Specific attribute of the Scheme (such as lock in/duration in case of target maturity scheme/close ended schemes etc.) (as applicable)	Tenure of the fund: In line with maturity profile of the underlying Index, the maturity of the Scheme will be December 29, 2028 ("Maturity Date"). If the maturity / payout date falls on a non-business day, the maturity / payout date shall be the next business day. The Scheme will distribute all of its maturity proceeds (Net Assets) to the Unitholders within 10 (Ten) Business days from the date of maturity of the
What are the Investment Strategies?	Scheme, in line with current regulatory timelines. The scheme is a target maturity index fund tracking the Nifty SDL December 2028 Index. The Scheme will be passively managed employing an investment strategy that tracks the performance of the underlying index, subject to tracking error. Normally, the fund would buy and hold the securities till maturity, in line with the maturity of the index. However, this would be subject to any selling to meet redemption requirements or re-balancing the portfolio.
	The Scheme may or may not hold all of the eligible securities which are part of the Index, subject to suitability and availability of the eligible securities from time to time.
	 During the 6 months prior to the maturity of the Scheme, the Fund Manager will endeavor to replicate the index. However, where the same is not possible, the Scheme will invest as follows: The Scheme will invest in any other security of the same issuer maturing on or before the maturity date of the Index
	 In case the above mentioned option is not available then the proceeds shall be invested in T-bills having the maturity date less than the maturity date of the Scheme. If T bills are also not available the proceeds shall be invested in TPEPS.
	 If T- bills are also not available the proceeds shall be invested in TREPS During normal circumstances, the Scheme's exposure to money market instruments will be in line with the asset allocation table. However, in case of maturity of securities in the Scheme portfolio, the reinvestment will be in line with the index methodology.
	As per SEBI Circular dated May 23, 2022, portfolio with residual maturity of greater than 5 years shall be considered to be replicating the index if, the deviation in duration is either +/- 6 months or +/- 10% of duration, whichever is higher. However, at no point of time, the residual maturity of the security forming part of the portfolio shall be beyond the target maturity date of the Scheme.

	 The annualized tracking difference averaged over one year period shall not exceed 1.25% upon completion of 1 year. Tracking error /Tracking Difference could be the result of a variety of factors including but not limited to: Delay in the purchase or non- availability of securities which are part of the Index Due to timing of transactions either on RFQ platforms or in open market Due to investment in out of index investments or where available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions, or corporate actions or otherwise. Expenditure incurred by the Fund. Issuers/Issuances which do not form part of the underlying Index. Due to over-weight / under-weight investment in issuances which are part of the Index Due to over-weight / under-weight investment in issuances which are part of the Index Due to over-weight / under-weight investment in issuances which are part of the Index Due to mismatch in the weight of the issuers forming part of the Index and the Scheme throughout life of the Scheme. As permitted under the Asset Allocation pattern upto 5% of the Total Assets may be invested in money market instrument. Difference in valuation of underlying securities by the Index Provider and AMC's valuation providers. Risk control measures Investments made by the Scheme would be in accordance with the investment objective of the Scheme and the provisions of the SEBI (MF) Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. While allocating and choosing securities, the Investment Manager will aim to diversify by gaining broad exposure to different industries and companies in order to reduce risk. Portfolio turnover Portfolio turnover is defined as lesser of purchases and sales
	subscriptions and redemptions expected on a daily basis. Hence, it will be difficult to estimate the portfolio turnover with any reasonable amount of accuracy.

