Part I. HIGHLIGHTS/SUMMARY OF THE SCHEME

Sr. No.	Title	Description
I.	Name of the scheme	PGIM India Large and Mid Cap Fund
II.	Category of the Scheme	Large and Mid Cap Fund
III.	Scheme type	An open ended equity scheme investing in both large cap and mid cap stocks.
IV.	Scheme code	PGIM/O/E/LMF/23/07/0026
V.	Investment objective	<p>The investment objective of the Scheme is to seek long term capital growth through investments in equity and equity related securities of predominantly large cap and mid cap stocks..</p> <p>However, there is no assurance that the investment objective of the Scheme will be achieved. The Scheme does not guarantee/ indicate any returns.</p>
VI.	Liquidity/listing details	<p>The Scheme offers Units for Subscription/switch in and Redemption / switch out at NAV based prices on all Business Days on an ongoing basis.</p> <p>Under normal circumstances the AMC shall dispatch the redemption proceeds within 3 business days from date of receipt of valid redemption request from the Unit holder.</p> <p>In case of exceptional circumstances as prescribed under paragraph 14.1.3 of SEBI Master Circular for Mutual Funds and amended from time to time, redemption or repurchase proceeds shall be transferred / dispatched to Unitholders within the time frame prescribed for such exceptional circumstances.</p> <p>Currently the Units of the Scheme are not proposed to be listed on any stock exchange.</p>
VII.	Benchmark (Total Return Index)	<p>NIFTY LargeMidcap 250 Index TRI.</p> <p>As required under clause 1.9 of Master Circular, the benchmark has been selected from amongst those notified by AMFI as the first tier benchmark to be adopted by mutual funds and which are reflective of the category of the scheme.</p> <p>The NIFTY LargeMidcap 250 reflects the performance of a portfolio of 100 large cap and 150 mid cap companies listed on NSE, represented through the NIFTY 100 and the NIFTY Midcap 150 index respectively. This index intends to measure the performance of large and mid-market capitalization companies with the aggregate weight of large cap stocks and mid cap stocks being 50% each, reset on a quarterly basis.</p> <p>The NIFTY LargeMidcap 250 is designed to reflect the behavior</p>

		and performance of the entire large and mid-capitalized segment of the financial market. Since, the equity investments in this particular fund are identified to cover both the large and the mid market cap, this Index is most suited for comparing the performance of the Scheme. Hence, it is an appropriate benchmark for the Scheme. The Total Return (TR) Version of the Index will be used for performance comparison.

The securities mentioned above could be listed or permitted unlisted, privately placed, secured or unsecured, rated or un-rated and of any maturity, as enabled under SEBI Regulations/ circulars/ RBI. The securities may be acquired from primary market/ Initial Public Offer (IPO), secondary market operations, private placement or negotiated deals.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme will be predominantly invested in equity and equity related securities primarily comprising of large cap and mid cap stocks. The aim of the Scheme is to seek long-term capital appreciation from an actively managed portfolio.

The Scheme will endeavor to achieve this by allocating the investments to equity and equity related securities out of which at least 35% each will be towards large cap stocks and mid cap stocks.

The portfolio will be built utilizing a combination of the top-down and bottom-up portfolio construction process, focusing on the fundamentals of each stock, including quality of management. The fund manager will aim to build a diversified portfolio with exposure across sectors.

The Scheme may also invest a certain portion of its corpus in debt and money market securities. Investment in debt securities will be guided by credit quality, liquidity, interest rates and their outlook. The Scheme may invest in other scheme(s) managed by the AMC or in the scheme(s) of any other mutual fund, provided it is in conformity with the investment objectives of the Scheme and in terms of the prevailing Regulations.

DERIVATIVE STRATEGY

The Scheme may invest in various derivative instruments which are permissible under the applicable regulations. Such investments shall be subject to the investment objective and strategy of the Scheme and the internal limits if any, as laid down from time to time. These include but are not limited to futures (both stock and index) and options (stock and index). Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument such as interest rates, exchange rates, commodities and equities. There are several advantages in using derivatives in the portfolio. The use of derivatives provides flexibility to the Scheme to hedge whole or part of the portfolio.

