PART I. HIGHLIGHTS / SUMMARY OF THE SCHEME

Sr. No.	Title	Description
I.	Name of the Scheme	Tata Floating Rate Fund
II.	Category of the Scheme	Debt -Floater Fund
III.	Scheme type	An open-ended debt scheme investing predominantly in floating rate instruments (including fixed rate instruments converted to floating rate exposures using swaps/ derivatives). A relatively high interest rate risk and moderate credit risk.
IV.	Scheme Code	TATA/O/D/FLF/21/04/0043
V.	Investment Objective	The objective of the scheme is to generate income through investment primarily in floating rate debt instruments, fixed rate debt instruments swapped for floating rate returns and money market instruments. However, there is no guarantee or assurance that the investment objective of the scheme will be achieved. The scheme doesn't assure or guarantee any returns.
VI.	Liquidity/listing details	The scheme is an open-ended scheme. The scheme is open for resale and repurchase of units at NAV based price, with applicable loads, if any on every business day on an ongoing basis. Under normal circumstances the AMC shall dispatch redemption proceeds within three working days from the date of redemption or repurchase, subject to exceptional circumstances as mentioned in this document. Currently the scheme is not listed. However, the trustees may review the same in future and list the units under the Scheme on one or more Stock Exchanges later subject to adherence of terms and conditions of Regulators/Exchanges.
VII.	Benchmark (Total Return Index)	CRISIL Short Duration Debt A-II Index The composition of the aforesaid benchmark is such that, it is most suited for comparing performance of the respective plans. Total Return variant of the index (TRI) index will be used for performance comparison.
VIII.	NAV Disclosure	The NAVs will be calculated and disclosed on every Business Day. The AMC will prominently disclose the NAVs under a separate head on the website of the Fund (www.tatamutualfund.com) and of the Association of Mutual Funds in India-AMFI (www.amfiindia.com) by 11 P.M. on every business day. However, due to inability in capturing same day valuation of underlying investments, the NAV shall be disclosed by 11 P.M. of the next business day. ^ If the NAVs are not available before the commencement of Business Hours on the following day (i.e., next day after the respective business day) due to any reason, the Mutual Fund shall issue a press release giving reasons for the delay and explain by when the Mutual Fund would be able to publish the NAV. In case NAV of Corporate Debt Market Development Fund ("CDMDF") units is not available by 9:30 p.m. of same Business Day, NAV declaration timing for Mutual Fund Schemes holding units of CDMDF shall be 10 a.m. on next business day instead of 11 p.m. on same Business Day. Portfolio Disclosure: The Fortnightly/ Monthly portfolio/Half Yearly of the Scheme shall be available in a user-friendly and downloadable format on the www.tatamutualfund.com on or before the fifth/tenth day of succeeding month. Due to difference in the expense ratio, the NAV of each option of Direct Plan will be different from the NAV of each option of Regular Plan. Similarly, due to payout, the NAV of payout option will be different from the NAV of Growth option.
IX.	Applicable timelines	Timeline for: • Dispatch of redemption proceeds: Under normal circumstances the AMC shall make the payment of redemption proceeds within three working days from the date of redemption or repurchase, subject to exceptional circumstances as mentioned in this document. In case of failure to dispatch, Interest for the period of delay shall be payable to unitholders at the rate of 15% per annum alongwith redemption or repurchase proceeds. • Dispatch of IDCW: The warrants/intimation shall be dispatched to the unitholders within 7 working days from the record date. In the event of failure of dispatch of income distribution within the stipulated 7 working days period from the record date, the AMC shall be liable of pay interest at such rate as may be specified by SEBI for the

		period of such delay (presently @15% per annum) to the Unitholders. The above timelines are subject to the list of exceptional circumstance as specified by SEBI or AMFI from time to time.
X.	<p>Plan and Options Plans/Options and sub options under the Scheme</p>	<p>The Scheme has the following Plans across a common portfolio:</p> <p>Regular Plan: This Plan is for investors who wish to route their investment through any distributor.</p> <p>Direct Plan: This Plan is only for investors who purchase /subscribe units in a scheme directly with the Fund and is not available for investors who route their investments through a Distributor.</p> <p>Regular Plan (For applications routed through Distributors):</p> <p>The Scheme has following options:</p> <ul style="list-style-type: none"> • Growth Option • Monthly Payout of Income Distribution Cum Capital Withdrawal Option (IDCW-Monthly Payout) • Quarterly Payout of Income Distribution Cum Capital Withdrawal Option (IDCW-Quarterly Payout) • Periodic Payout of Income Distribution Cum Capital Withdrawal Option (IDCW-Periodic Payout) • Monthly Reinvestment of Income Distribution Cum Capital Withdrawal option (IDCW-Monthly Reinvestment) • Quarterly Reinvestment of Income Distribution Cum Capital Withdrawal option (IDCW-Quarterly Reinvestment) • Periodic Reinvestment of Income Distribution Cum Capital Withdrawal Option (IDCW-Periodic Reinvestment) <p>Direct Plan (For applications not routed through Distributors)</p> <p>The Scheme has following options:</p> <ul style="list-style-type: none"> • Growth Option • Monthly Payout of Income Distribution Cum Capital Withdrawal Option (IDCW-Monthly Payout) • Quarterly Payout of Income Distribution Cum Capital Withdrawal Option (IDCW-Quarterly Payout) • Periodic Payout of Income Distribution Cum Capital Withdrawal Option (IDCW-Periodic Payout) • Monthly Reinvestment of Income Distribution Cum Capital Withdrawal Option (IDCW-Monthly Reinvestment) • Quarterly Reinvestment of Income Distribution Cum Capital Withdrawal Option (IDCW-Quarterly Reinvestment) • Periodic Reinvestment of Income Distribution Cum Capital Withdrawal Option (IDCW-Periodic Reinvestment) <p>Monthly Payout of Income Distribution Cum Capital Withdrawal (IDCW- Monthly Payout) Option will be default frequency.</p> <p>Compulsory Reinvestment of Income Distribution cum capital withdrawal :</p> <p>In order to reduce the expenses of the scheme and also for the convenience of the investors ,the income distribution cum capital withdrawal shall be compulsorily reinvested (for investors of non-electronic mode) within the scheme at the applicable ex-dividend NAV if income distribution cum capital withdrawal amount is Rs.100 or less , in the same option of the respective plans of the scheme at the ex- dividend rate.</p> <p>Investor shall note that when units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains shall be credited to an Equalization Reserve Account and which can be used to pay income distribution. Hence income distribution amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.</p> <p>Please note that the income distribution cum capital withdrawal amount shall be distributed at the discretion of the Trustees subject to the availability of distributable surplus.</p>

XVIII.	Swing Pricing	<p>Swing Pricing is an anti-dilution technique which helps funds manage liquidity risks internally by effectively passing on transaction costs to the unitholder/investors associated with that activity.</p> <p>Circumstances when Swing Pricing Triggered</p> <p>In a liquidity-challenged environment, quoted bid/ask spreads and overall trading cost can widen and may not be representative of the executed prices that can be achieved in the market. Swing pricing is needed to address issues in addition to costs of bid-offer spread and transaction costs, particularly arising during market dislocation in the mutual fund industry or in the underlying bond market. Further, liquidity is concentrated in high quality paper and during market dislocation, very high risk aversion is observed and in terms of yield of bonds, spread over benchmark spike, particularly for relatively lower quality paper. Accordingly, swing pricing, an anti-dilution adjustment that seeks to protect investors in a fund from performance dilution as a result of significant outflows from the fund, particularly during market dislocation.</p> <p>Mandatory Swing pricing during market dislocation</p> <p>The swing pricing framework will be made applicable only for scenarios related to net outflows from the scheme. Swing pricing will be mandatory during the period of market dislocation announced by SEBI. Once market dislocation is declared, it will be notified by SEBI that swing pricing will be applicable for a specified period. The provision of swing pricing for market dislocation shall be applicable only in case of following conditions:</p>

High or Very High Risk on the most recent risk-o-meter in terms of provision no. 17.4 of SEBI Master circular on Mutual Fund dated June 27, 2024,

AND

Classified themselves in any of the cell A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix in terms of provision no. 17.5 of SEBI Master circular on Mutual Fund dated June 27, 2024.

Following mandatory swing factor will be applied on redemption and subscription transactions in the scheme during market dislocation period announced by SEBI.

Minimum swing factor^			
Maximum Credit Risk of scheme →	Class A (Credit Risk Value >=12)	Class B (Credit Risk Value >=10)	Class C (Credit Risk Value <10)
Maximum Interest Rate Risk of the scheme ↓			
Class I: (Macaulay Duration <=1 year)			
Class II: (Macaulay Duration <=3 years)			
Class III: Any Macaulay Duration		1.5%	

^ Swing pricing shall be made applicable to all unitholders at PAN level with an exemption for redemptions upto Rs. 2 lacs for each scheme.

Disclosures Requirements:

The adjusted NAV's will be calculated and disclosed as mentioned in "Net Asset Value" section under "Periodic Disclosures" of this document.

The scheme performance shall be computed based on unswung NAV.

Disclosures pertaining to NAV adjusted for swing factor along with the performance impact shall be made in specific format as mandated by SEBI in the SIDs and in scheme wise Annual Reports and Abridged summary and the same will be disclosed on the website prominently only if swing pricing framework has been made applicable for the said mutual fund scheme.

Triggering Swing Pricing on Re-opening of scheme after announcement of winding-up:

There may be instances where TAMPL, after making an announcement to wind up a scheme, decides to roll-back the decision to wind up a scheme. Such situations may trigger larger scale redemptions and hence, in the interest of the investors following Swing Pricing Framework will be applicable / gets triggered for subscriptions & redemptions, once the scheme re-opens after roll back of winding up announcement.

Swing Factor Threshold

The below mentioned swing factor will be made applicable to subscription and redemption transactions during the swing period basis scheme's positioning in the PRC Matrix.

Minimum Swing Factor			
Maximum Credit Risk of scheme →	Class A (Credit Risk Value >=12)	Class B (Credit Risk Value >=10)	Class C (Credit Risk Value <10)
Maximum Interest Rate Risk of the scheme ↓			
Class I: (Macaulay Duration <=1 year)	0.00%	0.05%	0.20%
Class II: (Macaulay Duration <=3 years)	0.05%	0.10%	0.40%
Class III: Any Macaulay Duration	0.10%	0.20%	0.60%

Swing Factors mentioned above are subject to revision (higher / lower). Any revision will be notified to the investors by issuance of an Addendum which will be uploaded on the website of Tata Mutual Fund. However, the swing factor will not be lower than the AMFI specified threshold*.

Swing Pricing Period

The Swing pricing period means a period in which investors will get units allotted / redeemed at Swung NAV (i.e. after deducting swing factor as specified above). It will be for a period of 7 working days.

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. The two conditions mentioned above shall be complied with on a calendar quarter basis, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. However, in case the Scheme does not have a minimum of 20 investors, on an average basis, in the stipulated period (i.e. during the concerned calendar quarter), the provisions of Regulation 39(2) (c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard

SPECIAL CONSIDERATIONS

Investors are urged to read the terms of the SID carefully before investing in this Scheme, and to retain this SID for future reference. The Mutual Fund may disclose details of the investor's account and transactions there under to those intermediaries whose stamp appears on the application form or who have been designated as such by the investor. In addition, the Mutual Fund may disclose such details to the bankers, as may be necessary for the purpose of effecting payments to the investor. The Fund may also disclose such details to regulatory and statutory authorities/bodies as may be required or necessary.

Pursuant to the provisions of Prevention of Money Laundering Act, 2002, if after due diligence, the AMC believes that any transaction is suspicious in nature as regards money laundering, on failure to provide required documentation, information, etc. by the unit holder the AMC shall have absolute discretion to report such suspicious transactions to FIU-IND and / or to freeze the folios of the investor(s), reject any application(s) / allotment of units.

Tax Consequences

Redemption by the unitholders due to change in the fundamental attribute (if any, in future) of the scheme(s) or due to any other reason may entail tax consequences for which the Trustees, AMC, Fund their Directors / employees shall not be liable.

PART II. INFORMATION ABOUT THE SCHEME

A. HOW WILL THE SCHEME ALLOCATE ITS ASSETS

ASSET ALLOCATION AND RISK PROFILE

Under normal circumstances, the asset allocation of the Scheme will be as follows:

Instruments	Indicative Allocations (% of net assets)	
	Minimum upto	Maximum upto
Floating rate securities* (including fixed rate securities converted to floating rate exposures using swaps / derivatives)	65	100
Fixed rate debt securities, securitized debt, money market instruments	0	35
Units issued by REITs & InvITs	0	10

* Floating rate securities include Floating rate Money Market Instruments.

Under normal circumstances at least 65% of the total portfolio will be invested in floating rate debt securities. This may be by way of direct investment in floating rate securities or fixed rate securities swapped for floating rate returns by using swaps/derivatives. Use of derivatives for other purpose (excluding hedge position) will be restricted to 30% of the net assets of the Scheme.