Investors should note that the total recurring expenses of the scheme excluding issue or redemption expenses, whether initially borne by the Mutual Fund or by the AMC, but including the investment management and advisory fee, shall not exceed the limits as prescribed under Regulation 52 of the SEBI Regulations. The AMC will charge the Scheme such actual expenses incurred, subject to the statutory limit prescribed in the Regulations. For the actual current expenses being charged, the investor should refer to the website of the mutual fund at the following link <<u>https://www.barodabnpparibasmf.in/downloads/total-expense-ratio-of-</u> mutual-fund-schemes>. Any change proposed to the current expense ratio will be updated on the website and communicated to the investors via e-mail or SMS at least three working days prior to the effective date of the change (in accordance with SEBI circular SEBI/HO/IMD/DF2/CIR/P/2018/18 dated February 05, 2018, SEBI Circular SEBI/ HO/IMD/DF2/CIR/P/2018/91 dated June 05, 2018 read with SEBI Circular SEBI/HO/IMD/DF2/CIR/P/ 2019/42 dated March 25, 2019). Further, the disclosure of the expense ratio on a daily basis shall also be made on the website of AMFI viz. www.amfiindia.com. These estimates have been made in good faith as per the information available to the Investment Manager based on past experience and are subject to change inter-se. Types of expenses charged shall be as per SEBI (Mutual Funds) Regulations, 1996. The purpose of the above table is to assist the investor in understanding the various costs and expenses that an investor in the scheme will bear directly or indirectly. An Illustration of impact of expense ratio on Scheme's returns: If an investor A invests in a regular plan of a Scheme with an expense of 1% p.a. and an investor B invests in Direct Plan of the same scheme with an expense of 0.65% p.a. Assuming the gross return of this fund is 10% for that given year, investor A will make a return of 9% (post expense) for that year, whereas investor B will make 9.35% return for same period. Also, please take a look at below illustration which shows impact of different expense ratio: Particulars Regular Plan Direct Plan Amount Invested at the beginning of the year 10,000 10.000 Returns before Expenses (@10%pa) 1,000 1,000 Expenses other than Distribution Expenses 65 65 35 **Distribution Expenses** Returns after Expenses at the end of the Year 900 935 9.35% % Returns on Investment (Post Expenses) 9% Note: The purpose of the above illustration is to purely explain the impact of expense ratio charged to the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments, without considering any impact due to taxation.

Risk factors	Scheme Specific Risk Factors
	The Scheme specific risk factors are summarized as follows:
	Risks associated with investing in fixed income securities:
	• Credit and Counterparty risk: Credit risk or default risk refers to the risk that an issuer of a fixe income security may default (i.e., will be unable to make timely principal and interest payments o the security or honor its contractual obligations).
	Counterparty risk refers to the counterparty's inability to honor its commitments (payment, deliver repayment, etc.) and to risk of default. This risk relates to the quality of the counterparty to which th scheme has exposures. Losses can occur in particular for the settlement/delivery of financia instruments or the conclusion of financial derivatives contracts.
	The value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit and counterparty risk as well as any actual event of default. Changes in financial condition of an issuer, changes in economic and political conditions in general, or changes in economic or an political conditions specific to an issuer, all of which are factors that may have an adverse impact o an issuer's credit quality and security value.
	• Liquidity Risk: The liquidity of the scheme's investment is inherently restricted by trading volumes is the securities in which the scheme invests. A lower level of liquidity affecting an individual security or an entire market at the same time, may have an adverse bearing on the value of the scheme's assets. More importantly, this may affect the Fund's ability to sell particular securities quickly enough to minimise impact cost, as and when necessary to meet requirements of liquidity or to sell securities in response to triggers such as specific economic/corporate event.
	Trading volumes, settlement periods and transfer procedures may restrict the liquidity of a few or a of the investments and may affect the liquidity of the investments of the scheme. The scheme may be unable to implement purchase or sale decisions when the markets turn illiquid missing some investment opportunities or limiting ability to face redemptions. The lack of liquidit could also lead to the risk that the sale price of a security could be substantially lower than the fa value of the security.
	• Interest Rate Risk & Re-investment Risk: The value of an investment may be affected by interest rate fluctuations. Interest rates may be influenced by several elements or events, such as monetary policities the discount rate, inflation, etc. The value of debt and fixed income securities held by the Scheme generally will vary inversely with the changes in prevailing interest rates. In general, price of debt and fixed income securities of any issuer that has higher duration could be more risky in terms of price movements relative to those with lower duration. Thus any impact of interest rate changes would be higher on securities with higher duration irrespective of the status of the issuer of the security. The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the security.
	 securities in the Scheme are reinvested. The additional income from reinvestment is the "interest of interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed. x Sovereign risk: The Central Government of India is the issuer of the local currency debt in India. The Government raises money to meet its capital and revenue expenditure by issuing debt or discounter securities. Since payment of interest and principal amount has a sovereign status implying learner.

probability of a default, such securities are known as securities with sovereign credit. It also implies that the credit risk on such Government securities is even lower than that on non-government securities with "AAA" rating and hence yields on government securities are even lower than yields on non-government securities with "AAA" rating.

