This will be subject to single issuer limit in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by provision 3.5 of SEBI Master Circular on Mutual Funds dated June 27, 2024
- b. In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to single issuer limit in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by provision 3.5 of SEBI Master Circular on Mutual Funds dated June 27, 2024
- c. In case due to any reason, it is not possible to meet any norms as prescribed by provision 3.5 of SEBI Master Circular on Mutual Funds dated June 27, 2024, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.

2. Other debt securities /instruments in consistent with waterfall approach as mentioned earlier.
3. Money market instrument
4. Short term deposit of the schedule commercial banks

C. WHAT ARE THE INVESTMENT STRATEGIES

Tata Nifty G-Sec Dec 2029 Index Fund is a passively managed debt index fund which will employ an investment approach designed to track the performance of Nifty G-Sec Dec 2029 Index. The Scheme seeks to achieve this goal by investing in securities constituting the underlying Index in same proportion as in the Index. The Scheme will invest at least 95% of its total assets in the securities comprising the Underlying Index.

Tracking Error

Tracking error is a measure of the difference in returns from the Scheme and the returns from the index. It is computed as the standard deviation of the difference between the daily returns of the underlying benchmark and the NAV of the Scheme on an annualized basis.

Tracking error could be the result of a variety of factors including but not limited to:

- Delay in the purchase or sale of stocks within the benchmark due to:
 - i) Illiquidity in the instruments,
 - ii) Delay in realisation of sale proceeds,
- The scheme may buy or sell instruments comprising the index at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
- The potential for trades to fail, which may result in the Scheme not having acquired the stocks at a price necessary to track the benchmark price.
- The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
- Investment in Debt and money market instruments to meet redemption / other liquidity requirements
- Addition or Removal of stocks from the index-by-index service provider
- Disinvestments to meet redemptions, recurring expenses, income distribution cum capital withdrawal payouts etc.
- Execution of large buy / sell orders
- Transaction cost and recurring expenses
- Delay in realisation of Unit holders' funds
- Levy of margins by exchanges

The Scheme will endeavor to minimise the tracking error by:

- Rebalancing of the portfolio.
- Setting off incremental subscriptions against redemptions.

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error is expected to be about 2% p.a. However, in abnormal market circumstances, the tracking error may exceed the above limits. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

Portfolio Turnover Policy

Being index fund, the fund Manager will follow passive strategy while investing. The portfolio turnover is expected to be in line with the volume of subscription and redemption in the scheme.

"Portfolio Turnover" is the term used by any Mutual Fund for measuring the amount of trading that occurs in a Fund's portfolio during the given period of time. As the scheme is an open ended equity scheme, it is expected that there would be a number of subscriptions and repurchase on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. However, a high turnover would not significantly affect the brokerage and transaction costs. The Fund will endeavor to balance the increased cost on account of higher portfolio turnover with the benefits derived thereof. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of arbitrage opportunities that exist for scrips/securities held in the portfolio rather than an indication of a change in Fund view on a scrip, etc.

Portfolio Turnover Ratio: 0.03 Times as on 30th September, 2025 (for 13 months).

Risks associated with Debt/Money Markets Instruments

Interest Rate Risk

As with money instruments, changes in interest rate may affect the price of the money market instrument(s) and ultimately Scheme's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e., the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the scheme is reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Liquidity or Marketability Risk

This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.

Pre-payment Risk

Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.

Risk associated with potential change in Tax structure

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

Risk associated with Transaction in Units through Stock Exchange

In respect of transactions in Units of the Scheme through NSE and/or BSE or any other recognized stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognized exchange in this regard.

Risks associated with Segregated Portfolio

- Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. Security comprises of segregated portfolio may not realise any value.
- Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus, reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Risks associated with investment in units of domestic mutual fund:

Investment in Mutual Fund Units involves investment risks, including but not limited to risks such as liquidity risk, volatility risk, default risk including the possible loss of principal.

