C. Investment Strategy

The Scheme will be actively managed. The fund will invest upto 100% of the net assets of the scheme in debt and money market instruments with residual maturity upto 1 business day with an aim to generate income in line with overnight rates. Investments will be predominantly made in Tri-Party Repo (TREPS), CPs, CDs, repo, reverse repos etc. having residual maturity of 1 day.

Risk Control

Risk is an inherent part of the investment function. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objectives of the Scheme and provisions of SEBI regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying the risk and taking proper measures for the same. Risk such as Liquidity risk, volatility risk, Interest rate risk and such other risk can be partly mitigated through diversification, staggering of maturities, as well as internal controls. The Scheme may also use various derivatives products in accordance with the scheme objective and within the regulatory restriction for the purpose of trading, hedging and portfolio balancing from time to time, with an attempt to protect the value of the portfolio and enhance Unitholders' interest. While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that this risk would be completely eliminated.

Portfolio Turnover

The Scheme being an open-ended Scheme, it is expected that there would be a number of Subscriptions and Redemptions on a daily basis. The fund management team will be deploying funds in securities with one business day residual maturity which will keep portfolio turnover very low. The cost of this deployment would be negligible as compared to the total expenses of the Scheme. Therefore, it is difficult to measure with reasonable accuracy the likely turnover in the portfolio of the Scheme.

D. Benchmark Index

Benchmark Index	Justification
NIFTY 1D Rate Index	On the basis of investment objective/ asset allocation pattern of the Scheme, NIFTY 1D Rate Index is currently selected as the First tier Benchmark from the list of benchmark circulated by AMFI to be used by AMCs as a First Tier Benchmark, pursuant to para 1.9 as per SEBI Master Circular dated June 27, 2024 on 'Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes'. The overnight market in India is one of the most active components of the money market. The objective of NIFTY 1D Rate index is to measure the returns generated by market participants lending in the overnight market. The index uses the overnight rate provided through "Triparty Repo Dealing System (TREPS)" for computation of index values.

The Trustee / AMC reserve the right to change the benchmark for evaluation of performance of the Scheme from time to time in conformity with the investment objectives and appropriateness of the benchmark subject to the SEBI Regulations and other prevailing guidelines.

Part III. OTHER DETAILS

A. Computation of NAV

The Net Asset Value (NAV) per Unit of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation day. The Mutual Fund will value its investments according to the principle of fair valuation as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The Net Assets Value (NAV) per unit Units of the Scheme shall be calculated by either of the following methods shown below:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's Investments} + \text{Current Assets including Accrued Income} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under Scheme on the Valuation Day}}$$

Or

$$\text{NAV (Rs.)} = \frac{\text{Unit Capital + Reserves and Surplus}}{\text{No. of Units outstanding under the Scheme on the Valuation Day}}$$

Illustration of Computation of NAV:

The computation of NAV per unit using various components is explained as follows:

Particulars	Amount in Rs.
Market or Fair Value of Scheme's Investments(A)	10,00,00,000.00
Add: Current Assets including Accrued Income(B)	75,34,345.00
Less: Current Liabilities and Provisions(C)	(30,00,000.00)
Net Assets (A+B-C)	10,45,34,345.00

No. of Units outstanding under Scheme on the Valuation Day: 100,000.

The NAV per unit will be computed as follows: $10,45,34,345 / 100,000 = \text{Rs. } 1045.3435 \text{ p.u.}$ (rounded off to four decimals).

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

Methodology for calculation of sale and re-purchase price of the units:

- **Ongoing price for subscription (purchase) / switch-in (from other schemes/plans of the mutual fund) by investors.**

The Purchase Price of Units is the price at which an investor can subscribe /purchase Units of the Scheme. During the continuous offer of the Scheme, the Units will be available at the Applicable NAV. Pursuant to para 10.4.1.a of SEBI Master Circular dated June 27, 2024, there is no entry load for purchase of Units of the Scheme. Accordingly, Purchase Price will be equal to Applicable NAV.

