For detailed information about where will the scheme invest, kindly refer Section II.

C. WHAT ARE THE INVESTMENT STRATEGIES

1. Strategy is to benefit from the portfolio of historically non-correlated assets classes (domestic equity, international equity, Debt (G-Sec) and Commodities.
2. The aim is to get exposure to each asset class via passive funds, to help keep cost low
3. The fund manager aims to provide conservative (i.e. overweight to debt) exposure, using above asset classes (point # 1), in order to generate capital appreciation over medium to long term.
4. The fund intend to invest in specified schemes of Mutual Fund as follows –

- a. Motilal Oswal 5 Year Benchmark G – Sec ETF / Similar Domestic G-Sec Passive Funds in the range of 50% to 70%; however due to short term market movements it could move in the range of 40% to 90%. The risk profile would be low to medium for such funds
 - b. Motilal Oswal Nifty 500 Index Fund / Motilal Oswal M50 ETF / Similar Domestic Equity Passive Funds in the range of 0% to 40%. The risk profile would be medium to high for such funds.
 - c. Motilal Oswal S&P 500 Index Fund or Motilal Oswal NASDAQ 100 ETF / Similar International Equity Passive Fund in the range of 0% to 20%. The risk profile would be high for such funds.
 - d. ICICI Prudential Gold ETF / Similar Domestic Gold Exchange Traded Funds / Any other Commodity ETF/Passive Fund permitted by SEBI in the range of 0% to 20%. The risk profile would be medium for such funds.
 - e. Units of Liquid schemes/Money Market Instruments in the range of 0% to 5% We aim to maintain overall debt allocation around 50 to 70%; however due to short term market movement it could move in the range of 40% to 90%.
5. Minimum of 95% of total AUM of the Schemes shall stay invested in Units of specified schemes of Mutual Fund (point # 4) above.

Portfolio Turnover

Portfolio Turnover is defined as the lower of sales or purchase divided by the average corpus during a specified period of time. The Scheme, being an open ended Scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis. However, it is difficult to measure with reasonable accuracy the likely turnover in the portfolio of the Scheme.

Tracking Error Scheme

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Scheme and the NAV of the Scheme. The fund assets will be predominantly invested in the Underlying Scheme and which is valued at the market price of the said units on the principal exchange. The same may be at a variance to the underlying NAV of the Scheme.

Theoretically, the corpus of the Scheme has to be fully invested in the Underlying Scheme completely. However, it is not possible to invest as per the objective due to reason that the Scheme has to incur expenses, regulatory policies, lack of liquidity, etc. The Scheme's returns may therefore deviate from those of its Underlying Scheme. Tracking Error may arise due to the following reasons:-

1. Fees and expenses of the Scheme.
2. Halt in trading on the Stock exchange due to circuit filter rules
3. Cash balance held by the Scheme due to subscriptions, redemption, etc.
4. Delay in receipt of cash flows
5. Non- availability of units of Underlying Scheme or the Underlying Scheme is temporary closed for subscription
6. Lack of liquidity on Stock Exchange

The Scheme has to invest in the Underlying Scheme in whole numbers and has to round off the quantity of units

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The performance of the Scheme will be benchmarked 30% Nifty 500 TRI + 10% S&P 500 TRI (INR) + 10% Domestic Price of Gold + 50% Nifty 5 Yr Benchmark G-Sec Index. As the Scheme is a Fund of Fund Scheme and aims to invest in domestic equity, international equity, and domestic g-sec and (may be in) gold. However considerable portion is allocated between domestic equity and g-sec together. The benchmark is close suitable to such allocation.

PART III- OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per unit under the Scheme will be computed by dividing the net assets of the Scheme by the number of units outstanding on the valuation day. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The Net Asset Value (NAV) of the units under the Scheme shall be calculated as follows:

NAV (Rs.) =

Market or Fair Value of Scheme's investments + Receivables + Accrued Income + Other
Assets - Accrued Expenses- Payables- Other Liabilities

No. of Units outstanding under Scheme on the Valuation Day.

