I. INTRODUCTION

A. RISK FACTORS:

Apart from the risk factors mentioned in SAI, following are some of the additional risk factors which investors are advised to go through before investing:

a) **STANDARD RISK FACTORS:**

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- Edelweiss Silver ETF is only the name of the Scheme & it does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.1,00,000 made by it towards setting up the Fund.
- The Scheme is not a guaranteed or assured return Scheme.

b) **SCHEME SPECIFIC RISK FACTORS:**

The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc. Some of the Risks are listed below:

1. **Risks associated with the Scheme**

- **Passive Management of Investments:** Scheme shall follow a passive investment strategy. The scheme shall invest in Silver regardless of their investment merit. The scheme does not aim to take any defensive position in case of falling markets.
- **Active Market:** Although the scheme is proposed to be listed on exchange, there can be no assurance that an active secondary market will be developed or maintained. The AMC and the Trustees will not be liable for delay in trading of Units on Stock Exchange due to the occurrence of any event beyond their control. For an investor in less than creation unit size, exchange quotes may not be always available.
- **Liquidity Risk:** Trading in units of the scheme on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the scheme will continue to be met or will remain unchanged.
- **Redemption Risk:** The AMC will appoint Market Maker(s) (Aps)/ Market Makers (MMs) to provide liquidity for the units of Silver ETFs in secondary market on an ongoing basis. The Market Maker(s) would offer daily two-way quote (buy and sell quotes) in the market. Further, the price received upon redemption of units may be less than the value of the Silver represented by them
- **Regulatory change –** Any changes in trading regulations by the Stock Exchange(s) or SEBI may affect the ability of market maker to arbitrage resulting into wider premium / discount to NAV. The Units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of Units of the Scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the Scheme.
- **Settlement –** The Units will be issued only in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund during liquidity window depends upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.

2. Risks associated with Silver/commodity

Global Silver supplies and demand, which is influenced by factors such as forward selling by Silver producers, purchases made by Silver producers to unwind Silver hedge positions. Productions and cost levels in major Silver producing countries can also impact Silver prices. Further, Central bank purchases and sales also impact the price of Silver. The prices of Silver are also affected:-

- Macro-economic factors – Expected rate of inflation versus actual may impact the price of Silver. Global or regional political, economic or financial events and situations of countries, changes in interest rates and perceived trends in bullion prices, exchange rates, inflation trends, market movements, etc. can also impact price and demand / supply.
- Mining & Production – Lower production could have a positive effect on Silver prices. Conversely excessive production capacities would lead to a downward movement in Silver prices as the supply goes up.
- Currency exchange rates – A weakening dollar may act in favour of Silver prices and vice versa.
- Changes in regulations or taxes or any other levies – Any changes in trading regulations by the stock exchange(s) or SEBI may affect the ability of Authorised Participant to arbitrage resulting into wider premium / discount to NAV. Any changes in the regulations relating to import and export of Silver or Silver jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the Scheme to buy / sell Silver against the purchase and redemption requests received. Any change in the rates of indirect taxation / applicable taxes would affect the valuation of the Scheme.
- Seasonal demand: Demand for Silver in India is closely tied to the production of jewellery which tends to increase ahead of festive seasons. Any factor impacting the seasonal demand will impact the prices of Silver.
- Regulatory risk – Movement/trade of Silver that may be imposed by RBI. Trade and restrictions on import/export of Silver or Silver jewellery etc may also impact prices and demand/supply.
- Market Liquidity: There can be no assurance that the requirements of the market necessary to maintain the listing of Silver ETF will continue to be met or will remain unchanged. Silver ETF may suffer liquidity risk from domestic as well as international market.
- Demand-Supply mismatch – To the extent that demand for Silver exceeds the available supply at that time, Authorized Participants may not be able to readily acquire sufficient amounts of Silver necessary for the creation of a Basket. Market speculation in Silver could result in increased requests for the issuances. It is possible that Authorized Participants may be unable to acquire sufficient Silver that is acceptable for delivery for the issuance of new Baskets due to a limited then-available supply coupled with a surge in demand for the ETF units. In such circumstances, the AMC may suspend or restrict the issuance of Baskets. Such occurrence may lead to further volatility in the price and deviations, which may be significant, in the market price of the ETF units relative to the NAV.
- Market volatility – The Silver market in general has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to factors such as Silver's uses in jewelry, technology, and industrial applications, or cost and production levels in major Silver-producing countries.
- Indirect Taxation: For the valuation of Silver by the Scheme, indirect taxes like customs duty, VAT, etc. would also be considered. Hence, any change in the rates of indirect taxation / applicable taxes would affect the valuation of the Scheme.

