At all times the portfolio will adhere to the overall investment objective of the scheme.

Change in Investment Pattern

The Scheme may review the above pattern of investments based on views on interest rates and asset liability management needs. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme. Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations, legislative amendments and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be in accordance with Clause 1.14.1.2 of SEBI Master Circular for Mutual Funds dated June 27, 2024, as may be amended from time to time, for short term and for defensive considerations only. - 5) Investment in Short Term Deposits**

The Fund Manager reserves the right to invest in such other securities as may be permitted from time to time and which are in line with the investment objectives of the Scheme.

Detailed definition and applicable regulations/ guidelines for each instrument are included in Section II.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The investment team will follow an active strategy to manage the assets of the fund and will make investments as per the asset allocation pattern of the Scheme.

The investment objective of the Scheme is to generate income through investment in a portfolio comprising of government securities of various maturities. To achieve the investment objective, the Scheme will invest minimum 80% of its total assets in government securities of various maturities. The Scheme may also invest in Triparty Repo, Reverse Repo in Government Securities and Treasury Bills in line with the asset allocation of the Scheme.

The Fund Manager will seek to generate returns commensurate with minimal credit risk by investing in a portfolio comprising of securities issued and guaranteed by Central and State Government in line with the asset allocation pattern of the Scheme.

Being sovereign debt, Government Securities generally carry relatively minimal credit risk. However, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates.

The fund management team will take an active view of the interest rate environment by keeping a close watch on various parameters of the Indian economy. It will take into account the various variables affecting the interest rate scenario, relative valuation of the securities, quality of instruments, maturity profile of the instruments and liquidity of the securities.

The investment team of the AMC will continuously monitor and review the macroeconomic environment including the political and economic factors, money supply in the system, Government borrowing programme and demand and supply of debt instruments, credit pick up among others, affecting the liquidity and interest rates.

Investments in Mutual Fund Units:

To avoid duplication of portfolios and to reduce expenses, the Scheme may also invest in schemes managed by the AMC or in the schemes of other mutual funds, without charging any fees, in line with the investment objectives and asset allocation pattern of the Scheme and provided that aggregate inter-scheme investment made by all schemes managed by the AMC, either in its own schemes or of any other Mutual Fund, shall not exceed 5% (or such other permitted limit), of the Net Asset Value of the Fund.

Investment Process:

Decision making process:

The Fund Manager shall take a view on the broad direction of the markets including interest rate outlook. The Credit Analyst along with the Fund Manager shall have the responsibility of individual security analysis, while the dealers shall execute the trading mandates with a view to obtaining the best execution in terms of price and quantity.

The Fund Manager, while buying / selling securities for the Scheme shall take into account the following main factors:

1. Interest Rate Outlook
2. Compliance with SEBI Guidelines
3. Risk Management Guidelines

4. Yield to Maturity of the instrument
5. Yield curve analysis
6. Liquidity of the instrument

Credit Research and Monitoring of Government Securities:

The investment team will look at each issue in detail; the following broad framework shall help the team in managing the funds. Following are the key aspects of the process:

1. Creation and Maintenance of an Investment Universe
2. In-house credit appraisal
3. Tier system of monitoring
4. Exposure Norms

RISK CONTROL:

The asset allocation of the Scheme will be steadily monitored and it shall be ensured that investments are made in accordance with the scheme objective and within the regulatory and internal investment restrictions prescribed from time to time.

A detailed monitoring process has been designed to identify, measure, monitor and manage portfolio risk. The aim is to have a structured mechanism towards risk management thereby maximising potential opportunities and minimising the adverse effects of risk. Effective risk management is crucial for achieving optimum results. Adequate safeguards would be incorporated in the portfolio management process. The main instrument for reducing risk is through diversification across sectors/companies/ securities. The Fund Manager's job is to identify securities which offer higher returns with a lower level of risk. While identifying such securities, rigorous credit evaluation would be carried out by the investment team. The front office system of the AMC has the capability of pre- investment monitoring of investment restrictions as per SEBI guidelines and various internal limits prescribed from time to time to facilitate pre-emptive monitoring. The AMC will be guided by the ratings of Credit Rating Agencies authorised to carry on such activity. Further, various risk management tools will be used for measuring and monitoring portfolio risks. The Risks and the corresponding risk mitigation strategies are provided under Section II.