The NAV will be calculated up to four decimals.

The NAV shall be calculated and disclosed on each business day. The units of the Underlying Scheme will be valued at market price of underlying units as traded on the principal stock exchange. In case the units of Underlying Scheme do not get traded underlying NAV of the Underlying Scheme shall be considered for valuation. The income earned and the profits realized in respect of the Units remain invested and are reflected in the NAV of the Units.

ILLUSTRATION OF NAV:

If the net assets of the Scheme, after considering applicable expenses, are Rs.10,45,34,345.34 and units outstanding are 10,00,0000, then the NAV per unit will be computed as follows:

$$10,45,34,345.34 / 10,00,000 = \text{Rs. } 10.4534 \text{ per unit (rounded off to four decimals)}$$

Repurchase/ Resale is at Net Asset Value (NAV) related prices with repurchase/ resale loads as applicable (within limits) as specified under SEBI Regulations 1996, While determining the price of the units, the fund will ensure that the repurchase price is not lower than 95 per cent of the Net Asset Value.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid, marketing and advertising, registrar expenses, printing and stationary, bank charges etc.

\$ As per 10.1.3 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, it has been decided that inflows of amount upto Rs. 2,00,000/- per transaction, by the individual investors shall be considered as inflows from retail investors.

Investors may please note that they will be bearing the recurring expenses of the Scheme in addition to the expenses of the underlying schemes in which the fund of fund scheme makes investment.

It may be further noted that

- the total expense ratio of the Scheme including weighted average of the total expenses ratio levied by the underlying schemes(s) shall not exceed 1.00 percent of the daily net assets of the scheme.

Such expenses can be paid out of AMC's books at actuals or not exceeding 2 bps of respective scheme AUM, whichever is lower

However, the upfront trail commission shall be paid from AMC's books for inflows through SIPs from new investors as per the applicable regulations. A complete audit trail of upfronting of trail commissions from the AMC's books and amortization of the same to scheme(s) thereafter shall be made available for inspection. The said commission should be charged to the scheme as 'commissions' and should also account for computing the TER differential between regular and direct plans in each scheme.

The expenses towards Investment Management and Advisory Fees under Regulation 52 (2) and the various sub-heads of recurring expenses mentioned under Regulation 52 (4) of SEBI (MF) Regulations will be charged in line with SEBI Mutual Fund Regulations. Thus, there shall be no internal sub-limits within the expense ratio for expense heads mentioned under Regulation 52 (2) and (4) respectively. Further, the additional expenses under Regulation 52(6A)(c) shall also be incurred towards any of the expense heads mentioned in the above regulation..

The purpose of the above table is to assist the investor in understanding the various costs & expenses that the investor in the Scheme will bear directly or indirectly. These estimates have been made in good faith as per the information available to the AMC and the above expenses (including investment management and advisory fees) are subject to inter-se change and may increase/decrease as per actual and/or any change in the Regulations, as amended from time to time.

All fees and expenses charged in a direct plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in a regular plan. The TER of the Direct Plan will be lower to the extent of the distribution expenses/commission which is charged in the Regular Plan and no commission for distribution of Units will be paid / charged under the Direct Plan.

In addition to expenses under Regulation 52(6) and (6A), AMC may charge GST on investment and advisory fees, expenses other than investment and advisory fees and brokerage and transaction cost as below:

3. GST on brokerage and transaction cost paid for execution of trade, if any, shall be within the limit prescribed under regulation 52 of the SEBI Regulations.

In addition to the limits as specified in Regulation 52(6) of SEBI (Mutual Funds) Regulations 1996 or the Total Recurring Expenses (Total Expense Limit) as specified above, the following costs or expenses may be charged to the scheme:

Additional TER can be charged up to 30 basis points on daily net assets of the scheme as per regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (hereinafter referred to as Regulations), if the new inflows from beyond top 30 cities are at least (a) 30% of gross new inflows in the scheme or (b) 15% of the average assets under management (year to date) of the scheme, whichever is higher Provided that expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities

In case inflows from beyond top 30 cities is less than the higher of (a) or (b) above, additional TER on daily net assets of the scheme shall be charged as follows:

$$\frac{\text{Daily net assets} \times 30 \text{ basis points} \times \text{New inflows from beyond top 30 cities}}{365} \times \text{Higher of (a) or (b) above}$$

* 366, wherever applicable.

