Money market instrument's includes commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, and any other like instruments as specified by the Reserve Bank of India from time to time

A brief narration of Money Market Instruments is as under:

1. Certificate of Deposits (CDs) is a negotiable money market instrument issued by scheduled commercial banks and select all- India Financial Institutions that have been permitted by the RBI to raise short term resources.
2. Commercial Paper (CPs) is an unsecured negotiable money market instrument issued in the form of a promissory note, generally issued by the corporates, primary dealers and all India Financial Institutions as an alternative source of short term borrowings. They are issued at a discount to the face value as may be determined by the issuer. CP is traded in secondary market and can be freely bought and sold before maturity.
3. Treasury Bills (T-Bills) are issued by the Government of India to meet their short term borrowing requirements. T-

Bills are issued for maturities of 91 days, and 364 days. T-bills are issued at a discount to their face value and redeemed at par.

4. Triparty Repo

5. Securities created and issued by the Central Governments as may be permitted by RBI, securities guaranteed by the Central Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills). Central Government Securities are sovereign debt obligations of the Government of India with zero-risk of default and issued on its behalf by RBI. They form part of Government's annual borrowing programme and are used to fund the fiscal deficit along with other short term and long term requirements. Such securities could be fixed rate, fixed interest rate with put/call option, zero coupon bond, floating rate bonds, capital indexed bonds, Fixed Interest security with staggered maturity payment etc.

The Fund Manager reserves the right to invest in such instruments and securities as may be permitted from time to time and which are in line with the investment objective of the scheme, subject to regulatory approvals if any'.

C. WHAT ARE THE INVESTMENT STRATEGIES:

The Scheme will track CRISIL IBX SDL Index – September 2027 and will use a “passive” or indexing approach to endeavour to achieve scheme's investment objective. Unlike other funds, the scheme will not try to “beat” the market it tracks and do not seek temporary defensive positions when market decline or appear overvalued. The AMC does not make any judgments about the investment merit of a particular security nor will it attempt to apply any economic, financial or market analysis. Indexing eliminates active management risks with regard to over/ underperformance vis-à-vis a benchmark.

Since the scheme is an index fund, the scheme will only invest in the securities constituting the underlying index. However, under certain circumstances the scheme may temporarily hold securities which are not part of the index. For example, including but not limited to the below situations:

1. post allotment of the scheme until full deployment is achieved,
2. the portfolio may hold securities not included in the respective underlying index as result of certain changes in the underlying index such as reconstitution, addition, deletion etc.

The Scheme may also invest a portion of its portfolio in government securities maturing on or before the maturity date of the Scheme, money market instruments including triparty repo and units of liquid mutual fund to manage the liquidity requirement.

Derivatives Strategy:

The Scheme may take exposure to derivatives for hedging and/or non-hedging purpose as permitted by regulations from time to time. Such exposure to derivative instruments will be in line with the investment objective and overall strategy of the scheme.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

For details of derivative strategies please refer SAI.

For details pertaining to Risk Controls Strategies refer Section II of the Scheme Information Document and SAI.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE

The same has been chosen as this Scheme primarily invests in securities which are constituents of **CRISIL IBX SDL Index – September 2027**. Thus, the composition of the aforesaid benchmark is such that it is most suited for comparing performance of the Scheme.

Please refer to our website - <https://www.sbimf.com/offer-document-sid-kim>

In accordance with Regulation 25(16A), the asset management company shall invest such amounts in such schemes of the mutual fund, based on the risks associated with the schemes, as may be specified by the Board from time to time. But the AMC shall not be entitled to charge any management fees on this investment in the scheme. Investments by the AMC will be in accordance with Regulation 25(17) of the SEBI (MF) Regulations, 1996 which states that:

"The asset management company shall not invest in any of its schemes unless full disclosure of its intention to invest has been made in the Offer Document (presently Scheme Information Document), provided that the asset management company shall not be entitled to charge any fees on its investment in the scheme."

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

NAV of the Scheme shall be computed and declared on every business day. The NAV under the Scheme would be rounded off to 4 decimals and Units will be allotted upto four decimal places as follows or such other formula as may be prescribed by SEBI from time to time:

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provision}}{\text{No of Units outstanding under Scheme on the Valuation Date}}$$

NAV will be disclosed in the manner as specified prescribed under SEBI (Mutual Funds) Regulations, 1996. NAV can also be viewed on www.sbimf.com and www.amfiindia.com.