The risks associated with derivatives are similar to those associated with underlying investments. The additional risks of using derivative strategies could be on account of:

- Illiquidity;
- Potential mispricing of the Futures/Options;
- Lack of opportunity;
- Inability of derivatives to correlate perfectly with the underlying (Indices, Assets, Exchange Rates);
- Cost of hedge can be higher than adverse impact of market movements;
- An exposure to derivatives in excess of the hedging requirements can lead to losses;
- An exposure to derivatives can also limit the profits from a genuine investment transaction.
- The prices which are seen on the screen need not be the same at which execution will take place.

For detailed risks associated with use of derivatives, please refer paragraph “Scheme Specific Risk Factors”

For further details regarding concepts and examples of derivatives that may be used by the fund manager, please refer to SAI.

Overview of Debt Market in India

The Indian bond market comprises mainly of Government securities, bonds issued by Public Sector Undertakings (PSU), Development Financial Institutions (DFI) and infrastructure related agencies, debentures and money market instruments issued by the corporate sectors and banks.

The Indian bond market has witnessed increased issuance of bonds from government sponsored institutions, DFIs, and infrastructure related agencies since 1995. These bonds are rated by credit rating agencies like CRISIL, ICRA, CARE and India Ratings. They constitute reasonable amount of the trading volume on the Wholesale Debt Market platform of National Stock Exchange/Bombay Stock Exchange and are widely held by market participants because of their liquidity and reduced risk perception due to the government stake in some of them.

The Indian corporate sector has also been frequently raising capital through issuance of non-convertible debentures and commercial papers. Most of the money is raised through the “Private Placement” route. These debentures/commercial papers are mostly rated by rating agencies like CRISIL, ICRA, CARE and India Ratings. There is an active secondary market for these debentures/commercial papers (CPs).

The Government of India routinely issues government securities and Treasury bills for liquidity and fiscal management. While the government issues Treasury bills for 91 days, 182 days and 364 days in a discounted form, the coupon-bearing government securities are issued for maturity ranging from 1 year to as high as 50 years. Both the Treasury bills and coupon-bearing securities are auctioned by the RBI on behalf of the Government of India.

Certificate of Deposits (CDs) are mostly issued by scheduled commercial banks for tenor ranging from 7 days to 1 year. Select Financial Institutions can also issue CDs for tenor above 1 year and upto 3 years. CDs are more liquid than CPs.

Securitisation

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the

form of financial instruments. A typical process of asset securitisation involves sale of specific Receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company. The SPV in turn issues financial instruments (e.g., promissory notes, pass through certificates or other debt instruments) to investors, such instruments evidencing the beneficial ownership of the investors in the Receivables. The financial instruments are rated by an independent credit rating agency. An Investor's Agent is normally appointed for providing trusteeship services for the transaction.

On the recommendation of the credit rating agency, additional credit support (Credit Enhancement) may be provided in order that the instrument may receive the desired level of rating. Typically the servicing of the Receivables is continued by the seller in the capacity of the Servicer. Cash flows, as and when they are received, are passed onto the investors.

Risk Control

Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.

The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. Stock specific risk will be minimized by investing only in those companies that have been analyzed by the Investment Team at the AMC. For investments in debt securities, the AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous and in-depth credit evaluation of the securities proposed to be invested in, will be carried out by the investment team of the AMC. Rated Debt instruments in which the Scheme invests will be of investment grade as rated by a credit rating agency. The AMC will be guided but not limited by the ratings of Rating Agencies such as CRISIL, CARE, ICRA and Fitch or any other rating agencies that may be registered with SEBI from time to time. In case a debt instrument is not rated, investment will be in accordance with Guidelines approved by the Board. Further, all investments in the unrated paper are periodically reviewed by Investment Committee and the Board of AMC & Trustee Company.