The top 30 cities shall mean top 30 cities based on Association of Mutual Funds in India (AMFI) data on 'AUM by Geography – Consolidated Data for Mutual Fund Industry' as at the end of the previous financial year.

Mutual funds/AMCs shall make complete disclosures in the half yearly report of Trustees to SEBI regarding the efforts undertaken by them to increase geographical penetration of mutual funds and the details of opening of new branches, especially at locations beyond top 30 cities.

As per AMFI letter no. 35P/ MEM-COR/ 85-a/ 2022-23 dated March 02, 2023 on B-30 Incentive Mechanism, AMC has been advised to keep the B-30 incentive structure in abeyance with effect from March 01, 2023 till any further guidelines regarding necessary safeguards are issued by SEBI. However, AMC will continue to accrue expenses in the mutual fund schemes under Regulation 52 (6A) (b) and make the payment of B-30 incentive in respect of new inflows received from B-30 locations prior to March 01, 2023.

The Mutual Fund would update the current expense ratios on the website (www.motilaloswalmf.com) atleast three working days prior to the effective date of the change. Investors can refer to “Total Expense Ratio” section on <https://www.motilaloswalmf.com/downloads/mutual-fund/totalexpensratio> for Total Expense Ratio (TER) details.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. RISK FACTORS

Scheme Specific Risk Factors

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme’s NAV, yield, return and/or its ability to meet its objectives.

- **Risks associated with investing in Funds of Fund Scheme/ Underlying Schemes**

- As the investors are incurring expenditure at both the Fund of Funds level and the schemes into which the Fund of Funds invests, the returns that they may obtain may be materially impacted or may at times be lower than the returns that investors directly investing in such schemes obtain.
- Movements in the Net Asset Value (NAV) of the Underlying Schemes may impact the performance of the Scheme. Any change in the investment policies or fundamental attributes of the Underlying Schemes will affect the performance of the Scheme.
- Again as the Fund of Funds scheme may shift the weightage of investments between schemes into which it invests, the expenses charged being dependent on the structure of the underlying schemes (being different) may lead to a non- uniform charging of expenses over a period of time.
- The Scheme may invest predominantly in Passive Schemes. Hence the Scheme's performance may depend upon the performance of the underlying mutual fund scheme. Any change in the investment policies or the fundamental attributes of the underlying scheme could affect the performance of the Scheme. Since the Scheme will invest primarily in a combination of the specified equity and debt schemes of Motilal Oswal Mutual Fund, scheme specific risk factors of the Underlying Schemes will be applicable. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the Underlying Schemes
- The Portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying scheme where the Scheme has invested and will not include the investments made by the underlying Scheme.
- The fund assets are predominantly invested in Passive Schemes and valued at the market price of the said units on the exchange. The same may be at a variance to the underlying NAV of the fund, due to market expectations, demand supply of the units, etc. To that extent the performance of scheme shall be at variance with that of the underlying scheme.
- The liquidity of the Scheme's investments may be inherently restricted, in the event of an inordinately large number of redemption requests, or of a re-structuring of the Scheme's investment portfolio, these periods may become significant.
- The NAV of the scheme to the extent invested in Money market / Liquid schemes are likely to be affected by changes in the prevailing rates of interest and are likely to affect the value of the Scheme's holdings and thus the value of the Scheme's Units.

- **Risks associated with investing in Equities**

- Investments in the equity shares of the Companies constituting the Underlying Index are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro-economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.
- The Scheme would invest in the Underlying Index/ETF Schemes in the. Hence, the risk associated with the corresponding Underlying Index would be applicable to the Scheme. The Underlying Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The Fund would invest in the Index/ETF Schemes regardless of investment merit, research, without taking a view of the market and without adopting any defensive measures. The Fund would not select securities in which it wants to invest but is guided by the Underlying Index/ETF Schemes. As such the Scheme is passively managed.