Liquidity risk management practices adopted by the AMC:

Pursuant to AMFI Best Practice Guidelines Circular No. 103/2022-23 dated October 12, 2022, the liquidity risk management practices/ tools adopted by the AMC for the various debt schemes of Union Mutual Fund, as applicable, are given below:

- Potential Risk Matrix (PRC)
- Risk-o-meter
- Liquidity Risk Management (LRM) Framework
- Stress Testing
- Review of Asset Liability Mis-match under Risk Management Framework
- Swing Pricing

For details, please refer Section II.

Portfolio Turnover:

The Scheme being an open-ended dynamic debt Scheme investing across duration, it is expected that there would be a number of subscriptions and redemptions on a daily basis. Also, the average maturity of the Scheme being medium to long, the portfolio turnover ratio may be medium to high. Further, in the debt

market, trading opportunities may arise due to changes in system liquidity, interest rate policy announced by RBI, shifts in the yield curve, credit rating changes or any other factors. In the opinion of the fund manager these opportunities can be played out to enhance the total return of the portfolio, which will result in increase in portfolio turnover. There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, the cost would be negligible as compared to the total expenses of the Scheme. Frequent trading may increase the profits which will offset the increase in costs. The fund manager will endeavour to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to estimate with reasonable measure of accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The performance of the Scheme will be benchmarked with CRISIL Dynamic Gilt Index^{\$}. The said Benchmark is as per AMFI Tier I Benchmark.

^{\$}CRISIL Benchmark Disclaimer: CRISIL Indices are the sole property of CRISIL Limited (CRISIL). CRISIL Indices shall not be copied, transmitted or distributed in any manner for any commercial use. Justification for use of Benchmark

The composition of the aforesaid benchmark is such that it covers varying maturities of instruments and is most suited for comparing performance of the Scheme. This benchmark shall provide the investor with an independent and representative comparison with fund portfolio.

The Trustee reserves the right to change the Benchmark for the evaluation of the performance of the Scheme from time to time, keeping in mind the investment objective of the Scheme and the appropriateness of the Benchmark, subject to the Regulations and other prevalent guidelines.

Part III- OTHER DETAILS

A.COMPUTATION OF NAV

The Net Asset Value (NAV) per unit will be computed by dividing the net assets of the Scheme/Plan/Option by the number of units outstanding under the Scheme/Plan/Option on the valuation date.

The Fund will value its investments according to the valuation norms, as per the AMC's valuation policy and as specified in Eighth Schedule of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The Net Assets Value (NAV) per unit under the Scheme/Plan/Option shall be calculated as follows:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's + investments} + \text{Current Assets including accrued income} - \text{Current Liabilities and Provisions including accrued expenses}}{\text{Number of units outstanding}}$$

No. of Units outstanding under Scheme/Plan/Option

The numerical illustration of the above method is provided below:

Market or Fair Value of Scheme's investments (Rs.) = 11,00,00,000
 Current Assets (Rs.) = 10,00,000
 Current Liabilities and Provisions (Rs.) = 5,00,000
 No. of Units outstanding under the Scheme = 1,00,00,000

$$\text{NAV per unit (Rs.)} = \frac{11,00,00,000 + 10,00,000 - 5,00,000}{1,00,00,000} = 11.05.$$

1,00,00,000

The NAV of the Scheme shall be calculated up to four decimal places. Separate NAV will be calculated and disclosed for each Option under each Plan. The NAVs of the Growth Option and the Income Distribution cum Capital Withdrawal Option under each Plan will be different after the declaration of the first IDCW.

The NAVs will be calculated for all the Business Days.

Presently, entry load cannot be charged by mutual fund schemes. Thus, sale price for a particular investor shall be equal to the applicable NAV for the investor at the time of investment. For example, if applicable NAV of the Scheme is Rs. 11 then the sale price will also be Rs. 11 as Entry Load is not applicable.