The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unitholders' interest.

Portfolio Turnover

The Scheme is an open-ended scheme. It is expected that there would be a number of subscriptions and redemptions on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Benchmark (Total Returns Index):

NIFTY LargeMidcap 250 Index TRI is the Benchmark for the Scheme.

As required under paragraph 1.9 of SEBI Master Circular, the benchmark has been selected from amongst those notified by AMFI as the first tier benchmark to be adopted by mutual funds and which are reflective of the category of the scheme.

The NIFTY LargeMidcap 250 reflects the performance of a portfolio of 100 large cap and 150 mid cap

companies listed on NSE, represented through the NIFTY 100 and the NIFTY Midcap 150 index respectively. This index intends to measure the performance of large and mid-market capitalization companies with the aggregate weight of large cap stocks and mid cap stocks being 50% each, reset on a quarterly basis.

The NIFTY LargeMidcap 250 is designed to reflect the behavior and performance of the entire large and mid-capitalized segment of the financial market. Since, the equity investments in this particular fund are identified to cover both the large and the mid market cap, this Index is most suited for comparing the performance of the Scheme. Hence, it is an appropriate benchmark for the Scheme. The Total Return (TR) Version of the Index will be used for performance comparison.

The Trustee/AMC reserves the right to change the benchmark for evaluating the performance of the Scheme from time to time, in conformity with the investment objective of the Scheme and the appropriateness of the benchmark, subject to SEBI guidelines and other prevalent guidelines.

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

NAV of Units under the Scheme will be calculated by the following method:

NAV (Rs.) =	Market or Fair Value of Scheme's investments + Current Assets - Current Liabilities and Provisions
	No. of Units outstanding under the Scheme

The NAV shall be calculated up to two decimal places. However the AMC reserves the right to declare the NAVs up to additional decimal places as it deems appropriate. Separate NAV will be calculated and disclosed for each Plan/Option. The AMC will calculate and disclose the NAV of the Scheme on all the Business Days.

The valuation of the Scheme's assets and computation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

The numerical illustration of the above method is provided below:

Market or Fair Value of Scheme's investment (Rs.) = 1,15,12,05,600.00

Current Assets (Rs.) = 60,00,000.00

Current Liabilities (Rs.) = 40,00,000.00

No of units Outstanding under the scheme = 10,00,00,000

$$\text{NAV Per Unit (Rs.)} = \frac{115,12,05,600 + 60,00,000 - 40,00,000}{10,00,00,000} = 11.53$$

The aforesaid provision pertaining to "Calculation of NAV" shall apply in respect of each individual scheme and / or plan as the case may be. The NAV per unit above is rounded off to two decimals

The NAV will be calculated as of the close of every Business Day.

Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

Ongoing price for	At the applicable NAV.
-------------------	------------------------

subscription (purchase)/ switch-in (from other Schemes of the Mutual Fund) by investors. This is the price you need to pay for purchase /switch-in.	Ongoing Price for subscription = $\text{Applicable NAV} \times (1 + \text{Entry Load, (if any)})$ Example: If the Applicable NAV is Rs.10, Entry Load is nil then sales price will be $= \text{Rs. } 10 \times (1+0)$ $= \text{Rs. } 10$
Ongoing price for redemption (sale) /switch outs (to other schemes of the Mutual Fund) by investors. This is the price you will receive for redemptions/switch outs.	At the applicable NAV, subject to prevailing exit load. Redemption Price = $\text{Applicable NAV} \times (1 - \text{Exit Load, (if any)})$ Example: If the Applicable NAV is Rs.10, Exit Load is 1% then redemption price will be $= \text{Rs. } 10 \times (1-0.01)$ $= \text{Rs. } 9.90$

The Redemption Price will not be lower than 95% of the NAV or as permitted / prescribed under the SEBI Regulations from time to time.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. Kindly refer SAI.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc. all such expenses are borne by AMC.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the Scheme. These expenses include the Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' Fee, marketing and selling costs etc. as given below:

The AMC has estimated that up to 2.25% of the daily net assets of the scheme will be charged to the scheme as expenses.