- **Risk associated with investing in Foreign Securities**

- a. The Scheme will invest in foreign securities. Such overseas investments will be made subject to any / all approvals, conditions thereof as may be stipulated by SEBI / RBI and provided such investments do not result in expenses to the Fund in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing. The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceiling of expenses.
- b. As per the SEBI (MF) Regulation, the Fund is permitted to invest USD 1 billion. However, the overall limit for the Mutual Fund Industry is USD 7 billion. The Scheme therefore may or may not be able to utilise the limit of USD 1 billion due to the USD 7 billion limit being exhausted by other Mutual Funds. Further, the overall ceiling for investment in overseas Exchange Traded Funds (ETFs) that invests in securities is USD 1 billion subject to a maximum of USD 300 million per mutual fund. As and when the investment limits are breached, the subscriptions into the Scheme shall be suspended till further notice by the AMC.
- c. Mutual Funds can make investments in overseas Exchange Traded Fund (ETF(s)) subject to a maximum of USD 300 million per Mutual Fund, within the overall industry limit of USD 1 billion.
- d. As the Scheme will invest in securities which are denominated in foreign currencies, fluctuations in the exchange rates of these foreign currencies may have an impact on the income and value of the Fund. Thus, returns to investors are the result of a combination of returns from investments and from movements in exchange rates. Thus, the Indian rupee equivalent of the net assets, distribution and income may be adversely affected by changes in the exchange rates of respective foreign currencies relative to the Indian Rupee. Restrictions on currency trading that may be imposed by developing market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries. The repatriation of capital to India may also be hampered by changes in the regulations concerning exchange controls or political circumstances as well as the application to it of other restriction on investment.
- e. The risk of investing in foreign securities carries an exchange rate risks related to depreciation of foreign currency and country risks. The country risks would include events such as change in regulations or political circumstances like introduction of extraordinary exchange rate controls, restrictions on repatriation of capital due to exchange rate controls, bilateral political tensions leading to immobilisation of overseas financial assets and the prevalent tax laws of the respective jurisdiction for the execution of trades or otherwise.
- f. The Scheme shall invest in the Scheme which is investing into securities listed on the overseas stock exchange. Hence all the risk factors pertaining to overseas stock exchange like market trading risk, liquidity risk and volatility risk, as mentioned earlier, are also applicable to the

Scheme. The Scheme will also be exposed to settlement risk, as different countries have different settlement periods.

- g. Some countries prohibit or impose substantial restrictions on investments by foreign entities. Certain countries may restrict investment opportunities in issuers or industries or securities deemed important to national interests. The manner, in which foreign investors may invest in companies/securities in certain countries, as well as limitations on such investments, may have an adverse impact on the operations of the Scheme. Certain risk arises from the inability of a country to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country which might adversely affect the interests of the Scheme.
- h. The Scheme may invest in the units of overseas mutual fund schemes including exchange traded funds. Hence scheme specific risk factors of such underlying schemes will be applicable. All risks associated with such schemes, including performance of their underlying stocks, derivative instruments, stock-lending, off-shore investments, liquidity, etc., will therefore be applicable in this Scheme. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying schemes.
 - To the extent the assets of the scheme are invested in overseas financial assets, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market. Further, the repatriation of capital to India may also be hampered by changes in regulations or political circumstances as well as the application to it of other restrictions on investment. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, and bi-lateral conflict leading to immobilisation of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.
 - **Currency Risk:** The fund may invest in overseas mutual fund / foreign securities as permitted by the concerned regulatory authorities in India. Since the assets will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes/fluctuations in the value of the foreign currencies relative to the Indian Rupee.
 - **Country Risk:** The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests.
 - **Interest Rate Risk:** The pace and movement of interest rate cycles of various countries, though loosely co-related, can differ significantly. Hence by investing in securities of countries other than India, the Scheme stand exposed to their interest rate cycles.
 - **Taxation Risk:** Investment in Foreign Securities poses additional challenges based on the tax laws of each respective country or jurisdiction. The scheme may be subject to a higher level of taxes than originally anticipated and or dual taxation. The Scheme may be subject to withholding or other taxes on income and/or gains arising from its investment portfolio.