The Scheme may undertake (i) repo/ reverse repo transactions in Corporate Debt Securities; (ii) Short Selling and such other transactions in accordance with guidelines issued by SEBI from time to time.

The scheme may invest in units of domestic mutual fund schemes including ETFs to the extent of 35% of the net assets, subject to the limits prescribed in clause 4 of Seventh Schedule of SEBI(Mutual Funds) Regulations 1996.

The scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund.

The cumulative gross exposure through repo transactions in corporate debt securities along with other debt securities, REITs and InvITs and derivatives shall not exceed 100% of the net assets of the Scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.

The Scheme may indulge in 'Imperfect hedging' using IRFs upto maximum of 20% of the net assets of the scheme.

The scheme may invest in any other assets/securities as may permitted by SEBI/RBI from time to time subject to SEBI/RBI approvals as may be required.

Pending deployment of funds of a Scheme in terms of investment objectives of the scheme, a mutual fund may invest them in short term deposits of schedule commercial banks, subject to provision no. 12.16 of SEBI Master Circular on Mutual Fund dated June 27, 2024. Asset Management Company (AMC) will not charge investment management and advisory fees on funds which are parked in short term deposits of scheduled commercial banks.

Due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short term purpose only for defensive considerations and such deviation shall be subjected to 30 days rebalancing period.

Duration, Valuation, Yields, in case of perpetual bonds, debt instruments with special features, debt instruments with call/put options, floating rate bonds will be based on the method specified by SEBI or AMFI from time to time.

Provision no. 4.5 & 4.6 of SEBI Master circular on Mutual Fund dated June 27, 2024 has mandated the open ended debt schemes (except Overnight Schemes and Gilt Schemes) shall hold minimum liquid assets in the schemes (i.e 20 % in case in case of Liquid Schemes and 10% in other schemes). In order to have uniform practices across, AMFI vide Best Practices Guidelines under reference 135/BP/93/2021-22 dated July 24,2021, has prescribed detailed guidelines for maintenance of minimum liquid assets in the open ended debt schemes (except Overnight Schemes and Gilt Schemes).

As per AMFI Guidelines, these schemes are required to maintain following two ratios on an ongoing basis.

- 1) LR-RaR- Redemption at Risk
- 2) LR-CRaR – Conditional redemption at Risk

It shall be ensured that the liquid assets / eligible assets are maintained to the extent of the LR-RaR and LR-CRaR ratios. In case, the exposure in such liquid assets/eligible assets falls below the prescribed threshold levels of net assets of the Scheme, the AMC shall ensure that the LR -RaR and LR-CRaR ratios are restored to 100% of the required level(s) by ensuring that the net inflows (through net subscription /accruals /maturity & sale proceeds) into the scheme are used for restoring the ratios before making any new purchases outside 'Liquid Assets / Eligible Assets' as specified in the referred circular(s). In case the ratio remains below 100% for more than 15 consecutive days, then, this information will be highlighted to Trustees till such time said ratio is not restored to 100% of the requirement on weekly basis. Certain additional parameters such as concentration of an investor group / distributor, exit load features, taxation dynamics etc shall be monitored at scheme level.

Also, provision no. 4.1 of SEBI Master circular on Mutual Fund dated June 27, 2024 the AMC should have policy in place on management of the mis-match in putative liabilities vis-à-vis the liquid assets of each scheme. AMC shall report the status of compliance with the liquidity risk management policy to the Board of AMC & Trustees at the frequency and format prescribed by AMFI/Trustees.

SID - TATA FLOATING RATE FUND

Pursuant to provision no 16A.1 of SEBI Master circular on Mutual Fund dated June 27, 2024, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Note: The investment in CDMDF shall not be considered as a Fundamental Attribute Change of the scheme.

CDMDF Framework

CDMDF shall comply with the Guarantee Scheme for Corporate Debt (GSCD) as notified by Ministry of Finance vide notification no. G.S.R. 559(E) dated July 26, 2023 and provision no 16A. 1 of SEBI Master circular on Mutual Fund dated June 27, 2024 and circulars / guidelines/ Letters issued by SEBI and AMFI from time to time, which includes the framework for corporate debt market development fund. The framework will inclusive of following points-

- a) The CDMDF shall deal only in following securities during normal times:
 - Low duration Government Securities
 - Treasury bills
 - Tri-party Repo on G-sec
 - Guaranteed corporate bond repo with maturity not exceeding 7 days.
- b) The fees and expenses of CDMDF shall be as follows:
 - During Normal times: (0.15% + tax) of the Portfolio Value charged on daily pro-rata basis.
 - During Market stress: (0.20% + tax) of the Portfolio Value charged on daily pro-rata basis.
 - "Portfolio Value" means the aggregate amount of portfolio of investments including cash balance without netting off of leverage undertaken by the CDMDF.
- c) Corporate debt securities to be bought by CDMDF during market dislocation include listed money market instruments. The long term rating of issuers shall be considered for the money market instruments. However, if there is no long term rating available for the same issuer, then based on credit rating mapping of CRAs between short term and long term ratings, the most conservative long term rating shall be taken for a given short term rating.
- d) CDMDF shall follow the Fair Pricing document, while purchase of corporate debt securities during market dislocation as specified in provision no 16A. 1 of SEBI Master circular on Mutual Fund dated June 27, 2024 and circulars / guidelines/ Letters issued by SEBI and AMFI from time to time.

CDMDF shall follow the loss waterfall accounting and guidelines w.r.t. purchase allocation and trade settlement of corporate debt securities bought by CDMDF, specified in provision no 16A. 1 of SEBI Master circular on Mutual Fund dated June 27, 2024 and circulars / guidelines/ Letters issued by SEBI and AMFI from time to time.

Stress Testing

SEBI has also mandated AMC to have stress testing policy for open ended debt schemes. AMCs shall carry out the stress testing on following parameters

- 1) Interest Rate Risk
- 2) Liquidity Risk and
- 3) Credit Risk

AMFI in consultation with SEBI has prescribed detailed methodology to assess the above-mentioned risks under stress situation. The stress test analysis report shall be presented to the investment committee for its review. In case of threshold continues beyond breach of cure period, the same shall be reported to AMC Board and Trustees along with the corrective action.

Placement of the scheme in one of the cells of PRC matrix does not reflect the scheme holdings pertaining to the perpetual bonds with respect to the Modified Duration and maturity thresholds specified in provision no. 17.5 of SEBI Master circular on Mutual Fund dated June 27, 2024, till the time such bonds are held by the scheme, for pre-existing holding of aforementioned perpetual bonds by debt schemes.

Change in Investment Pattern/ Portfolio Rebalancing

Pursuant to provision no. 1.14.1.2.b of SEBI Master circular on Mutual Fund dated June 27, 2024, the tentative portfolio break-up mentioned above with minimum and maximum asset allocation can be altered for a short-term period on defensive considerations. In this event where the asset allocation falling outside the limits specified in the asset allocation table due to defensive considerations, the Scheme will rebalance the portfolio within thirty (30) calendar days.

Pursuant to provision no. 2.9 of SEBI Master circular on Mutual Fund dated June 27, 2024, in the event where the asset allocation is falling outside the limits specified in the asset allocation table due to passive breaches (occurrence of instances not arising out of omission and commission of AMC), the Scheme will rebalance the portfolio within thirty (30) business days. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme within the stipulated period of thirty (30) business days, justification in writing including details of efforts taken to rebalance the portfolio for the same shall be provided to the Investment Committee. The Investment Committee shall then decide on the course of action and if they so desires can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. Further, compliances relating to disclosures etc. shall be adhered in line with the said circular.

In case the portfolio of schemes is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall:

- i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- ii. not to levy exit load, if any, on the investors exiting such scheme.

AMC shall adhere to SEBI guidelines regarding the rebalancing of asset allocation norms as stipulated from time to time.

B. WHERE WILL THE SCHEME INVEST

I. Debt & Money Market Instruments

II. Real Estate Investment Trusts (REITs) & Infrastructure Investment Trusts (InvITs)

III. Units of Domestic Mutual Fund Schemes

IV. Units of Corporate Debt Market Development Fund

C. WHAT ARE THE INVESTMENT STRATEGIES

The scheme proposes to invest predominantly in floating interest rate securities, fixed interest rate securities swapped for floating rate returns. The scheme may also invest a part of the portfolio in fixed rate debt securities and money market instruments. The aim of the investment strategy will be to allocate the assets of the scheme between various fixed interest rate securities and floating interest rate securities and use derivatives like swaps and Forward Rate Agreements (FRA) effectively with the objective of achieving stable returns in the short as well as long term.

The security will be identified based on various parameters such as issuer's credit rating history, financial track record of the issuer, corporate governance track record of the issuer, liquidity of the security, maturity of the security, interest rate scenario etc.

Trading in Derivatives

Subject to SEBI (Mutual Fund) Regulations, 1996, the Scheme may use techniques and instruments such as trading in derivative instruments to hedge the risk of fluctuations in the value of the investment portfolio.

SID - TATA FLOATING RATE FUND

The scheme may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements / Interest Rate Futures, Interest Rate Options or such other derivative instruments as may be introduced from time to time and as may be permitted under the SEBI (Mutual Fund) Regulations.

The Scheme will comply with all the applicable circulars issued by SEBI as regard to derivatives like provision no. 7.5, 7.6, 12.25 of SEBI Master circular on Mutual Fund dated June 27, 2024.

All Limits/ Exposure / Norms specified in the Scheme Information Document (SID) are applicable at the time of Investments.

In line with provision no. 12.25 of SEBI Master circular on Mutual Fund dated June 27, 2024 exposure to derivative is subject to exposure limits given below:

1. The total exposure related to option premium paid shall not exceed 20% of the net assets of the scheme.
2. Cash or cash equivalents with residual maturity of less than 91 days will be treated as not creating any exposure.
3. Mutual funds are allowed to hedge the portfolio or part of the portfolio (including one or more securities) on weighted average modified duration basis by using Interest Rate Futures (IRFs). The maximum extent of short position that may be taken in IRFs to hedge interest rate risk of the portfolio or part of the portfolio, is as per the formula given below:

$$\frac{(\text{Portfolio Modified Duration} \times \text{Market Value of the Portfolio})}{(\text{Futures Modified Duration} \times \text{Futures Price/PAR})}$$

In case the IRF used for hedging the interest rate risk has different underlying security(s) than the existing position being hedged, it would result in imperfect hedging.

5. Mutual Funds are permitted to resort to imperfect hedging, without it being considered under the gross exposure limits, if and only if, the correlation between the portfolio or part of the portfolio (excluding the hedged portions, if any) and the IRF is atleast 0.9 at the time of initiation of hedge. In case of any subsequent deviation from the correlation criteria, the same may be rebalanced within 5 working days and if not rebalanced within the timeline, the derivative positions created for hedging shall be considered under the gross exposure. The correlation should be calculated for a period of last 90 days.

The portion of imperfect hedging in excess of 20% of the net assets of the scheme should be considered as creating exposure and shall be included in the computation of gross exposure.

6. The Mutual Fund may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions shall be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases shall not exceed the value of respective existing assets being hedged by the scheme.
7. Exposure to a single counterparty in such transactions shall not exceed 10% of the net assets of the scheme.
8. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the above mentioned limits.

Definition of Exposure in case of Derivative Positions

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price*Lot Size*Number of Contracts
Short Future	Futures Price*Lot Size* Number of Contracts
Option Bought	Option Premium Paid*Lot Size* Number of Contracts.

ILLUSTRATION OF INTEREST RATE DERIVATIVES

Interest Rate Swaps (IRS): An Interest Rate Swap is an agreement whereby two parties agree to exchange periodic interest payments. The amount of interest payments exchanged is based on some predetermined principal, called notional principal amount. The amount each counterparty pays to the other upon periodic interest rate multiplied by the notional principal amount. The only amount that is exchanged between the parties is the interest payment, not the notional principal amount.

Example A: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is bearish and call rates are likely to spurt over the next three months. The fund manager would therefore prefer to pay fixed rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days floating interest rate from overnight fixed rate.

1. Say Notional Amount: Rs. 2 crores
2. Benchmark: NSE MIBOR
3. Tenor: 91 Days
4. Fixed Rate: 9.90%
5. At the end of 91 days;
6. The Scheme pays: fixed rates for 91 days is 9.90%
7. TMF receives: compounded call rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives Rs. 2, 00, 00,000 x 0.35% x 91 / 365 = 17,452. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

The Schemes of the fund are in cash, and the view of the fund manager is interest rates are expected to move down due to certain positive events which have occurred. In such cases the Schemes can enter into a received position (IRS) where the Schemes will receive a fixed rate for a specified maturity and pay the floating rate of interest. This is illustrated below.

Example B: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is soft and call rates are unlikely to spurt over the next three months. The fund manager would therefore prefer to receive a higher rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days fixed interest rate from overnight floating rate.

