted securities, government securities, corporate debt securities, money market instruments, repos not involving borrowing and short term deposits with overseas banks. Such investments carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.
 - It is the AMC's belief that investment in Foreign Securities offers new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the Scheme. Since the Scheme(s) would invest only partially in Foreign Securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme.

- Overseas investments will be made subject to any/all approvals, conditions thereof as may be stipulated under the SEBI Regulations or by RBI and provided such investments do not result in expenses to the Scheme(s) in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing. The Mutual Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians, etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses.
- To the extent that the assets of the Scheme(s) will be invested in Foreign Securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment

g) Risks associated with Investing in Securitised Debt:

- The Scheme may be exposed to risks associated with investing in asset backed securities (ABS), i.e. securitised debt. The underlying assets in the case of investment in securitised debt could be mortgages [being mortgage backed securities (MBS)] or other assets like credit card receivables, automobile / vehicle, consumer durables, personal, commercial or corporate loans and any other receivables, loans or debt.
- Different types of securitised debt/structured instruments carry different levels and types of risks and the NAV(s) of the Scheme may, to the extent that its assets are invested in such instruments, fluctuate depending on the value of such instruments. For instance, credit risk on securitised bonds depends upon the credit worthiness of the originator and would vary depending on whether such bonds are issued with recourse to the originator or otherwise (a structure with recourse will have a lower credit risk than a structure without recourse). Even within securitised debt, AAA rated securitised debt offers lesser risk of default than AA rated securitised debt. Changes in/withdrawal of the credit rating of the instruments issued by the originator may affect the value of the Scheme's investments and consequently, the NAV of the Units.
- Underlying assets in securitised debt may assume different forms and the general types of receivables include Auto Finance, Credit Cards, Personal Loans/Receivables, Home Loans/Receivables, Corporate Loans/Receivables and other retail loans. Credit risks relating to these types of receivables depend upon various factors including macro economic factors impacting each of these industries. Specific factors like nature and adequacy of property mortgaged against these borrowings and the nature of loan agreement / mortgage deed in case of Home Loans, adequacy of documentation in case of Auto Finance and Home Loans, capacity of the borrower to meet its obligations in case of Credit Cards and intentions of the borrower influence the risks relating to the asset borrowings underlying the securitised debt.
- If a court/regulatory authority concludes that the sale from the originator to the securitisation trust was not a "true sale", the Scheme(s) may, in the event that it has invested in instruments issued by such trust, experience losses or delays in the payments due and the NAV of the Units may be affected thereby. Care is generally taken while structuring the transaction so as to minimize the risk of the sale to the trust not being construed as a "true sale" and legal opinion confirming that the sale constitutes a true sale is usually obtained.
- Presently, the secondary market for securitised papers is not very liquid and there is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the Scheme(s) to resell such securities. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.
- In case of securitised debt, changes in market interest rates and pre-payments may not change the absolute amount of receivables for the investors but may have an impact on the re-investment of the periodic cash flows that an investor receives on securitised papers.
- Securitised debt papers carry credit risk of the obligors and are dependent on the servicing of the Pass Through Certificates, contributions, etc. However, these are offset suitably by appropriate pool selection as well as credit enhancements specified by Credit Rating Agencies. However, the credit enhancement stipulated in a securitization transaction represents a limited loss cover only. Delinquencies and credit losses may cause depletion of the amount available under the cash collateral account and thereby the

scheduled payouts of the investors may get affected if the amount available in the cash collateral account is not enough to cover the shortfall. In cases where the underlying facilities are linked to benchmark rates, the securitized debt papers may be adversely impacted by adverse movements in benchmark rates. However, this risk is mitigated to an extent by appropriate credit enhancement specified by Credit Rating Agencies.