Further, such investments are exposed to risks associated with the changing / evolving tax / regulatory regimes of all the countries where the Scheme invests. All these may entail a higher outgo to the Scheme by way of taxes, transaction costs, fees etc. thus adversely impacting its NAV; resulting in lower returns to an Investor.

- **Legal and Regulatory risk:** Legal and regulatory changes could occur during the term of the Scheme which may adversely affect it. If any of the laws and regulations currently in effect should change or any new laws or regulations should be enacted, the legal requirements to which the Scheme and the investors may be subject could differ materially from current requirement and may materially and adversely affect the Scheme and the investors. Legislation / Regulatory guidelines could also be imposed retrospectively.

To manage risks associated with foreign currency and interest rate exposure, the Mutual Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/ RBI from time to time.

- **Market Risk**

The Scheme's NAV will react to stock market movements. The value of investments in the scheme may go down over a short or long period due to fluctuations in Scheme's NAV in response to factors such as performance of companies whose stock comprises the underlying portfolio, economic and political developments, changes in government policies, changes in interest rates, inflation and other monetary factors causing movement in prices of underlying investments.

- **Passive Investments**

The Scheme as per its investment objective invests in the units of the Underlying schemes regardless of their investment merit.

- **Right to Limit Redemptions**

Pursuant to clause 1.12 of SEBI Master Circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The Trustee, in the general interest of the Unitholders of the Scheme offered under this SID and keeping in view of unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day subject to the guidelines/circulars issued by the Regulatory Authorities from time to time.

For detailed restrictions, please refer to Section II Part D, "Right to Limit Redemptions."

- **Risk Factors relating to Portfolio Rebalancing**

In the event that the asset allocation of the Scheme deviates from the ranges as provided in the asset allocation table in this SID, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme then the AMC would notify the Board of the Trustee Company and the Investment Committee of the AMC with appropriate justifications.

- **Asset Class Risk**

The returns from the types of securities in which the Scheme invests may under perform from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison with the general securities markets.

- **Selection Risk**

The risk that a security chosen will underperform the market for reasons that cannot be anticipated.

- **Risk associated with investing in fixed income securities and Money Market Instruments**

- a. **Credit risk:** Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e. will be unable to make timely principal and interest payments on the security). Because of this risk debentures are sold at a yield spread above those offered on Treasury securities, which are sovereign obligations and generally considered to be free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the actual changes in the perceived level of credit risk as well as the actual event of default.
- b. **Counterparty risk:** Counterparty refers to the counterparty's inability to honor its commitments (payment, delivery, repayment, etc.) and to risk of default. This risk relates to the quality of the counterparty to which the scheme has exposures. Losses can occur in particular for the settlement/delivery of financial instruments.
- c. **Interest Rate risk:** This risk is associated with movements in interest rate depends on various factors such as government borrowing, inflation, economic performance etc. The value of investments will appreciate/depreciate if the interest rates fall/rise. However, if the investments are held on till maturity of the investments, the value of the investments will not be subjected to this risk.
- d. **Reinvestment risk:** This risk arises from uncertainty in the rate at which cash flows from the securities may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
- e. **Liquidity or Marketability Risk:** This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market.
- f. Different types of fixed income securities in which the Scheme would invest carry different levels and types of risk. Accordingly, the Scheme risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, bonds, which are AAA rated, are comparatively

less risky than bonds, which are AA rated.

- g. The Net Asset Value (NAV) of the Scheme, to the extent invested in Debt and Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

h. Settlement Risk

Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are un invested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well-developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.

- **Risks associated with investing in Government of India Securities**

- a. Market Liquidity risk with fixed rate Government of India Securities even though the Government of India Securities market is more liquid compared to other debt instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by Reserve Bank of India undergo any adverse changes.
- b. Interest Rate risk associated with Government of India Securities - while Government of India Securities generally carry relatively minimal credit risk since they are issued by the Government of India, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is not unique to Government of India Securities. It exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.

