PART II - INFORMATION ABOUT THE SCHEME

A. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

Asset Allocation

Under the normal circumstances, the asset allocation of the Scheme will be as follows:

Types of Instruments	Indicative allocations (% of total assets)	
	Minimum Allocation	Maximum Allocation
Equities and equity related securities covered by Nifty LargeMidcap 250 Index	95%	100%
Debt and Money Market Instruments	0%	5%

In accordance with SEBI circular no. SEBI/HO.IMD/DF2/CIR/P/2021/024 dated March 04, 2021, the cumulative gross exposure through equity and equity instruments, debt, money market instruments will not exceed 100% of the net assets of the scheme.

However, cash and cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.

The funds raised under the Scheme shall be invested in the stocks and will be as per Regulation 44 (1), Schedule 7 of the SEBI (MF) Regulations, 1996.

The scheme being an Index Scheme, the net assets of the scheme will be invested in the same weightage as the stocks constituting the Nifty LargeMidcap 250 Index.

Change in Investment Pattern

Change in Asset Allocation:

The Scheme, in general, will hold all the securities that comprise the underlying Index in the same proportion as the Index. Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimise tracking error to the maximum extent possible. If the investments fall outside the asset allocation range given above due to change in constituents of the index as a result of periodic review, the portfolio of the Scheme shall be rebalanced within 7 calendar days. The proportions mentioned in the asset allocation can vary substantially depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive considerations only and will be rebalanced within 7 calendar days. As per SEBI Circular No. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, in case of deviation (passive), the portfolio would be rebalanced within 7 calendar days from the date of deviation. The funds raised under the Scheme shall be invested only in securities as permitted by SEBI (Mutual Funds) Regulations, 1996. Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.

Portfolio Rebalancing

Pursuant to SEBI circular no. SEBI/HO/IMD/IMD-II DOF3/P/CIR/2022/39 dated March 30, 2022; SEBI/HO/IMD/IMD-II DOF3/P/CIR/2022/39 dated May 23, 2022 and circulars issued thereunder, in case of change in constituents of the index due to periodic review, the portfolio of the scheme will be rebalanced within 7 calendar days.

Short term defensive consideration

Subject to SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021 and circulars issued thereunder, the asset allocation pattern indicated above may change for a short term period on defensive considerations, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be rebalanced within 07 calendar days from the date of deviation and further action may be taken as specified under SEBI Circulars/ AMFI guidelines issued from time to time.

Detailed definition and applicable regulations/guidelines for each instrument is included in Section II.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme will adopt a passive investment strategy and will endeavor to invest in stocks in proportion to the weightage of the stocks in the Nifty LargeMidcap 250 Index. The investment strategy would revolve around reducing the tracking error to the least possible extent through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Index as well as the incremental collections/redemptions in the Scheme. Such rebalancing shall be done in accordance with timelines prescribed by SEBI from time to time.

A part of the funds may be invested in debt and money market instruments, to meet the liquidity requirements.

The Scheme may also invest in the schemes of Mutual Funds in terms of the prevailing SEBI (MF) Regulations.

EQUITY INVESTMENT STRATEGY:

The investment objective of the scheme is to achieve a return equivalent to Nifty LargeMidcap 250 Index TRI by investing in stocks of companies comprising Nifty LargeMidcap 250 Index. The Scheme endeavors to invest in stocks in proportion to the weightages of these stocks in the Nifty LargeMidcap 250 Index.

The fund will, in general, invest a significant part of its corpus in equities; the surplus amount of the fund, not exceeding 5% shall be invested in Cash/Tri-Party Repo, Repo in corporate debt securities & Money Market instruments.

The performance of the Scheme may not be commensurate with the performance of the respective benchmark of the Schemes on any given day or over any given period. Such variations are commonly referred to as the tracking error. The Scheme intends to maintain a low tracking error by effectively replicating the portfolio in line with the index.

However, there is no assurance that all such buying and selling activities would necessarily result in benefit for the Fund.

DEBT AND MONEY MARKET INVESTMENT STRATEGY:

A small portion of the net assets will be held as cash or will be invested in debt and money market instruments permitted by SEBI/RBI including TREPS or in alternative investment for the TREPS as may be provided by the RBI, to meet the liquidity requirements under the Scheme.

PORTFOLIO TURNOVER:

The Scheme being an open-ended Scheme, it is expected that there would be a number of Subscriptions initially and Redemptions (post completion of mandatory lock-in of three years) on a daily basis. The fund manager, depending upon the netflows of daily subscription and redemption received, would execute trades in securities, which will lead to increase in Portfolio Turnover. The Scheme has no specific target relating to portfolio turnover.

D. HOW WILL SCHEME BENCHMARK ITS PERFORMANCE?

The performance of the scheme will be benchmarked against Nifty LargeMidcap 250 (Total Returns Index)

The Scheme proposes to invest in equity and equity related instruments of companies, which are constituents of the Nifty LargeMidcap 250 Index. Hence, it is an appropriate benchmark for the Scheme. Further, a Total Returns Index reflects the returns on the index from index gain/loss plus dividend payments by constituent index stocks.