Liquidity risk – The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the right to limit redemptions will be in accordance with provision 1.12 of SEBI Master Circular on Mutual Funds dated June 27, 2024 on Restriction on Redemption in Mutual Funds. .

Volatility risks: There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification across companies and sectors.

Default risk - Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

C. Risk mitigation strategies:**Risk mitigation measure for debt & related investments:**

The scheme is passive fund. The scheme will invest in securities which are part of Nifty G-Sec Dec 2029 Index. Portfolio of the Scheme is subject to same risk as that of constituents of the underlying interest i.e., interest rate risk, credit risk and liquidity risk. Since scheme follows passive strategy, these risks are inherent and not in the control of the fund manager. From investor point of view, interest risk & liquidity risk can be mitigated if units of the scheme are held till the target maturity date of the scheme.

Overview of Debt Market & Money Market:

The major players in the Indian Debt Markets are banks, financial institutions, insurance companies and mutual funds. The instruments in the market can be broadly categorized as those issued by corporate, banks, financial institutions and those issued by state/central governments. The risk associated with any investments are – credit risk, interest rate risks and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The liquidity risk in corporate securities market is higher compared to those of government securities. The liquidity risk in corporate securities market is higher compared to those of government securities. Liquidity in the corporate debt market has been improving due to the entry of more players and due to various measures taken by the regulators to increase the liquidity and transparency such as introduction of repo in corporate bonds, Credit Default Swaps, compulsory reporting of secondary market OTC transactions on exchange platforms to name a few. Moreover, the recent successful introduction of Interest Rate Future in the benchmark 10 year Government Bond will also likely to increase the depth in the debt market.

The market participants in the corporate debt and gilt markets are banks, financial institutions, mutual funds, corporates, insurance companies, FIs, primary dealers and provident funds. The main debt instruments in the market are those issued by Corporates and State/Central Governments. Corporate papers carry credit risk while government securities are believed to carry no credit risk. The main risks with investments in debt securities are interest rate risk, credit risk and liquidity risk. Interest rate risk associated with debt instruments depend on the macroeconomic environment. It includes both market price changes due to change in yields as well as coupon reinvestment rate risk. Corporate papers carry higher liquidity risk as compared to gilts due to the depth of the gilt market.

Money market encompasses a wide range of instruments with maturities ranging from one day to a year, issued by Government, Banks and corporates etc and traded in markets of varying liquidity. The risk associated with any investments are – credit risk, interest rate risk and liquidity risk. However, such risks are lower in case of money market instruments compare to other debt instruments. Further, within the gamut of money market instruments as available in the market, such risks are very low in case of instruments issued by government. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk.

The HIRE Act includes Foreign Account Tax Compliance Act (FATCA), which now forms a part of the US-IR Code. The regulations for FATCA have undergone revision since 2010 and the final regulations make the FATCA provisions effective from July 1, 2014.

- i. US taxpayers about certain foreign financial accounts and offshore assets.

Foreign Financial Institutions (FFIs) about financial accounts with them of US taxpayers or foreign entities in which US taxpayers hold substantial ownership interest.

CIR/MIRSD/2/2014 dated June 30, 2014, has advised that Government of India and US Government have reached an agreement in substance on the terms of an Inter-Governmental Agreement (IGA) to implement FATCA and India is now treated as having an IGA in effect from April 11, 2014. Tata Asset Management Private Limited (TAMPL) is classified as a Foreign Financial Institution (FFI) under the FATCA provisions and in accordance therewith, the AMC would be required to comply with the rules & regulations of FATCA, from time to time.