The AMC shall update the NAVs on the website of Association of Mutual Funds in India - AMFI (www.amfiindia.com) by 11.00 p.m. In case of any delay, the reasons for such delay would be explained to AMFI and SEBI by the next

day. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs.

Further, as per SEBI Regulations, the repurchase price shall not be lower than 95% of the NAV.

Illustration on computation of NAV: If the net assets of the Scheme are Rs.10,45,34,345.34 and units outstanding are 10,000,000, then the NAV per unit will be computed as follows: $10,45,34,345.34 / 10,000,000 = \text{Rs. } 10.4534$ p.u. (rounded off to four decimals)

Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

Let's assume that the NAV of a Mutual Fund Scheme on April 01, 2018 is Rs. 10/-.

Purchase of mutual fund units:

The Purchase Price of the Units on an ongoing basis will be same as Applicable NAV.

Purchase Price = Applicable NAV

In the above example, purchase is done on April 01, 2018, when the Applicable NAV = Rs. 10/-
Therefore, Purchase Price = Rs. 10/-

As per existing Regulations, no entry load is charged with respect to applications for purchase / additional purchase of mutual funds units.

Redemption/Re-purchase of mutual fund units

The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any. In case of redemption, the amount payable to the investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)

Say, in the above example the exit load applicable is:

- a. For exit on or before 12 months from the date of allotment – 1.00%
- b. For exit after 12 months from the date of allotment – Nil.

Scenario 1: Redemption is done during applicability of exit load

In case the investor requests for redemption on or before 12 months i.e. on or before March 31, 2019; say December 1, 2018, when the NAV of the scheme is Rs. 12/- and the exit load applicable is 1%, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)
= Rs. 12 * (1-1%) = Rs. 11.88/-

Scenario 2: Redemption is done when the exit load is NIL

In case the investor requests for redemption after 12 months i.e. after March 31, 2019; say April 1, 2019, when the NAV of the scheme is Rs. 12/- and the exit load applicable is NIL, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)
= Rs. 12 * (1-0) = Rs. 12/-

The aforesaid example does not take into consideration any applicable statutory levies or taxes. Accordingly, the redemption amount payable to investor shall further reduce to the extent of applicable statutory levies or taxes.

Note: The aforesaid disclosure has been made pursuant to paragraph 8.1.5 of the SEBI Master Circular for mutual funds dated June 27, 2024

B. NEW FUND OFFER (NFO) EXPENSES

SECTION II

I. Introduction

A. Definitions/interpretation

Please refer the definitions/interpretation as disclosed on our website under: <https://www.sbimf.com/offer-document-sid-kim>

B. Risk factors

Scheme specific risk factors

A. Risks associated with investment in units of mutual fund:

Investment in Mutual Fund Units involves investment risks, including but not limited to risks such as liquidity risk, volatility risk, default risk including the possible loss of principal.

- **Liquidity risk** – The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the right to limit redemptions (including suspending redemptions) under certain circumstances will be in accordance with Paragraph 1.12 of SEBI Master Circular.
- **Volatility risks:** There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification across companies and sectors within PSUs.
- **Default risk** - Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

B. Risks associated with investment in TREPs:

1. **Interest rate risk:** This risk arises from uncertainty in the rate at which cash flows from the securities may be reinvested. While the rate of interest for TREPs remains closely correlated to the repo rate, it also may vary based on inter-bank lending demand & supply. Hence, there remains a risk of rate at which TREPs will get re-invested.
2. **Settlement risk:** Since the settlement for TREPs happens through CCIL, the risk of default from counterparty is limited. However, in case a clearing member fails to honour their settlement obligations, the "Default Waterfall" mechanism is used to make complete the settlement process. As per the waterfall mechanism, 1st step: the defaulter's margins and the defaulter's contribution to the default fund have been appropriated; 2nd step: CCIL's contribution is used to meet the losses; 3rd step: Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Hence, the scheme is subject to the risk of loss to the extent of initial margin and default fund contribution being invoked in the event of failure of any settlement obligations.

C. Debt & money market instruments under the scheme may be subject to the following risks:

1. **Credit risk:** Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuers' ability to meet the obligations.
2. **Liquidity Risk** pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
3. **Interest Rate risk** is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The value of investments will appreciate/depreciate

if the interest rates fall/rise. However, if the investments are held on till maturity of the investments, the value of the investments will not be subjected to this risk.