1. Say Notional Amount : Rs. 2 crores
2. Benchmark : NSE MIBOR
3. Tenor : 91 Days
4. Fixed Rate: 10.25%
5. At the end of 91 days;
6. The Scheme pays: compounded call rates for 91 days is 9.90%
7. TMF receives : Fixed rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives Rs. $2,00,00,000 \times 0.35\% \times 91 / 365 = 17,452$. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

Forward Rate Agreements (FRA):

This is an agreement between two counterparties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date based on the notional amount, for an agreed period. In short, in a FRA, interest rate is fixed now for a future period.

This is illustrated below:

Assume that on April 1, 2023, the 30-day commercial paper (CP) rate is 7.75% and the Scheme has an investment in a CP of face value Rs. 50 crores, which is going to mature on April 30, 2023. If the interest rates are likely to remain stable or decline after April 30, 2023, and if the fund manager, who wants to re-deploy the maturity proceeds for 1 more month, does not want to take the risk of interest rates going down, he can then enter into a following forward rate agreement (FRA) say as on April 30, 2023:

He can receive 1 X 2 FRA on April 30, 2023 at 7.75% (FRA rate for 1 month lending in 2 months time) on the notional amount of Rs.50 crores, with a reference rate of 30 day CP benchmark. If the CP benchmark on the settlement date i.e. April 30, 2023 falls to 7.50%, then the Scheme receives the difference 7.75 - 7.50 i.e. 25 basis points on the notional amount Rs. 50 crores for 1 month. The maturity proceeds are then reinvested at say 7.50% (close to the benchmark). The scheme, however, would have locked in the rate prevailing on April 30, 2023 (7.75%) as it would have received 25 basis points more as settlement amount from FRA. Thus the fund manager can use FRA to mitigate the reinvestment risk.

In this example, if the rates move up by 25 basis points to 8% on the settlement date (April 30, 2023), the Scheme loses 25 basis points but since the reinvestment will then happen at 8%, effective returns for the Scheme is unchanged at 7.75%, which is the prevailing rate on April 30, 2023.

Interest Rate Future (IRF)

An interest rate future is a (a futures contract) with an interest-bearing instrument as the underlying asset. Interest rate futures are used when there is an expectation of interest rate movement in adverse direction.

For example, if fund manager expects rise in interest rate. He may sell interest rate future today. If interest rates rise in the future, the value of the future will fall (as it is linked to the underlying asset, bond prices), and hence a profit can be made when closing out of the future (i.e. buying the future). However, in case interest rate falls, loss may be incurred on IRF position.

Illustration of Use of IRF (For Hedging)

A – Perfect Hedge

- 1) Assume a portfolio has 100 crores of Government security 7.59% GOI 2026 with face value Rs. 100/. The bond is currently trading in market at 105.00.
- 2) The futures on 7.59% GOI 2026, expiring on 27th October 2016 is trading on exchange at 105.10.
- 3) Instead of exiting the cash position, the fund manager can decide to hedge the position by selling the same quantity in futures. Since one contract of IRF has a notional of 2 lacs, in this example the fund manager sells 100 crs/2 lacs = 5000 contracts, to hedge long position.
- 4) At maturity, the settlement price of the futures will be almost same as closing price of the underlying security.

At maturity of the Interest Rate Futures

Case 1: At expiry Bonds close higher than the price at which fund manager hedged the position, but below the futures price at which he hedged

Closing price of Bonds on day of maturity of futures = 105.05

Settlement price of futures = 105.05

MTM gain on the underlying bond	= (105.05-105.00) * 100 crs / 100 (i.e. face value of bond)	= Rs. 5,00,000
The profit on the futures leg is	= 5000*2lacs * (105.10-105.05) / 100 (i.e. face value of bond)	= Rs 5,00,000
Overall profit to the fund	= Rs 10,00,000	

Case 2: At maturity bonds close higher than the level at which futures were sold

In case, the closing price of bonds on the day of maturity of futures = 105.20,

Settlement price of futures = 105.20

The MTM gain on underlying bond	= (105.20-105.00) * 100 crs / 100 (i.e. face value of bond)	= Rs. 20,00,000
Loss on futures leg is	= 5000*2 lacs * (105.10-105.20) / 100 (i.e. face value of bond)	= - Rs 10,00,000
Total Profit to the fund	= Rs 10,00,000	

As can be seen above, by selling the future contract instead of the underlying, the fund manager has locked in the Rs. 10, 00,000 profit and at the same time cash holding position will be hedged against the adverse market movements.

B-Illustration of Use of IRF (For Imperfect Hedging)

Assume the portfolio of market value worth INR 1000 crore has a modified duration of 5. This is being hedged with an IRF that has a modified duration of 10. Considering that fund manager choose to hedge 20% of the portfolio the maximum extent of short position that may be taken in IRF is as below:

(Portfolio Modified Duration*Market Value of the Portfolio)

(Futures Modified Duration*Futures Price/PAR)

$$\frac{(5*(0.2*1000))}{(10*(101/100))}$$

=Rs.99.01 Crores.

Hence the scheme can sell IRFs worth Rs.99.01 Crores and with duration of 10 to hedge Rs.200 Crores of portfolio with a duration of 5.

Position Limits for IRF Contracts:

Scheme Level: The gross open positions across all contracts shall not exceed 3 % of the total open interest or INR 200 crores- whichever is higher.

Mutual Fund: The gross open positions across all contracts shall not exceed 10 % of the total open interest or INR 600 crores- whichever is higher.

Interest Rate Option (IRO)

Call Options

When someone buys an interest rate call option, they are buying the right to buy the option at a set price. Therefore, if someone buys a call option, he will profit if interest rates rise.

Call Example

Assume that interest rates are at 5 percent. An investor thinks they will rise in the next 12 months, so he buys a Rs.100 call option for Rs.5. A year goes by, and interest rates have risen to 10 percent. He can now buy the asset--now worth Rs.110--for Rs.100.

Put Options

Put options are the opposite of call options. These options allow an investor to sell the option at a set price at a set time. This means the investor will profit from falling interest rates.

Put Example

Assume that interest rates are now at 10 percent. The investor in the above example believes these rates are unsustainably high, so he buys a Rs.110 put option on his original Rs.100 option. The following year, interest rates fall back to 5 percent, so the Rs.100 only earned Rs.5 in interest. However, the investor can sell for Rs.110, thus making Rs.5 off an interest rate decline.

The investment policies mentioned in this SID are in conformity with the provisions of various constitutional documents viz. MOA/ AOA of the TAMPL/Trustee Company, IMA and the Trust Deed. Moneys collected under these Schemes shall be invested only in transferable securities.

For detailed derivative strategies, kindly refer SAL.

Portfolio Turnover Policy:

“Portfolio Turnover” is the term used by any Mutual Fund for measuring the amount of trading that occurs in a Scheme’s portfolio during the given period. The scheme is an open ended scheme. It is expected that there would be a number of subscriptions and repurchase on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely annual turnover in the portfolio. However, a high turnover would not significantly affect the brokerage and transaction costs.

The Fund will endeavor to balance the increased cost on account of higher portfolio turnover with the benefits derived thereof. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of arbitrage opportunities that exist for scrips / securities held in the portfolio rather than an indication of a change in Fund view on a scrip, etc.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE

CRISIL Short Duration Debt A-II Index

CRISIL Short Duration Debt A-II Index seeks to track the performance of a short duration debt portfolio that includes government securities, AAA rated corporate bonds and CPs, CDs issued by issuers having long term rating as AAA-

The composition of the aforesaid benchmark is such that, it is most suited for comparing performance of the respective plans. Total Return variant of the index (TRI) index will be used for performance comparison.

The Trustees may change the benchmark in future if a benchmark better suited to the investment objective of the scheme is available.

vi. Investments of Asset Management Company in the Scheme

TAMPL (the AMC) may invest in the scheme(s) on an ongoing basis, such amount, as they deem appropriate. The AMC shall not be entitled to charge any management fees on this investment in the scheme(s). Investments by the AMC will be in accordance with Regulation 25(17) of the SEBI (MF) Regulations, 1996.

As per the amended regulations i.e. sub-regulation 16(A) in Regulation 25 of SEBI (Mutual Funds) Regulations, 1996 ('MF Regulations'), asset management companies ('AMCs') are required to invest such amount in such scheme(s) of the mutual fund, based on the risk associated with the scheme. The AMC will comply with provision no. 6.9 of SEBI Master Circular on Mutual Fund dated June 27, 2024 in this respect.

Pursuant to provision no 16A.1 of SEBI Master circular on Mutual Fund dated June 27, 2024 on Investment by Mutual Fund Schemes and AMCs in units of CDMDF, AMC will make a one-time contribution equivalent to 2 bps of the AUM of the specified debt-oriented schemes as on December 31, 2022 within 10 working days of request from CDMDF. Contribution made to CDMDF shall be locked-in till winding up of the CDMDF. In case of delay in contribution, the AMC shall be liable to pay interest at fifteen percent (15%) per annum for the period of delay.

s

PART III- OTHER DETAILS

A. COMPUTATION OF NAV

Net Asset Value ("NAV") of the Units shall be determined as of the close of each Business Day. NAV shall be calculated in accordance with the following formula:

$$\text{NAV} = \frac{\text{Market Value of Scheme's Investments} + \text{Accrued Income} + \text{Receivables} + \text{Other Assets} - \text{Accrued Expenses} - \text{Payables} - \text{Other Liabilities}}{\text{Number of Units Outstanding}}$$

The computation of Net Asset Value, valuation of Assets, computation of applicable Net Asset Value (related price) for ongoing Sale, Redemption, Switch and their frequency of disclosure shall be based upon a formula in accordance with the Regulations and as amended from time to time including by way of Circulars, Press Releases, or Notifications issued by SEBI or the Government of India to regulate the activities and growth of Mutual Funds. The NAVs of the fund shall be rounded off upto four decimals.

The valuation of investments shall be based on the principles of fair valuation specified in the Schedule VIII of the SEBI (Mutual Funds) Regulations, 1996 and guidelines issued by SEBI /AMFI from time to time. * Please refer Para VIII. of SAI on 'Investment valuation norms for securities & other assets' for details.

Each option of the Regular Plan & Direct Plan will have a separate NAV.

Illustration of Calculation of Sale & Repurchase Price:

Assumed NAV Rs. 11.00 per unit

Entry Load: NIL

Exit Load 1%

Sale Price = NAV + (Entry Load(%) * NAV)

Sale Price = 11 + (0% * 11)

Sale Price = 11 + 0

Sale Price = Rs. 11/-

Repurchase Price = NAV – (exit load (%) * NAV)

Repurchase Price = 11 – (1%*11)

Repurchase Price = 11 – 0.11

Repurchase Price = Rs.10.89

In the event NAV cannot be calculated and / or published, such as because of the suspension of RBI Clearing, Bank strikes, during the existence of a state of emergency and / or a breakdown in communications, the Board of Trustees may temporarily suspend determination and / or publication of the NAV of the Units.

While determining the price of the units, the fund will ensure that the repurchase price is not lower than 95 per cent of the Net Asset Value.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc.

Being an ongoing Scheme this section is not applicable.

C. ANNUAL SCHEME RECURRING EXPENSES**Slab wise break up depending on the assets under management:**

As per provision no. 52(6)(c) of SEBI (Mutual Funds) Regulations, 1996 the total expense ratio of open-ended scheme shall not exceed the following limits. The AMC has estimated that upto 2.00 % (excluding additional permissible limits as per Regulation 52(6A)(b) & 52(6A)(c)) of the daily average net assets of the scheme will be charged to the scheme as expenses.

Assets under management Slab (In Rs. crore)	Total expense ratio limits for equity-oriented schemes	Total expense ratio limits for other than equity-oriented schemes
On the first Rs.500 crores of the daily net assets	2.25%	2.00%
On the next Rs.250 crores of the daily net assets	2.00%	1.75%
On the next Rs.1,250 crores of the daily net assets	1.75%	1.50%
On the next Rs.3,000 crores of the daily net assets	1.60%	1.35
On the next Rs.5,000 crores of the daily net assets	1.50%	1.25%
On the next Rs.40,000 crores of the daily net assets	Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof.	
On balance of the assets	1.05%	0.80%

For the actual current expenses being charged, the investor should refer to functional Weblink: <https://www.tatamutualfund.com/expense-ratio/total-expense-ratio>.

Fees & Expenses:

The maximum recurring expenses of the Scheme is estimated below:

Ref	Expenses Head	% of Daily Net Assets #

	Cost related to investor communications	
	Cost of fund transfer from location to location	
	Cost of providing account statements and income distribution, redemption cheques and warrants	
	Costs of statutory Advertisements	
	Cost towards investor education & awareness (at least 2 bps)	
	Brokerage & transaction cost over and above 12 bps and 5 bps for cash and derivative market trades resp.	
	Goods & Services tax on expenses other than investment and advisory fees	
	Goods & Services tax on brokerage and transaction cost	
(a)	Maximum total expense ratio (TER) permissible under Regulation 52 (6) (c)	Upto 2.00%*
(b)	Additional expenses under regulation 52 (6A) (c)	Nil
(c)	Additional expenses for gross new inflows from specified cities under regulation 52 (6A) (b)	Upto 0.30%^

* Excluding Goods & Services Tax on investment and advisory fees

Note: Expenses of Direct Plan will be lower than expenses of the Regular Plan as no commission/distribution expenses will be charged in the case of Direct Plan. All fees and expenses charged in a direct plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in a regular plan. NAV of the Direct Plan will be different than the NAV of Regular Plan.

All scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the scheme only within the regulatory limits and not from the books of AMC, its associate, sponsor, trustees or any other entity through any route in terms of SEBI circulars, subject to the clarifications provided by SEBI provision no. 10.1 of SEBI Master circular on Mutual Fund dated June 27, 2024 on implementation of Total Expense Ratio (TER) and performance disclosure for Mutual Fund.

**in addition to the above the scheme may charge additional limit of 0.05% (The AMC shall not charge additional expenses under Regulation 52(6A)(c) in case exit load is not levied/ not applicable) specified in sub regulation (6A)(c) of Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 excluding tax on investment management & advisory fees and expenses not exceeding of 0.30 per cent of daily net assets as stated in regulation 6A(b) of SEBI (Mutual Funds) Regulation, 1996.

^ Expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from such cities as specified by SEBI from time to time are atleast:

- (i) 30 per cent of gross new inflows in the scheme, or;
- (ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from such cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis:

Provided further that expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities:

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.

Additional TER can be charged based on inflows only from retail investors (i.e. other than corporates and institutions) from B 30 cities as per provision no. 10.1.3 of SEBI Master Circular on Mutual Fund dated June 27, 2024. Retail Investor means transaction from individual investors where inflow is upto Rs. 2,00,000/- per transaction.

Notes:

- 1) Brokerage & transaction costs (including tax) which are incurred for the purpose of execution of trade may be capitalised to the extent of 12bps and 5bps for cash market transactions and derivatives transactions respectively. GST on brokerage and transaction cost paid for execution of trades shall be within the limit prescribed under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996. Any payment towards brokerage and transaction cost, over and above the said 12 bps and 5bps for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.
- 2) AMC shall annually set apart atleast 2 basis point on daily net assets for investor's education and awareness initiatives.
- 3) The fund shall update the current expense ratios on the website(www.tatamutualfund.com) at least three working days prior to the effective date of the change. The exact functional web link for TER is <http://www.tatamutualfund.com/our-funds/total-expense-ratio>.
- 4) **Illustration of impact of expense ratio on scheme return:**

Particulars	Regular Plan	Direct Plan
Amount Invested (Rs)	10,000	10,000
Gross Returns-assumed	7%	7%
Closing NAV before expenses (Rs.)	10,700	10,700
Expenses (Rs)		
• Expenses Other than Distribution expenses	50	50
• Distribution Expenses	50	NIL
Total NAV after charging expenses (Rs)	10,600	10650
Net returns to investor	6.00%	6.50%

Illustration is given to understand the impact of expense ratio on a scheme return and this should not be construed as an indicative return of the scheme.

TER for the Segregated Portfolio

- a. AMC shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
- b. The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
- c. The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- d. The costs related to segregated portfolio shall in no case be charged to the main portfolio

D. LOAD STRUCTURE

Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. As per provision no. 10.4.1.a of SEBI Master Circular on Mutual Fund dated June 27, 2024, there shall be no entry load for all Mutual Fund schemes. Goods & Services tax on exit load, if any, shall be paid out of the exit load proceeds and exit load net of tax, if any, shall be credited to the scheme.

The Load Structure of the Scheme is given hereunder:

Type of Load	Load chargeable (as %age of NAV)
Entry Load	N.A.
Exit Load	NIL

Pursuant to AMFI's communication dated 09th April 2025, Exit Load will not be charged on any Switch/Systematic transfer transaction from Regular plan to Direct plan of the same scheme w.e.f. 23rd April 2025.

Units issued on reinvestment of IDCW shall not be subject to exit load.

For applicability of load structure and NAV, switch-in will be considered as subscription and switch-out will be considered as redemption.

The AMC reserves the right to change/modify exit load, depending upon the circumstances prevailing at any given time. However any change in the load structure will be applicable on prospective investment only. At the time of changing the load structure, the AMC will adopt the following measures:

SID - TATA FLOATING RATE FUND

- The addendum detailing the changes may be attached to Scheme Information Documents and Key Information Memorandum. The addendum may be circulated to all the distributors/brokers so that same can be attached to all Scheme Information Documents and Key information memoranda already in stock.
- The investor is requested to check the prevailing load structure of the scheme before investing. For any change in load structure arrangement may be made to display the addendum in the Scheme Information Document in the form of a notice in all the investor service centers and distributor/ brokers' office.
- The introduction of the exit load along with the details may be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load.
- A public notice shall be given in respect of such changed in one English daily newspaper having nationwide circulation as well as in a newspaper publishes in the language of region where the Head office of Mutual Fund is situated.

SECTION II

I. INTRODUCTION

A. DEFINITIONS/INTERPRETATION

Functional weblink that contains detailed description: Kindly visit <https://www.tatamutualfund.com/statutory-disclosures/other-statutory-disclosures>

B. RISK FACTORS

Standard Risk Factors:

- a. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- b. As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme(s) may go up or down
- c. Mutual Funds and securities investments are subject to market risks and there can be no assurance and no guarantee that the Scheme(s) will achieve its objective.
- d. Mutual fund investments are subject to market risks, read all scheme related documents carefully.
- e. As with any investment in stocks, shares and securities, the NAV of the Units under this Scheme can go up or down, depending on the factors and forces affecting the capital markets.
- f. Past performance of the previous Schemes, the Sponsors or its Group / Affiliates / AMC / Mutual Fund is not indicative of and does not guarantee the future performance of the Scheme.
- g. The sponsors are not responsible or liable for any loss resulting from the operations of the scheme beyond the initial contribution of Rs. 1 lakh made by them towards setting up of the mutual fund.
- h. The name of the Scheme does not in any manner indicate either the quality of the Scheme, its future prospects or the returns. Investors therefore are urged to study the terms of the Offer carefully and consult their tax and Investment Advisor before they invest in the Scheme.
- i. Tata Floating Rate Fund is not a guaranteed or assured return scheme.

Scheme Specific Risk Factors:**Risk Factors for investing in floating rate instruments including fixed rate instruments converted to floating rate exposures using swaps/ derivatives**

1. Basis Risk (Interest Rate Movement): During the life of floating rate security or a swap the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. This type of events may result in loss of value in the portfolio.
2. Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions the spreads may move adversely or favourably leading to fluctuation in NAV.
3. In case of downward movement of interest rates, floating rate debt instruments may give a lower return than fixed rate debt instruments.

Liquidity and Settlement Risks:

The liquidity of the Scheme investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. From time to time, the Scheme will invest in certain securities of certain companies, industries, sectors, etc. based on certain investment parameters as adopted internally by TAMPL. While at all times the Asset Management Company will endeavour that excessive holding/investment in certain securities of industries, sectors, etc. by the Scheme is avoided, the funds invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or during restructuring of the Scheme's investment portfolio. Furthermore, from time to time, the Asset Management Company, the Custodian, the Registrar, any Associate, any Distributor, Dealer, any Company, Corporate Bodies, Trusts, any Retirement and Employee Benefit Funds or any Associate or otherwise, any scheme / mutual fund managed by the Asset Management Company or by any other Asset Management Company may invest in the Scheme. While at all times the Trustee Company and the Asset Management Company will endeavour that excessive holding of Units in the Scheme among a few Unitholders is avoided, however, the funds invested by these aforesaid persons may acquire a substantial portion of the Scheme's outstanding Units and collectively may constitute a majority unitholder in the Scheme. Redemption of Units held by such persons may have an adverse impact on the value of the Units of the Scheme because of the timing of any such redemptions and this may impact the ability of other Unitholders to redeem their respective Units.

Investment Risks:

The value of, and income from, an investment in the Scheme can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Scheme's investment objective will be attained or that the Scheme be in a position to maintain the model percentage of investment pattern particularly under exceptional circumstances.

Different types of securities in which the scheme would invest in, as mention in this SID, carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated. Zero coupon bonds carry an additional risk, unlike bonds

that pay interest throughout the period to maturity, zero coupon instruments/deferred interest bonds typically would not realise any cash until maturity. If the issuer defaults, the Scheme may not obtain any return on its investment.

The scheme may use techniques and instruments for efficient portfolio management and to attempt to hedge or reduce the risk of such fluctuations. However these techniques and instruments if imperfectly used have the risk of the scheme incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any). The use of these techniques is dependent on the ability to predict movements in the prices of securities being hedged and movements in interest rates. There exists an imperfect correlation between the hedging instruments and the securities or market sectors being hedged. Besides, the fact that skills needed to use these instruments are different from those needed to select the Fund's / Scheme's securities. There is a possible absence of a liquid market for any particular instrument at any particular time even though the futures and options may be bought and sold on an organised exchange. The use of these techniques involves possible impediments to effective portfolio management or the ability to meet repurchase / redemption requests or other short-term obligations because of the percentage of the Scheme's assets segregated to cover its obligations.

Securitized Debt:

Securitized Debt such as Mortgage Backed Securities ("MBS") or Asset Backed Securities ("ABS") is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. Asset Securitization is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. A typical process of asset securitization involves sale of specific receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company.

The SPV in turn issues financial instruments (promissory notes, participation certificates or other debt instruments) also referred to as "Securitized Debt" to the investors evidencing the beneficial ownership of the investors in the receivables. The financial instruments are rated by an independent credit rating agency.

Risks Associated with Securitized Debt

Risk due to prepayment: In case of securitized debt, changes in market interest rates and pre-payments may not change the absolute amount of receivables for the investors but may have an impact on the reinvestment of the periodic cash flows that an investor receives on securitized papers. In the event of pre-payment of the underlying debt, investors may be exposed to changes in tenor and yield.

Liquidity Risk: Presently, despite recent legal developments permitting the listing of securitized debt instruments, the secondary market for securitized debt in India is not very liquid. Even if a more liquid market develops in the future, secondary transactions in such instruments may be at a discount to initial issue price due to changes in the interest rate structure.

Limited Recourse and Credit Risk: Certificates issued on investment in securitized debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan can adversely affect the pay outs to the investors and thereby, adversely affect the NAV of the Scheme. While it is possible to repossess and sell the underlying asset, various factors can delay or prevent repossession and the price obtained on sale of such assets may be low.

Bankruptcy Risk: If the originator of securitized debt instruments in which the Scheme invests is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', then the Scheme could experience losses or delays in the payments due. Normally, care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'.

Risk of Co-mingling: Servicers in a securitization transaction normally deposit all payments received from the obligors into a collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account. In this interim period, collections from the loan agreements by the servicer may not be segregated from other funds of the servicer. If the Servicer fails to remit such funds due to investors, investors in the Scheme may be exposed to a potential loss.

Risk Controls for Securitized Debt:

1. Risk profile of securitized debt vis a vis risk appetite of the scheme:

Securitized Debt is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. In line with the investment strategy of the Scheme and considering that there would be no intermediate redemption pressures for the Fund Manager, the Scheme may take exposure to rated Securitized Debt with the intent to enhance portfolio yield without compromising on credit quality.

2. Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc.

The evaluation parameters of the originators are as under:

- Track record
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:
 - Outlook for the economy (domestic and global)
 - Outlook for the industry
 - Company specific factors

Track record

We ensure that there is adequate past track record of the Originator before selection of the pool including a detailed look at the number of issuances in past, track record of issuances, experience of issuance team, etc. We also look at the credit profile of the Originator for its own debt. We normally invest only if the Originator's credit rating is at least 'AA' (+/- or equivalent) or above by a credit rating agency recognized by SEBI.

Willingness to pay

As the securitized structure has underlying collateral structure, depending on the asset class, historical NPA trend and other pool / loan characteristics, a credit enhancement in the form of cash collateral, such as fixed deposit, bank guarantee etc. is obtained, as a risk mitigation measure.

Ability to pay

This assessment is based on a detailed financial risk assessment.

A traditional SWOT analysis is used for identifying company specific financial risks. One of the most important factors for assessment is the quality of management based on its past track record and feedback from market participants. In order to assess financial risk a broad assessment of the issuer's financial statements is undertaken to review its ability to undergo stress on cash flows and asset quality.

Business risk assessment, wherein following factors are considered:

- Outlook for the economy (domestic and global)
- Outlook for the industry
- Company specific factors

In addition, a detailed review and assessment of rating rationale is done including interactions with the company as well as agency.