- h) The Mutual Fund is not assuring any returns nor is it assuring that it will make periodic distributions. All IDCW distributions are subject to the investment performance of the scheme, availability of distributable profits and computed in accordance with SEBI (MF) Regulations.
- i) No person has been authorized to issue any advertisement or to give any information or to make any representations other than that contained in this SID. Circulars in connection with this offering not authorized by the Mutual Fund and any information or representations not contained herein must not be relied upon as having been authorized by the Mutual Fund.
- j) **Investments in Debt and money market instruments under the scheme may also be subject to the following risks:**

- Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.
- Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
- Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
- Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
- Risk associated with unrated debt instruments – Investments in unrated instruments are subject to the risk associated with investments in any other fixed income securities such as credit risk, interest rate risk etc. However, investments in unrated instruments are considered to be subject to greater risk of loss of principal and interest than rated instruments.
- Derivative risks: The derivatives will entail a counterparty risk to the extent of amount that can become due from the party. The cost of hedge can be higher than adverse impact of market movements. An exposure to derivatives in excess of the hedging requirements can lead to losses. An exposure to derivatives can also limit the profits from a genuine investment transaction. Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities and also on the suitable and acceptable benchmarks.

k) Risks associated with Investing in Derivatives

- The AMC, on behalf of the Scheme may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unit holders' interest. Investors should understand that derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include but

are not limited to the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. There may be a cost attached to selling or buying futures or other derivative instrument. Further there could be an element of settlement risk, which could be different from the risk in settling physical shares. The possible lack of a liquid secondary market for a futures contract or listed option may result in inability to close futures or listed option positions prior to their maturity date.

- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable.
- No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

l) Risk Associated with Stock lending:

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in which case the securities might go in for auction. In the event of exceptional circumstances resulting in non-availability of securities in auction, such transactions would be financially closed-out at appropriate rates as per exchange regulations. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned.

m) Risk factors associated with repo transactions in corporate debt securities:

Corporate Bond Repo transactions are currently done on OTC basis and settled on non guaranteed basis. Credit risks could arise if the counterparty does not return the security as contracted on due date. The liquidation of underlying bonds in case of counterparty default would depend on the liquidity of the bond and market conditions at that time. This risk is largely mitigated, as the choice of counterparties is largely restricted and also haircuts are applicable on the underlying bonds depending on credit ratings. Also, operational risks are lower as such trades are settled on a DVP basis.

In the event of the scheme being unable to pay back the money to the counterparty as contracted in case of transactions as a borrower, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Mutual Fund. Thus, the scheme may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.

C. RISK CONTROL STRATEGIES:

Investments in Equity and equity related instruments including derivatives, debt and money market instruments carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigates.

For risk control, the following may be noted:

Liquidity risks:

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.

Interest Rate Risk:

Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk.

Credit Risks

Credit risk shall be mitigated by investing in rated papers of the companies having the sound back ground, strong fundamentals, and quality of management and financial strength of the Company.

Volatility risks:

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification. To that extent the Volatility risk will be mitigated in the scheme.

Covered call strategy

The scheme may write call options only under a covered call strategy for constituent stocks of NIFTY 50 and BSE SENSEX, and any other stock as and when allowed by SEBI, subject to the following:

- a) The total notional value (taking into account strike price as well as premium value) of call options written by a scheme shall not exceed 15% of the total market value of equity shares held in that scheme.
- b) The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a particular company held in the scheme. The unencumbered shares in a scheme shall mean shares that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrances.
- c) At all points of time the Mutual Fund scheme shall comply with the provisions at paragraph (a) and (b) above. In case of any passive breach of the requirement at paragraph (a), the respective scheme shall have 7 trading days to rebalance the portfolio. During the rebalancing period, no additional call options can be written in the said scheme.
- d) In case a Mutual Fund scheme needs to sell securities on which a call option is written under a covered call strategy, it must ensure compliance with paragraphs (a) and (b) above while selling the securities.
- e) In no case, a scheme shall write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts.
- f) The premium received shall be within the requirements prescribed in terms of paragraph 12.25.8 (i) (f) of Master Circular for Mutual Funds i.e. the total gross exposure related to option premium paid and received must not exceed 20% of the net assets of the scheme.
- g) The exposure on account of the call option written under the covered call strategy shall not be considered as exposure in terms of paragraph 12.25.8 (i) (g) of Master Circular for Mutual Funds..
- h) The call option written shall be marked to market daily and the respective gains or losses factored into the daily NAV of the respective scheme(s) until the position is closed or expired.

Benefits of using Covered Call strategy in Mutual Funds:

The covered call strategy can help in earning income and hedging risk and subsequently result in better risk adjusted returns for the Scheme. Following are the benefits offered by this strategy:

- a. Hedge against market risk - Since the fund manager sells a call option on a stock already owned by the mutual fund scheme, the downside from fall in the stock price would be lower to the extent of the premium earned from the call option.
- b. Generating additional returns in the form of option premium in a range bound market. Thus, a covered call strategy involves gains for unit holders in case the strategy plays out in the right direction.