4. **Reinvestment risk:** This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
5. **Performance Risk:** Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
6. **Prepayment Risk:** The Scheme may receive payment of monthly cashflows earlier than scheduled, which may result in reinvestment risk.
7. **Market Risk:** Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities.
8. The Net Asset Value (NAV) of the Scheme, to the extent invested in Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

D. Risks associated with investing in State Development Loans (SDL)

Market Liquidity risk with fixed rate SDL, even though the SDL market is relatively liquid when compared to other corporate bond instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by state governments undergo any adverse changes. Interest Rate risk associated with SDL - while SDL generally carry relatively minimal credit risk since they are issued by the respective State Governments, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is, however, not unique to SDL, it exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.

E. Risks associated with investing in Government of India Securities:

Market Liquidity risk with fixed rate Government of India Securities even though the Government of India Securities market is more liquid compared to other debt instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by Reserve Bank of India undergo any adverse changes. Interest Rate risk associated with Government of India Securities - while Government of India Securities generally carry relatively minimal credit risk since they are issued by the Government of India, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is not unique to Government of India Securities. It exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.

F. Tracking Difference Risk:

The Fund Manager may not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the scheme, corporate actions, cash balance, changes to the underlying index and regulatory policies which may affect AMC's ability to achieve close correlation with the

underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index. Tracking Difference is the Difference of returns between the Scheme and the Benchmark Index annualized over 1 year, 3 Year, 5 Year, 10 year and Scheme Since Inception period. It will be the endeavor of the fund manager to keep the tracking difference as low as possible. Tracking Difference shall be disclosed only if the scheme has completed 1 year period. The Fund must maintain a Tracking Difference of not more than 1.25% on a 1 year basis. If the tracking difference over one year period for Debt ETFs/ Index Funds is higher than 1.25%, the same shall be brought to the notice of trustees with corrective actions taken by the AMC, if any. Tracking difference is to be disclosed on a monthly basis on www.sbimf.com and AMFI website.

G. Tracking Error Risk

The Fund Manager may not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance, changes to the underlying index and regulatory policies which may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index. Tracking error of the scheme is calculated using standard deviation of difference of daily returns between the scheme and the underlying index annualized over 1 Year Period.

H. Passive Investments

As the scheme proposes to invest not less than 95% of the net assets in the securities of the underlying Index, the scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select securities or to take defensive positions in declining markets.

I. Concentration Risk

The scheme will predominantly invest in SDLs and may have limited or no diversification to any other types of fixed income securities within its portfolio. This could have implications on the performance of the scheme. The scheme may be more sensitive to economic, business, political or other changes that may directly impact the SDL spreads etc. and this may lead to sizeable fluctuation in the Net Asset Value of the scheme.

J. Risks associated with segregated portfolio

Different types of securities in which the scheme would invest carry different levels and types of risk as given in the Scheme Information Document of the scheme. In addition to the same, unitholders are requested to also note the following risks with respect to Segregated Portfolio: Investor holding units of segregated portfolio may not be able to liquidate their holding till the time there is recovery of money from the issuer. Listing of units of segregated portfolio in recognized stock exchange does

not necessarily guarantee their liquidity, as there may not be active trading of units in the stock market. Further trading price of units on the stock market may be at a significant discount compared to the prevailing NAV. Securities which are part of the segregated portfolio may or may not recover any money, either fully or partially.

K. Right to Limit Redemptions

The Trustee, in the general interest of the unit holders of the underlying scheme and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of units which can be redeemed on any business day depending on the total "Saleable Underlying Stock" available with the fund. For details, refer Section on 'Right to limit Redemption'

L. Asset Class Risk

The returns from the types of securities in which the scheme invest may underperform returns of general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison of securities markets.

M. Risks associated with Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in which case the securities might go in for auction. In the event of exceptional circumstances resulting in non-availability of securities in auction, such transactions would be financially closed-out at appropriate rates as per exchange regulations. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned.

C. RISK MITIGATION STRATEGIES:

The scheme aims to track the CRISIL IBX SDL Index – September 2027 before expenses. The index is tracked on a regular basis and changes to the constituent, if any, are replicated in the portfolio with the purpose of minimizing tracking error.

