I. INTRODUCTION

A. RISK FACTORS:

Apart from the risk factors mentioned in SAI, following are some of the additional risk factors which investors are advised to go through before investing:

a) STANDARD RISK FACTORS:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- Edelweiss Gold and Silver ETF Fund of Fund is only the name of the Scheme & it does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.1,00,000 made by it towards setting up the Fund.
- The Scheme is not a guaranteed or assured return Scheme.

b) SCHEME SPECIFIC RISK FACTORS:

Investors may please note that they will be bearing the recurring expenses of the relevant Fund of Funds Scheme in addition to the expenses of the underlying schemes in which the Fund of Funds Scheme makes investment.

1. Risks Associated with investing in Fund of Funds scheme

- As the investors are incurring expenditure at both the Fund of Funds level and the scheme into which the Fund of Funds invests, the returns that they may obtain may be materially impacted or may at times be lower than the returns that investors directly investing in such schemes obtain.
- While it would be the endeavour of the Fund Manager of the Fund of Funds scheme to invest in the underlying scheme in a manner, which will seek to maximize returns, the performance of the underlying Scheme may vary which may lead to the returns of the Fund of Funds Scheme being adversely impacted.
- The liquidity of the scheme's investment may be restricted by trading volumes, transfer process & settlement periods. It may also be affected by the liquidity of the underlying ETFs units. The liquidity for gold or silver ETFs units on the exchange may be low. There might be an impact cost for liquidating units on the exchange.
- The Portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying ETFs where the Scheme has invested and will not include the investments made by the underlying ETFs
- The NAV of the scheme shall be determined, based on the closing market price of the underlying ETFs on the exchange(s). In case the underlying ETFs are not traded on any particular business day then the NAV of the scheme shall be derived based on NAV of the underlying ETFs in accordance with valuation policy. Any delay in declaration of NAV of any particular underlying ETFs may result in delay of the computation of the NAV of the scheme.
- The scheme may invest in debt and money market instruments from time to time, as per the Asset Allocation pattern, which will have a different return profile compared to gold and silver returns profile.
- The scheme specific risk factors of the underlying scheme becomes applicable where a Fund of Funds invests in any underlying scheme. Investors who intend to invest in Fund of Funds are required to and are deemed to have read and understood the risk factors of the underlying scheme relevant to the Fund of Funds scheme that they invest in.

2. Risks associated with investing in Tri Party Repo through CCIL (TREPS)

Risk of exposure in the Tri-party Repo settlement Segment provided by CCIL emanates mainly on two counts –

- 1) Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Tri-party Repo transaction.
- 2) Risk of default by a borrower in repayment.