Typically, we would avoid investing in securitization transaction (without specific risk mitigant strategies / additional cash/security collaterals/ guarantees) if we have concerns on the following issues regarding the originator / underlying issuer:

- High default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios - both on a standalone basis as well on a fated level/ group level. This is very important in case of single borrower loan sell down
- Higher proportion of re-schedulement of underlying assets of the pool or loan
- Higher proportion of overdue assets of the pool or the underlying loan
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan

3. Risk mitigation strategies for investments with each kind of originator

Risk Mitigation Strategies

Investments in securitized debt will be done based on the assessment of the originator which is carried out by the Fixed Income team based on the in-house research capabilities as well as the inputs from the independent credit rating agencies.

In order to mitigate the risk at the issuer/originator level, the Fixed Income team will consider various factors which will include:

- size and reach of the originator
- the infrastructure and follow-up mechanism
- quality of information disseminated by the issuer/originator; and
- the Credit enhancement for different type of issuer/originator
- the originator's track record in that line of business

4. The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments

Majority of securitized debt investments shall be in asset backed pools wherein the underlying assets could be Medium and Heavy Commercial Vehicles, Light Commercial Vehicles (LCV), Cars, and Construction Equipment, Mortgages etc.

The Fund Manager will invest in securitized debt which are rated 'AA' (+/- or equivalent) or above by a credit rating agency recognized by SEBI. While the risks mentioned above cannot be eliminated completely, they may be minimized by considering the diversification of the underlying assets as well as credit and liquidity enhancements.

Table 1: illustrates the framework that will be applied while evaluating investment decision relating to a pool securitization transaction:

Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

In addition to the framework as per the table above, we also take into account following factors, which are analyzed to ensure diversification of risk and measures identified for less diversified investments:

- Size of the loan: The size of each loan is generally analyzed on a sample basis and an analysis of the static pool of the originator is undertaken to ensure that the same matches with the static pool characteristics. It also indicates whether there is high reliance on very small ticket size borrower which could result in delayed and expensive recoveries.
- Average original maturity of the pool: The analysis of average maturity of the pool is undertaken to evaluate whether the tenor of the loans are generally in line with the average loans in the respective industry and repayment capacity of the borrower.
- Default rate distribution: The Fixed Income team generally ensures that all the contracts in the pool are current to ensure zero default rate distribution.
- Geographical Distribution: The analysis of geographical distribution of the pool is undertaken to ensure prevention of concentration risk.
- Risk Tranching: Typically, we avoid investing in Securitised debt in the form of sub ordinate tranche, without specific risk mitigant strategies / additional cash / security collaterals/ guarantees, etc.
- Credit enhancement facility - credit enhancement facilities in the form of cash collateral, such as fixed deposits, bank guarantee etc. could be obtained as a risk mitigation measure.
- Liquid facility - these parameters will be evaluated based on the asset class as mentioned in the table above
- Structure of the pool of underlying assets - The structure of the pool of underlying assets would be either single asset class or combination of various asset classes as mentioned in the table above. We could add new asset class depending upon the securitization structure and changes in market acceptability of asset classes.

Investment in the Single Loan Securitization would be done based on the assessment of credit risk associated with the underlying borrower as well as the originator. The Fixed Income team will adhere internal credit process and perform a detailed review of the underlying borrower prior to making investments.

5. Minimum retention period of the debt by originator prior to securitization

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements. In addition, RBI has proposed minimum holding period of between nine and twelve months for assets before they can be securitized. The minimum holding period depends on the tenor of the securitization transaction. The Fund will invest in securitized debt that are compliant with the laws and regulations.

6. Minimum retention percentage by originator of debts to be securitized

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements, including maximum exposure by the originator in the PTCs. In addition, RBI has proposed minimum retention requirement of between five and ten percent of the book value of the loans by the originator. The minimum retention requirement depends on the tenor and structure of the securitization transaction. The Fund will invest in securitized debt that are compliant with the laws and regulations

7. The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund

An investment by the scheme in any security is done after detailed analysis by the Fixed Income team and in accordance with the investment objectives and the asset allocation pattern of a scheme. All investments are made on an arm's length basis without consideration of any investments (existing/potential) in the schemes made by any party related/involved in the transaction. The robust credit process ensures that there is no conflict of interests when a scheme invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme. Normally the issuer who is securitizing instrument is in need of money and is unlikely to have long term surplus to invest in mutual fund scheme.

Furthermore, there is clear cut segregation of duties and responsibilities with respect to Investment function and Sales function. Investment decisions are being taken independently based on the above mentioned parameters and investment by the originator in the scheme is based on their own evaluation of the scheme vis a vis their investment objectives.

8. The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt

The risk assessment process for securitized debt, as detailed in the preceding paragraphs, is same as any other credit. The investments in securitized debt are done after appropriate research by credit analyst. The ratings are monitored for any movement.

The resources for and mechanisms of individual risk assessment with the AMC for monitoring investment in securitized debt are as follows:

- Fixed Income Team - Risk assessment and monitoring of investment in Securitised Debt is done by a team comprising of Credit Team.
- Ratings are monitored for any movement - Based on the cash-flow report and analyst view, periodic review of utilization of credit enhancement shall be conducted and ratings shall be monitored accordingly.
- Wherever the schemes portfolio is disclosed, the AMC may give a comprehensive disclosure of Securitised debt instruments held in line with SEBI requirement.

Note: The information contained herein is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

Securities Lending by the Mutual Fund

The Scheme may participate in securities lending and borrowing scheme in accordance with Securities Lending Scheme, 1997, Regulation 44 (4) of SEBI (Mutual Funds) Regulations ,1996, provision no. 12.11 of SEBI Master circular on Mutual Fund dated June 27, 2024,framework for short selling and borrowing and lending of securities ,provision no. 12.11.2.1.a of SEBI Master circular on Mutual Fund dated June 27, 2024. The Scheme shall also follow other relevant regulations /guidelines issued by stock exchange(s) from time to time. The Scheme shall participate in Securities Borrowing and Lending only with the SEBI approved intermediaries.

Securities Lending means the lending of securities to SEBI approved intermediaries for a fixed period of time at a negotiated compensation in order to enhance returns of the scheme portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period. The AMC will adhere to the following strict internal limits should it engage in Securities Lending.

Not more than 20% of the net assets of the respective scheme can generally be deployed in securities. Collateral would always be obtained by the approved intermediary. Collateral value would always be more than the value of the security lent. Collateral can be in form of cash, bank guarantee, and government securities, as may be agreed upon with the approved intermediary, and would also be subject to a mark to market valuation on a daily basis.

Example:

A fund has a Non-Convertible Debenture (NCD) of a company which it would wish to hold for a long period of time as a core holding in the portfolio as per the fund manager's plan. In that case the investors would be benefited only to the extent of the rise in the value of the NCD, from time to time if any, on the exchange. If the fund is enabled to lend the said security to a borrower who would be wanting to take advantage of the market fluctuations in its price, the borrower would return the security to the lender (scheme) at a stipulated time or on demand for a negotiated compensation. The fund's unitholders can enhance their returns to the extent of the compensation it will earn for lending the same. An adequate security or collateral will have to be maintained by the intermediary. This should always be higher than the cost of the security. Thus, it is in the interest of the investors that returns can be enhanced by way of Securities lending rather than hold the security only for capital appreciation potential.

Thus the scenario under which the fund would participate in Securities lending would be:

1. There is a holding of security e.g. 5000 units of NCD's of XYZ Ltd in the fund which the fund manager wants to be the core holding of the scheme for approximately 6 to 12 months.
2. There is a borrower (not mutual fund) for the security, (who has taken a short position in the market and needs XYZ Ltd NCD to settle it) who is willing to put up a proper collateral for the same.(In all cases higher than the price of the script).
3. The borrower is represented by a proper recognized intermediary.
4. The agreement is to return the security or the amount so negotiated at a particular period of time or on demand.

Then the security will be lent by the fund and the unitholders would benefit from the additional compensation earned for lending, apart from the capital appreciation which also happens in that stock. Thus, to summarize, securities lending would be done by the scheme only in the following circumstances:

- a) If permitted by trustees and the extent SEBI regulations in that regard, from time to time.
- b) If such activity generates additional returns for the scheme and helps to enhance the scheme returns.
- c) If considering the above, and other factors all considered in totality, such activity is in the interest of unitholders in the scheme.

Securities Lending Risks

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there is also be temporary illiquidity of the securities that are lent out and the scheme will not be able to sell such lent out securities until they are returned.

As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

Interest Rate Risk

As with debt instruments, changes in interest rate may affect the Scheme's net asset value. Generally the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the schemes are reinvested. The additional income from reinvestment is the “interest on interest” component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Counterparty Risk:

This is the risk of failure of counterparty to the transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the scheme in case of counterparty default.

Derivatives carry the risk of adverse changes in the market price. The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Although for exchange traded derivatives, the risk is mitigated as the exchange provides the guaranteed settlement however in OTC trades the possibility of settlement is limited.

Risk associated with potential change in Tax structure

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the ‘Income Tax Act 1961’ or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

Risk factors for Structured Obligation and Credit Enhancement:

The risk of investing in structured obligation is similar to risks associated with fixed income instruments. However, they carry following additional risks:

- **Liquidity Risk:** Typically the liquidity of structured obligations could be lower as compared to debt securities as the market for structured products is not very deep. Hence, they may carry higher liquidity risk.
- **Default Risk:** In case of default from this portfolio, there could be limited recourse available for recovery subject to the specific transaction terms and dependent on the legal terms. Hence they could carry higher default risk.
- **Credit enhancements** are specified by Credit Rating Agencies. However, the credit enhancement stipulated in a securitization transaction represents a limited loss cover only.
- **Counterparty risk associated with credit enhancement:** Credit enhancement can be provided by guarantee or cash collateral. For instance in case of guarantee, the investors are exposed to the credit quality risk of corporate entity providing the guarantee. Similarly, if the cash collateral is the fixed deposit of a financial institution, the investor is exposed to the credit risk associated with that financial institution.

Risk associated with Transaction in Units through Stock Exchange

In respect of transactions in Units of the Scheme through NSE and/or BSE or any other recognized stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognized exchange in this regard.

Risks associated with Derivatives

- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments”.

Risks associated with exposure to Floating Rate Instruments

The scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Risks associated with Segregated Portfolio

- Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. Security comprises of segregated portfolio may not realise any value.
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Risk associated with investing in Repo of Corporate Bond Securities

To the extent the scheme invests in Repo of Corporate Bond Securities, the scheme will be subject to following risks –

- Corporate Bond Repo will be subject to counter party risk.
- The Scheme will be exposed to credit risk on the underlying collateral– downward migration of rating. The scheme may impose adequate haircut on the collateral to cushion against any diminution in the value of the collateral. Collateral will require to be rated AA and above rated where potential for downgrade/default is low. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.
- Liquidity of collateral: In the event of default by the counterparty, the scheme would have recourse to recover its investments by selling the collateral in the market. If the underlying collateral is illiquid, then the Mutual Fund may incur an impact cost at the time of sale (lower price realization).

Risks associated with Imperfect Hedging using Interest Rate Futures (IRF)

Liquidity/execution risk – IRF are relatively new instruments traded on the exchanges and don't have as much liquidity as the OTC market in the underlying bond. This could expose the hedge to liquidity (execution and wider bid-offer spread) risk and associated impact cost.

Spread risk – The IRF is based on government securities and treasury bills. Imperfect hedging can be applied on portfolios comprised of corporate bonds as well. Corporate bond yield theoretically comprises of the risk free rate and a credit spread. IRF would hedge out only the risk free rate. Any compression/expansion of credit spread of the underlying portfolio would not be hedged by the IRF.

Yield curve slope risk – The IRF hedge is done on a modified duration basis. This means that the maturity of the underlying instrument and the maturity of the IRF could be different. The hedge ratio is arrived at using the prescribed formula. This hedges the risk arising from a parallel shift in the yield curve. Any change in the slope of the yield curve (flattening/steepening) remains unhedged as residual risk.

Unwinding risk— An unexpected change in market conditions may require unwinding the derivative positions at disadvantageous prices during periods of heightened volatility e.g. if the yields slide lower due to a surprise RBI rate cut, participants with short Interest Rate Futures positions would seek to cut their losses and exit, leading to an increase in the price of the IRF, and negative price impact on the hedged portfolio there from.

Correlation risk – As per the extant regulation, the IRF has to have a 0.90 correlation coefficient with the underlying bond/portfolio, for the past 90 days, to be considered for imperfect hedging. If the correlation deteriorates going forward, the hedge may have to be rebalanced with attendant impact costs.

Risk Factors Associated with Investments in REITs and InvITS:

Market Risk: REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to factors impacting the underlying assets. AMC/Fund Manager's will do the necessary due diligence but actual market movements may be at variance with the anticipated trends.

Liquidity Risk: As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.

Reinvestment Risk: Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

Regulatory/Legal Risk: REITs and InvITs being new asset classes, rights of unit holders such as right to information etc may differ from existing capital market asset classes under Indian Law.