3. Risks associated with handling, storing and safekeeping of physical Silver

All physical Silver procured must follow the guidelines as prescribed by SEBI. Risk arises when part or all of the Silver held by the Fund could be lost, stolen or damaged and access to Silver may be restricted due to natural calamities or human actions, loss or damage directly or indirectly occasioned by, happening through or in consequence of war, invasion, acts of foreign enemies, hostilities (whether war be declared or not), civil war, rebellion, revolution, insurrection, military or usurped power. Loss due to aridity, humidity, exposure to light or extremes of temperature. Hence, the Custodian maintains insurance in regard to the business on terms and conditions and the custodian is also responsible for all costs arising from the insurance policies. The custodian taking delivery on behalf of the AMC needs to ensure the weight, purity, and the source of Silver as specified under

the guidelines issued by SEBI. Since this is paramount to the SEBI guidelines, the risk arises in violation of same. Safekeeping of physical Silver requires appropriate vaulting space, conforming to the best global standards. The vaulting agents engaged by the custodian need to ensure the same.

4. Risks Related to the Custody of Silver

The Custodian may select Sub-Custodians/ Vaulting Service Provider to perform any of its duties, including holding silver. The Custodian alone shall be liable for any fees, loss, damages, costs, or charges of such Sub-Custodian/Vaulting Service Provider. The Custodian directly and/ or through its Sub-Custodians/ Vaulting Service Provider maintains insurance on such terms and conditions as it considers appropriate in connection with its custodial obligations under the Custodian Agreement and is responsible for all costs, fees and expenses arising from the insurance policy or policies. The Custodian shall be fully responsible for custody/ losses/ damages of physical silver whether the Custodian appoints Sub-custodian/ Vaulting Service Provider or not. Custodian will maintain all ledgers (or other records) reflecting Property in physical possession of Custodian or held by any Sub-Custodian/ Vaulting Service Provider. In terms of the Agreement entered into with the custodian, the Custodian is liable for any loss, damage, cost, judgment, expense or any other liability including any physical loss, destruction or damage to the Property, except, for Losses arising from nuclear fission or fusion, radioactivity, war, terrorist event, invasion, insurrection, civil commotion, riot, strike, act of government or public authority, acts of God or a similar cause that is beyond the control of the Custodian (“Force Majeure”).”

- Neither the Shareholders nor any Authorized Participant have a right under the Custodian Agreement to assert a claim against the Custodian. Claims under the Custodian Agreement may only be asserted by the AMC.
- The procedures agreed to with the Custodian contemplate that the Custodian must undertake certain tasks in connection with the inspection of Silver delivered by Authorized Participants in exchange for Baskets. The Custodian’s inspection includes review of the corresponding bar list to ensure that it accurately describes the weight, fineness, refiner marks and bar number appearing on the Silver bars, but does not include any chemical or other tests designed to verify that the Silver received does, in fact, meet the purity requirements. Accordingly, such inspection procedures may not prevent the deposit of Silver that fails to meet these purity standards. The Custodian will not be responsible or liable to the Trust or to any investor in the event any Silver otherwise properly inspected by it does not meet the purity requirements.
- The AMC does not insure its Silver (Underlying Silver of the scheme). The Custodian maintains insurance on such terms and conditions as it considers appropriate in connection with its custodial obligations under the Custodian Agreement and is responsible for all costs, fees and expenses arising from the insurance policy or policies. The AMC is not a beneficiary of any such insurance and does not have the ability to dictate the existence, nature or amount of coverage. Therefore, Shareholders cannot be assured that the Custodian maintains adequate insurance or any insurance with respect to the Silver held by the Custodian on behalf of the Trust.

5. Risks Associated with investing in Debt and Money Market Instruments

- Interest rate Risk:** Price of a fixed income instrument generally falls when the interest rates move up and vice-versa. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Credit risk or default Risk:** Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest and/or principal payment obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.
- Liquidity & Settlement Risk:** The liquidity of a fixed income security may change, depending on market conditions, leading to changes in the liquidity premium attached to the price of such securities. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio. Different segments of the

financial markets have different settlement cycle/periods, and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. This can adversely affect the ability of the Fund to swiftly execute trading strategies which can lead to adverse movements in NAV.

- iv. Reinvestment Risk:** Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security.
- v. Performance Risk:** Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
- vi. Prepayment Risk:** The Scheme may receive payment of monthly cashflows earlier than scheduled, which may result in reinvestment risk.
- vii. Market Risk:** Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities.