The Repurchase Price however, will not be lower than 95% of the NAV subject to SEBI Regulations as amended from time to time.

Methodology of calculation of repurchase price:

For calculating the repurchase price, the exit load, if any, applicable at the time of investment shall be deducted from the applicable NAV of the Scheme.

For example: If the applicable NAV of the Scheme is Rs. 11 and the Exit Load applicable at the time of investment is 1% if redeemed before completion of 1 year from the date of allotment of units and the investor redeems units before completion of 1 year, then repurchase price will be calculated as follows:

Step 1: Applicable NAV * Exit Load at the time of investment in % = Exit Load Amount;

i.e. Rs. 11 * 1% = Rs. 0.11;

Step 2: Applicable NAV - Exit Load Amount = Repurchase price;

i.e. Rs. 11 - Rs. 0.11 = Rs. 10.89

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities (as applicable), procedure in case of delay in disclosure of NAV etc. refer to SAI.

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid, marketing and advertising, Registrar & Transfer Agents expenses, printing and stationary, bank charges etc.

The additional Total Expense Ratio (TER) on account of inflows from beyond top 30 cities so charged shall be credited back to the scheme in case the said inflows are redeemed within a period of 1 year from the date of investment.

D. LOAD STRUCTURE

Load is an amount which is paid by the investor to redeem the Units from the Scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, investors may

refer to the website of the AMC (www.unionmf.com) or may call at 18002002268 / 18005722268 (toll free no.) or you can contact your distributor.

Type of Load	Load Chargeable (as %age of NAV)
Exit Load*	Nil

*Goods & Services Tax on exit load, if any, will be paid out of the exit load proceeds and Exit load net of Goods & Services Tax, if any, will be credited to the Scheme.

The above mentioned load structure shall be equally applicable to the special products such as SIP, STP, SWP, switches to other schemes, etc. offered by the AMC. However, no load will be applicable for switches between the Plans under the scheme and switches between the options under each Plan under the Scheme. Further, the AMC shall not charge any load on issue of bonus units and units allotted on reinvestment of IDCW for existing as well as prospective investors.

The Investor is requested to check the prevailing Load structure, if any, of the Scheme before investing.

The AMC / Trustee reserves the right to change / modify the Load structure, subject to the limits prescribed under the Regulations, if it so deems fit in the interest of investors and for the smooth and efficient functioning of the Mutual Fund.

The Repurchase Price however, will not be lower than 95% of the NAV subject to SEBI Regulations as amended from time to time.

The Mutual Fund may charge the load without any discrimination to any specific group of unit holders.

Any imposition or enhancement in the Load in future shall be applicable on prospective investments only.

Procedure for changing the Load Structure:

At the time of changing the Load Structure, the AMC shall follow the following procedure:

1. An addendum detailing the changes will be attached to Scheme Information Document (s) and Key Information Memorandum. The addendum may be circulated to all the distributors / brokers so that the same can be attached to all Scheme Information Documents and Key Information Memorandum already in stock.
2. The addendum will be displayed on the website of the AMC immediately and arrangements will be made to display the addendum in the form of a notice in all the Investor Service Centers and distributors / brokers' office.
3. The introduction of the Exit Load along with the details may be stamped in the acknowledgement slip issued to the Investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such Load.
4. Any other measure which the Mutual Fund may consider necessary.

E. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at Applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the Applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

I. Introduction

A. Definitions/interpretation

Kindly refer ([definitions-interpretations.pdf](#) ([unionmf.com](#))) for definitions/interpretations. The given Scheme specific definitions/terms as may be applicable to the Scheme apply throughout this Document in addition to the definitions/terms mentioned in the Statement of Additional Information unless the context requires otherwise.

B. Risk Factors:

Scheme Specific Risk Factors:

The Scheme shall invest in government securities and other securities as mentioned in the asset allocation pattern of the Scheme, and shall inherit risks that are specific to government securities and to debt broadly as an asset class.

As the portfolio of the Scheme shall be invested in securities comprising of securities issued by the Central or State Government there would be minimal Credit Risk. Further, as there is no restriction on the maturity of the securities, there would be moderate to high price risk or interest rate risk.