3. RISKS ASSOCIATED WITH INVESTING IN UNDERLYING SCHEMES (AS APPLICABLE):

- **Liquidity Risk:** Trading in units of the ETFs on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange authorities or SEBI, trading in units of the ETFs is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the ETFs will continue to be met or will remain unchanged.
- **Market Risk:** The value of the Units relates directly to the value of the gold and silver held by the underlying ETFs and fluctuations in the price of gold and silver could adversely affect investment value of the Units. Hence the investor may also lose money due to fluctuation in the prices of the Gold.
- **Regulatory Risk:** Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Authorised Participant/Market maker to arbitrage resulting into wider premium/ discount to NAV. Any changes in any other regulation relating to import and export of gold / silver or gold/ silver jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the ETFs to buy/sell gold and silver against the purchase and redemption requests received.
- **Passive Management of Investments:** The underlying ETFs shall follow a passive investment strategy. The performance may be affected by the general price decline in the gold and silver prices. The ETFs shall invest in Gold / Silver regardless of their investment merit.
- **Tracking Error:** Tracking error may have an impact on the performance of the underlying ETFs. Tracking error may be accounted by the various reasons which includes but not limited to expenses, cash balance to meet redemptions, payout, delay in purchase/sale of gold / silver, illiquidity, delay in realization of sale proceeds, buy/sell transactions at different point in time which may not correspond to the closing price, transaction cost (including taxes, insurance etc), creation of lot size etc. The AMC would monitor the tracking error of the underlying ETFs on selection and ongoing basis Tracking error this may vary due to the volatility in the markets and any other reasons beyond the control of the Fund Manager. There can be no assurance or guarantee that the underlying scheme will achieve any particular level of tracking error relative to performance of the benchmark Index
- **Redemption Risk:** Investors may note that even though the underlying ETFs could be an open ended scheme, the ETFs would repurchase units in creation unit size only. Thus, if the unit holding is less than the creation unit size then it can be sold only through the secondary market on the exchange where the units are listed, subject to rules and regulations of the Stock Exchange.
- The market price of the ETFs unit like any other listed security is largely dependent on two factors viz. the intrinsic value of the unit (or NAV) and demand and supply of the units in the market. Sizeable demand or supply of the units in exchange may lead to market price of the units to quote at premium or discount to NAV. And hence the units of the underlying ETFs may trade above or below the NAV.
- The gold and the silver price reflects the prices of gold and silver at a point in time, which is the price at close of business day. The underlying ETFs, however, may trade these securities at different points in time during the trading session and therefore the prices at which ETFs trades may not be identical to the closing price of gold or silver
- **Currency Risk:** The formula for deriving the NAV of the units of the underlying ETFs is based on the imported (landed) value of the gold, which is computed by multiplying international market price by US Dollar value. Hence the value of NAV or Gold or Silver will depend upon the conversion value and attracts all the risk associated with such conversion.
- **Physical Gold / Silver:** There is a risk that part or all of the underlying ETF's gold / silver could be lost, damaged or stolen. Access to the underlying ETF's gold / silver could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the underlying ETFs and consequently on investment in units.
- **Counter party Risk:** There is no Exchange for physical gold / silver in India. The Mutual Fund may have to buy or sell gold / silver from the open market, which may lead to counter party risks for the Mutual Fund for trading and settlement.
- **Operational Risks:** Gold Exchange Traded Funds and Silver Exchange Traded Funds are relatively new products and their value could decrease if unanticipated operational or trading problems arise. These funds are therefore subject to operational risks. In addition, investors should be aware that there is no assurance that gold / silver will maintain its long-term value in terms of purchasing power. In the event that the price of gold / silver declines, the value of investment in Units is expected to decline proportionately.

- The underlying ETFs may not be able to acquire or sell the desired number of units of gold / silver due to conditions prevailing in the market, such as, but not restricted to circuit filters on the ETFs (if any), liquidity and volatility in gold / silver prices
- Governments, central banks and related institutions, own a significant portion of the aggregate world gold holdings. If one or more of these institutions decides to sell in amounts large enough to cause a decline in world gold prices, the price of Units of the underlying ETFs will be adversely affected.
- Conversion of underlying physical gold into the Units of the underlying ETFs may attract capital gain tax depending on acquisition cost and holding period.

4. Risk Factors Associated with Investments by the underlying schemes in Exchange Traded Commodity Derivatives (ETCDs)

- An exchange traded commodity derivative is a derivative instrument that mimics the price movements of an underlying commodity, allowing an investor exposure to the commodity without physical purchase.
- Liquidity Risk: While ETCDs that are listed on an exchange carry lower liquidity risk, the ability to sell these contracts is limited by the overall trading volume on the exchanges. The liquidity of the Schemes' investments is inherently restricted by trading volumes of the ETCD contracts in which it invests. Additionally, change in margin requirements or intervention by government agencies to reduce overall volatility in the underlying commodity could lead to adverse impact on the liquidity of the ETCD.
- Price risk: ETCDs are leveraged instruments hence, a small price movement in the underlying security could have a large impact on their value. Also, the market for ETCDs is nascent in India hence, arbitrages can occur between the price of the physical commodity and the ETCD, due to a variety of reasons such as technical issues and volatile movement in the price of the physical good. This can result in mispricing and improper valuation of investment decisions as it can be difficult to ascertain the amount of the arbitrage.
- Settlement risk: ETCDs can be settled either through the exchange or physically. The inability to sell ETCDs held in the Schemes' portfolio in the exchanges due to the extraneous factors may impact liquidity and would result in losses, at times, in case of adverse price movement. Wherein the underlying commodity is physically delivered in order to settle the derivative contract, such settlement could get impacted due to various issues, such as logistics, Government policy for trading in such commodities