Investments in debt, Money market instruments carry various risks such as inability to sell securities, interest rate risk, liquidity risk, default risk, reinvestment risk etc.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For risk control, the following may be noted:

Liquidity risks:

Securities in the underlying index are selected by applying liquidity as one of the criteria and hence the portfolio of CRISIL IBX SDL Index – September 2027 Index is reasonably liquid. Liquidity issues in the scheme are not envisaged.

Interest Rate Risk:

Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk.

Volatility risks:

This being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus, there is no additional element of volatility or stock concentration on account of fund manager decisions. The fund manager would endeavor to keep cash levels at the minimal to control tracking error.

Segregation of Portfolio:

Creation of segregated portfolio shall be subject to following guidelines specified by SEBI as per Paragraph 4.4 of Master Circular for Mutual Funds dated June 27, 2024 and subsequent circulars issued by SEBI from time to time:

The term 'segregated portfolio' shall mean a portfolio, comprising of debt or money market instrument affected by a credit event that has been segregated in a Mutual Fund Scheme and the term 'main portfolio' shall mean the

Scheme portfolio excluding the segregated portfolio and the term 'total portfolio' shall mean the Scheme portfolio including the securities affected by the credit event.

Segregated portfolio will be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

- Downgrade of a debt or money market instrument to 'below investment grade, or
- Subsequent downgrades of the said instruments from 'below investment grade, or
- Similar such downgrades of a loan rating.

In case of difference in rating by multiple CRAs, the most conservative rating will be considered.

Creation of segregated portfolio will be based on issuer level credit events as mentioned above and implemented at the ISIN level.

PROCESS:

The recommendation of creating the segregated portfolio needs to be approved by the Board of AMC & Trustee. Further, the AMC shall immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. The AMC will also disclose that the segregation shall be subject to trustee approval.

Additionally, the said press release will be prominently disclosed on the website of the AMC.

The AMC will ensure that till the time the trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.

Post approval process:

Once AMC & trustee approval is received by SBIFML:

1. Segregated portfolio shall be effective from the day of credit event
2. SBIFML shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.
3. An e-mail or SMS should be sent to all unit holders of the concerned scheme.
4. The NAV of both segregated and main portfolio shall be disclosed from the day of the credit event.
5. All existing investors in the scheme as on the day of the credit event shall be allotted equal number of units in the segregated portfolio as held in the main portfolio.
6. No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.
7. If the AMC Board/ trustees do not approve the proposal to segregate portfolio, AMC shall issue a press release immediately informing investors of the same.

Security Valuation and processing of subscriptions and redemptions:

1. The valuation of any security sought to be segregated will be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder and shall be in line with the valuation policy, which would be either external valuation prices or hair cut based valuation as applicable.

The valuation price may deviate from the above based on adequate reasons and necessary disclosure as required by the SEBI guidelines.

2. All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing circular on applicability of NAV. However, in case of segregated portfolio, applicability of NAV will be as under:

- Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
- Investors subscribing to the Scheme will be allotted units only in the main portfolio based on its NAV

Disclosure requirements:

A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event will be communicated to the investors

within 5 working days of creation of the segregated portfolio. Further, adequate disclosure of the segregated portfolio will also appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the Scheme. Further, the NAV of the segregated portfolio will be declared on daily basis.

The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc. The scheme performance required to be disclosed at various places will include the impact of creation of segregated portfolio. The scheme performance will clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, will be disclosed as a footnote to the scheme performance. These disclosures regarding the segregated portfolio will be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.

The investors of the segregated portfolio will be duly informed of the recovery proceedings of the investments of the segregated portfolio and status update will be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Total Expense Ratio (TER) for the segregated portfolio

SBIFML shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.

The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.

The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by SBIFML.

The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Monitoring by Trustees

In order to ensure timely recovery of investments of the segregated portfolio, Trustees will ensure that, the SBIFML puts in sincere efforts to recover the investments of the segregated portfolio. Upon recovery of money, whether partial or full, it will be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio. Further, an Action Taken Report (ATR) on the efforts made by the SBIFML to recover the investments of the segregated portfolio will be placed in every Trustee meeting till the investments are fully recovered/ written-off.

The Trustees will monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, trustees will ensure that there is a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme. Creation of segregated portfolio will be optional and at the discretion of the AMC.