Example: The applicable NAV of the Scheme is Rs. 1100.00 p.u. Since Entry load is not applicable, the sale / subscription price will be calculated as follows:

$$\begin{aligned} \text{Sale / Subscription Price} &= \text{Applicable NAV} \times (1 + \text{Entry Load}) \\ &= \text{Rs. } 1100.00 \times (1 + 0) \\ &= \text{Rs. } 1100.00 \times 1 \\ &= \text{Rs. } 1100.00 \end{aligned}$$

The investors should also note that stamp duty at the applicable rate will be levied on applicable transactions i.e. purchase, switch-in, IDCW reinvestment, instalment of Systematic Investment Plan, Systematic Transfer Plan. Accordingly, pursuant to levy of stamp duty, the number of units allotted will be lower to that extent. For more details & impact of stamp duty on number of units allotted, please refer SAI

- **Ongoing price for redemption (sale) / switch outs (to other schemes/plans of the Mutual Fund) by investors**

Ongoing price for redemption /switch out (to other schemes/plans of the Mutual Fund) is price which a Unit holder will receive for redemption/switch-outs. During the continuous offer of the Scheme, the Unit holder can redeem the units at applicable NAV, subject to payment of Exit Load, if any. It will be calculated as follows:

$$\text{Redemption Price} = \text{Applicable NAV} \times (1 - \text{Exit Load, if any})$$

Example 1: The applicable NAV of the Scheme is Rs. 1100.00 p.u. If the applicable Exit Load at the time of investments is 1%, then the repurchase / redemption price will be calculated as follows:

$$\begin{aligned} &= \text{Rs. } 1100.00 \times (1 - 0.01) \\ &= \text{Rs. } 1100.00 \times 0.99 \\ &= \text{Rs. } 1089 \end{aligned}$$

Example 2: The applicable NAV of the Scheme is Rs. 1100.00 p.u. If the applicable Exit Load at the time of investment is Nil, then the repurchase / redemption price will be calculated as follows:

$$\begin{aligned} \text{Repurchase / Redemption Price} &= \text{Applicable NAV} \times (1 - \text{Exit Load}) \\ &= \text{Rs. } 1100.00 \times (1 - 0) \\ &= \text{Rs. } 1100.00 \times 1 \\ &= \text{Rs. } 1100.00 \end{aligned}$$

Since the Scheme is not an equity scheme, Securities Transaction Tax (STT) is not applicable.

The Redemption / Repurchase Price will not be lower than 95% of the Applicable NAV.

B. Risk Factors

Scheme specific risk factors

1. Risk associated with Fixed Income and Money Market Instruments

Interest - Rate Risk

While the general risk associated with rise in interest rates and its impact on prices of securities will not affect the Scheme, any volatility in the overnight rates may lead to a divergence from those prevailing in normal market conditions.

Credit Risk

Credit risk or default risk refers to the risk that the issuer of a fixed income security may default on interest payment or even in paying back the principal amount on maturity. In case of Government securities, there is minimal credit risk to that extent. Different types of securities in which the Scheme would invest carry different types and levels of risk. Lower rated or unrated securities are likely to react to developments affecting the credit risk of the issuer than the highly rated securities.

Liquidity or Marketability Risk

Since the Scheme will be investing in securities having residual maturity of one business day, the Scheme does not envisage liquidity risk.

Securities which are not quoted on the stock exchange(s) may be illiquid and can carry higher liquidity risk in comparison with securities which are listed on the stock exchange(s) and offer exit option to the investor including put option. The Scheme would invest in the securities which are not listed but offer attractive yields. This may however increase the risk of the portfolio.

Re-investment Risk

This refers to the interest rate risk at which the intermediate cash flows received from the securities in the Scheme including maturity proceeds are reinvested. Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the debt security. Consequently, the proceeds may get invested at a lower rate.