6. Tracking Error and Tracking Difference Risk:

Tracking Error and Tracking difference is to measure divergence of the performance (return) of the Fund's portfolio from that of the Underlying Index. Tracking error / Tracking difference are inherent in any ETF and such errors may cause the schemes to generate returns which are not in line with the performance of the Domestic prices of Silver. The Fund Manager would not be able to invest the entire corpus in physical Silver due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance, changes to the underlying index and regulatory restrictions, which may result in Tracking Error with the underlying index. The Scheme's returns may therefore deviate from those of the underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the Scheme. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of Tracking Error relative to performance of the underlying Index. Tracking Error may arise due to the following reasons:

- Expenditure incurred by the Fund.
- Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions for corporate actions or otherwise.
- Accounting for indirect taxes including tax reclaims.
- SEBI Regulations (if any) may impose restrictions on the investment and/or divestment activities of the Scheme. Such restrictions are typically outside the control of the AMC and may cause or exacerbate the Tracking Error

Due to the reasons mentioned above and other reasons that may arise, it is expected that the scheme may have a tracking error, the same however, shall not be more than 2% per annum from its Benchmarks. However, it needs to be clearly understood that this is an indicative range and that the actual tracking error can be within or outside the range given.

The units may trade above or below their NAV. The NAV of the underlying Scheme will fluctuate with changes in the market value of the holdings. The trading prices will fluctuate in accordance with changes in their NAV as well as market supply and demand. However, given that units of Silver ETFs can be created and redeemed in Creation Units, it is expected that large discounts or premiums to the NAV will not sustain due to arbitrage opportunity available. The value of Silver ETFs Units could decrease if unanticipated operational or trading problems arise.

7. Risk associated with investing in exchange traded commodity derivatives Commodity risks

Volatility in the commodities markets may be caused by changes in overall market movements, domestic and foreign political and economic events and policies, war, acts of terrorism, changes in domestic or foreign interest

rates and/or investor expectations concerning interest rates, domestic and foreign inflation rates, investment and trading activities of mutual funds, hedge funds and commodities funds, and factors such as drought, floods, weather, livestock disease, embargoes, tariffs and other regulatory developments, or supply and demand disruptions. Because the Fund's performance is linked to the performance of volatile commodities, investors should be willing to assume the risks of potentially significant fluctuations in the value of the Fund's shares. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of investment strategies depends upon the ability of the fund manager(s) to identify such opportunities which may not be available at all times. Identification and execution of the strategies to be pursued by the fund manager(s) involve uncertainty and decision of fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies.

8. Systemic Risks

Systemic risks which may be witnessed while trading in Indian Commodities Market are liquidity risk, market risk in terms of volatility, Exchange Risk and counterparty risks.

- Settlement Risk – Risks pertaining to settlement of Commodity Derivatives vide Physical Delivery of goods
- Incremental margin / cost to be borne- The Commodity exchanges have robust settlement process like the equity exchanges. However, there are rules and timelines which need to be complied with, failing which delivery of the commodity will need to be taken. This will lead to incremental cost to procure the commodity. Avoidance of the same will lead to the exchange penalizing the buyer or the seller or both depending on the type of commodity being dealt with.
- Risk Factors in case settlement of Derivatives vide Physical Delivery of goods – Timelines to dispose off the physical goods, loss due to damage, inadequate insurance, If the Commodities futures position passes its last square off date or the 'Intention' is missed to be provided before the Delivery Intention period, the buyer or the seller will be allocated delivery of the commodity. Thus, there emerges a risk of holding goods in physical form at the warehouses. Though the commodity is inclusive of insurance cost, there is a small deductible in each claim which is not payable by the Insurance company.

9. Risks Associated with exposure in Tri-party Repo

Risk of exposure in the Tri-party Repo settlement Segment provided by CCIL emanates mainly on two counts –

- Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Tri-party Repo transaction.
- Risk of default by a borrower in repayment.

10. Risks Associated with segregated portfolio

- Unit holder holding units of Segregated Portfolio may not able to liquidate their holdings till the recovery of money from the issuer.
- Portfolio comprising of Segregated Portfolio may not realise any value or may have to be written down.
- Listing of units of Segregated Portfolio in Annualized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

 - i. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
 - ii. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
 - iii. An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every trustee meeting till the investments are fully recovered/ written-off.
 - iv. The trustees shall monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.
- b) In order to avoid mis-use of segregated portfolio during the credit event trustees have put mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

Benefits of Segregated Portfolio

While very stringent internal credit evaluation norms are being followed by the AMC/Mutual Fund, the risk of credit downgrade in portfolio companies due to various factors cannot be ruled out. In the event of credit downgrade the downgraded instrument generally become illiquid making it very difficult for the fund manager to dispose of such instrument/s. In such an event segregation of such an instrument from the main portfolio will prevent the distressed asset(s) from damaging the returns generated from more liquid and better-performing assets of the portfolio. It also provides fair treatment to all existing, incoming and outgoing investors, as any recovery from the issuer in future would get distributed among those investors, who would have suffered a loss due to downgrade event.

