The scheme will invest in stocks comprising the Nifty 50 Index in the same proportion as in the Index with the objective of achieving returns equivalent to the Total Returns Index of Nifty 50 Index by minimizing the performance difference between the benchmark index and the scheme.

The Total Returns Index is an index that reflects the returns on the index from index gain/ loss plus dividend payments by the constituent stocks.

The Scheme will invest in the securities constituting the Underlying Index. However, due to changes in Underlying Index the scheme may temporarily hold securities which are not part of the index. For instance, the portfolio may hold securities not included in the Underlying Index as result of certain changes in the Underlying Index such as reconstitution, addition, deletion etc.

The fund manager's endeavour would be to rebalance the portfolio in order to replicate the Index; however, there may be a short period where the constituents of the portfolio may differ from that of the Underlying Index.

Rebalancing due to Short Term Defensive Consideration:

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations as per SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 4, 2021, and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.

Rebalancing due to Passive Breaches

Further, as per SEBI Circular no. SEBI/HO/IMD/IMD-II DOF3/P/CIR/2022/39 dated March 30, 2022, as may be amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Scheme within 30 Business Days. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in SEBI circular dated March 30, 2022.

Securities Lending by the Fund

The scheme shall engage in securities lending for equity investments, in line with the SEBI (Mutual Funds) Regulations, 1996, Securities Lending Scheme, 1997, and Paragraph 12.11, 12.11.2.1.b of SEBI Master circular on Mutual Funds dated May 19, 2023 notifying framework for lending of securities and such other applicable guidelines as may be amended from time to time In accordance with the Regulations and applicable guidelines, the Fund may engage in stock lending activities. The Securities will be lent by the Approved Intermediary against collateral received from borrower, for a fixed period of time, on expiry of which the securities lent will be returned by the borrower. It may be noted that this activity would have the inherent

probability of collateral value drastically falling in times of strong downward market trends, resulting in inadequate value of collateral until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and /or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can also be temporary illiquidity of the securities that are lent out and the scheme may not be able to sell such lent out securities.

Portfolio Turnover:

Portfolio Turnover is defined as the aggregate of purchases and sales as a percentage of the corpus during the specified period of time. Portfolio Turnover is a term used to measure the volume of trading that occurs in a Scheme's portfolio during a given time period. Navi ELSS Tax Saver Nifty 50 Index Fund is a passively managed open-ended index scheme. It is therefore expected that there would be a number of subscriptions and redemptions on a daily basis. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in Navi ELSS Tax Saver Nifty 50 Index Fund.

There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, it is difficult to estimate with reasonable measure of accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The performance of the Scheme will be benchmarked with NIFTY 50 TRI Index.

Justification for use of benchmark

Nifty 50 TRI Index is a broad-based index and its composition represents the Scheme's investment universe. The composition of the benchmark is such that they are most suited for comparing performance of the Scheme.

The Trustee/ AMC reserves the right to change the benchmark in the future for measuring performance of the scheme subject to SEBI (MF) Regulations, and other prevailing guidelines and shall be subject to prior approval of the Board and the unitholders.

In terms of the Paragraph 3.4 of SEBI Master circular on Mutual Funds dated May 19, 2023, the Index shall comply with the following portfolio concentration norms:

- a) The Index shall have a minimum of 10 stocks as its constituents.
- b) No single stock shall have more than 25% weight in the index.
- c) The weightage of the top three constituents of the Index, cumulatively shall not be more than 65% of the Index.
- d) The individual constituent of the Index shall have a trading frequency greater than or equal to 80% and an average impact cost of 1% or less over previous six months.

The Scheme shall monitor compliance with the aforesaid norms by the Index at the end of every calendar quarter. Further, the updated constituents of the Index shall be made available on the website of the Fund. The Trustee reserves the right to change the benchmark for the evaluation of the performance of the Scheme from time to time, keeping in mind the investment objective of the Scheme and the appropriateness of the benchmark, subject to the Regulations and other prevalent guidelines.

vi. Investments of AMC in the Scheme – Please visit website <https://navi.com/mutual-fund>.

The AMC may invest in the Scheme(s) anytime during the continuous offer period subject to the SEBI (MF) Regulations. The AMC may also invest in existing schemes of the Mutual Fund. As per the existing SEBI (MF) Regulations, the AMC will not charge Investment Management and Advisory fee on the investment made by it in the Scheme(s) or existing Schemes of the Mutual Fund.