• Concentration Risk:

The Scheme may pursue only a limited degree of diversification. It may invest in a limited number of securities or invest a greater proportion of assets in the securities of very few issuers (within the limits permitted by regulation) or be concentrated on a few market sectors as compared to a diversified scheme. The scheme is also expected to have higher market liquidity risk on account of concentration. This could have implications on the performance of the scheme. The scheme may be more sensitive to economic, business, political or other changes and this may lead to sizeable fluctuation in the Net Asset Value of the scheme.

Risk associated with investment in Government securities and Triparty repo on Government securities or treasury bills:

• The mutual fund is a member of securities segment and Triparty repo on Government securities or treasury bills trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Triparty repo on Government securities or treasury bills trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counter party risks considerably for transactions in the said segments.

• The members are required to contribute towards margin obligation (Initial / Mark to Market etc.) as per bye-laws of CCIL as also an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in discharging their obligation. As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members as determined by CCIL.

• Thus, the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

• CCIL maintains two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty repo on Government securities or treasury bills trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, if the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Risks associated with segregated portfolio:

- Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- Security comprises of segregated portfolio may not realise any value.
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.
- Trading in the units of segregated portfolio on the Exchange may be halted because of market conditions, including any halt in the operations of Depository Participants or for reasons that in view of the Exchange Authorities or SEBI, trading in the units is suspended and / or restricted. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange rules of 'circuit filter'. There can be no assurance that the requirements of Stock Exchange necessary to maintain the listing of units of scheme will continue to be met or will remain unchanged.

Passive Investments:

The Scheme is not actively managed. Since the Scheme is linked to index, it may be affected by a general decline in the Indian markets relating to its underlying index. The Scheme as per its investment objective invests in Securities which are constituents of its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

<u>Risk factors associated with processing of transaction in case of investors investing in mutual fund</u> <u>units through Stock Exchange Mechanism</u>

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognized stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing / settlement, etc. upon which the Fund and the AMC have no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s) upon which the Fund and the Fund and the Fund and the AMC have no control. Accordingly, there could be negative impacts to the investors such as delay or failure in allotment / redemption of Units. The Fund and the AMC are not responsible for the negative impacts.

RISK MITIGATION STRATEGIES

The Scheme will invest in SDLs which are constituents of the underlying Index viz. NIFTY SDL December 2028 Index. Based on the availability of issuances, it is expected that the portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error. That said, broad risk parameters of the portfolio of the Scheme such as credit rating, weighted average YTM, weighted average maturity, asset allocation etc. are expected to be similar to the Underlying Index.

The Scheme's exposure to money market instruments will be in line with the asset allocation table.

This allocation will be monitored periodically, and it shall be ensured that investments are made in accordance with the Scheme objective and within the regulatory and internal investment restrictions prescribed from time to time.

Since disciplined investing requires risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The Scheme has a detailed process to identify, measure, monitor and manage various portfolio risks. The objective is to understand these risks and mitigate them wherever possible.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. There is a Board level Risk Management Committee which reviews overall risk management function.