The Scheme related risks include but are not limited to the following:

1. Risks associated with investing in Fixed Income Securities:

The following are the risks associated with investment in Fixed Income Securities:

Interest Rate Risk: This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. Fixed income securities such as government bonds, corporate bonds, money market instruments etc run price-risk or interest-rate risk. Generally, when interest rates rise, prices of such securities fall and when interest rates drop, the prices generally increase. The extent of fall or rise in the prices depends upon factors such as coupon, maturity of the security, the yield level at which the security is being traded. The longer the time to an instrument's maturity, the greater is its interest rate risk. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

Re-investment Risk: Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the security. Consequently, the proceeds may get invested at a lower rate.

Spread Risk: Yield Spreads between fixed income securities might change.

Liquidity Risk: This risk pertains to how saleable a security is in the market or the ease at which a security can be sold at or close to its true value. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of the investments. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. The liquidity of debt securities may change, depending on market conditions. At the time of selling the security, the security can become less liquid (wider spread) or illiquid, leading to loss in value of the portfolio. Securities that are unlisted generally carry a higher liquidity risk compared to listed securities.

Counterparty Risk: This is the risk of failure of counterparty to the transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the Scheme in case of counterparty default.

Settlement Risk: Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make purchases in intended securities due to settlement problems could cause the Scheme to miss certain investment opportunities. Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

Duration Risk: The modified duration of a security is a measure of its price sensitivity to interest rates movements, based on the average time to maturity of its interest and principal cash flows.

Portfolio managers increase average duration when they expect rates to decline, to get the most benefit, and decrease average duration when they expect rates to rise, to minimize the negative impact. If rates move in a direction contrary to their expectations, they lose.

Concentration Risk: This is the risk arising from over exposure to few securities/issuers.

Sovereign Risk: The Central Government of a country is the issuer of the local currency in that country. The Government raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since payment of interest and principal amount has a sovereign status implying no default, such securities are known as securities with sovereign credit. For domestic borrowers and lenders, the credit risk on such sovereign credit is minimal, even lower than a security with "AAA" rating and hence commands a yield, which is lower than a yield on "AAA" security.

Credit risk or default risk: This refers to inability of the issuer of the debt security to make timely payments of principal and/ or interest due. In case of investments in government securities, the credit risk

is minimal. It is reflected in the credit rating of the issuer. Hence if the credit rating of the issuer is downgraded, the price of the security will suffer a loss and the NAV will fall. Credit risk factors pertaining to lower rated securities also apply to lower rated zero coupon and deferred interest kind bonds. Lower rated zero coupon and deferred interest kind bonds carry an additional risk in that, unlike bonds that pay interest through the period of maturity, the Scheme by investing in these bonds will realize no cash till the cash payment date and if the issuer defaults, the Scheme may obtain no return on its investment.

2. Risks associated with investing in Securities Segment and Tri-party Repo trade settlement

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time i.e. in the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund.

3. Risk Factors associated with Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

4. Risks associated with transaction in Units through stock exchange(s):

In respect of transaction in Units of the Scheme through BSE and / or NSE (applicable to the facility to transact in the Units of the Scheme through the Stock Exchange mechanism provided by the AMC), allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by BSE and / or NSE and their respective clearing corporations on which the Fund has no control.

5. Risks associated with segregated portfolio:

If segregated portfolio is created pursuant to Clause 4.4 of SEBI Master Circular for Mutual Funds dated June 27, 2024, the following risks associated with segregated portfolio will be applicable: The unit holders may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of

segregated portfolio on the recognized stock exchange. The risks associated in regard to the segregated portfolio are as follows:

- The investors holding units of the segregated portfolio may not be able to liquidate their holdings till the time of recovery of money from the issuer.
- The security comprising the segregated portfolio may not realize any value.
- Listing of units of the segregated portfolio on a recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units of the segregated portfolio on the stock exchange.
- The trading price of units on the stock exchange may be significantly lower than the prevailing Net Asset Value (NAV) of the segregated portfolio.

C. Risk Mitigation Strategies

The asset allocation of the Scheme will be steadily monitored and it shall be ensured that investments are made in accordance with the scheme objective and within the regulatory and internal investment restrictions prescribed from time to time.