5. RISKS ASSOCIATED WITH INVESTING IN FIXED INCOME SECURITIES

- Market Risk/Interest Rate Risk: The Net Asset Value (NAV) of the underlying Scheme(s), to the extent invested in Debt and Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the underlying Scheme(s) is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates. Liquidity Risk: The liquidity of debt security may change depending on market conditions leading to changes in the liquidity premium linked to the price of the security. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio.
- Credit Risk: Investments in Fixed Income Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.
- Price Risk: Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.

- Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the “interest on interest” component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- Different types of fixed income securities in which the Scheme(s) would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme(s) risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, bonds, which are AAA rated, are comparatively less risky than bonds, which are AA rated.
- The underlying schemes may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.
- As zero coupon securities does not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The underlying schemes may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio
- The underlying schemes at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.
- underlying schemes performance may differ from the benchmark index to the extent of the investments held in the debt segment, as per the investment pattern indicated under normal circumstances.

6. Risks Associated with segregated portfolio

- 1) Unit holder holding units of Segregated Portfolio may not able to liquidate their holdings till the recovery of money from the issuer.
- 2) Portfolio comprising of Segregated Portfolio may not realise any value or may have to be written down.
- 3) Listing of units of Segregated Portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

4. Risk associated with investments in Gold and Silver by underlying schemes

A. Several factors that may affect the price of gold/commodity are as follows

Global gold supplies and demand, which is influenced by factors such as forward selling by gold producers, purchases made by gold producers to unwind gold hedge positions. Productions and cost levels in major gold producing countries can also impact gold prices. Further, Central bank purchases and sales also impact price of Gold. The prices of gold are also affected:-

- Investors’ expectations with respect to the rate of inflation
- Currency exchange rates
- Interest rates
- Investment and trading activities of hedge funds and commodity funds
- Global or regional political, economic or financial events and situations
- Changes in indirect taxes or any other levies
- Demand & supply
- Movement/trade of gold that may be imposed by RBI
- Trade and restrictions on import/export of gold or gold jewellery etc

The returns from gold may underperform returns from the various general securities markets or different asset classes other than gold. Different types of securities tend to go through cycles of out-performance and under-performance in comparison to the general securities markets

The scheme may invest in Gold ETFs. The units may trade above or below their NAV. The NAV of the underlying Scheme will fluctuate with changes in the market value of the holdings. The trading prices will fluctuate in accordance with changes in their NAV as well as market supply and demand. However, given that units of Gold ETFs can be created and redeemed in Creation Units, it is expected that large discounts or premiums to the NAV will not sustain due to arbitrage opportunity available. Value of Gold ETFs Units could decrease if unanticipated operational or trading problems arise.

In case of investment in Gold ETFs, the scheme can subscribe to the units of Gold ETFs according to the value equivalent to unit creation size as applicable. If subscriptions received are not adequate enough to invest in creation unit size, the subscriptions may be deployed in debt and money market instruments which will have a different return profile compared to gold returns profile

B. Several factors that may affect the price of Silver are as follows

Global Silver supplies and demand, which is influenced by factors such as forward selling by Silver producers, purchases made by Silver producers to unwind Silver hedge positions, government regulations, productions and cost levels in major Silver producing countries.