	Risk & Description specific to the Scheme	Risk mitigants / Management Strategy
	Market/Volatility Risk : Risk arising due to price fluctuations and volatility, having material impact on the overall returns of the Scheme.	The Scheme, being a Target Maturity Date index fund structure, is expected to follow a Buy and Hold investment strategy in a passive manner. Based on that, we expect to mitigate intermittent price volatility in the underlying assets. Investors who remain invested until the maturity of the Scheme are expected to mitigate market / volatility risk to large extent.
	Credit risk : Risk associated with repayment of investment	The Scheme intends to invest in SDLs issued by State governments. SDLs are issued and serviced by the RBI. SDLs are eligible for SLR investments. These bonds are considered safe
	Liquidity risk : Risk arising due to inefficient Asset Liability Management, resulting in high impact costs	The Scheme intends to invest in SDLs issued by State governments. In general, SDLs enjoy higher level of secondary market liquidity.

Product Labelling (including Risk-o-meter) The Product labelling mandated by SEBI is to provide investors an easy understanding of the risk involved in the kind of product / scheme they are investing to meet their financial goals. The Riskometer categorizes various schemes under different levels of risk based on the investment objective, asset allocation pattern, investment strategy and typical investment time horizon of investors. Therefore, the schemes falling under the same level of risk in the Riskometer may not be similar in nature. Investors are advised before investing to evaluate a Scheme not only on the basis of the Product labelling (including the Riskometer) but also on other quantitative and qualitative factors such as performance, portfolio, fund managers, asset manager, etc. and shall seek appropriate advise, if they are unsure about the suitability of the Scheme before investing. As per SEBI Guidelines, Riskometer of the Scheme shall be reviewed on a monthly basis based on evaluation of risk level of Scheme's month end portfolios. Notice about changes in Scheme's Riskometer, if any, shall be issued. In accordance with Paragraph 17.4 of SEBI Master Circular on Mutual Fund dated June 27, 2024 and SEBI Circular no SEBI/HO/IMD/PoD1/CIR/P/2024/150 dated Disclosure of expenses, half yearly returns, yield and risk-o-meter of schemes of Mutual Funds, the Risk-o-meter shall have following six levels of risk: i. Low Risk ii. Low to Moderate Risk iii. Moderate Risk iv. Moderately High Risk v. High Risk and vi. Very High Risk

	Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e- mail or SMS to unitholders. The risk-o-meter shall be evaluated on a monthly basis and the risk-o-meter along with portfolio disclosure shall be disclosed on the AMC website as well as AMFI website within 10 days from the close of each month.
	Further, Paragraph 5.16 of SEBI Master Circular on Mutual Fund dated June 27, 2024:A) AMCs shall disclose the following in all disclosures, including promotional material or that stipulated by SEBI:
	 a. risk-o-meter of the scheme wherever the performance of the scheme is disclosed. b. risk-o-meter of the scheme and benchmark wherever the performance of the scheme vis-à-vis that of the benchmark is disclosed.

Dematerialization of units	 Pursuant to para 14.4.2 of SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024; the unit holders of the scheme shall be applicable: The unit holder opting to hold units in demat form must provide their demat account details in the specified section of the application form. Such unit holder should have a beneficiary account with the depository participant (DP) (registered with NSDL / CDSL) and shall be required to indicate in the application form the name of the DP, DP ID Number and the beneficiary account number. The unit holder must mandatorily provide latest client investor master or demat account statement along with the application form. Units held in demat form are transferable (except for Equity Linked Savings Scheme) in accordance with the provisions of SEBI (Depositories and Participants) Regulations, 1996 as may be amended from time to time. Transfer can be made only in favor of transferees who are capable of holding units and having a valid demat account. In case, the unit holder desires to hold the units in a demat/rematerialized form at a later date, the request for conversion of units held in non-demat form into Demat (electronic) form or vice-versa should be submitted alongwith a demat/remat request form to the DP directly and not to the AMC or the Registrar and Transfer Agent (RTA) of the Fund. The AMC shall then issue units in the desired form on the receipt of valid documents from the respective DP. The credit of the converted units shall be reflected in the transaction statement provided by the DP to its client. Similarly, request for redemption or any other non – financial request shall be submitted directly to the DP and not to the AMC/ RTA of the Fund. For the units held in demat form investors will receive an account statement from their respective DPs and not from AMC / RTA of the Fund. Units will be credited in the demat account only based on fund realization. The facility of availing the units in