A detailed monitoring process has been designed to identify, measure, monitor and manage portfolio risk. The aim is to have a structured mechanism towards risk management thereby maximising potential opportunities and minimising the adverse effects of risk. Effective risk management is crucial for achieving optimum results. Adequate safeguards would be incorporated in the portfolio management process. The main instrument for reducing risk is through diversification across sectors/companies/ securities. The Fund Manager's job is to identify securities which offer higher returns with a lower level of risk. While identifying such securities, rigorous credit evaluation would be carried out by the investment team. The front office system of the AMC has the capability of pre- investment monitoring of investment restrictions as per SEBI guidelines and various internal limits prescribed from time to time to facilitate pre-emptive monitoring. The AMC will be guided by the ratings of Credit Rating Agencies authorised to carry on such activity. Further, various risk management tools will be used for measuring and monitoring portfolio risks.

Some of the risks and the corresponding risk mitigating strategies are listed below:

Risk	Risk mitigation strategy
Interest rate risk Security price volatility due to movements in interest rate.	Active duration management strategy; Control portfolio duration and actively evaluate the portfolio structure with respect to existing interest rate scenario. Interest Rate risk may also be mitigated through a well diversified portfolio.
Market Risk Risk arising due to adverse market movements.	Endeavour to have a well-diversified portfolio of high quality securities.
Volatility Risk Risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc.	The Scheme will manage volatility risk through diversification.
Liquidity Risk	The liquidity of the Scheme's investments may be

Risk	Risk mitigation strategy
Risk associated with saleability of portfolio securities.	inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification as well as any internal controls identified at the time of construction of portfolio. Liquidity Risk would be low considering that the Scheme would invest in a portfolio comprising of government securities.

Liquidity risk management practices adopted by the AMC:

Pursuant to AMFI Best Practice Guidelines Circular No. 103/2022-23 dated October 12, 2022, the liquidity risk management practices adopted by the AMC for the various debt schemes of Union Mutual Fund, as applicable, are given below:

Liquidity Management Tool	Applicable Schemes	Brief Description
Potential Risk Matrix (PRC) (pursuant to Clause 17.5 of SEBI Master Circular for Mutual Funds dated June 27, 2024) Risk-o-meter (pursuant to Clause 17.4 of SEBI Master Circular for Mutual Funds dated June 27, 2024)	PRC: Applicable to all debt schemes; Risk-o-meter: Applicable to all schemes.	The maximum risk that the fund manager can take in the scheme is depicted by the Potential Risk Class (PRC) Matrix of the Scheme, and the current risk of the Scheme at a given point in time is depicted by the risk-o-meter of the Scheme which is updated on a regular basis. The PRC Matrix consists of parameters based on maximum interest rate risk (measured by Macaulay Duration (MD) of the scheme) and maximum credit risk (measured by Credit Risk Value (CRV) of the scheme). The risk-o-meter consists of six risk levels ranging from low risk to very high risk. The AMC monitors and ensures that the scheme does not exceed the maximum risk depicted in the PRC.
Liquidity Risk Management (LRM) Framework (pursuant to Clause 4.6 of SEBI Master Circular for Mutual Funds dated June 27, 2024, AMFI Best Practice Guidelines Circular dated July 24, 2021, December 3, 2021 and November 13, 2024)	Applicable to all open ended debt schemes except Union Overnight Fund and Union Gilt Fund	The LRM framework defines Liquidity Risk [Liquidity Ratio – Redemption at Risk (LR-RAR) and Liquidity Ratio – Conditional Redemption at Risk (LR-CRaR)] arising from the liability side of the Scheme. LR-RAR is based on the Redemption at Risk concept to represent the likely outflows at a given confidence interval and LR-CRaR is based on the concept of Conditional Redemption at Risk to represent the behaviour of the tail at the given confidence interval. The Scheme shall maintain adequate