Example of Covered Call

Illustrations:

Buy 100 stocks of Company A at Rs 1000 and write (sell) call options of the company A for the same month, with a strike price of Rs 1050. Assume the said option is trading at Rs 10. Thus, the total premium received for selling the call option is Rs 1000 (Rs 10*100 lot size).

On the day of expiration of options contract:

Scenario 1: markets goes up and the stock price of company A goes upto Rs 1030

- a) Gain on stock is Rs 3000.
- b) The call option will expire worthless (strike price is Rs 1050 and underlying price is Rs 1030). Thus, as a writer (seller) of call option, we can keep the premium of Rs 1000.
- c) Thus, net gain is Rs 4000 (Rs 3000 on underlying stock and Rs 1000 premium collected)

Scenario 2: markets goes up and the stock price of company A goes upto Rs 1100

- a) Gain on stock is Rs 10000
- b) The call option is in the money by Rs 50 (strike price is Rs 1050 and underlying price is Rs 1100). Thus, as a writer (seller) of call option we must pay Rs 5000 to option buyer (Rs 50) and we would receive option premium of Rs. 1000 (Rs. 10*100), thus, the total loss would be Rs. 4000 (Rs. 5000 – Rs. 1000 received as the option premium).
- c) Thus, net gain is Rs 6000 (Rs 10000 on underlying stock and Rs 4000 loss on option position)

Scenario 3: markets goes down and the stock price of company A goes down to Rs 950

- a) Loss on stock is Rs 5000
- b) The call option will expire worthless (strike price is Rs 1050 and underlying price is Rs 950). Thus, as a writer (seller) of call option, we can keep the premium of Rs 1000.
- c) Thus, net loss is Rs 4000 (Rs 5000 on underlying stock and Rs 1000 premium collected)

Provisions Relating to Segregation of Portfolios

Creation of segregated portfolio shall be subject to following guidelines specified by SEBI as per Paragraph 4.4 of Master Circular for Mutual Funds:

The term 'segregated portfolio' shall mean a portfolio, comprising of debt or money market instrument affected by a credit event that has been segregated in a Mutual Fund Scheme and the term 'main portfolio' shall mean the Scheme portfolio excluding the segregated portfolio and the term 'total portfolio' shall mean the Scheme portfolio including the securities affected by the credit event.

Segregated portfolio will be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

- Downgrade of a debt or money market instrument to 'below investment grade, or
- Subsequent downgrades of the said instruments from 'below investment grade, or
- Similar such downgrades of a loan rating.

In case of difference in rating by multiple CRAs, the most conservative rating will be considered. Creation of segregated portfolio will be based on issuer level credit events as mentioned above and implemented at the ISIN

level.

Creation of segregated portfolio for investment in debt instruments with special features

Segregated portfolio of such instruments may be created in case the said instrument is to be written off or converted to equity pursuant to any proposal, the date of said proposal may be treated as the trigger date. However, if the said instruments are written off or converted to equity without proposal, the date of write off or conversion of debt instrument to equity may be treated as the trigger date subject to compliance with relevant provisions of Paragraph 4.4 of Master Circular for Mutual Funds issued with respect to 'Creation of segregation portfolio in mutual fund schemes' and any other relevant Regulations/Circulars/Guidelines issued in the future from time to time

PROCESS:

The recommendation of creating the segregated portfolio needs to be approved by the Board of AMC & Trustee. Further, the AMC shall immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. The AMC will also disclose that the segregation shall be subject to trustee approval.

Additionally, the said press release will be prominently disclosed on the website of the AMC.

The AMC will ensure that till the time the trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.

Post approval process:

Once AMC & trustee approval is received by SBIFML:

1. Segregated portfolio shall be effective from the day of credit event
2. SBIFML shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.
3. An e-mail or SMS should be sent to all unit holders of the concerned scheme.
4. The NAV of both segregated and main portfolio shall be disclosed from the day of the credit event.
5. All existing investors in the scheme as on the day of the credit event shall be allotted equal number of units in the segregated portfolio as held in the main portfolio.
6. No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.
7. If the AMC Board/ trustees do not approve the proposal to segregate portfolio, AMC shall issue a press release immediately informing investors of the same.