- b) Investors’ expectations with respect to the macro-economic indicators;
- c) Currency exchange rates;
- d) Interest rates;
- e) Investment and trading activities of hedge funds and commodity funds; and
- f) Global or regional political, economic or financial events and situations.
- g) In addition, investors should be aware that there is no assurance that Silver will maintain its long-term value. In the event that the price of Silver declines, the value of investment in units is expected to decline proportionately.
- h) Changes in indirect taxes like custom duties for import, sales tax, VAT or any other levies will have an impact on the valuation of Silver and consequently the NAV of the Scheme.
- i) Demand side and/or supply side constraints in domestic and/or international markets.

4. Risk associated with schemes investing in Gilt securities by underlying schemes

Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in prices is a function of the existing coupon, days to maturity and the increase or decrease in interest rates. Price-risk is not unique to government securities but is true for all fixed income securities. The default risk however, in respect of Government securities is zero. Therefore, their prices are influenced only by movement in interest rates in the financial system. On the other hand, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced by credit standing of the issuer as well as the general level of interest rates.

Even though the Government securities market is more liquid compared to other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.

<p>Liquidity risk The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.</p>	<p>As such the liquidity of securities that the underlying scheme invests into could be relatively low. B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. If either/both of such limit(s) is breached during the NFO of the Scheme, it shall be ensured that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. During the ongoing offer these two conditions shall be complied with on calendar quarter basis, on an average basis, as specified by SEBI. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2) (c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the Units would be redeemed at applicable NAV. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the Applicable Net Asset Value on the 15th day of the notice period. The Mutual Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

In order to track the investor's holding rather than the folio/account's holdings, the fund houses are recommended to track the investors at the master folio/ master account (whatever be the terminology used by the fund houses) level. In addition since there is a possibility of an investor holding multiple accounts, the account is identified for the purpose of aggregation to comply with 20/25 rule by using a common parameter like PAN. Thus, tracking of investor's holding & number of investors may be conducted using a common parameter like PAN, Master Folio/Master Account, since there is possibility of an investor holding multiple accounts. In line with AMFI's suggestion, tracking of investor's holding & number of investors may be conducted using a common parameter like PAN, master folio/master account, since there is possibility of an investor holding multiple accounts. In case of multiple folios, the sequence or the order of the compulsory redemption is left to the discretion of the fund house in consultation with the investor.

Expenses such as distribution expenses, brokerage or commission payable to distributors will not be charged to the investment made via direct investment and hence the Direct Plan will have a lower expense ratio.</p>

Based on the above, the Scheme offers a choice of two plans:

1. Direct Plan; and
2. Regular Plan

Investors subscribing under Direct Plan of the Scheme will have to indicate “Direct Plan” against the Scheme name in the application form i.e. “Edelweiss Gold and Silver ETF Fund of Fund”. Investors should also indicate “Direct” in the ARN column of the application form.

If the application is received incomplete with respect to not selecting Regular/Direct Plan, the application will be processed as under:

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load.

Each Plan under the Scheme offers a choice of two options:

- Growth Option
- IDCW Option

IDCW Option shall have the following facilities:

- Payout of Income Distribution cum capital withdrawal option
- Reinvestment of Income Distribution cum capital withdrawal option

Growth Option: No IDCW will be declared under this Option. Income / profits received / earned on the Scheme’s corpus would be accumulated by the Fund as capital accretion & will remain invested in the Scheme and will be reflected in the Net Asset Value (NAV). Unit holders who opt for this Option will not receive any IDCW in normal circumstances.