- **Market Trading Risks**

- a. **Absence of Prior Active Market:** Although the scheme will be listed on stock exchange, there can be no assurance that an active secondary market will develop or be maintained.

- b. **Lack of Market Liquidity:** Trading in the units of the scheme on stock exchange may be halted because of market conditions or for reasons that in view of stock exchange or SEBI, trading in the units of the scheme are not advisable. In addition, trading of the units of the scheme are subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of stock exchange necessary to maintain the listing of the units of the scheme will continue to be met or will remain unchanged.
- c. **Units of the scheme may trade at prices other than NAV:** The units of the scheme may trade above or below their NAV. The NAV of the scheme will fluctuate with changes in the market value of scheme holdings. The trading prices of the units of the scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the units of the scheme. However, given that units of the scheme can be created and redeemed in creation units directly with the fund, it is expected that large discounts or premiums to the NAV of units of the scheme will not sustain due to arbitrage opportunity available.
- d. **Regulatory Risk:** Any changes in trading regulations by stock exchange or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.
- e. **Right to Limit Redemptions:** The Trustee, in the general interest of the unit holders of the scheme and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of units which can be redeemed on any business day depending on the total "Saleable Underlying Stock" available with the fund.
- f. **Redemption Risk:** Investors may note that even though the Scheme is open-ended Scheme, the Scheme would ordinarily repurchase units in creation unit size. Thus unit holdings less than the creation unit size can only be sold through the secondary market on the exchange.
- g. **Asset Class Risk:** The returns from the types of securities in which the scheme invest may underperform returns of general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison of securities markets.
- h. The units will be issued only in demat form through depositories. The records of the depository are final with respect to the number of units available to the credit of unit holder. Settlement of trades, repurchase of units by the mutual fund depends up on the confirmations to be received from depository (ies) on which the mutual fund has no control.
- i. **Tracking Error Risk:** The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the respective scheme, corporate actions, cash balance, changes to the underlying index and regulatory policies which may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the respective scheme. Tracking Error may arise due to the following reasons: -

- Expenditure incurred by the fund.
- The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- Securities trading may halt temporarily due to circuit filters.
- Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.
- Rounding off of quantity of shares in underlying index.
- IDCW payout.
- Disinvestments to meet redemptions, recurring expenses, IDCW payouts etc.
- Execution of large buy / sell orders
- Transaction cost (including taxes and insurance premium) and recurring expenses
- Realisation of Unit holders' funds
- Index provider undertakes a periodical review of the scripts that comprise the underlying index and may either drop or include new securities. In such an event, the fund will try to reallocate its portfolio but the available investment/reinvestment opportunity may not permit absolute mirroring immediately.

It will be the endeavor of the fund manager to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum. However, in case of certain corporate actions like, IDCW received from underlying securities, rights issue from underlying securities, and market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

- **Risks associated with investing in TREPS Segments**

The mutual fund is a member of securities and TREPS segments of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in TREPS segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.

- **Risks associated with Segregated portfolio:**

The AMC / Trustee shall decide on creation of segregated portfolio of the Scheme in case of a credit event/actual default at issuer level. Accordingly, Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. The Security

comprised of segregated portfolio may not realise any value. Further, Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

- **Risk associated with investments in Gold ETF's:**

a) The scheme would invest in Gold ETFs and thus the NAV of the scheme will react to Gold price movements. Several factors that may affect the price of gold are as follows:

- Global gold supplies and demand, which is influenced by factors such as forward selling by gold producers, purchases made by gold producers to unwind gold hedge positions, central bank purchases and sales, productions and cost levels in major gold producing countries such as the South Africa, the United States and Australia.
- Investors' expectations with respect to the rate of inflation
- Currency exchange rates
- Interest rates
- Investment and trading activities of hedge funds and commodity funds
- Global or regional political, economic or financial events and situations
- Changes in indirect taxes or any other levies

b) **To the extent the Scheme's assets are invested in Gold ETFs the risks associated with the underlying Gold ETFs, will also be applicable. Some of them are explained below:**