2. Risk Factor associated with investing in Securities Segment and Tri-party Repo trade settlement

Clearing Corporation of India Ltd. ('CCIL') is providing clearing and settlement services, for Triparty Repo trades in Government Securities, under its Securities Segment. CCIL would act as a Central Counterparty to all the borrow and lend Triparty Repo trades received by it for settlement. CCIL would also be performing the role responsibilities of Triparty Repo Agent, in terms of Repurchase transactions (Repo) (Reserve Bank) Directions, 2018 as amended from time to time. CCIL would settle the Triparty Repo trades, in terms of its Securities Segment Regulations.

The funds settlement of members is achieved by multilateral netting of the funds position in Triparty Repo with the funds position in Outright and Market Repo and settling in the books of RBI for members who maintain an RBI Current Account. In respect of other members, funds settlement is achieved in the books of Settlement Bank. Securities settlement for Triparty Repo trades shall be achieved in the Gilt Account of the Member maintained with CCIL. Securities obligation for outright and market repo trades shall be settled in the SGL / CSGL account of the Member with RBI.

Invesco Mutual Fund is a member of securities segment and Tri-party Repo trade settlement of the CCIL. Since all transactions of the Fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL, it reduces the settlement and counterparty risks considerably for transactions in the said segments.

To mitigate the potential losses arising in case any member defaults in settling the transactions routed through CCIL, CCIL maintains a Default Fund. CCIL shall maintain two separate Default Funds in respect of its securities segment, one to meet the losses arising out of any default by its members from outright and repo trades and other for meeting losses arising out of any default by its members from Triparty Repo trades.

In case any clearing member fails to honor his settlement obligations, the Default Fund is utilized to complete the settlement applying the Default Waterfall Sequence. As per the said waterfall mechanism, after the defaulter's margins and defaulter's contribution to default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution, if there is still a loss to be met, then contribution of non-defaulting members to Default Fund is utilized to meet the said loss.

The Scheme is subject to the risk of losing initial margin and contribution to Default Fund in the event of failure of any settlement obligation. Further the Scheme's contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

Further, CCIL periodically prescribes a list of securities eligible for contribution as collaterals by members. Presently, all Central Government Securities and Treasury Bills are accepted as collaterals by CCIL. The above risk factor may undergo a change in case the CCIL notifies securities other than Government of India Securities as eligible for contributions as collateral.

3. Risk Factors Associated with repo transaction in Corporate Debt Securities

Counterparty Risk: This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price. Fund Manager will endeavor to manage counterparty risk by dealing only with counterparties having strong credit profiles assessed through in-house credit analysis and / or with entities regulated by SEBI/RBI/IRDA. In the event of default by the repo counterparty, the Scheme will have recourse to the corporate debt securities given as collateral to recover the investment by selling the collateral in the market. However, selling of collateral will also be subject to liquidity risk in the market and the Scheme may incur impact cost at the time of selling the collateral.

Collateral Risk: Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations or there is downward migration in rating of collateral. Further if the rating of collateral goes below the minimum required rating during the term of repo or collateral becomes ineligible for any reason, counterparty will be expected to substitute the collateral. In case of failure to do so, IAMI / Schemes of the Fund will explore the option for early termination of the trade.

4. Risks associated with segregated portfolio

- Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
- Security(ies) held in segregated portfolio may not realize any value.
- Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

C. Risk Mitigation Strategies

Type of Risk	Risk Mitigation Measures
Volatility	By controlling class/ sector/ issuer exposures in debt & money market instruments to control overall portfolio volatility.
Concentration	By investing in various debt instruments such as corporate and PSU bonds, TREPS/ Repo and money market instruments of various issuers which will be from different industries/sectors.