		<p>liquidity, as required, by the above two ratios. However, to meet redemptions, the AMC may have to periodically dip into their liquid assets which may result in the liquidity ratio dropping below the required levels on those days.</p> <p>The Scheme shall ensure to take remedial actions in line with the requirement of the referred circulars.</p>
<p>Stress Testing</p> <p>(pursuant to Clause 4.2 of SEBI Master Circular for Mutual Funds dated June 27, 2024 and AMFI Best Practice Guidelines Circular dated October 12, 2022)</p>	<p>Applicable to all open-ended debt schemes except Union Overnight Fund</p>	<p>The Stress Testing exercise addresses the asset side risk from an Interest Rate, Credit and Liquidity Risk perspective at an aggregate portfolio level in terms of its impact on NAV.</p> <p>Stress testing is carried out on a periodical basis. For any breach of the prescribed thresholds, appropriate remedial measures would be taken.</p>
<p>Review of Asset Liability Mis-match under Risk Management Framework</p> <p>(pursuant to Clause 4.1 of SEBI Master Circular for Mutual Funds dated June 27, 2024)</p>	<p>Applicable to all open-ended Schemes</p>	<p>The referred SEBI circular on 'Risk Management Framework (RMF) for Mutual Funds' inter alia prescribes that liquidity risk has to be modelled at the level of each scheme (except schemes that do not have continuous liquidity requirements like close ended and interval schemes) and should display alerts pertaining to asset liability mis-match (ALM) on monthly basis and in line with any other relevant guidelines prescribed.</p> <p>This addresses potential liquidity requirement over a 90-day period and the required relevant asset side liquidity to be maintained.</p>
<p>Swing Pricing</p> <p>(pursuant to Clause 4.10 of SEBI Master Circular for Mutual Funds dated June 27, 2024 read with AMFI Best Practice Guideline No. 135/ BP/96-B/ 2024-25 dated November 04, 2024)</p>	<p>Applicable to all open-ended debt Schemes except Union Overnight Fund and Union Gilt Fund</p>	<p>In case of severe liquidity stress at an AMC level or a severe dysfunction at market level or re-opening of the scheme after announcement of winding up, the Swing Pricing guidelines get triggered.</p> <p>When swing pricing framework is triggered and swing factor is made applicable (in accordance with the disclosures made in the Scheme Information Documents of the respective schemes), applications of both the incoming and outgoing investors shall be processed at applicable NAV adjusted for swing factor.</p>

II. Information about the scheme:

A. Where will the scheme invest

The Scheme shall invest minimum 80% of the total assets in government securities (i.e. Central and State Government securities, Treasury Bills and Cash Management Bills of Government of India). The Scheme may also invest in Call money market or alternative investment for call money market as may be provided by the Reserve Bank of India. The corpus of the Scheme will be invested in securities which will include but are not limited to the following:

1) Central and State Government Securities, Treasury Bills

Securities created and issued by the Central Government and/or a State Government (including Treasury Bills) or Government Securities as defined in the Public Debt Act, 1944, as amended or re-enacted from time to time.

Treasury Bills (T-Bills) are issued by the Government of India or State Governments to meet their short term borrowing requirements. T-Bills are issued for maturities of 91 days, 182 days and 364 days. T-Bills are issued at a discount and for a fixed period.

2) Cash Management Bills (CMB)

Cash Management Bills (CMB) are issued by Government of India to meet the temporary cash flow mismatches of the Government. CMBs are non-standard, discounted instruments issued for maturities less than 91 days. CMBs are issued at discount to the face value through auctions. The settlement of the auction will be on T+1 basis.

3) Call money market or in alternative investment for the call money market as may be provided by the RBI to meet the liquidity requirements (currently Triparty Repo, Reverse Repo in Government Securities and Treasury Bills).

a) Tri-party Repo (TREPS) in Government Securities:

Tri-party Repo means a repo contract where a third entity (apart from the borrower and lender), called a Tri-Party Agent, acts as an intermediary between the two parties to the repo to facilitate services like collateral selection, payment and settlement, custody and management during the life of the transaction. The Scheme shall undertake Tri-party Repo transactions in Government Securities.

b) Reverse Repo in Government Securities:

Reverse Repo is a transaction in which two parties agree to sell and purchase the same security with an agreement to purchase or sell the same security at a mutually decided future date and price. The transaction results in collateralized borrowing or lending of funds. Presently in India, Central Government Securities, State Government securities, T-Bills, corporate debt securities are eligible for Reverse Repo. The Scheme intends to participate in Reverse Repo in Central Government Securities, State Government securities, T-Bills. However, the scheme does not intend to participate in repo/ reverse repo transactions in corporate debt securities.