Operating & recurring expenses under regulation 52 (6) & 52 (6A):

- a. The total expense ratio of the Scheme, excluding issue or redemption expenses, whether initially borne by the mutual fund or by the AMC, but including the investment management and advisory fee shall be as follows:

Assets under management Slab (In Rs. crore)	Total expense ratio limits (p.a.)
on the first Rs.500 crores of the daily net assets	2.25%
on the next Rs.250 crores of the daily net assets	2.00%
on the next Rs.1,250 crores of the daily net assets	1.75%
on the next Rs.3,000 crores of the daily net assets	1.60%
on the next Rs.5,000 crores of the daily net assets	1.50%
On the next Rs.40,000 crores of the daily net assets	Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof
On balance of the assets	1.05%

- b. In addition to the annual recurring expenses stated in (a) above, the following costs or expenses may be charged to the Scheme:-
- Brokerage and transaction cost incurred for the purpose of execution shall be charged to the schemes as provided under Regulation 52 (6A) (a) upto 0.12 per cent and 0.05 per cent for cash market transactions and derivatives transactions respectively. Any payment towards brokerage & transaction costs, over and above the said 0.12 per cent and 0.05 per cent for cash market transactions and derivatives transactions respectively may be charged to the Scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under Regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.
 - Additional Expenses not exceeding of 0.30 per cent of daily net assets of the schemes, if the new inflows from beyond top 30 cities (as per SEBI Regulations /Circulars/ AMFI data) are at least (i) 30 per cent of gross new inflows from retail investors* in the scheme, or (ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher. Provided that if inflows from such cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis.

**Inflows of amount upto Rs 2,00,000/- per transaction, by individual investors shall be considered as inflows from "retail investors."*

The additional expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities. Provided further that amount incurred as additional expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.

Note: Pursuant to the directions received from SEBI vide its letter no. SEBI/HO/IMD-SEC-3/P/OW/2023/5823/1 dated February 24, 2023 read along with AMFI communication dated

March 02, 2023, w.e.f March 01, 2023 no additional expense shall be charged on the new inflows received on or after March 01, 2023 from specified cities as per Regulation 52 (6A) (b) till any further guidance is received from SEBI in this regard.

- iii. Additional expenses not exceeding 0.05 per cent of daily net assets of the scheme, towards the investment and advisory fees or various other permissible expenses; (It may be noted that these expenses will not be charged in case the scheme does not charge an exit load)

Within such total recurring expenses charged to the Scheme as above, the investment management and advisory fee (charged as a percentage of daily net assets) would be as decided by the AMC from time to time, provided that the investment management and advisory fee shall not exceed the aggregate of expenses charged under clause (a) and (b) (iii) above.

In terms of paragraph 10.1.16 of SEBI Master Circular for Mutual Fund, the AMC shall annually set apart at least 0.02% on daily net assets within the maximum limit of recurring expenses as per Regulation 52 for investor education and awareness initiatives.

The maximum annual recurring expenses of the Scheme including the investment management and advisory fee (together with additional management fee wherever applicable) shall not exceed the limit stated in Regulation 52 read with paragraph 10.1 of SEBI Master Circular for Mutual Fund, as explained above.

Goods and Services tax (GST):-

- AMC may charge GST on investment and advisory fees of the Scheme in addition to the maximum limit of TER as per the Regulation 52(6) and (6A).
- GST on expenses other than investment and advisory fees: AMC may charge GST on expenses other than investment and advisory fees of the Scheme, if any within the maximum limit of TER as per the Regulation under 52(6) and (6A).
- GST on brokerage & transaction cost: GST on brokerage and transaction costs which are incurred for the purpose of execution of trade, will be within the limit of expenses as per the Regulation 52(6) and (6A). Further, the Goods and Services tax on exit load, if any, shall be paid out of the exit load proceeds and the exit load net of Goods and Services tax, if any, shall be credited back to the scheme.