Common Reporting Standard (CRS)

On similar lines of FATCA, the Organization of Economic Development (OECD), along with the G 20 countries, of which India is a member, has released a 'Standard for Automatic Exchange of Financial Account Information in Tax matters'. In order to combat the problem of offshore tax evasion and avoidance and stashing of unaccounted money abroad, the G 20 & OECD countries have together developed a common reporting standard(CRS) on automatic exchange of information(AEOI). On June 3,2015 India has joined the Multilateral Competent Authority Agreement(MCAA) on AEOI. The CRS on AEOI requires the financial institutions of the 'source' jurisdiction to collect and report information to their tax authorities about account holders 'resident' in other countries. The information to be exchanged relates not only to individuals, but also to shell companies and trusts having beneficial ownership or interest in the 'resident' countries.

In view of India's commitment to implement the CRS on AEOI and also the IGA with USA and with a view to provide information to other countries necessary legislative changes has already been made in Finance Act & by inserting Rules 114F to 114H and Form 61B to provide a legal basis for the Reporting Financial Institutions (RFIs) for maintaining and reporting information about the reportable accounts.

• **Provisions in relation to segregated portfolios of a mutual fund scheme are as follows –**

In section 2 in clause (42A) of the Income-tax Act, 1961 the following amendment has been made "(hh) in the case of a capital asset, being a unit or units in a segregated portfolio referred to in sub-section (2AG) of section 49, there shall be included the period for which the original unit or units in the main portfolio were held by the assessee;".

In section 49 of the Income-tax Act, 1961 after sub-section (2AF), the following has been inserted, namely:—

(2AG) The cost of acquisition of a unit or units in the segregated portfolio shall be the amount which bears, to the cost of acquisition of a unit or units held by the assessee in the total portfolio, the same proportion as the net asset value of the asset transferred to the segregated portfolio bears to the net asset value of the total portfolio immediately before the segregation of portfolios.

(2AH) The cost of the acquisition of the original units held by the unit holder in the main portfolio shall be deemed to have been reduced by the amount as so arrived at under sub-section (2AG).

Explanation– For the purposes of sub-section (2AG) and sub-section (2AH) of section 49, the expressions "main portfolio", "segregated portfolio" and "total portfolio" shall have the meanings respectively assigned to them in provision no. 4.4 of SEBI Master circular on Mutual Fund dated May 19, 2023, issued by the Securities and Exchange Board of India under section 11 of the Securities and Exchange Board of India Act, 1992.

Clause(42A) of section 2 defines the expression "short term capital asset" to be a capital asset held by an assessee for not more than twenty-four months immediately preceding the date of its transfer.

-Provided that in the case of a security listed in a recognized stock exchange in India, the provisions of this clause shall have effect as if for the words "twenty-four", the words "twelve months" had been substituted:

If the unit or units in a segregated portfolio are held for twenty-four months or less from the original date of acquisition of units in the Main portfolio then the same will constitute 'short term capital assets' and any capital gains arising therefrom shall be considered as 'short term capital gain'. On the contrary, if the unit or units in a segregated portfolio are held for more than twenty-four months from the original date of acquisition of units in the Main portfolio then the same will constitute 'long-term capital assets' and any capital gains arising therefrom shall be considered as 'long term capital gain'.

However, the allotment of units in a segregated portfolio of a mutual fund scheme shall not be considered as 'Transfer' under section 47 of the Income-tax Act, 1961. These amendments are applicable from AY 2020-21.

Example:

Suppose Mr. X had invested in a scheme of a mutual fund on 01-01-2015 when the NAV was Rs. 10. On May 1, 2019, when NAV of the scheme was Rs. 20, segregation of portfolio was created due to a credit event.

Post creation of the segregated portfolio, the NAV of the main portfolio was Rs. 16 and the segregated portfolio was Rs 4. Hence, the proportion is 80:20 of the total portfolio. The cost of acquisition of the main portfolio and the segregated portfolio should be taken as Rs. 8 and Rs. 2 respectively. Similarly, the period of holding of the units of the main portfolio and the segregated portfolio should be reckoned from 1st January 2015.

The information stated above is based on Tata Mutual Fund understanding of the tax laws and only for the purpose of providing general information to the unit holders of the schemes.