Security Valuation and processing of subscriptions and redemptions:

1. The valuation of any security sought to be segregated will be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder and shall be in line with the valuation policy, which would be either external valuation prices or hair cut based valuation as applicable. The valuation price may deviate from the above based on adequate reasons and necessary disclosure as required by the SEBI guidelines.
2. All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing circular on applicability of NAV. However, in case of segregated portfolio, applicability of NAV will be as under:
 - Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
 - Investors subscribing to the Scheme will be allotted units only in the main portfolio based on its NAV

Disclosure requirements:

A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event will be communicated to the investors within 5 working days of creation of the segregated portfolio. Further, adequate disclosure of the segregated portfolio will also appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the Scheme. Further, the NAV of the segregated portfolio will be declared on daily basis.

The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc. The scheme performance required to be disclosed at various places will include the impact of creation of segregated portfolio. The scheme performance will clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, will be disclosed as a footnote to the scheme performance. These disclosures regarding the segregated portfolio will be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.

The investors of the segregated portfolio will be duly informed of the recovery proceedings of the investments of the segregated portfolio and status update will be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Total Expense Ratio (TER) for the segregated portfolio

SBIFML shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.

The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.

The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by SBIFML.

The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Monitoring by Trustees

In order to ensure timely recovery of investments of the segregated portfolio, Trustees will ensure that, the SBIFML puts in sincere efforts to recover the investments of the segregated portfolio. Upon recovery of money, whether partial or full, it will be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio. Further, an Action Taken Report (ATR) on the efforts made by the SBIFML to recover the investments of the segregated portfolio will be placed in every Trustee meeting till the investments are fully recovered/ written-off.

The Trustees will monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, trustees will ensure that there is a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

Creation of segregated portfolio will be optional and at the discretion of the AMC.

Illustration of impact of Portfolio Segregation on scheme and its investors:**Before Segregation:**

Total Portfolio	Regular Plan	Direct Plan
Net Asset (a)	500	200
Units (b)	20.00	10.00
NAV per Unit (c = a/b)	25.00	20.00

Assumptions:

The above portfolio has a security XYZ with current market value on the date of segregation of Rs 70 which has been downgraded below investment grade or has defaulted. Post splitting the Total portfolio into Main portfolio and Segregated portfolio, the impact will be as below:

After Segregation:

Main Portfolio	Regular Plan	Direct Plan
Net assets before segregation (a)	500	200
Market Value of Security XYZ (b)	50.00	20.00
Net assets after segregation (c = a – b)	450.00	180.00
Units (d)	20.00	10.00
NAV per unit (c/d)	22.500	18.000

Segregated Portfolio	Regular Plan	Direct Plan
Net Assets* (a)	50.00	20.00
Units (b)	20.00	10.00
NAV per Unit (c = a/b)	2.50	2.00

(*equivalent of market value of segregated security)

For existing investors, the total portfolio will decline by the amount which is segregated (i.e. value of main portfolio after segregation). They will be allotted equal number of units in the main portfolio and the segregated portfolio in the same proportion as held by them in the total portfolio. Thereafter, existing investors can redeem from the main portfolio based on the prevailing NAV and they will continue to hold units in the segregated portfolio. For any new investor, they will be allotted units only in the main portfolio based on the prevailing NAV. NAV of the segregated portfolio may undergo a change on the future depending on any recovery and any applicable haircut.

Risks associated with segregated portfolio

Different types of securities in which the scheme would invest carry different levels and types of risk as given in the Scheme Information Document of the scheme. In addition to the same, unitholders are requested to also note the following risks with respect to Segregated Portfolio:

1. Investor holding units of segregated portfolio may not be able to liquidate their holding till the time there is recovery of money from the issuer.
2. Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity, as there may not be active trading of units in the stock market. Further trading price of units on the stock market may be at a significant discount compared to the prevailing NAV.
3. Securities which are part of the segregated portfolio may or may not recover any money, either fully or partially

Risks associated with Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as a Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance

the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI Board. Thus this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the aforementioned schemes shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

Investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

RISK CONTROL STRATEGIES:

The Scheme's will invest in various securities / instruments which carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For risk control, the following may be noted:

Liquidity risks:

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.