All fees and expenses charged in the Direct Plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under the Regular Plan. The Direct Plan under the Scheme shall have a lower expense ratio as compared to the Regular Plan. Commission/ Distribution expenses will not be charged in case of Direct Plan. The Direct Plan shall also have separate NAV. For the actual current expenses being charged, the investor may refer to the website of the Mutual Fund (<https://www.pgimindia.com/mutual-funds>). Further, the disclosure of Total Expense Ratio (TER) on a daily basis shall also be made on the website of AMFI (www.amfiindia.com). The Mutual Fund would update the expense ratios on the website at least three business days prior to the effective date of the change. Additionally, TER is also available on website <https://www.pgimindia.com/mutual-funds>.

The AMC has estimated the following total expenses for the first Rs. 500 Crores of the daily net assets of the Scheme:-

Expense Head	% of daily Net Assets
Investment Management and Advisory Fees	Upto 2.25%
Trustee fee	
Audit fees	
Custodian fees

Other Expenses*	
Maximum total expense ratio (TER) permissible under Regulation 52 (6) (c)	Upto 2.25%
Additional expenses under regulation 52 (6A) (c)	Upto 0.05%**
Additional expenses for gross new inflows from beyond top 30 cities	Upto 0.30%

*Any other expenses which are directly attributable to the Scheme, except those expenses which are specifically prohibited, may be charged with the approval of the Trustee within the overall limits specified in the SEBI (Mutual Funds) Regulations.

**It may be noted that these expenses will not be charged in case the scheme does not charge an exit load

The purpose of the above table is to assist the investor in understanding the various costs & expenses that an investor in the Scheme will bear directly or indirectly. The above estimates have been made in good faith as per the information available to the AMC, and are subject to change inter-se, or in total, on account of any change in SEBI Regulations or otherwise. The actual expenses incurred may be lower than the estimated rates mentioned above. The AMC will strive to reduce the level of these expenses so as to keep them well within the maximum limit allowed by SEBI. All types of expenses charged to the Scheme shall be in accordance with the SEBI (MF) Regulations.

The entire exit load (net of Goods and Services Tax), charged, if any, shall be credited to the Scheme.

Illustration of impact of expense ratio on scheme's returns

Investment Management and Advisory Fees (in Rs.)	60.00	60.00
Returns after Brokerage and Transaction Cost ,other expenses and Investment Management and Advisory Fees (in Rs.)	770.00	920.00

The present illustration is calculated pursuant to the requirements of paragraph 5.8.2.2 of SEBI Master Circular for Mutual Fund. The purpose of an illustration is to purely explain the impact of expense ratio charged to the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments. Actual returns on your investment may be more, or less. The expenses of the Direct Plan under the Scheme will be lower to the extent of distribution expenses/commission. The NAVs published by the AMC are net of scheme expenses and they reflect return on investment to investors, provided investment is not subject to exit load. Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to consult his or her own financial advisor.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time.

The load structures of the Scheme is as follows:

Type of Load	Load chargeable (as % age of NAV)
Exit	<ul style="list-style-type: none"> For Exits within 90 days from date of allotment of units : 0.50%. For Exits beyond 90 days from date of allotment of units : NIL

The entire exit load (net of Goods and Services Tax), charged, if any, shall be credited to the respective Schemes.

The AMC/Trustee reserves the right to change / modify the Load structure of the Scheme, subject to maximum limits as prescribed under the Regulations.

Exit Load for switches within the Scheme:-

- a) Where the investments were routed through a distributor (i.e. made with distributor code), any Switch of Units from the Regular Plan to Direct Plan of a Scheme shall be subject to applicable exit load, if any. However, any subsequent switch - out or redemption of such investments from the Direct Plan will not be subject to any exit load;
- (b) Where investments were made directly i.e. without any distributor code, exit load will not be levied on switch of Units from Regular Plan to Direct Plan of that Scheme. However, any subsequent switch-out or redemption will be subject to exit load applicable from the original date of investment;
- (c) No exit load shall be levied in case of switch of Units from Direct Plan to Regular Plan of a Scheme. However, any subsequent switch-out or redemption of such investment from the Regular Plan shall be subject to exit load based on the original date of investment in the Direct Plan.