PORTFOLIO TURNOVER

Portfolio Turnover measures the volume of trading that occurs in a Scheme's portfolio (silver and silver related instruments) during a given time period. The Scheme is an open-ended Exchange Traded Fund and it is expected that there may be a number of subscriptions and repurchases on a daily basis through Stock Exchange(s) or Market Makers and Large Investors. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any. However, it will be the endeavor of the Fund Manager to maintain an optimal portfolio turnover rate commensurate with the investment objective of the Scheme and the purchase/ redemption transactions on an ongoing basis in the Scheme.

TRACKING ERROR & TRACKING DIFFERENCE

Tracking Error may arise due to reasons including but not limited to the following: -

- a. Expenditure incurred by the fund.
- b. The fund may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- c. Disinvestments to meet redemptions, recurring expenses, IDCW payouts etc.
- d. Execution of large buy / sell orders
- e. Transaction cost (including taxes and insurance premium) and recurring expenses
- f. Realization of Unit holder's funds

It will be the endeavor of the fund manager to keep the tracking error as low as possible. The tracking error i.e. the annualized standard deviation of the difference in daily returns between physical silver and the NAV of SilverETF based on past one year rolling over data (For ETFs in existence for a period of less than one year, annualized standard deviation shall be calculated based on available data) shall not exceed 2%. The disclosure regarding the same shall be made on daily basis on the website of Edelweiss Mutual Fund and on the website of AMFI.

In case of unavoidable circumstances in the nature of force majeure which are beyond the control of the AMCs, the tracking error may exceed 2%, and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any.

There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the benchmark.

TRACKING DIFFERENCE:

Tracking Difference is defined as the annualized difference of daily returns between the index and the NAV of the ETF Schemes.

Tracking difference of the Scheme shall be disclosed on the website of the AMC i.e. www.edelweissmf.com and AMFI, on a monthly basis, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units.

RISK MANAGEMENT STRATEGIES

Risk & Description specific to the Scheme	Risk mitigants / management strategy
Market Risk The value of the Scheme's investments, may be affected by price and volume, volatility interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments	The Scheme being passively managed carry lesser risk compared to active management. The Scheme follow the underlying price of silver and therefore the level of portfolio volatility would be same as that of the underlying silver price.
Settlement Risk The potential for trades to fail, which may result in	Units procured through exchanges have an auction process inbuilt into them, and hence the aforesaid

the Scheme not having acquired silver at a price necessary to track the benchmark price.	risk is automatically mitigated. Even for lot size purchases, the AMC deals with multiple reputed banks/authorized participants whereby the probability of default in trades are remote.
Liquidity risk The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests. Inability to buy / sell appropriate quantity of silver	The Scheme invest in physical silver which satisfy the norms of 'Good Delivery' as defined by London Bullion Markets association. Liquidity issues are not envisaged as silver is a globally traded commodity and thereby liquid. There are also designated Authorised Participants who facilitate liquidity on the exchange..
Event risk/Custody Risk Risk of loss, damage, theft, impurity etc. of silver	There is a risk that part or all of the physical silver belonging to the Scheme could be lost, damaged or stolen. In order to ensure safety, the said silver will be stored with custodian in its vaults. Silver held by custodian is also insured. The custodian will insure/cover all such risks.
Derivatives Risk Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices	The fund has provision for using derivative instruments. The fund proposes to use non-hedging strategy if required. Investments in derivative instruments will be used as per local (RBI and SEBI) regulatory guidelines. The fund will endeavor to maintain adequate controls to monitor the derivatives transactions entered into.

Risk mitigants for Debt and money market instruments

Risk & Description specific to the Scheme	Risk mitigants / management strategy
Market Risk Changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.	Fund Managers will periodically monitor the portfolio structure with respect to existing interest rate scenario.
Concentration risk Risk arising due to over exposure in few securities	Minimal exposure to debt and money market and equivalents
Liquidity risk	The fund will endeavor to minimise liquidity risk by

The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.	investing in securities having a liquid market
Credit Risk The value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default.	Detailed evaluation of issuers will be done. Investments will be done on high credit quality securities
Reinvestment Risk The rate at which interim cash flows can be reinvested may be lower than that originally assumed.	Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.

FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.