Interest Rate Risk:

Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk.

Credit Risks

Credit risk shall be mitigated by investing in rated papers of the companies having the sound back ground, strong fundamentals, and quality of management and financial strength of the Company.

Volatility risks:

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification.

Risks mitigation for Investments in REITs AND InvITs

The Investment Manager endeavours to invest in REITs/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.

Liquidity Risk Management Framework:

The scheme adopts the Liquidity Risk Management Framework (LRM) as mandated by SEBI and AMFI, which requires Scheme Portfolio to maintain certain portion of their investments in liquid assets. This portion as required to be kept, is ascertained basis the scheme's liability profile, i.e investor profile. This framework seeks to estimate a likely quantum of redemption that the scheme is expected to face over the next 30 days and requires the scheme to maintain liquid assets to that extent as a minimum requirement. The Framework also enumerates corrective actions to be taken in the event of any shortfall owing to higher redemption than estimated. The Investment Manager also have in place an Asset Liability Mismatch (ALM) Framework which monitors similar aspects for a longer tenure of 90 days and ensures that schemes assets are always adequate to cater to liabilities.

Stress Testing:

The Investment Manager conducts Stress Tests on the Asset side, i.e. Portfolio assets on key aspects like Interest Rate Risk, Credit Risk and Liquidity Risk. These are done at an aggregate portfolio level to evaluate the impact of NAV from each of these risks. These NAV impact figures are then compared to Thresholds as laid out by AMFI and by AMC for monitoring and any action, if deemed necessary. The stress test is performed using the methodology and periodicity as mandated by AMFI in consultation to SEBI, as amended from time to time.

II. Information about the scheme:

- A. Where will the scheme invest** – Detailed description of the instruments (including overview of debt markets in India, if applicable) mentioned in Section I.

I. Equity and Equity Related Instruments:

1. Equity share is a security that represents ownership interest in a company.
2. Equity Related Instruments are securities which give the holder of the security right to receive Equity Shares on pre-agreed terms. DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Portfolio Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money

between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks), Treasury Bills (issued by RBI) and the Triparty Repo.

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and Triparty Repo are guaranteed and done by a central counterparty, the Clearing corporation of India (CCIL). Money market deals involving CD's and CP's are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE (ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments as on October 24, 2025:

Instruments	Indicative yield range (%)
Overnight rates	5.45-5.50
90 day Commercial Paper	6.05-6.10
91-day T-bill	5.43-5.45
1 year G-Sec	5.56-5.58
5 year G – Sec	6.12-6.17
10 year G-Sec	6.43-6.48
1 year AAA Bond	6.60-6.65
5 year AAA Bond	6.82-6.87

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP's and CD's which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments.

--	---

	Flex Systematic Transfer Plan is a facility wherein an investor under a designated open-ended Scheme can opt to transfer variable amounts linked to the value of his investments on the date of transfer at pre-determined intervals from designated open-ended scheme (source scheme) to the Growth option of another open-ended scheme (target scheme). Terms and conditions of Flex STP are as follows: 1. The amount to be transferred under Flex STP from source scheme to target scheme shall be calculated using the below formula: Flex STP amount = [(fixed amount to be transferred per installment x number of installments already executed, including the current installment) - market value of the investments through Flex STP in the Transferee Scheme on the date of transfer] 2. The first Flex STP installment will be processed for the fixed installment amount specified by the investor at the time of enrolment. From the second Flex STP installment onwards, the transfer amount shall be computed as per formula stated above. 3. Flex STP would be available for Weekly, Monthly and Quarterly frequencies. 4. Weekly Flex STP can be done on 1st / 8th / 15th / 22nd of every month. 5. Flex STP is available from "Daily / Weekly" IDCW plans of the source schemes. 6. Flex STP is available only in "Growth" option of the target scheme. 7. If there is any other financial transaction (purchase, redemption or switch) processed in the target scheme during the tenure of Flex STP, the Flex STP will be processed as normal STP for the rest of the installments for a fixed amount. 8. A single Flex STP Enrolment Form can be filled for transfer into one Scheme/Plan/Option only. 9. In case the date of transfer falls on a Non-Business Day, then the immediate following Business Day will be considered for the purpose of determining the applicability of NAV. 10. In case the amount (as per the formula) to be transferred is not available in the source scheme in the investor's folio, the residual amount will be transferred to the target scheme and Flex STP will be closed. 11. The complete application form for enrolment / termination for Flex STP should be submitted, at least 10 days prior to the desired commencement/ termination date. 12. --	--