4) Investments in units of mutual fund schemes

The Scheme may invest in schemes managed by the AMC or in the schemes of any other mutual funds, without charging any fees, in conformity with the investment objective and asset allocation pattern of the Scheme and in terms of the prevailing SEBI (MF) Regulations which requires that the aggregate inter-scheme investment made by all the schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the Net Asset Value of the Mutual Fund.

5) Investment in Short Term Deposits

Pending deployment of funds as per the investment objective of the Scheme and for margin purposes, the funds may be parked in short term deposits of Scheduled Commercial Banks, subject to guidelines and limits specified by SEBI. The AMC shall not charge investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.

Investment in unrated debt instruments shall be subject to complying with the provisions of the Regulations and within the limit as specified in Schedule VII to the Regulations.

The securities / instruments mentioned above and such other securities the Scheme is permitted to invest in could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of any maturity subject to investment limits specified elsewhere in this document.

The Fund Manager reserves the right to invest in such other securities as may be permitted from time to time and which are in line with the investment objectives of the Scheme.

DEBT AND MONEY MARKETS IN INDIA

The Indian debt market is today one of the largest in Asia and includes securities issued by the Government (Central & State Governments), public sector undertakings, other government bodies, financial institutions, banks and corporates. Government and public sector enterprises are the predominant borrowers in the markets. Securities in the debt market typically vary based on their tenure and rating. The major players in the Indian debt markets today are banks, financial institutions, mutual funds, insurance companies, primary dealers, trusts, pension funds and corporates. The Indian debt market is the largest segment of the Indian financial markets. The debt market comprises broadly two segments, viz. Government Securities market or G-Sec market and corporate debt market. The latter is further classified as market for PSU bonds and private sector bonds.

The Government Securities market is the oldest and the largest component of the Indian debt market in terms of market capitalization, outstanding securities and trading volumes. The G-Sec market plays a vital role in the Indian economy as it provides the benchmark for determining the level of interest rates in the country through the yields on the Government Securities which are referred to as the risk-free rate of return in any economy. Over the years, there have been new products introduced by the RBI like zero coupon bonds, floating rate bonds, inflation indexed bonds, etc.

The corporate bond market, in the sense of private corporate sector raising debt through public issuance in capital market, is only an insignificant part of the Indian Debt Market. A large part of the issuance in the non-Government debt market is currently on private placement basis.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), reverse repo transactions (temporary buy with an agreement to sell the securities at a future date at a specified price), commercial papers (CPs, short term unsecured

promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI) and similar securities. In a predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates. In money market, activity levels of the Government and non government debt vary from time to time.

Apart from these, there are some other options available for short tenure investments that include MIBOR linked debentures with periodic exit options and other such instruments. PSU / DFI / Corporate paper with a residual maturity of less than 1 year are actively traded and offer a viable investment option.

Following table exhibits various debt instruments along with current yields as on May 15, 2025:

Instrument	Yield Range
	(% per annum)
Tri – Party Repo	5.55-5.80
Repo	5.55-5.95
91 days T-Bill	5.75-5.77
364 days T-Bill	5.78-5.80
1 month CD/CP	6.50-6.60
3 month CD/CP	6.40-7.00
6 month CD/CP	6.60-7.10
1 year CD/CP	6.70-7.15
1 year Corporate Bond - AAA Rated	6.65-6.75
3 year Corporate Bond - AAA Rated	6.65-6.75
5 year Corporate Bond - AAA Rated	6.70-6.80
5 year G-sec	5.94-5.95
10 year G-sec	6.27-6.30

(Source: Bloomberg, NDS OM and CCIL)

These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing consequent to changes in macro-economic conditions and RBI policy. The price and yield on various debt instruments fluctuate from time to time depending upon the macro economic situation, inflation rate, overall liquidity position, foreign exchange scenario etc. Also, the price and yield vary according to maturity profile, credit risk etc.