The performance will be benchmarked to the Total Returns Variant of the Index. The Trustee reserves the right to change the benchmark for evaluation of performance of the Scheme from time to time in conformity with the investment objectives and appropriateness of the benchmark subject to SEBI (MF) Regulations, and other prevailing guidelines, if any by suitable notification to investors to this effect.

PART III - OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per Unit of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding under the Scheme on the valuation date. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

In case of any conflict between the Principles of Fair Valuation and valuation guidelines specified by SEBI, the Principles of Fair Valuation shall prevail.

NAV of Units of under the Scheme shall be calculated as shown below:

NAV (₹) per Unit =

Market or Fair Value of the Scheme's Investments + Current Assets - Current Liabilities and Provisions

No. of Units outstanding under each Scheme

The NAV of the Scheme will be calculated at the close of every Business Day.

The NAV of the Scheme will be calculated up to 4 decimal places.

Methodology for calculation of sale and repurchase price.

Pursuant to SEBI circular no. *SEBI/HO/IMD/DF2/CIR/P/2018/92* dated June 05, 2018 on "Go Green Initiative in Mutual Funds", the methodology of calculating the sale and repurchase price of units is explained with an illustration below:

A) Sale Price:

The Sale Price for a valid purchase will be the Applicable NAV of the respective Scheme i.e. Sale Price = Applicable NAV.

For a valid purchase request of ₹ 10,000, where the applicable NAV is ₹ 10, the units will be allotted as below:

Purchase Amount - ₹ 10,000 Applicable NAV - ₹ 10 No. of Units - 1,000 Units <i>(Purchase Amount/Applicable NAV)</i>
--

Please note that the entry load has been abolished with effect from August 01, 2009 vide SEBI Circular no. SEBI/IMD/CIR No. 4/ 168230/09 dated August 01, 2009. Hence, Sale price is equal to the applicable NAV.

B) Repurchase Price:

The Repurchase Price for a valid repurchase will be the applicable NAV reduced by any exit load (say 1%, if redeemed before completion of 1 year). i.e. applicable NAV - (applicable NAV X applicable exit load)

For a valid repurchase request where the applicable NAV is ₹ 10, the repurchase price will be as follows :

$$\begin{aligned} &\text{Applicable NAV - ₹ 10} \\ &\text{Exit Load - 1\%} \\ &= 10 - (10 \times 1\%) \\ &= 10 - (0.1) \\ &= \text{₹ 9.9} \end{aligned}$$

Therefore, for the repurchase for 1,000 units, the Investor will receive the proceeds as given below:

$$\begin{aligned} &\text{No. Of Units - 1,000} \\ &\text{Repurchase Price = ₹9.9} \\ &= 1000 \times 9.9 \\ &= \text{₹ 9,900} \end{aligned}$$

Note: Transaction charges and other charges/expenses, if any, borne by the investors have not been considered in the above illustration(s).

The Mutual Fund will ensure that the Redemption Price will not be lower than 95% of the Applicable NAV provided that the difference between the Redemption Price and the Subscription /Purchase Price at any point in time shall not exceed the permitted limit as prescribed by SEBI from time to time, which is currently 5% calculated on the Subscription/ Purchase Price. The Purchase Price shall be at applicable NAV.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. kindly refer to SAI.

- It is assumed that the expenses charged are evenly distributed throughout the year.
- Calculations are based on assumed NAVs, and actual returns on your investment may be more, or less.

SECTION - II

I. Introduction

A. Definitions/Interpretations

In this Scheme Information Document, the words and expressions shall have the meaning specified in the following link, unless the context otherwise requires.

<https://www.zerodhafundhouse.com/resources/disclosures/>

B. Risk Factors

Standard Risk Factors

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price/ value/ interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on the various factors and forces affecting the capital markets and money markets.
- Past performance of the Sponsors and their affiliates / AMC / Mutual Fund does not guarantee future performance of the Scheme of the Mutual Fund.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of ₹1 lakh each made by them towards setting up the Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Scheme Specific Risk Factors

The Scheme is subject to the specific risks that may adversely affect the Scheme's NAV, return and / or ability to meet its investment objective. The specific risk factors related to the Scheme include, but are not limited to the following:

Tracking Error & Tracking Difference Risk

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance, changes to the underlying index, regulatory restrictions and lack of liquidity which may result in Tracking Error. Hence it may affect Scheme's ability to achieve close correlation with the underlying index of the Scheme. The Scheme's returns may therefore deviate from its underlying index. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible.

Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the Nifty LargeMidcap 250 Index or one or more securities covered by / included in the Nifty LargeMidcap 250 Index and may arise from a variety of factors including but not limited to:

1. Any delay in the purchase or sale of securities due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of dividend, etc.
2. The index reflects the prices of securities at a point in time, which is the price at close of business day on the stock exchange. The scheme, however, may trade the securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be identical to the closing price of each scrip on that day on the respective stock exchange. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance from the closing price considered in the Index.
3. The potential of trades to fail may result in the scheme not having acquired the security at the price necessary to mirror the index.
4. Transaction and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees.
5. Being an open-ended passive scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet ongoing redemptions.
6. The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to circuit filters in the securities, liquidity and volatility in security prices. The tracking error of the scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs/ Mutual Fund, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. The Scheme will disclose the tracking error based on past one year rolling data, on a daily basis, on the website of AMC and AMFI. In case the Scheme has been in existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data.

Risks associated with Equity and Equity Related Instruments:

Equity and equity related instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as price volatility, volumes traded, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issued under the Scheme may be adversely affected.

Equity and equity related instruments listed on the stock exchange carry lower liquidity risk; however the Scheme's ability to sell these investments is limited by the overall trading volume on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, if there is a subsequent decline in the value of securities held in the Scheme's portfolio.

Investments in equity and equity related instruments involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

Risks associated with Debt and Money Market Instruments or Fixed Income Securities:

Debt and Money Market Instruments or Fixed Income Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.

Credit Risk: This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Interest-Rate Risk: Fixed income securities such as government bonds, corporate bonds and Money Market Instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.

Liquidity Risk: The Indian debt market is such that a large percentage of the total traded volumes on particular days might be concentrated in a few securities. Traded volumes for particular securities differ significantly on a daily basis. Consequently, the scheme might have to incur a significant "impact cost" while transacting large volumes in a particular security.

Reinvestment Risk: Investments in fixed income securities carry reinvestment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

Basis Risk: The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements. This may result in loss of value of the portfolio.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. During the tenure of the security this spread may move adversely or favourably leading to fluctuations in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Risk of Rating Migration: It may be noted that the price of a rated security would be impacted with the change in rating and hence, there is risk associated with such migration.

Counterparty and Settlement Risk: Corporate Bond Repo will be settled between two counterparties in the OTC segment unlike in the case of TREPS transactions where CCIL stands as central counterparty on all transactions (no settlement risk). Settlement risk in reverse repo will be mitigated by requiring the counterparty (entity borrowing funds from the Mutual Fund) to deliver the defined collateral in the account of the MF before the cash is lent to the counterparty. Further, the Mutual Fund will also have a limited universe of counterparties, but not limited to, comprising Scheduled Commercial Banks, Primary Dealers, Mutual Funds and National Financial Institutions.

Legislative Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the scheme.

Risk factors associated with processing of transactions through Stock Exchange Mechanism

The trading mechanism introduced by the Stock Exchange(s) is configured to accept and process transactions for mutual fund Units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other authorized Stock Exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing /settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the Stock Exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized Stock Exchange(s). Accordingly, there could be negative impacts to the investors such as delay or failure in allotment / redemption of units. The Fund and the AMC are not responsible for the negative impacts.

Risk associated with Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

The AMC shall adhere to the following limits should it engage in Stock Lending:

1. Not more than 20% of the net assets of a Scheme can generally be deployed in Stock Lending.
2. Not more than 5% of the net assets of a Scheme can generally be deployed in Stock Lending to any single approved intermediary / counterparty.

Risks associated with segregated portfolio:

The unit holders may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange.

The risks associated in regard to the segregated portfolio are as follows:

- The investors holding units of the segregated portfolio may not be able to liquidate their holdings till the time of recovery of money from the issuer.
- The security comprising the segregated portfolio may not realise any value.
- Listing units of the segregated portfolio on a recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units of the segregated portfolio on the stock exchange.
- The trading price of units on the stock exchange may be significantly lower than the prevailing Net Asset Value (NAV) of the segregated portfolio.

Risk factors related to Zerodha ELSS Tax Saver Nifty LargeMidcap 250 Index Fund

In line with the provisions stipulated under the ELSS scheme, 2005, units issued under the Scheme will not be redeemed until the completion of 3 (three) years from the date of allotment of units. The ability of an investor to realize returns on investments in the Scheme will consequently be restricted for the first 3

(three) years. Redemption can be made prior to the expiry of the aforesaid 3 (three) years period only in the event of the death of a Unit Holder, subject to the Units having been held for a period of 1 (one) year from the date of their allotment.

C. Risk Mitigation Strategies

The Scheme aims to track Nifty LargeMidcap 250 Index before expenses. The Index is tracked on a regular basis and changes to the constituents or their weights, if any, are replicated in the Underlying Portfolio with the purpose of minimizing tracking errors. Investments in equity, debt and money market securities carry various risks such as but not limited to the ones mentioned above. Whilst such risks cannot be eliminated, they may be mitigated by diversification. In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in the securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level, and scheme level in accordance with the Risk Management Framework prescribed by the SEBI. The Risk Management division of the AMC is an independent division within the organization. Internal risk thresholds are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. The Risk Management Committee of the Board enables a dedicated focus on risk factors and the relevant risk mitigants from time to time.