Risks associated with investment in units of domestic mutual fund:

Investment in Mutual Fund Units involves investment risks, including but not limited to risks such as liquidity risk, volatility risk, default risk including the possible loss of principal.

Liquidity risk – The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the right to limit redemptions will be in accordance with provision no. 1.12 of SEBI Master circular on Mutual Fund dated June 27, 2024.

Volatility risks: There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification across companies and sectors.

Default risk - Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

Risk associated with Swing Price

It is to be noted that in case of invocation of the swing pricing the realization of the redemption proceeds would be subject to swing factor applicable for the investor's transaction. The price adjustment adopted by invoking swing pricing may not completely protect investors in a fund from performance dilution as a result of significant outflows from the fund, particularly during market dislocation or re-opening of scheme after announcement of winding up of scheme. The Swing price framework shall be subject to provisions of circulars and guidelines laid down by SEBI and AMFI from time to time.

Credit Evaluation Process for the investments in Debt Securities

In-house credit evaluation team has the necessary capability of conducting independent due diligences of credit risk. From credit evaluation perspective, companies are broadly classified under two sectors - Industrials and Financial Institutions. Industrials include Manufacturing and trading companies, while Financial Institutions include Banks and Non-Banking Financial Companies (NBFCs). The set of parameters for evaluation of credits for these sectors are different.

Broad guidelines for the appraisal of Industrials for short-term and long-term exposure include, but are not restricted to:

- External Ratings threshold: Investment is made only if the issuer credit rating is at least 'investment grade' (BBB- or above) for Long-term debt by a credit rating agency recognized by SEBI. In the short-term, investment is made in top notch (A1+ or equivalent) rated debt instruments. However this is subject to review from time to time and investment committee / Board of AMC approval is required for any exception.
- Each company is internally appraised based on various parameters including, but not restricted to:
 - Business Fundamentals: Product/Service offerings, Market Position, Competitive Landscape, and Product cycle etc.
 - Regulatory environment: Support/intervention, developmental stage of industry, level of regulation
 - Financial Analysis: Margins, Profitability, Leverage, Working Capital requirement and cycle, Cash-flows etc. This is also seen in light of historic trend
 - Management Track Record: Management track record, performance of company through economic cycle, promoters' background, other group companies.
 - Macro-Economic Environment: Economic cycle, Credit cycle

In the short-term, the focus is more on the working capital cycle, near-term cash-flows and existing business position, while in the long-term the focus is more on the outlook of the business, capital expenditure program, profitability etc.

The credit evaluation policy is subject to review from time to time. Any material change in the credit evaluation policy will be updated by way of an addendum to the scheme information document.

The asset allocation among the various debt securities will be decided based upon the prevailing market conditions, macroeconomic environment and the performance of corporate sector, the debt market and other considerations.

Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus this backstop facility will help fund managers of the scheme to better generate liquidity during market dislocation to help the scheme fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with provision no 16A.1 of SEBI Master circular on Mutual Fund dated June 27, 2024 on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

Investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Investors are requested to read the detailed disclosure on investment of the schemes in the CDMDF as listed in Part II sub- section "A. How will the Scheme allocate its assets? and Section II Sub-section II Information about the scheme. Clause A Where will the Scheme Invest"

C. RISK MITIGATION STRATEGIES:

Risk mitigation measure for debt & related investments:

Type of Risk	Measures
Liquidity Risk	<ul style="list-style-type: none"> • Focus on good quality paper at the time of portfolio construction • Portfolio exposure spread over various maturity buckets to in line with expected outflow
Credit Risk	<ul style="list-style-type: none"> • In house dedicated team for credit appraisal • Issuer wise exposure limit • Rating wise exposure limits are maintained • Periodically portfolios are reviewed by the Board of the AMC
Interest Rate Risk	<ul style="list-style-type: none"> • Close watch on the market events • Duration management is actively followed • Portfolio exposure spread over various maturities
Regulatory Risk	<ul style="list-style-type: none"> • Online monitoring of various exposure limits by the Front Office System Also as a backup, manual control are also implemented.

Performance Risk	<ul style="list-style-type: none">• A periodical review of scheme performance vis-à-vis the benchmark index as well as peer group is conducted.
------------------	---

Further, the Investment Manager endeavours to invest in REITs/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on their own research as well as third party research. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.

II. INFORMATION ABOUT THE SCHEME

A. WHERE WILL THE SCHEME INVEST

The corpus of the Scheme will be invested in various types of debt and money market instruments (including but not limited to) such as:

I. Debt & Money Market Instruments

1. Certificate of Deposits (CDs)
2. Commercial Paper (CPs)
3. Treasury Bills (T-Bills)
4. Triparty Repo
5. Central Government/State Government securities created and issued by the Central Governments and/or State Governments as may be permitted by RBI, securities guaranteed by the Central Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills). Such securities could be fixed rate, fixed interest rate with put/call option, zero coupon bond, floating rate bonds, capital indexed bonds, fixed interest security with staggered maturity payment etc.

II. Real Estate Investment Trusts (REITs) & Infrastructure Investment Trusts (InvITs)

III. Units of Domestic Mutual Fund Schemes

The above lists are illustrative and not the exhaustive and may include other money market securities as may be available / introduced in the market.

IV. Units of Corporate Debt Market Development Fund

Repo in Corporate Debt Securities

The scheme may participate in Repo in Corporate Debt Securities in accordance with the relevant circular issued by SEBI or RBI from time to time. As mandated by SEBI vide provision no. 12.18 of SEBI Master circular on Mutual Fund dated June 27, 2024, AMC and Trustee company of Tata Mutual Fund have specified norms for Category of counterparty, credit rating of counterparty, tenor of collateral and applicable haircuts for participation in repo in corporate bonds.

Guidelines specified by RBI and SEBI includes the following:

- Gross exposure to corporate bond repo transaction should be not more than 10% of the net asset of the scheme.
- The cumulative gross exposure through repo transactions in corporate debt securities along with other debt securities, REITs and InvITs and derivatives shall not exceed 100% of the net assets of the Scheme.
- The Scheme will participate in repo transactions only in AA and above rated corporate debt securities.
- The Scheme may borrow through repo transactions (for redemption/income distribution payout) only if the tenor of the transaction does not exceed a period of six months and aggregate borrowing is not more than 20% of net assets of the Scheme.
- Credit exposure will be on the counterparty and not on the collateral securities in case of corporate bond repo. Issuer and counterparty limits will be based on approved credit universe.

Fresh investment in perpetual bonds (including additional Tier 1 bonds) can only be made in scheme, as it is placing itself in Class III of the Potential Risk Matrix (PRC).

Investments may be made in instruments, which, in the opinion of the Fund Manager, are of an acceptable credit risk and chance of default is minimum. The Fund Manager will generally be guided by, but not restrained by, the ratings announced by various rating agencies on the assets in the portfolio.

Overview of Debt Market:

The major players in the Indian Debt Markets are banks, financial institutions, insurance companies and mutual funds. The instruments in the market can be broadly categorized as those issued by corporate, banks, financial institutions and those issued by state/central governments. The risk associated with any investments are – credit risk, interest rate risks and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The liquidity risk in corporate securities

SID - TATA FLOATING RATE FUND

market is higher compared to those of government securities. The liquidity risk in corporate securities market is higher compared to those of government securities. Liquidity in the corporate debt market has been improving due to the entry of more players and due to various measures taken by the regulators to increase the liquidity and transparency such as introduction of repo in corporate bonds, Credit Default Swaps, compulsory reporting of secondary market OTC transactions on exchange platforms to name a few. Moreover, the recent successful introduction of Interest Rate Future in the benchmark 10 year Government Bond will also likely to increase the depth in the debt market.

The market participants in the corporate debt and gilt markets are banks, financial institutions, mutual funds, corporates, insurance companies, FIIs, primary dealers and provident funds. The main debt instruments in the market are those issued by Corporates and State/Central Governments. Corporate papers carry credit risk while government securities are believed to carry no credit risk. The main risks with investments in debt securities are interest rate risk, credit risk and liquidity risk. Interest rate risk associated with debt instruments depend on the macroeconomic environment. It includes both market price changes due to change in yields as well as coupon reinvestment rate risk. Corporate papers carry higher liquidity risk as compared to gilts due to the depth of the gilt market.

Money Market:

Money market encompasses a wide range of instruments with maturities ranging from one day to a year, issued by Government, Banks and corporates etc and traded in markets of varying liquidity. The risk associated with any investments are – credit risk, interest rate risk and liquidity risk. However, such risks are lower in case of money market instruments compare to other debt instruments. Further, within the gamut of money market instruments as available in the market, such risks are very low in case of instruments issued by government. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk.

The following table attempts to give a broad overview of the available instruments in the financial markets and their risk return profile. The data given in the table is based on market conditions around the date of the Offer document and can at best be considered indicative:

- If security/issuer is rated by two or more credit rating agencies, the investment Committee will decide the credit rating agency whose rating to be considered for monitoring the various exposure limits.
- In case of investment in short term securities like money market instruments or debentures/bonds upto 1 year maturity, long term rating of the issuer will be considered for monitoring the sector exposure limit.

17. Fresh investments in perpetual bonds (including Additional Tier 1 bonds) can only be made in schemes that are in class III.

All investment restrictions shall be applicable at the time of making investment.

These investment limitations / parameters (as expressed / linked to the net asset / net asset value / capital) shall in the ordinary course apply as at the date of the most recent transaction or commitment to invest, and changes do not have to be effected merely because, owing to appreciations or depreciations in value, or by reason of the receipt of any rights or benefits in the nature of capital or of any scheme of arrangement or for amalgamation, reconstruction or exchange, or at any repayment or redemption or other reason outside the control of the Fund, any such limits would thereby be breached. If these limits are exceeded for reasons beyond its control, TAMPL shall adopt as a priority objective the remedying of that situation, taking due account of the interests of the Unitholders.

In addition, certain investment parameters (like limits on exposure to Sectors, Industries, Companies, etc.) may be adopted internally by TAMPL, and amended from time to time, to ensure appropriate diversification / security for the Fund. The Trustee Company / TAMPL may alter these above stated limitations from time to time, and also to the extent the SEBI (Mutual Funds) Regulations, 1996 change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its investment objective. As such all investments of the Scheme will be made in accordance with SEBI (Mutual Funds) Regulations, 1996, including Schedule VII thereof.

C. FUNDAMENTAL ATTRIBUTES

Following are the Fundamental Attributes of the scheme, in terms of Regulation 18 (15A) of the SEBI (Mutual Funds) Regulations, 1996:

(i) Type of a scheme

An open-ended debt scheme investing predominantly in floating rate instruments (including fixed rate instruments converted to floating rate exposures using swaps/ derivatives). A relatively high interest rate risk and moderate credit risk.

(ii) Investment Objective

The objective of the scheme is to generate income through investment primarily in floating rate debt instruments, fixed rate debt instruments swapped for floating rate returns and money market instruments.

However, there is no guarantee or assurance that the investment objective of the scheme will be achieved. The scheme doesn't assure or guarantee any returns.

Investment Pattern and Risk Profile:

The tentative portfolio break-up with minimum and maximum asset allocation, while retaining the option to alter the asset allocation for a short term period on defensive considerations has been given in paragraph "Asset Allocation Pattern".

(iii) Terms of Issue

- **Liquidity:** Repurchase/ Resale is at Net Asset Value (NAV) related prices with repurchase/ resale loads as applicable (within limits) as specified under SEBI Regulations 1996, While determining the price of the units, the fund will ensure that the repurchase price is not lower than 95 per cent of the Net Asset Value.
- Aggregate fees and expenses chargeable to the Scheme. (Refer section "C Annual Scheme Recurring Expenses" of Part III - Other Details for further details).
- The scheme does not provide any safety net or guarantee nor does it provide any assurance regarding declaration of income distribution. There is no guarantee or assurance that the scheme will achieve its' objective.

Any permanent change in the positioning of the scheme into a cell resulting in a risk (in terms of credit or duration risk) which is higher than the maximum specified for the chosen PRC (Potential Risk Class) cell, shall be considered as a fundamental attribute change (FAC) of the scheme. However, the PRC value of a scheme could change temporarily due to price movements, rating changes, investment actions, etc. Any such temporary change in the PRC cell of a scheme to a higher risk scale for either credit risk or duration risk beyond the maximum risk specified for the chosen PRC cell shall be treated as a passive breach and shall be rebalanced within a period of 30 days.

In accordance with Regulation 18(15A) of the SEBI (MF) Regulations, the Trustees shall ensure that no change in the fundamental attributes of the Scheme(s) and the Plan(s) / Option(s) there under or the trust or fee and expenses payable or any other change which would modify the Scheme(s) and the Plan(s) / Option(s) there under and affect the interests of Unitholders is carried out unless:

- i. SEBI has reviewed and provided its comments on the proposal.
- ii. A written communication about the proposed change is sent to each Unitholder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
- iii. The Unitholders are given an option for a period of atleast 30 calendar days to exit at the prevailing Net Asset Value without any exit load.