II. INFORMATION ABOUT THE SCHEME:

A. Where will the scheme invest

The corpus of the Scheme will be invested in Debt and Money Market Instruments having residual maturity of 1 business day which will include but not limited to:

1. Certificate of Deposits (CDs) is a negotiable money market instrument issued by scheduled commercial banks and select all-India Financial Institutions that have been permitted by the RBI to raise short term resources. The minimum denomination of CD should be Rs. 1 Lac and in multiples of Rs. 1 Lac thereafter. The maturity period of CDs issued by the Banks is between 7 days to one year, whereas, in case of FIs, maturity is between one year to 3 years from the date of issue. CDs may be issued at a discount to face value. Banks/ FIs cannot buy back their own CDs before maturity.
2. They are issued at a discount to the face value as may be determined by the issuer. CP is traded in secondary market and can be freely bought and sold before maturity.
3. Treasury Bills (T-Bills) are issued by the Government of India to meet their short term borrowing requirements. T-Bills are issued for maturities of 91 days, 182 days and 364 days. T-bills are issued at a discount to their face value and redeemed at par.
4. Tri-party Repo means a repo contract where a third entity (apart from the borrower and lender), called a Tri-party Agent, acts as an intermediary between the two parties to the repo to facilitate services like collateral selection, payment and settlement, custody and management during the life of the transaction.
5. Non-convertible debentures as well as bonds are securities issued by companies / institutions promoted / owned by the Central or State governments and statutory bodies, which may or may not carry a Central/State government guarantee, public and private sector banks, All India Financial Institutions, private sector companies. These instruments may be secured against the assets of the company or unsecured and generally issued to meet the short term and long term fund requirements. Rate of interest on such instruments would depend upon spread over corresponding government security, perceived risk, rating, tenor etc. These instruments include fixed interest security with/without put/call option, floating rate bonds, zero coupon bonds. Frequency of the interest payment could be either monthly/quarterly/half-yearly or annually.
6. Floating rate debt instruments are debt instruments issued by Central government, State government, corporates, PSUs etc. with coupon reset periodically. The periodicity of reset could be daily, monthly, quarterly, half yearly and annually or any other periodicity as may be mutually agreed between the issuer and the Fund. The fund manager will have the flexibility to invest the debt component into floating rate debt securities in order to reduce the impact of rising interest rate in the economy.
7. Repo (Repurchase Agreement) or Reverse Repo is a transaction in which two parties agree to sell and purchase the same security with an agreement to purchase or sell the same security at a mutually decided future date and price. The transaction results in collateralized borrowing or lending of funds. When the seller sells the security with an agreement to repurchase it, it is Repo transaction whereas from the perspective of buyer who buys the security with an agreement to sell it at a later date, it is reverse repo transaction. Presently in India, G-Secs, State government securities, T-Bills and corporate debt securities are eligible for Repo/Reverse Repo.
8. Securities created and issued by the Central and State Governments as may be permitted by RBI, securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills). Special securities issued by the Government of India to entities like Oil Marketing Companies, Fertilizer Companies, the Food Corporation of India, etc. (popularly called oil bonds, fertilizer bonds and food bonds respectively) and special

securities issued by the State Government under “Ujwal DISCOM Assurance Yojana (UDAY) Scheme for Operational and Financial Turnaround of Power Distribution Companies (DISCOMs)” notified by Ministry of Power vide Office Memorandum (No 06/02/2015-NEF/FRP) dated November 20, 2015, (popularly called as UDAY Bonds). Central Government Securities are sovereign debt obligations of the Government of India with zero-risk of default and issued on its behalf by RBI. They form part of Government’s annual borrowing programme and are used to fund the fiscal deficit along with other short term and long term requirements. Such securities could be fixed rate, fixed interest rate with put/call option, zero coupon bond, floating rate bonds, capital indexed bonds, fixed interest security with staggered maturity payment etc.