Illustration of impact of Portfolio Segregation on scheme and its investors:

Before Segregation:

Total Portfolio	Regular Plan	Direct Plan
Net Asset (a)	500	200
Units (b)	20.00	10.00
NAV per Unit (c = a/b)	25.00	20.00

Assumptions:

The above portfolio has a security XYZ with current market value on the date of segregation of Rs 70 which has been downgraded below investment grade or has defaulted. Post splitting the Total portfolio into Main portfolio and Segregated portfolio, the impact will be as below:

After Segregation:

Main Portfolio	Regular Plan	Direct Plan
Net assets before segregation (a)	500	200
Market Value of Security XYZ (b)	50.00	20.00
Net assets after segregation (c = a – b)	450.00	180.00
Units (d)	20.00	10.00
NAV per unit (c/d)	22.500	18.000

Segregated Portfolio	Regular Plan	Direct Plan
Net Assets* (a)	50.00	20.00
Units (b)	20.00	10.00
NAV per Unit (c = a/b)	2.50	2.00

(*equivalent of market value of segregated security)

For existing investors, the total portfolio will decline by the amount which is segregated (i.e. value of main portfolio after segregation). They will be allotted equal number of units in the main portfolio and the segregated portfolio in the same proportion as held by them in the total portfolio. Thereafter, existing investors can redeem from the main portfolio based on the prevailing NAV and they will continue to hold units in the segregated portfolio. For any new investor, they will be allotted units only in the main portfolio based on the prevailing NAV. NAV of the segregated portfolio may undergo a change on the future depending on any recovery and any applicable haircut.

2. Commercial Paper (CPs) is an unsecured negotiable money market instrument issued in the form of a promissory note, generally issued by the corporates, primary dealers and all India Financial Institutions as an alternative source of short term borrowings. They are issued at a discount to the face value as may be determined by the issuer. CP is traded in secondary market and can be freely bought and sold before maturity.
3. Treasury Bills (T-Bills) are issued by the Government of India to meet their short term borrowing requirements. T-Bills are issued for maturities of 91 days, and 364 days. T-bills are issued at a discount to their face value and redeemed at par.

DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Portfolio Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks), Treasury Bills (issued by RBI) and the Triparty Repo.

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and TREPS are guaranteed and done by a central counterparty, the Clearing corporation of India (CCIL). Money market deals involving CD's and CP's are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE (ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments as on May 08, 2025:

Instruments	Indicative yield range
Overnight rates	5.75-5.80
90 day Commercial Paper	6.70-6.75
91-day T-bill	5.87-5.89
1 year G-Sec	5.85-6.00
5 year G – Sec	6.12-6.17
10 year G-Sec	6.35-6.37
1 year AAA Bond	6.80-6.85
5 year AAA Bond	6.98-7.03

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally, when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP's and CD's which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments

D. Index methodology (for index funds, ETFs and FOFs having one underlying domestic ETF)-

ABOUT THE INDEX:

Index objective: Seeks to track the performance of liquid SDL issuers with total outstanding greater than Rs. 5,000 crores.

Index Features:

State issuers with a minimum outstanding of Rs. 5,000 crores, having the security with highest liquidity.

Securities Selection Methodology

Issuer Selection:

1. All states with issuances in maturing in the eligible period will be shortlisted
2. 10 most liquid issuers based on liquidity score as evaluated during the index inception date with minimum total outstanding of Rs.5000 crores will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected.
3. Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

1. For each issuer selected, most liquid security based on liquidity score in the previous quarter as evaluated during the index inception date will be selected. Securities maturing in eligible period before the target date, with minimum amount outstanding of Rs. 1000 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.

2. UDAY bonds will be excluded

Weighing Approach:

1. Weights to the issuers will be divided equally as on the base date of the index. The weights may vary on account of relative price movements

2. Weights will be reset during every rebalancing

Rebalancing and Downgrade:

1. The index constituents will be reviewed on semi annually basis.

2. If any issuer becomes eligible, it will be added during the rebalancing, and the weights will be reset.

3. If the total number of SDL issuers fall below 10, when issuers are excluded due to any reason, new issuers will be added as per the criteria stated above.

4. Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights

5. As the index includes securities that shall mature during the 6 month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach -

- The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer and maturing on or just before the index maturity date.
- In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
- In case due to any reason it is not possible to reinvest as per the above criteria, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
- If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

The effective date of the above rebalancing shall be first working day of the month or the quarter.

Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on a unplanned market off, will mature on the next working day.'

Index Termination

The index shall mature on September 30, 2027