B. What are the investment restrictions?

Investment restrictions as contained in the SEBI (MF) Regulations specifically in the Seventh Schedule of the Regulations including any amendments thereto and SEBI circulars issued from time to time are provided below:

1) The Scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorised to carry out such activity under the SEBI Act, 1992. Such investment limit may be extended to 12% of the NAV of the Scheme with the prior approval of the Board of Trustee and the Board of directors of the AMC. This limit applies only to the extent of investments in applicable securities as mentioned under the sub-section 'Where will the scheme invest?'.

Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and triparty repo on Government securities or treasury bills.

Pursuant to Clause 12.8.3 of SEBI Master Circular dated June 27, 2024, within the single issuer limit specified above for debt and money market instruments, the Scheme shall not invest more than:

- a. 10% of its NAV in debt and money market securities rated AAA; or
- b. 8% of its NAV in debt and money market securities rated AA; or
- c. 6% of its NAV in debt and money market securities rated A and below

issued by a single issuer.

The above investment limits may be extended by up to 2% of the NAV of the scheme with prior approval of the Board of Trustees and Board of Directors of the AMC, subject to compliance with the overall 12% limit specified above.

The long-term rating of issuers shall be considered for the money market instruments. However, if there is no long-term rating available for the same issuer, then based on credit rating mapping of Credit Rating Agencies (CRAs) between short term and long-term ratings, the most conservative long-term rating shall be taken for a given short term rating. Exposure to government money market instruments such as TREPS on G-Sec/ T-bills shall be treated as exposure to government securities.

2) The Scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities and other money market instruments.

Provided that the Scheme may invest in unlisted non-convertible debentures up to a maximum of 10% of the debt portfolio of the scheme subject to such conditions as may be specified by SEBI from time to time. Provided further that the Scheme shall comply with the norms under this clause within the time and in the manner as may be specified by SEBI. This limit applies only to the extent of investments in applicable securities as mentioned under the sub-section 'Where will the scheme invest?'.

Provided further that the norms for investments by the Scheme in unrated debt instruments shall be specified by SEBI from time to time.

Pursuant to Clause 12.1 of SEBI Master Circular for Mutual Funds dated June 27, 2024, as may be amended from time to time, the Scheme shall not invest in unlisted debt instruments including commercial papers (CPs), other than (a) government securities, (b) other money market instruments and (c) derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. which are used by mutual funds for hedging. However, the Scheme may invest in unlisted Non-Convertible Debentures (NCDs) not exceeding 10% of the debt portfolio of the scheme subject to the condition that such unlisted NCDs have a simple structure (i.e. with fixed and uniform coupon, fixed maturity period, without any options, fully paid up upfront, without any credit enhancements or structured obligations) and are rated and secured with

coupon payment frequency on monthly basis. This limit applies only to the extent of investments in applicable securities as mentioned under the sub-section 'Where will the scheme invest?'.

For the purpose of provisions of this point, listed debt instruments shall include listed and to be listed debt instruments.

Further, investment in unrated debt and money market instruments, other than government securities, treasury bills, derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. by the Scheme shall be subject to the following:

- a. Investments should only be made in such instruments, including bills re-discounting, usance bills, etc., that are generally not rated and for which separate investment norms or limits are not provided in SEBI (Mutual Fund) Regulations, 1996 and various circulars issued thereunder.
- b. Exposure of the Scheme in such instruments, shall not exceed 5% of the net assets of the Scheme.
- c. All such investments shall be made with the prior approval of the Board of AMC and the Board of trustees and shall be subject to such conditions and requirements as prescribed under Clause 12.1.5 of SEBI Master Circular dated June 27, 2024, as amended by SEBI from time to time.

This limit applies only to the extent of investments in applicable securities as mentioned under the sub-section 'Where will the scheme invest?'.

- 3) Transfers of investments from one scheme to another scheme in the same mutual fund shall be allowed only if, —
 - (a) such transfers are done at the prevailing market price for quoted instruments on spot basis.