Compliance under Foreign Account Tax Compliance Act (FATCA) regulations:

United States of America (US) has introduced chapter no. 4 in the US Internal Revenue Code as a part of the Hiring Incentives to Restore Employment (HIRE) Act, which was enacted by the US legislature to create employment opportunities in US. The HIRE Act includes Foreign Account Tax Compliance Act (FATCA), which now forms a part of the US-IR Code. The regulations for FATCA have undergone revision since 2010 and the final regulations make the FATCA provisions effective from July 1, 2014.

The objective of FATCA is to detect "US Persons", who evade US taxes by using financial account maintained outside US. The US persons are defined as those who have either US citizenship or US residency. The FATCA stipulates reporting on -

- US taxpayers about certain foreign financial accounts and offshore assets.
- Foreign Financial Institutions (FFIs) about financial accounts with them of US taxpayers or foreign entities in which US taxpayers hold substantial ownership interest.

FFIs (including mutual funds in India) are required to periodically report information on accounts of US persons, who maintain balances above a threshold. In the event of a default in the reporting of information on accounts of US taxpayers, a withholding of 30% of the payment made from US sources will be imposed on the recalcitrant account holders and non-participating Financial Institutions. SEBI vide its circular no. CIR/MIRSD/2/2014 dated June 30, 2014, has advised that Government of India and US Government have reached an agreement in substance on the terms of an Inter-Governmental Agreement (IGA) to implement FATCA and India is now treated as having an IGA in effect from April 11, 2014. Tata Asset Management Company Pvt Limited (TAMPL) is classified as a Foreign Financial Institution (FFI) under the FATCA provisions and in accordance therewith, the AMC would be required to comply with the rules & regulations of FATCA, from time to time.

In order to ensure compliance with FATCA and other rules / directions / notifications as may be issued by Government of India or other regulatory authority, Mutual Funds are required to institute a process to identify US Person investors and report the same.

Applicants are required to refer to the "FATCA information" section in the application and mandatorily fill/sign off on the same. Applications without this information / declaration being filled/signed off will be deemed as incomplete and are liable to be rejected. Investors are requested to note that the contents of the information to be provided/ declaration in the application form may undergo a change on receipt of communication / guidelines from Government of India or AMFI or SEBI or any other regulatory authority.

Common Reporting Standard (CRS)

On similar lines of FATCA, the Organization of Economic Development (OECD), along with the G 20 countries, of which India is a member, has released a 'Standard for Automatic Exchange of Financial Account Information in Tax matters'. In order to combat the problem of offshore tax evasion and avoidance and stashing of unaccounted money abroad, the G 20 & OECD countries have together developed a common reporting standard(CRS) on automatic exchange of information(AEOI). On June 3,2015 India has joined the Multilateral Competent Authority Agreement(MCAA) on AEOI. The CRS on AEOI requires the financial institutions of the 'source' jurisdiction to collect and report information to their tax authorities about account holders 'resident' in other countries. The information to be exchanged relates not only to individuals, but also to shell companies and trusts having beneficial ownership or interest in the 'resident' countries.

	<p>In view of India's commitment to implement the CRS on AEOI and also the IGA with USA and with a view to provide information to other countries necessary legislative changes has already been made in Finance Act & by inserting Rules 114F to 114H and Form 61B to provide a legal basis for the Reporting Financial Institutions (RFIs) for maintaining and reporting information about the reportable accounts.</p> <p>Applicants are required to refer to the "FATCA/CRS information" section in the application and mandatorily fill/sign off on the same. Applications without this information / declaration being filled/signed off will be deemed as incomplete and are liable to be rejected. Investors are requested to note that the contents of the information to be provided/ declaration in the application form may undergo a change on receipt of communication / guidelines from Government of India or AMFI or SEBI or any other regulatory authority.</p> <p>With the change in guidelines, investors may be called for additional information required by the law. Investors are requested to keep Mutual Fund updated with change in information already submitted by them with Mutual Fund. FATCA provisions are relevant not only at on-boarding stage of investor(s)/unit holder(s) but also throughout the life cycle of investment with the Fund/the AMC. In view of this, Investors should immediately intimate to the Fund/the AMC, in case of any change in their status with respect to FATCA/CRS related declaration provided by them previously.</p> <p>Investors(s)/Unit holder(s) should consult their own tax advisors to understand the implications of FATCA/CRS provisions /requirements.</p> <p>"Subject to the Regulations and other applicable laws, the AMC / Trustee may reject any application for subscription and/or redemption of units if found incomplete or due to unavailability of underlying securities, etc."</p>

<p>Ongoing price for subscription (purchase)/switch-in (from other schemes/plans of the mutual fund) by investors.</p> <p>This is the price you need to pay for purchase/switch-in.</p>	<p>At the applicable NAV.</p>
<p>Ongoing price for redemption (sale) / repurchase / switch outs (to other schemes/plans of the Mutual Fund) by investors.</p> <p>This is the price you will receive for redemptions/switch outs. Example: If the applicable NAV is Rs. 10, exit load is 2% then redemption price will be: Rs. 10* (1-0.02) = Rs. 9.80</p>	<p>At the applicable NAV subject to prevailing exit load, if any.</p> <p>Repurchase/ Resale is at Net Asset Value (NAV) related prices with repurchase/ resale loads as applicable (within limits) as specified under SEBI Regulations 1996, While determining the price of the units, the fund will ensure that the repurchase price is not lower than 95 per cent of the Net Asset Value.</p> <p>The Trustee Company may however, from time to time review and modify the repurchase load for each choice of investment. The Units if partially repurchased would be subtracted from the Unit balance of that Unitholder on "First In First Out" basis i.e. the Units that were offered / allotted first would be the first to be repurchased. In case amount is withdrawn, the same will be converted into Units at the applicable Repurchase price / NAV related price and the number of Units so arrived at will be subtracted from the Unit balance of that Unitholder on "First In First Out" basis. The repurchase would be permitted to the extent of credit balance in the Unitholder's account.</p> <p>The repurchase cheque will be issued in the name of the first unitholder.</p>

	<p>Under normal circumstances, the Fund will ensure that the repurchase cheques are despatched within ten business days from the date of processing the repurchase request on repurchase day. In the event of partial repurchase, the Fund shall despatch the revised Account Statement by suitable mode as decided by AMC from time to time for the balance number of Units still being held by the Unitholder along with the repurchase cheque. Credit balances in the account of a Non- Resident Unitholder on maturity or otherwise, (where RBI final approval and any other approval (if any required) has been obtained) may be repurchased by the Fund by such Unitholder in accordance with the procedure described above and also subject to any procedures laid down by RBI and any other agency.</p> <p>Such repurchase proceeds will be paid by means of a Rupee cheque payable to the NRE/ NRO account of the Unitholder or subject to RBI procedures and approvals, such payment in Indian Rupees will be converted into US Dollars or into any other currency, as may be permitted by RBI, at the rate of exchange prevailing at the time of remittance and will be despatched at the applicants' risk, or at the request of the applicants' will be credited to their NRE/ NRO Accounts, details of which are to be furnished in the space provided for this purpose in the Repurchase Form.</p> <p>The Fund will not be liable for any delays or for any loss on account of exchange fluctuations, while converting the rupee amount in US Dollar or any other currency. The Fund (if required) may also make arrangements to obtain RBI approvals on a case-by-case basis on behalf on the Unitholder, subject to the Unitholder providing the Fund with the necessary documents required.</p>
Special Products available	<p>a) Systematic Investment Plan (SIP)</p> <p>The investors can benefit by investing specified Rupees amounts at regular intervals. The SIP allows the unitholders to invest a fixed amount of Rupees at regular intervals for purchasing additional units of the fund at NAV based prices. Investment can be done with the minimum / maximum amount and number of cheques specified by AMC from time to time. The cheques will be presented on the dates mentioned on the cheque and subject to realization. Units will be allotted at the applicable NAV along with applicable load (if any).</p> <p>SIP with Top-up SIP facility:</p> <p>SIP with Top-up SIP is a facility whereby an investor has an option to increase the amount of the SIP Installment by a fixed amount at pre-defined intervals. This will enhance the flexibility of the investor to invest higher amounts during the tenure of the SIP.</p> <p>The terms and conditions of top-up SIP are as follows:</p> <ol style="list-style-type: none"> The Top-up option must be specified by the investors while enrolling for the SIP facility. For minimum SIP Top-up amount refer application form. The Top-up details cannot be modified once enrolled. In order to make any changes, the investor must cancel the existing SIP and enroll for a fresh SIP with Top-up option. Under monthly SIP investors can opt for top up amount at half-yearly and yearly intervals. If the investor does not specify the frequency, the default interval for Top-up will be considered as Yearly. In case of Quarterly SIP, investors can opt for only Yearly interval top-up frequency. <p>For complete details regarding the SIP with top-up facility, please refer to SIP Auto Debt Form with Top up facility enrollment form.</p> <p>b) Systematic Withdrawal Plan (SWP)</p> <p>This facility available to the unitholders of the fund enables them to redeem fixed sums or fixed number of units from their unit accounts at periodic intervals. The amount withdrawn under SWP by redemption shall be converted into the Fund units at the Repurchase price and such units will be subtracted from the unit balance of that unitholder. In case the date falls during a book closure period the immediate next Business day will be considered for this purpose.</p> <p>The Authorised Investor Service Center may terminate SWP on receipt of a notice from the unitholder. It will terminate automatically if all units are liquidated or withdrawn from the account or upon the receipt of notification of death or incapacity of the unitholder.</p> <p>"SWP facility is available subject to terms and conditions. Please refer to the SWP Enrolment form for terms and conditions before enrolment."</p> <p>c) Systematic Transfer Plan (STP)</p> <p>A unitholder may establish a Systematic Transfer Plan (STP)/Flex STP and choose to transfer on a periodicity mentioned in the application form, from one TMF Scheme to another TMF Scheme on a date prescribed by the Investment Manager. The amount thus withdrawn by redemption shall be converted into units at the applicable NAV on the scheduled day and such units will be subtracted from the unit balance of that unitholder. Unitholders may change the amount, not below the specified minimum, by giving two weeks prior written notice to the registrars. STP may be terminated automatically if the balance falls below the minimum account balance or upon the receipt of notification of death or incapacity of the unitholders by the fund. Rules relating to the plan may be changed from time to time by the Investment Manager.</p> <p>"STP facility is available subject to terms and conditions. Please refer to the STP Enrolment form for terms and conditions before enrolment."</p> <p>lexi STP Facility:</p>

	<p>Flexible Systematic Transfer Plan ("Flex STP") by Tata Mutual Fund is a facility wherein a Unitholder(s) of designated open-ended Scheme(s) can opt to transfer variable amounts linked to the value of his investments on the date of transfer at pre-determined intervals from designated open-ended (source scheme) to the growth option of another open-ended scheme (target scheme).</p> <p>Salient Features of Flex STP are as follows:</p> <ol style="list-style-type: none"> 1. The amount to be transferred under Flex STP from source scheme to target scheme shall be calculated using the below formula: Flex STP amount = [(fixed amount to be transferred per instalment x number of instalments already executed, including the current instalment) - market value of the investments through Flex STP in the Transferee Scheme on the date of transfer] 2. The first Flex STP instalment will be processed for the fixed instalment amount specified by the investor at the time of enrolment. From the second Flex STP instalment onwards, the transfer amount shall be computed as per formula stated above. 3. Tata Floating Rate Fund is an eligible source as well as target scheme for Flex STP facility. 4. Flex STP would be available for Monthly, Quarterly, Weekly & Daily frequencies. 5. Flex STP is not available from "Daily / Weekly" income distribution(IDCW) plans of the source schemes. 6. Flex STP is available only in "Growth" option of the target scheme. 7. Conversion to Normal STP: If there is any other financial transaction (purchase, redemption or switch) processed in the target scheme during the tenure of Flex STP, the Flex STP will be processed as normal STP for the rest of the instalments for a fixed amount. 8. Flex STP will stop/cease on occurrence of any of the following event whichever is earlier. <ol style="list-style-type: none"> a. Flex STP will cease after the specified End Date / Specified number of instalments have been transferred. b. In case the amount (as per the formula) to be transferred is not available in the source scheme in the investor's folio, the residual amount will be transferred to the target scheme and Flex STP will be closed. 9. A single Flex STP enrolment Form can be filled for transfer into one Scheme/Plan/Option only. 10. In case the date of transfer falls on a Non-Business Day, then the immediate following Business Day will be considered for the purpose of determining the applicability of NAV. 11. The request for flex STP should be submitted at least 10 calendar days before the first STP date. 13. All other terms & conditions of Systematic Transfer Plan are also applicable to Flex STP. <p>Flex STP is a Systematic Withdrawal Plan (SWP) from Source Scheme and Systematic Investment Plan (SIP) in the Target scheme, therefore in the source scheme the exit load for the units will be as per the load structure applicable at the time of the purchase of those units. In the Target scheme the load structure will be as per the prevailing exit Load structure applicable for the SIP for that scheme.</p> <p>Systematic Transfer from one scheme to another scheme attracts capital gain tax depends on the periodicity of holding. In view of the individual nature of tax implications, each unit holder is advised to consult with his or her own tax advisors with respect to the specific tax and other implications arising out of the transactions.</p> <p>The AMC reserves the right to withdraw/change/modify the terms and conditions of Flex STP.</p> <p>For detail terms & conditions, unitholders are requested to check KIM cum application form of the scheme.</p> <p>Facility for purchasing of the units of the scheme through order routing platform on BSE and NSE</p> <p>The scheme is admitted on the order routing platform of Bombay Stock Exchange Limited ("BSE") and National Stock Exchange of India Limited ("NSE"). Under this facility investors can submit the application for subscription and redemption of units of the scheme through the Stock Exchange platform. The introduction of this facility is pursuant to guidelines issued by SEBI vide provision no. 16.2 of SEBI Master Circular on Mutual Fund dated June 27, 2024 and the Stock Exchanges viz. <p>Transactions through online facilities / electronic modes</p>	<p>Investor can transact through online facilities /electronic modes in Tata Mutual Fund Scheme .The time of transaction done through various online facilities / electronic modes offered by the AMC, for the purpose of determining the applicability of NAV, would be the time when the request for purchase / sale / switch of units is received in the servers of AMC/RTA.</p> <p>In case of transactions through online facilities / electronic modes, the movement of funds from the investors' bank account to the Scheme's bank account may happen via the Intermediary / Aggregator service provider through a Nodal bank account and post reconciliation of fund. The process of movement of funds from the investors' bank account into the Scheme's Bank account in case of online transaction is governed by Reserve Bank of India(RBI)vide their circular Ref. RBI/2009-10/231 DPSS.CO.PD.No.1102/02.14.08/2009-10 dated 24th November, 2009. The process followed by the aggregator and the time lines within which the Funds are credited into the Scheme's bank account is within the time lines provided by RBI which is</p>