Load exemptions:

- No Exit Load will be charged on Intra-Scheme switches i.e., switches between Growth and IDCW Options.

Any change in the load structure shall be applicable on prospective investments only. For any change in load structure, the AMC will issue an addendum and display it on its Website (<https://www.pgimindia.com/mutual-funds>) and Investor Service Centres. The addendum will also be circulated to all the distributors / brokers, so that the same can be attached to all SIDs and Key Information Memoranda in stock till the same is updated and reprinted. The AMC would make arrangements to display the addendum to the SID in the form of a notice at all the Investor Service Centres. The change in the Exit Load would be disclosed in the statement of accounts issued after the introduction of such Load. Any other measures which the Mutual Fund may feel necessary would be undertaken.

The investors are requested to check the prevailing load structure of the Scheme before investing. *For the current applicable exit load structure, please refer to the website of the AMC (<https://www.pgimindia.com/mutual-funds>) or may call at 1800 266 7446 (toll free no.) or your distributor.*

B. Risk factors

i) Standard Risk Factors

For Standard Risk Factors, kindly refer Statement of Additional Information (SAI)

ii) Scheme Specific Risk Factors

1. Risks associated with investments in Equities

- The Scheme’s portfolio shall comprise equity holdings of large cap (minimum 35% and maximum 65% of the portfolio) and mid cap stocks (minimum 35% and maximum 65% of the portfolio). The Scheme may also invest upto 30% in equity stocks other than large and mid cap stocks. While mid cap stocks give one an opportunity to go beyond the usual large blue chip stocks and present possible higher capital appreciation, it is important to note that mid cap stocks can be riskier and more volatile on a relative basis. Therefore, the risk levels of investing in mid cap stocks are more than investing in stocks of large well established companies. It should be noted that over a period of time, mid cap and large cap stocks have demonstrated different levels of volatility and investment returns and it is important to note that generally, no one class consistently outperforms the others.
- Investors may note that AMC/Fund Manager’s investment decisions may not be always profitable, as actual market movements may be at variance with anticipated trends. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different

segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio.

- Equity and equity related securities may be volatile and hence are prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, currency exchange rates, changes in law / policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual securities, a specific sector or all sectors.
- Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.

2. Risk associated with investing in Fixed Income Securities

- **Interest Rate Risk:** Market value of fixed income securities is generally inversely related to interest rate movement. Accordingly, value of portfolio of the scheme may fall if the market interest rate rise and may appreciate when the market interest rate comes down.
- **Credit Risk:** - This is risk associated with default on interest and /or principal amounts by issuers of fixed income securities. In case of a default, scheme may not fully receive the due amounts and NAV of the scheme may fall to the extent of default.
- **Spread Risk:** - Credit spreads on corporate bonds may change with varying market conditions. Market value of debt securities in portfolio may depreciate if the credit spreads widen and vice – versa. Similarly, in case of floating rate securities, if the spreads over the benchmark security / index widen, then the value of such securities may depreciate.
- **Liquidity Risk:** - Liquidity condition in market varies from time to time. In an environment of tight liquidity, necessity to sell securities may have higher than usual impact cost. Further, liquidity of any particular security in portfolio may lessen depending on market condition, requiring higher discount at the time of selling.
- **Counterparty Risk:** - This is the risk of failure of counterparty to a transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the Scheme in case of a counterparty default.
- **Re-investment Risk:** - Investment in fixed income securities carries re-investment risk. Interest rates prevailing on the coupon payment or maturity date may differ from the purchase yield of the security. This may result in final realized yield to be lower than that expected at the time of purchase.