Subject to Regulation 25(16A) of the SEBI (Mutual Funds) Regulations, 1996 read with paragraph 6.9 of SEBI Master Circular dated May 19, 2023, the AMC shall invest such amounts in such schemes of the mutual fund, based on the risks associated with the schemes, as may be specified by SEBI from time to time. Such investment shall be maintained at all times and shall not be redeemed unless the scheme is wound up.

PART III- OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per Unit of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation day. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time. In case of any conflict between the Principles of Fair Valuation and valuation guidelines specified by SEBI, the Principles of Fair Valuation shall prevail.

The Net Assets Value (NAV) of the Units under the Scheme shall be calculated as shown below:

$$\begin{array}{rclcl} \text{NAV (Rs.)} = & \text{Market or Fair} & & \text{Current Assets} & & \text{Current Liabilities} \\ & \text{Value of Scheme's} & + & \text{including Accrued} & - & \text{and Provisions} \\ & \text{Investments} & & \text{Income} & & \\ & & & & & \\ & \text{-----} & & & & \\ & \text{No. of Units outstanding under Scheme on the Valuation Day} & & & & \end{array}$$

The NAV shall be calculated up to four decimal places. However the AMC reserves the right to declare the NAVs up to additional decimal places as it deems appropriate. Separate NAV will be calculated and disclosed for each Option. The NAVs of the Growth Option and the Dividend Option will be different after the declaration of the first Dividend.

The NAVs will be calculated for all the Business days.

Pursuant to Regulation 49 (3) the repurchase Price of the units of an open ended scheme will not be lower than 95% of the NAV. Any imposition or enhancement of Load in future shall be applicable on prospective investments only.

Illustration on Computation of NAV: If the net assets of the Scheme are Rs. 10,55,55,000.00 and units outstanding are 1,00,00,000 then the NAV per unit will be computed as follows: $10,55,55,000.00 / 1,00,00,000 = \text{Rs. } 10.5555$ per unit.

Ongoing price for Redemption (sale) /Switch outs (to other schemes/plans of the Mutual Fund) by Investors.

Ongoing price for redemption /Switch out (to other Schemes/Plans of the Mutual Fund) is the price which a Unit holder will receive for redemption/Switch-outs. During the continuous offer of the Scheme, the Unit holder can redeem the Unit at Applicable NAV,

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to **SAI**.

Section II

I. Introduction

A. Definitions/interpretation

For detailed description please refer <https://navi.com/mutual-fund/downloads/statutory-disclosure>

B. Risk factors

Scheme Specific Risk Factors

Tracking Error Risk: The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance and changes to the underlying index and regulatory restrictions, lack of liquidity which may result in Tracking Error. Hence it may affect AMC's ability to achieve close correlation with the underlying index of the Scheme. The Scheme's returns may therefore deviate from its underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the Scheme. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible.

Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the Nifty 50 Index or one or more securities covered by / included in the Nifty 50 and may arise from a variety of factors including but not limited to:

1. Any delay in the purchase or sale of securities due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of dividend, etc.
2. The index reflects the prices of securities at a point in time, which is the price at close of business day on the stock exchange. The scheme, however, may trade the securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be 10 identical to the closing price of each scrip on that day on the respective stock exchange. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance from the closing price considered in the Index.
3. The potential of trades to fail may result in the scheme not having acquired the security at the price necessary to mirror the index
4. Transaction and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees.
5. Being an open-ended passive scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet on going redemptions.
6. The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to circuit filters in the securities, liquidity and volatility

in security prices. The tracking error of the scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. The Scheme will disclose the tracking error based on past one year rolling data, on a daily basis, on the website of AMC and AMFI. In case the Scheme has been in existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data.

Tracking Difference: The tracking difference i.e. the annualized difference of daily returns between the index and the NAV of the Scheme will be disclosed on the website of the AMC and AMFI, on a monthly basis, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units.

Risks associated with Equity and Equity Related Instruments:

Equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as price volatility, volumes traded, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issued under the Scheme may be adversely affected.

Equity and Equity Related Instruments listed on the stock exchange carry lower liquidity risk; however the Scheme's ability to sell these investments is limited by the overall trading volume on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, if there is a subsequent decline in the value of securities held in the Scheme's portfolio.

Investments in equity and equity related instruments involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

Risks associated with Fixed Income Securities:

Interest-Rate Risk: Fixed income securities such as government bonds, corporate bonds and Money Market Instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.