	<p>T+3 settlement cycle / business days, where T is the date of Transaction / day of intimation regarding completion of transaction. The nodal bank account as stated above is an internal account of the bank and such accounts are not maintained or operated by the intermediary / aggregator or by the Mutual Fund.</p> <p>While the movement of Funds out of the investors' Bank account may have happened on T day, however post reconciliation and as per statutory norms, the allotment can happen only on availability of Funds for utilization by the AMC/MF and accordingly the transaction will be processed as per the applicable NAV based on availability of funds for utilization. This lag may impact the applicability of NAV for transactions where NAV is to be applied, based on actual realization of funds by the Scheme. Under no circumstances will Tata Asset Management Private Limited or its bankers or its service providers be liable for any lag / delay in realization of funds and consequent pricing of units.</p>

Repurchase Price = 11 – 0.11

Repurchase Price = Rs.10.89

In the event NAV cannot be calculated and / or published, such as because of the suspension of RBI Clearing, Bank strikes, during the existence of a state of emergency and / or a breakdown in communications, the Board of Trustees may temporarily suspend determination and / or publication of the NAV of the Units.

While determining the price of the units, the fund will ensure that the repurchase price is not lower than 95 per cent of the Net Asset Value..

D.TRANSACTION CHARGES & STAMP DUTY

Transaction Charges

Pursuant to provision no. 10.5 of SEBI Master Circular on Mutual Fund dated June 27, 2024, transaction charge per subscription of Rs. 10,000/- and above be allowed to be paid to the distributors of the Tata Mutual Fund products. The transaction charge shall be subject to the following:

1. There shall be no transaction charges on direct investments.
2. For existing investors in a Mutual Fund, the distributor may be paid Rs.100/- as transaction charge per subscription of Rs.10,000/- and above.
3. For first time investor in Mutual Funds, the distributor may be paid Rs.150/- as transaction charge for subscription of Rs.10,000/- and above.
4. The transaction charge shall be deducted by the AMC from the subscription amount and paid to the distributor and the balance amount shall be invested.
5. The statement of account shall clearly state that the net investment as gross subscription less transaction charge and give the number of units allotted against the net investment.
6. There shall be no transaction charge on subscription below Rs. 10,000/-.
7. In case of SIPs, the transaction charge shall be applicable only if the total commitment through SIPs amounts to Rs. 10,000/- and above. In such cases the transaction charge shall be recovered in 3 installments.
8. There shall be no transaction charge on transactions other than purchases/ subscriptions relating to fresh/additional purchase.

The transaction charges would be deducted only in respect of those transactions where the concern distributor has opted for opt in for levying transaction charge. In case distributor has chosen 'Opt Out' of charging the transaction charge, no transaction charge would be deducted from transactions registered.

It may further be noted that distributors shall have also the option to either opt in or opt out of levying transaction charge based on type of the product.

Stamp Duty

With effect from 1st July 2020 a stamp duty @ 0.005% of the transaction value would be levied on mutual fund investment transactions. Accordingly, the number of units allotted on purchases, switch-ins, SIP/STP installments and including IDCW reinvestment to the unitholders would be reduced to that extent.

E. ASSOCIATE TRANSACTIONS

Please refer to Statement of Additional Information (SAI).

F. TAXATION

Taxation for Other than Equity Oriented Mutual Funds

•Taxation of Income in respect of units of Mutual Fund

The information is provided for general information only. However, in view of the individual nature of the implications, each investor is advised to consult his or her own tax advisors with respect to the specific amount of tax and other implications arising out of his or her participation in the Scheme.

Withholding tax on income distribution

Type of Investor	Withholding Tax Rate
Resident	10%*

NRI	20%** or rate as per applicable tax treaty*** (whichever is lower)
-----	--

* Tax not deductible if income distributed in respect of units of a mutual fund is below Rs. 10,000 in a financial year.

** The base tax is to be further increased by surcharge at the rate of:

- 37% on base tax where total income exceeds Rs. 5 crore;
- 25% where total income exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where total income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore

*** The income distributed by mutual fund to unitholders is unlikely to fall within the definition of dividend under the tax treaty. Given this and the language of the newly inserted proviso to section 196A, claiming tax treaty benefit in respect of income distributed by mutual fund to unitholders for withholding tax purpose may not be possible.

Further, "Health and Education Cess" is to be levied at 4% on aggregate of base tax and surcharge.

Withholding tax applicability in case of Inoperative PAN

As per section 139AA of the Income-tax Act, 1961, read with rule 114AAA of the Income-tax Rules, 1962, in the case of a resident person, whose PAN has become inoperative due to non-linking of PAN with Aadhaar, it shall be deemed that he has not furnished the PAN and tax could be withheld at a higher rate of 20% as per section 206AA of Income-tax Act, 1961. For linking PAN with Aadhaar, fees of Rs. 1,000 has been prescribed.

•Capital Gains Taxation

	Individual/ HUF/ Non Resident S	Domestic Company @
Short Term Capital Gains (Units held for 24 months or less) – Also refer to Note 1	30%^	30%/25%^/22%^/15%^
Long Term Capital Gains (Units held for more than 24 months) (Not Applicable for units of Specified Mutual Fund) – Also refer to Note 1	12.5%*	12.5%*

*Without indexation

^ Assuming the investor falls into highest tax bracket.

^^ If total turnover or gross receipts in the financial year 2023-24 does not exceed Rs. 400 crores.

^^^ This lower rate is optional and subject to fulfillment of certain conditions as provided in section 115BAA.

^^^^ This lower rate is optional for companies engaged in manufacturing business (set-up & registered on or after 1 October 2019) subject to fulfillment of certain conditions as provided in section 115BAB.

Note 1 - Capital gains from transfer of units of "specified mutual fund schemes" acquired on or after 1st April 2023 are treated as short term capital gains taxable at applicable slab rates, irrespective of the period of holding of such mutual fund units.

For this purpose, "specified mutual fund" means a mutual fund where not more than 35 per cent of its total proceeds is invested in the equity shares of domestic companies. The Finance Act (No.2) of 2024 has amended the definition of "specified mutual fund" with effect from 1st April 2026, to mean (a) a mutual fund scheme investing more than 65% in debt and money market instruments; & (b) fund of fund investing 65% or more in a mutual fund scheme referred to in (a).

\$ Surcharge to be levied at:

- 37% on base tax where Specified income** exceeds Rs. 5 crore;
- 25% where Specified income** exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where total income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore.

**Specified income – Total income excluding income by way of dividend on shares and short-term capital gains on units of equity oriented mutual fund schemes and long-term capital gains on mutual fund schemes. In case the total income includes such specified income, surcharge on such specified income shall not exceed 15%.

Further, Health and Education Cess to be levied at the rate of 4% on aggregate of base tax and surcharge.

@ Surcharge at 7% on base tax is applicable where total income of domestic corporate unit holders exceeds Rs 1 crore but does not exceed 10 crores and at 12% where total income exceeds 10 crores. However, surcharge at flat rate of 10 percent to be levied on base tax for the companies opting for lower rate of tax of 22%/15%. Further, "Health and Education Cess" to be levied at the rate of 4% on aggregate of base tax and surcharge.

Further, the domestic companies are subject to minimum alternate tax (except for those who opt for lower rate of tax of 22%/15%) not specified in above tax rates.

•Stamp Duty

With effect from 1st July 2020 a stamp duty @ 0.005% of the transaction value would be levied on mutual fund investment transactions. Accordingly the number of units allotted on purchases, switch-ins, SIP/STP instalments and including dividend reinvestment to the unitholders would be reduced to that extent.

•Provisions in relation to segregated portfolios of a mutual fund scheme are as follows –

In section 2 in clause (42A) of the Income-tax Act, 1961 the following amendment has been made "(hh) in the case of a capital asset, being a unit or units in a segregated portfolio referred to in sub-section (2AG) of section 49, there shall be included the period for which the original unit or units in the main portfolio were held by the assessee;"

In section 49 of the Income-tax Act, 1961 after sub-section (2AF), the following has been inserted, namely:—

(2AG) The cost of acquisition of a unit or units in the segregated portfolio shall be the amount which bears, to the cost of acquisition of a unit or units held by the assessee in the total portfolio, the same proportion as the net asset value of the asset transferred to the segregated portfolio bears to the net asset value of the total portfolio immediately before the segregation of portfolios.

SID - TATA FLOATING RATE FUND

(2AH) The cost of the acquisition of the original units held by the unit holder in the main portfolio shall be deemed to have been reduced by the amount as so arrived at under sub-section (2AG).

Explanation- For the purposes of sub-section (2AG) and sub-section (2AH) of section 49, the expressions "main portfolio", "segregated portfolio" and "total portfolio" shall have the meanings respectively assigned to them in provision no. 4.4 of SEBI Master circular on Mutual Fund dated May 19, 2023, issued by the Securities and Exchange Board of India under section 11 of the Securities and Exchange Board of India Act, 1992.

Clause(42A) of section 2 defines the expression "short term capital asset" to be a capital asset held by an assessee for not more than twenty-four months immediately preceding the date of its transfer.

-Provided that in the case of a security listed in a recognized stock exchange in India, the provisions of this clause shall have effect as if for the words "twenty-four", the words "twelve months" had been substituted:

If the unit or units in a segregated portfolio are held for twenty-four months or less from the original date of acquisition of units in the Main portfolio then the same will constitute 'short term capital assets' and any capital gains arising therefrom shall be considered as 'short term capital gain'. On the contrary, if the unit or units in a segregated portfolio are held for more than twenty-four months from the original date of acquisition of units in the Main portfolio then the same will constitute 'long-term capital assets' and any capital gains arising therefrom shall be considered as 'long term capital gain'.

However, the allotment of units in a segregated portfolio of a mutual fund scheme shall not be considered as 'Transfer' under section 47 of the Income-tax Act, 1961. These amendments are applicable from AY 2020-21.

Example:

Suppose Mr. X had invested in a scheme of a mutual fund on 01-01-2015 when the NAV was Rs. 10. On May 1, 2019, when NAV of the scheme was Rs. 20, segregation of portfolio was created due to a credit event.

Post creation of the segregated portfolio, the NAV of the main portfolio was Rs. 16 and the segregated portfolio was Rs 4. Hence, the proportion is 80:20 of the total portfolio. The cost of acquisition of the main portfolio and the segregated portfolio should be taken as Rs. 8 and Rs. 2 respectively.

Similarly, the period of holding of the units of the main portfolio and the segregated portfolio should be reckoned from 1st January 2015.

The information stated above is based on Tata Mutual Fund understanding of the tax laws and only for the purpose of providing general information to the unit holders of the schemes. In view of the individual nature of tax implications, each unit holder is advised to consult with his or her own tax advisors with respect to the specific tax and other implications arising out of the restructuring.

Any tax liability arising post redemption on account of change in tax treatment with respect to Tax on Income Distribution/Capital Gain Tax, by the tax authorities, shall be solely borne by the investors and not by the AMC or Trustee Company.

For further details on taxation please refer the clause on taxation in SAI.