- The Scheme at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.
- **Risks associated with unrated instruments:** - Investments in unrated instruments are subject to the risk associated with investments in any other fixed income securities, as referred above. However, investments in unrated instruments are considered to be subject to greater risk of loss of principal and interest than rated instruments.

3. Risk envisaged and mitigation measures for repo transactions :

- **Counterparty Risks** - Risks could arise if the Counterparty does not return the security (in a borrowing transaction) as contracted or pay interest (lending transaction) on the due date. This risk is largely mitigated, as the choice of counterparties is 'restricted' and their credit ratings and overall credit risk levels are taken into account before entering into such transactions.
- **Settlement Risks** - Operational risks are lower as such trades are settled on a DVP (Delivery versus Payment – Safe settlement) basis. The trades are settled on a bilateral basis in the OTC segment.
- **Collateral / Credit Risk** - In the event of the scheme being unable to pay back the money to the Counterparty as contracted, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds if any after such disposal may be refunded to the scheme. The value of the collateral will be monitored on a daily basis and shortfalls if any will lead to demand on the counterparty to top up collateral. In ability to comply with top up requests could lead to liquidation of security / collateral and an early / premature termination of the agreement.
- **Risk of Co-mingling** -Servicers normally deposit all payments received from the Obligor into the Collection Account. However, there could be a time gap between collection by a Servicer and depositing the same into the Collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the Loan Agreements may not be segregated from other funds of the Servicer. If the Servicer fails to remit such funds due to Investors, the Investors may be exposed to a potential loss. Due care is normally taken to ensure that the Servicer enjoys highest credit rating on standalone basis to minimize Co-mingling risk

4. Risk associated with investments in Derivatives

- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities as well as to manage risks arising thereby. Identification and execution of the strategies to be pursued by the Scheme involve uncertainty and investment decisions may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. Derivative investments carry certain risks and issues arising out of such dealings. The risks associated with the use of derivatives - either for hedging or for portfolio balancing – are different from, and possibly greater than, the risks associated with investing directly in securities and other traditional investments. Certain other risks, one or more, that may arise consequent to use of derivatives are: risk of mis-pricing or improper valuation of derivatives, credit risk arising out of counterparty failing to honour its commitment, liquidity risk where the derivatives cannot be sold at prices that reflect the underlying assets, rates and indices, and price risk where the market price may move in adverse fashion. Derivatives require the

maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to manage the risks as a result of the possible failure of the counterparty to comply with the terms of the derivative contract.

- To the extent that Derivatives are utilised to seek to achieve the investment objectives of the Scheme, and for purposes other than hedging, the overall risk of loss to the Scheme may be increased. To the extent that Derivatives are utilised for hedging purposes, the risk of loss to the Scheme may be increased where the value of the Derivative instrument and the value of the Security or position which it is hedging are insufficiently correlated.
- **Futures and Call Options:-** The Scheme may invest in Derivatives such as futures and call options. The option buyer's risk is limited to the premium paid, while the risk of an option writer is unlimited. However the gains of an option writer are limited to the premiums earned. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price. The loss can be unlimited as the underlying asset can increase to any level. The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price and the loss is limited to the strike price. The relevant stock exchange, if any, may impose restrictions on the exercise of options and may also restrict the exercise of options at certain times in specified circumstances.
- **Risks for writing covered call options for equity shares:**
 - a) Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strategy, the profits from call option writing is capped at the option premium, however the downside depends upon the increase in value of the underlying equity shares.
 - b) The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement.

This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity, or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.

 - c) The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is more than the option premium received the scheme would be at a loss.
 - d) The total gross exposure related to option premium paid and received must not exceed the regulatory limits of the net assets of the scheme.
- This may restrict the ability of Scheme to buy any options.
- Investments in index futures face the same risk as investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying Securities.

- The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.