IDCW Option (Payout Facility): Under this Option, IDCW will be declared subject to the availability of distributable surplus as computed in accordance with SEBI Regulations. IDCWs, if declared, will be paid (subject to deduction of dividend distribution tax and statutory levy, if any) to those Unit holders, whose names appear in the register of Unit holders on the notified record date. AMC reserves the right to change the record date from time to time. However, it must be distinctly understood that actual declaration of IDCWs and frequency thereof is at the discretion of Board of Trustees. There is no assurance or guarantee to Unit holders as to the rate of IDCW distribution nor that the IDCWs will be declared regularly, though it is the intention of the Mutual Fund to make regular IDCW distribution under the IDCW Option. On payments of IDCWs, the NAV will stand

	<p>reduced by the amount of IDCW paid and the dividend distribution tax, if applicable.</p> <p>IDCW Option (Reinvestment Facility): Unit holders opting for IDCW option may choose to reinvest the IDCWs to be received by them. Under this facility the IDCW due and payable to the Unit holders will be compulsorily and without any further act by the Unit holders, reinvested in the IDCW option at a price based on the prevailing Net Asset Value per Unit on the record date. The Units for the purpose of re-investment will be created and credited to the Unit holder’s account at a price based on the prevailing Ex-Dividend Net Asset Value (NAV derived post declaration of IDCW) per unit on the record date. There shall, however, be no load on the IDCWs so reinvested. In case the selected date for IDCW declaration falls on a holiday/non-Business Day then the next Business Day will be considered.</p> <p>Default Option: Growth Option If the investor does not clearly specify the choice of Option at the time of investing, the Units of the respective Scheme(s) will be allotted in the Growth Option of the Scheme.</p> <p>Default Facility: Reinvestment of Income Distribution cum capital withdrawal option If the investor selects IDCW Option but fails to mention the facility, it will be deemed that the investor has opted for Reinvestment of Income Distribution cum capital withdrawal option facility.</p>
<p>IDCW Policy</p>	<ul style="list-style-type: none"> ● IDCW Distribution Procedure: SEBI Circular lays down the procedure for Declaration of IDCW which clearly says that quantum of IDCW and record date shall be fixed by the Board of Trustees and AMC shall issue a notice to the public communicating the decision about IDCW including the record date, within one calendar day of the decision made by the Board of Trustees in their meeting. <p>Record date shall be the date that will be considered for the purpose of determining the eligibility of investors whose name appears on the register of Unit holders. Equity oriented fund has been defined u/s 112A of Income Tax Act,1961 to mean a fund set up under a scheme of a mutual fund specified under clause (23D) of section 10 and,—

(i) in a case where the fund invests in the units of another fund which is traded on a recognised stock exchange,— (A) a minimum of ninety per cent of the total proceeds of such fund is invested in the units of such other fund; and (B) such other fund also invests a minimum of ninety per cent of its total proceeds in the equity shares of domestic companies listed on a recognised stock exchange; and

(ii) in any other case, a minimum of sixty-five per cent of the total proceeds of such fund is invested in the equity shares of domestic companies listed on a recognised stock exchange.

Further, the percentage of equity shareholding or unit held in respect of the fund, as the case may be, shall be computed with reference to the annual average of the monthly averages of the opening and closing figures.

The Scheme’s corpus shall predominantly be invested in equity and equity related securities including equity derivatives in the Indian and international markets. However, in order to protect its objective of giving absolute returns with low volatility, the Scheme may even invest its corpus largely in debt and money market securities. In such a situation, the Scheme may at any point of time lose its status of an equity oriented Scheme and such conversion may have tax consequences. It may be noted that no prior intimation/indication would be given to investors in such cases.

In such an aforesaid situation, tax provisions of an Equity Oriented Scheme may not be applicable for such a period where the Scheme is not classified as equity oriented Scheme under the Income Tax Act, 1961. Consequently, tax provisions as summarized in table 2 below would be applicable. Investors are requested to examine the asset allocation from time to time for every purchase / transfer / redemption before claiming tax exemptions available for Equity Oriented Schemes.

The Information is provided only for general information purposes. However, in view of the individual nature of the implications, each investor is advised to consult his or her or its own tax advisors/ authorised dealers with respect to the specific amount of tax and other implications arising out of his or her or its participation in the Scheme.