9. Clearcorp Repo Order Matching System (CROMS) is a Straight Through Processing (STP) enabled anonymous Order Matching Platform launched by Clearcorp Dealing Systems (India) Ltd. for facilitating dealing in Market Repos in all kinds of Government Securities. It enables dealing in two kinds of Repos – (1) Basket and (2) Special Repos. Building on the internationally popular Standard Repo Model, Basket Repos enables dealing in baskets wherein repoable securities have been classified based on instrument type, liquidity and outstanding tenor and clustered together. While borrowers can raise funds through a Basket Repo against any of security forming part of the concerned basket, the lender is assured that it would receive any of the securities forming part of the concerned basket. Details of security allocated are known to both counterparties post trade. As for Special Repos, which is the conventional repo, both borrower and lender are aware of the underlying security against which deal is sought to be concluded. CROMS provides better transparency, repo rate discovery and operational efficiency.
10. Cash Management Bills (CMB) are issued by Government of India to meet the temporary cash flow mismatches of the Government. CMBs are non-standard, discounted instruments issued for maturities less than 91 days. CMBs are issued at discount to the face value through auctions. The settlement of the auction will be on T+1 basis.
11. Bills Rediscounting.
12. Any other debt scheme of Invesco Mutual Fund or of any other mutual fund provided such investment is in conformity with the investment objective of the Scheme.
13. Any other securities as permitted by SEBI/RBI from time to time.

The securities / instruments mentioned above and such other securities the Scheme is permitted to invest in could be listed / unlisted, privately placed, secured, unsecured, rated or unrated and of residual maturity of 1 business day. The securities will be acquired through the secondary market. Further investments in debentures, bonds and other fixed income securities will be in instruments which have been assigned investment grade rating by the credit rating agency. Investment in unrated debt instruments shall be subject to complying with the provisions of SEBI Regulations and within the limit as specified in Schedule VII to SEBI Regulations.

Debt and Money Markets in India

The Indian debt market is today one of the largest in Asia and includes securities issued by the Government (Central & State governments), public sector undertakings, other government bodies, financial institutions, banks and corporates. Government and public sector enterprises are the predominant borrowers in the markets. The major players in the Indian debt markets today are banks, financial institutions, mutual funds, insurance companies, primary dealers, trusts, pension funds, foreign portfolio investors and corporates.

The Indian debt market is the largest segment of the Indian financial markets. The debt market comprises broadly two segments, viz., Government Securities Market or G-Sec Market and Corporate Debt Market. The latter is further classified as Market for PSU Bonds and Private Sector Bonds. The Government Securities (G-Secs + T-bills) market, with market capitalization of Rs. 1,21,52,195.627 crores as on May 9, 2025 (Source: RBI), is the oldest and the largest component of the Indian debt market in terms of market capitalization, outstanding securities and trading volumes. The outstanding dated securities of the Government of India is Rs. 1,13,73,828.63 Crores as on May 9, 2025 (Source - RBI). The G-Secs market plays a vital role in the Indian economy as it provides the benchmark for determining the level of interest rates in the country through the yields on the government securities which are referred to as the risk-free rate of return in any economy. Over the years, there have been new products introduced by the RBI like zero

coupon bonds, floating rate bonds, inflation indexed bonds, Cash Management Bills etc. Apart from these instruments, there has been a significant demand in the STRIPS (Separate Trading of Registered Interest and Principal of Securities) of the Government Securities. Current outstanding amount of such STRIPS instruments is Rs 8,20,093.15 Cr as on May 22, 2025 (Source - RBI). State Government Securities (SGS) through which State Governments borrow to fund their fiscal deficit has also become of a prominent size with outstanding amount of Rs. 63,60,131.59 Cr as on May 21, 2025 (Source – RBI) The corporate bond market, in the sense of private corporate sector raising debt through public issuance in capital market, is only an insignificant part of the Indian debt market. However, recently there was a significant increase in corporate bond issuances, particularly since it is at a more attractive rate than bank financing. The total traded volume in corporate bonds during April 2024 - March 2025 was Rs. 17,09,932.54 Crores vis-à-vis Rs. 13,73,394.02 Crores during April 2023 - March 2024 (Source: SEBI). The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). In a predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates.