- **Currency Risk:** The formula for determining NAV of the Units of Gold ETFs is based on the imported (landed) value of gold. Landed value of gold held by Gold ETFs is computed by multiplying international market price by US dollar value. The value of gold or NAV, therefore will depend upon the conversion value of US dollar into Indian rupee and attracts all the risks attached to such conversion.
- **Regulatory Risk:** Any changes in trading regulations by the stock exchange(s) or SEBI may affect the ability of Authorised Participant of Gold ETFs to arbitrage resulting into wider premium/ discount to NAV. Any changes in the regulations relating to import and export of gold or gold jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the underlying Gold ETFs to buy / sell gold against the purchase and redemption requests received.
- Units of Gold ETFs may be acquired from the stock exchanges where the price quoted may be at variance with the underlying NAV, resulting in higher acquisition costs.

c) **Taxation:** Conversion of underlying physical gold into units of Gold ETFs may attract capital gain tax depending on acquisition cost and holding period. Moreover, converting units of the underlying scheme to Gold may also attract Wealth tax. Furthermore, Gold is subject to indirect tax not restricted to the following: Sales Tax, Octroi, VAT, Stamp Duty, and Custom Duty. Hence, any change in the rates of taxation/applicable taxes would affect the valuation of the Scheme.

d) Redemption Risk:

- The units issued under the Scheme, when invested in Gold ETFs, will derive liquidity from the underlying Gold ETF having creation / redemption process in creation unit size of predefined quantity of physical gold (e.g. 1 kg). At times prevailing market conditions may affect the ability of the underlying Gold ETFs to sell gold against the redemption request received.
- Furthermore, the endeavour would always be to get cash on redemptions from the underlying Gold ETFs. However, in case the underlying Gold ETF is unable to sell for any reason, and delivers physical gold, there could be delay in payment of redemption proceeds pending such realization.
- Additionally, the Scheme will derive liquidity from trading units of underlying Gold ETFs on the exchange(s) in the secondary market which may be inherently restricted by trading volumes, settlement periods and transfer procedures. As there is no active secondary market for Gold ETFs, the processing of redemption requests at times may be delayed. In the event of an inordinately large number of redemption requests, or re-structuring of the Scheme's investment portfolio, the processing of redemption requests may be delayed.
- Gold ETFs would ordinarily repurchase Units in Creation Unit Size. Thus Unit holding less than Creation Unit Size can only be sold through the secondary market on the Exchange. Further, the price received upon the redemption of Units of Gold ETFs may be less than the value of the gold represented by them.

e) Market Trading Risks:

- Although units of Gold ETFs are listed on recognised stock exchange(s), there can be no assurance that an active secondary market will be developed or be maintained.
- Trading in units of Gold ETFs on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange Authorities or SEBI, trading in units of Gold ETFs is not advisable. In addition, trading in units of Gold ETFs is subject to trading halts caused by extraordinary market volatility and pursuant to the Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of units of Gold ETFs will continue to be met or will remain unchanged.
- Any changes in trading regulations by the Stock Exchange(s) or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV.
- The units of Gold ETFs may trade above or below their NAV. The NAV of Gold ETFs will fluctuate with changes in the market value of that scheme's holdings. The trading prices of units of Gold ETFs will fluctuate in accordance with changes in their NAV as well as market supply and demand for the units of Gold ETF.

- Gold ETFs may provide for the creation and redemption of units in Creation Unit Size directly with the concerned Mutual Fund and therefore, it is expected that large discounts or premiums to the NAV of the units of Gold ETFs will not sustain due to arbitrage opportunity available.

Trading through mutual fund trading platforms of BSE and/ or NSE

- In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

• General Risk Factors

Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Units of the Scheme can go up or down because of various factors that affect the capital markets in general.

As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances.

• Risk associated with potential change in Tax structure

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

Risk Control

Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.