Fund (SBIMF) to a target scheme of SBIMF including a feature of reverse transfer from target scheme into the source scheme, in order to achieve the targeted market value on each transfer date in the target scheme. This ensures that the market value on each date of the transfer rises by a specified amount at every frequency irrespective of the market price. For example, if investor decides that the value of their investment in the target scheme should appreciate by Rs. 1000 per month, then each month investor will invest only to the extent of the shortfall. If appreciation in the target scheme is higher than the target value then this excess value is reverse transferred to the source scheme. Thus the amount to be transferred will be arrived at on the basis of the difference between the target market value and the actual market value of the holdings in the target scheme on the date of transfer.

Terms & conditions of Swing STP are as follows:

1. Source scheme: All open ended schemes (Excluding SBI Long Term Equity Fund and ETF schemes) of SBI Mutual Fund.
2. Target scheme: Growth option in all open ended schemes (Excluding SBI Long Term Equity Fund and ETF schemes) of SBI Mutual Fund.
3. Frequency: Weekly, Monthly and Quarterly intervals. In case the Frequency is not indicated, Monthly frequency shall be treated as the Default Frequency.
4. Dates: The dates of transfers/ default dates shall be as under:

Frequency	Dates of Transfers	Default Date
Weekly Interval	1 st , 8 th , 15 th & 22 nd of every month	-
Monthly Interval	1 st , 5 th , 10 th , 15 th , 20 th , 25 th & 30 th In case of February last working day)	10 th of every month
Quarterly Interval	1 st , 5 th , 10 th , 15 th , 20 th , 25 th & 30 th (In case of February last working day) The beginning of the quarter could be any month e.g. January, May, November, etc.	10 th of every quarter

In case the date of transfer falls on a non-Business Day, the

	immediate next Business day will be considered for the purpose of determining the applicability of NAV and processing the transaction. <u>5.1.</u> The minimum amount for the first installment shall be as follows: • Weekly & Monthly frequency: Rs. 1,000 and in multiples of Re. 1 • Quarterly frequency: Rs. 3,000 and in multiples of Re. 1 <u>6.2.</u> Minimum number of installments • Weekly: 6 & Monthly frequency: 12 • Quarterly frequency: 4 <u>7.3.</u> If there is any other financial transaction (purchase / redemption / switch / SIP / DTP etc.) processed in the target scheme/plan/option during the tenure of Swing STP, the Swing STP will be processed as normal STP for the rest of the installments for the fixed amount. <u>8.4.</u> Amount of transfer: The first Swing STP installment will be processed for the installment amount specified by the investor at the time of enrollment. From the second Swing STP installment onwards, the transfer amount will be derived by the following formula: (First installment amount X Number of installments including the current installment) – Market Value of the investments through Swing STP in the target scheme/plan/option on the date of transfer. In case on the STP date, the amount (as specified above) to be transferred is not available in the source scheme/plan/option in the investor's folio, the residual amount will be transferred to the target scheme/plan/option and Swing STP will be closed. Investors have an option to consider earlier investments in the target scheme for calculating Swing STP amount. <u>9.5.</u> Reverse Transfer: On the date of transfer, if the market value of the investments in the target scheme/plan/option through Swing STP is higher than the target market value (first installment amount X number of installments including the current installment), then a reverse transfer will be effected from the target scheme/plan/option to the source scheme/plan/option to the extent of the difference in the amount, in order to arrive at the target market value. <u>10.6.</u> Top-up option: Investor can choose Swing STP based on fixed amount installment and additionally investor has an option to choose top-up option. Under this, investor can indicate an absolute amount or percentage (in annualized terms) by which each installment amount will be increased. Amount of transfer will be calculated by taking into consideration of the target market value (including top-up amount) and actual market value of the investments in the target scheme. a. Amount of transfer: The first Swing STP installment will be processed for the first installment amount specified by the investor at the time of enrollment. From the second Swing STP installment onwards, the transfer amount will be derived by the following formula: In case Top-up amount mentioned as absolute amount: Target market value Minus Market Value of the investments