In money market, activity levels of the Government and non-government debt vary from time to time. Instruments that comprise a major portion of money market activity include but not limited to:

1. Overnight Call
2. Tri-party Repo
3. Repo/Reverse Repo Agreement
4. Treasury Bills
5. Government Securities with a residual maturity of < 1 year.
6. Commercial Paper
7. Certificate of Deposit

Though not strictly classified as money market instruments, PSU / PFI /Corporate paper with a residual maturity of < 1 year, are actively traded and offer a viable investment option.

The following table gives approximate yields prevailing on October 27, 2025 on some of the instruments. These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing consequent to changes in macro-economic conditions and RBI policy.

The Scheme shall participate in repo transactions in corporate debt securities subject to following guidelines:

A. Category and Credit Rating of Counterparty:

Invesco India Overnight Fund

The Scheme will enter into repo transaction only with those counterparties which are rated AA and above and which are approved by Fixed Income team and with whom the Fund has approved credit limits. In case if counterparty has more than one rating from Credit Rating Agencies, then the most conservative publicly available rating would be considered.

B. Eligible Collateral:

The Scheme will participate in repo transactions only in AAA or equivalent rated corporate debt securities and tenure of collateral shall not exceed 5 years residual maturity where the Scheme is lending. For repo transactions where the Scheme is borrowing, collateral rated AA and above will be eligible and no tenor restrictions will apply.

C. Tenor of Repo:

As per the current RBI guidelines, repo in corporate debt securities shall be undertaken for a minimum period of one day and a maximum period of one year.

Accordingly, where the Scheme is lending money in repo transaction, then the tenor of repo shall not exceed a period of one business day. Where the Scheme is borrowing money in repo transactions, then the tenor of transaction shall not exceed 6 (Six) months.

D. Applicable Hair-Cut:

As per RBI guidelines, Collaterals shall be priced transparently at prevailing market prices, in the first leg of a repo. The price for the second leg shall be the price for the first leg of transaction plus interest.

Currently, RBI circular provides below guidelines on haircut / margins which will be decided either by the clearing house or may be bilaterally agreed upon, in terms of the documentation governing repo transactions:

- i) Listed corporate bonds and debentures shall carry a minimum haircut of 2% of market value. Additional haircut may be charged based on tenor and illiquidity of the security
- ii) CPs and CDs shall carry a minimum haircut of 1.5% of market value

Securities issued by a local authority shall carry a minimum haircut of 2% of market value. Additional haircut may be charged based on tenor and illiquidity of the security.

Collateral Type Collateral Residual Maturity	Minimum Haircut	
	upto 1 year	1 year to 5 years
AAA rated debt securities	3%	5%

The above are minimum hair-cut percentages and AMC may apply higher hair-cuts depending upon various factors i.e. residual maturity, counterparty, liquidity of collateral etc.

Liquidity Management Tool	Brief Description	Practice followed by AMC
Potential Risk Matrix (PRC) & Risk-o-meter	The maximum risk that a scheme will run as per design and a measurement of that risk on a regular basis. Remedial measures in place in case any of the design boundaries are breached.	<u>Potential Risk Class Matrix</u> The Scheme has been classified under A-I cell of PRC Matrix in order to determine the maximum risk that a fund manager can take in the Scheme. PRC Matrix consists of parameters based on maximum interest rate risk (measured by Macaulay Duration of the Scheme) and maximum credit risk (measured by Credit Risk Value of the Scheme). The PRC Cell of the Scheme is also included in the type of the Scheme. AMC monitors PRC of the Scheme regularly to ensure that the Scheme does not exceed maximum risk depicted by PRC. In case of any breach, remedial measures will be taken in accordance with the requirements of SEBI Circulars. <u>Risk-o-meter</u> Risk-o-meter in product label of the Scheme dynamically captures the actual risk taken by fund manager and consists of six levels of risk from low risk to very high risk. Risk-o-meter is evaluated on a monthly basis based on Scheme's portfolio holding and disclosed along with the portfolio disclosure. Any change in risk-o-meter is communicated by way

		addendum uploaded on the website of the fund and by way of email / SMS to the unitholders of the Scheme.