Re-investment Risk: Investments in fixed income securities carry re-investment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

Basis Risk: The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Liquidity Risk: The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.

Credit Risk: This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Settlement Risk: Corporate Bond Repo will be settled between two counterparties in the OTC segment unlike in the case of TREPS transactions where CCIL stands as central counterparty on all transactions (no settlement risk). Settlement risk in reverse repo will be mitigated by requiring the counterparty (entity borrowing funds from the Mutual Fund) to deliver the defined collateral in the account of the MF before the cash is lent to the counterparty. Further, the Mutual Fund will also have a limited universe of counterparties comprising of Scheduled Commercial Banks, Primary Dealers, Mutual Funds and National Financial Institutions.

Units of the Scheme cannot be assigned/ transferred/pledged/redeemed/switched out until completion of three years from the date of allotment of the respective Units.

Risks associated with Short Selling

Short selling is the sale of shares or securities that the seller does not own at the time of trading. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock/security he shorted and returns the stock/security to the lender to close out the loan. The inherent risks are Counterparty risk and liquidity risk of the stock/security being borrowed. The security being short sold might be illiquid or become illiquid and covering of the security might occur at a much higher price level than anticipated, leading to losses.

Risk factors associated with processing of transactions through Stock Exchange Mechanism

The trading mechanism introduced by the Stock Exchange(s) is configured to accept and process transactions for mutual fund Units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other authorized Stock Exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing /settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the Stock Exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized Stock Exchange(s).

Risk factors related to Navi ELSS Tax Saver Nifty 50 Index Fund

In line with the provisions stipulated under the ELSS scheme, 2005, units issued under the Scheme will not be redeemed until the completion of 3 (three) years from the date of allotment of units. The ability of an investor to realize returns on investments in the Scheme will consequently be restricted for the first 3 (three) years. Redemption can be made prior to the expiry of the aforesaid 3 (three) years period only in the event of the death of a Unit Holder, subject to the Units having been held for a period of 1 (one) year from the date of their allotment.

Risks associated with segregated portfolio:

The unit holders may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange.

The risks associated in regard to the segregated portfolio are as follows:

- The investors holding units of the segregated portfolio may not be able to liquidate their holdings till the time of recovery of money from the issuer.
- The security comprising the segregated portfolio may not realize any value.
- Listing units of the segregated portfolio on a recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units of the segregated portfolio on the stock exchange.
- The trading price of units on the stock exchange may be significantly lower than the prevailing Net Asset Value (NAV) of the segregated portfolio.

Risk associated with Short Selling & Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

The AMC shall adhere to the following limits should it engage in Stock Lending:

1. Not more than 20% of the net assets of a Scheme can generally be deployed in Stock Lending.

2. Not more than 5% of the net assets of a Scheme can generally be deployed in Stock Lending to any single approved intermediary / counterparty

Short selling is the sale of shares or securities that the seller does not own at the time of trading. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock/security he shorted and returns the stock/security to the lender to close out the loan. The inherent risks are Counterparty risk and liquidity risk of the stock/security being borrowed. The security being short sold might be illiquid or become illiquid and covering of the security might occur at a much higher price level than anticipated, leading to losses.

C.RISK MITIGATION STRATEGIES

The Scheme aims to track Nifty 50 Index before expenses. The Index is tracked on a regular basis and changes to the constituents or their weights, if any, are replicated in the Underlying Portfolio with the purpose of minimizing tracking error.

The AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

The fund will endeavour to manage the various risks associated with investing in equity and equity related instruments. Risk is expected to be reduced through diversification of portfolio across various sectors and market capitalizations. The various types of risks identified and their risk management strategies are as follows:

Risk Type	Risk Management Strategy
Quality Risk: Risk of investing in unsustainable / weak companies	Investment Universe consists of constituents of the Nifty 50 index. These are typically the largest and most liquid companies in the country which mitigates the quality risk.
Liquidity Risk: High Impact Costs	To control liquidity at the portfolio construction stage. Stocks in the Underlying Index are selected by applying liquidity as one of the criteria and hence the portfolio of Nifty 50 Index is reasonably liquid.
Volatility Risk: Price Volatility due to company or portfolio specific factors	To monitor overall portfolio volatility and control risk - stock / sector exposures as required. The scheme will manage volatility risk through diversification.