Target market value = (Target market value at the time of last installment + First installment amount + (Top-up absolute amount X Number of installments excluding the current installment)). 1. SBI Mutual Fund is registered with Securities and Exchange Board of India (SEBI) and is as such eligible for benefits u/s. 10(23D) of the Income-tax Act, 1961. Accordingly, the entire income of SBI Mutual Fund is exempt from income-tax. SBI Mutual Fund will receive all its income without deduction of tax at source as per provisions of Section 196 of the said Act.
2. With effect from April 1, 2020, income distributed by a mutual fund in respect of units of mutual funds is taxable in the hands of the unitholders at normal tax rates (plus applicable surcharge and cess).
3. Basic Tax shall be increased by surcharge as per applicable rate and Health & Education Cess at the rate of 4% on aggregate of basic tax & surcharge.
4. Non-Equity Funds are those funds wherein equity exposure is less than 65% of total proceeds of such fund.

As per Section 50AA of the Income-tax Act, 1961, investments in Specified Mutual Funds on or after April 1, 2023 shall be deemed to be short term capital assets irrespective of holding period.

- a. Up to 31st March 2025, a "Specified Mutual Fund" means a Mutual Fund by whatever name called, where not more than 35% of its total proceeds is invested in the equity shares of domestic companies. The percentage of equity shareholding held in respect of the Specified Mutual Fund shall be computed with reference to the annual average of the daily closing figures. It is possible that an "equity-oriented fund" which invests in units of another equity fund instead of investing directly in equity shares of domestic company may be regarded as "specified mutual fund" and taxed accordingly.
 - b. From 1st April 2025 onwards, a "Specified Mutual Fund" means: (a) a Mutual Fund by whatever name called, which invests more than 65% of its total proceeds in debt and money market instruments; or (b) a fund which invests 65% or more of its total proceeds in units of a fund referred to in (a). The percentage of investment in debt and money market instruments or in units of a fund, as the case may be, in respect of the Specified Mutual Fund, shall be computed with reference to the annual average of the daily closing figures.
5. The Mutual Fund will pay/deduct taxes as per the applicable tax laws on the relevant date considering the provisions of the Income-tax Act, 1961 read with the Income-tax Rules, 1962 and any circulars or notifications or directives or instructions issued thereunder. Please note that grant of DTAA benefit, if any, is subject to fulfilment of stipulated conditions under the provisions of the Income-tax Act, 1961 and the relevant DTAA as well as interpretation of relevant Article of such DTAA.

In case of Resident Investors: TDS is applicable at the rate of 10% on income distributed in excess of Rs.10,000 by a mutual fund.

In case of Non-Resident Investors: TDS is applicable on any income in respect of units of a Mutual Fund at lower of 20% (plus applicable surcharge and cess) or rate of income-tax provided in the relevant DTAA (read with CBDT Circular no. 3/2022 dated 3rd February 2022), provided such investor furnishes valid Tax Residency Certificate (TRC) for concerned FY. Tax will be deducted on Short-term/Long-term capital gains at the tax rates (plus applicable Surcharge and Health and Education Cess) specified in the Finance Act 2025 at the time of redemption of units in case of Non-Resident investors (other than FIIs) only.

TDS at higher rates: In case PAN is not furnished or PAN is inoperative, then TDS as per Section 206AA of the Income-tax Act, 1961 would apply (higher of specified rate or rates in force or 20%), subject to Rule 37BC of the Income-tax Rules, 1962.

The above income-tax/TDS rates are in accordance with the provisions of the Income-tax Act, 1961 as amended by Finance Act 2025. The above rates are based on the assumption that the mutual fund units are held by the investors as capital assets and not as stock in trade.

Investors are requested to note that the tax position prevailing at the time of investment may change in future due to statutory amendment(s). The Mutual Fund will pay/deduct taxes as per the applicable tax laws on the relevant date considering the provisions of the Income-tax Act, 1961. Additional tax liability, if any, imposed on investors due to such changes in the tax structure, shall be borne solely by the investors and not by the AMC or Trustee.

The above information is provided for only general information purposes and does not constitute tax or legal advice. In view of the individual nature of tax benefits, each investor is advised to consult with his/ her tax consultant with respect to the specific direct tax implications arising out of their transactions.