5. Risk associated with Overseas Investment

- Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry a risk on account of fluctuations in the foreign exchange rates, nature of securities market of the country, repatriation of capital due to exchange controls and political circumstances.
- It is the AMC's belief that investment in Permitted Foreign Securities offers new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the Scheme. Since the Scheme would invest in Permitted Foreign Securities including but not limited to units/ securities issued by overseas mutual fund or unit trusts which are registered with the overseas regulator, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme. To manage risks associated with foreign currency and interest rate exposure, the Scheme may use derivatives in accordance with conditions as may be stipulated by SEBI/RBI from time to time.
- Offshore investments will be made subject to any/all approvals, conditions thereof as may be stipulated by SEBI/RBI and provided such investments do not result in expenses to the Scheme in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing.
- To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment. Due to time zone differences, NAV of investee scheme in such cases may not be available for the same day.
- The investment limit in foreign securities currently applicable to Mutual Fund under paragraph 12.19 of SEBI Master Circular for Mutual Funds if overall limit for the Mutual Fund in overseas securities reaches USD 1 billion or the overall limit for Mutual Fund Industry in overseas securities reaches USD 7 billion, then Mutual Fund will not be able to invest in overseas securities / will not be able to do incremental overseas investment, unless such limit is increased or further directions is received from SEBI or RBI in this regard. It may be noted that the cap of USD 1 billion will be monitored and enforced at the Mutual Fund level and not at the individual scheme level.

6. Risks associated with investment in Securitised Instruments:

Generally available types of loans for Securitisation in India are:

- Commercial Vehicles
- Auto and Two wheeler pools
- Mortgage pools (residential housing loans)

- Personal Loan, credit card and other retail loans
- Corporate loans/receivables

Underlying Risk: Each asset class has a different underlying risk, however, residential mortgages are supposed to be having lower default rates. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans/receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the risks would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher and hence their overall risks are comparable to other AAA rated asset classes.

The rating agencies have an elaborate system of stipulating margins, over collateralisation and guarantee to bring risk limits in line with the other AAA rated securities. Please note that the scheme(s) intends to invest predominantly in AAA rated securitised debt.

Investment exposure of the Fund with reference to Securitised Debt:

The Fund will predominantly invest only in those securitization issuances which have AAA rating indicating the highest level of safety from credit risk point of view at the time of making an investment. The Fund will not invest in foreign securitised debt.

The Fund may invest in various type of securitisation issuances, including but not limited to Asset Backed Securitisation, Mortgage Backed Securitisation, Personal Loan Backed Securitisation, Collateralized Loan Obligation/Collateralized Bond Obligation and so on.

The Fund does not propose to limit its exposure to only one asset class or to have asset class based sub-limits as it will primarily look towards the AAA rating of the offering.

Risk Factors specific to investments in Securitised and Structured Instruments: Underlying Risk

Each asset class has a different underlying risk, however, residential mortgages are supposed to be having lower default rates. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans/receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the risks would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher and hence their overall risks are comparable to other similarly rated asset classes.

Limited Liquidity & Price Risk :

Presently, secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the investor to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

Limited Recourse, Delinquency and Credit Risk:

Securitised transactions are normally backed by pool of receivables and credit enhancement as stipulated by the rating agency, which differ from issue to issue. The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and there is no obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the Certificate Holders against the Investors'

Representative. Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Investor Payouts may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of a Obligor to repay his obligation, the Servicer may repossess and sell the underlying Asset.

However many factors may affect, delay or prevent the repossession of such Asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such Asset may be sold may be lower than the amount due from that Obligor.

Risks due to possible prepayments:

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. Full prepayment of underlying loan contract may arise under any of the following circumstances:

- Obligor pays the Receivable due from him at any time prior to the scheduled maturity date of that Receivable; or
- Receivable is required to be repurchased by the Seller consequent to its inability to rectify a material misrepresentation with respect to that Receivable; or
- The Servicer recognizing a contract as a defaulted contract and hence repossessing the underlying Asset and selling the same.
- In the event of prepayments, investors may be exposed to changes in tenor and yield.

Bankruptcy of the Originator or Seller

If originator becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the sale from originator to Trust was not a sale then an Investor could experience losses or delays in the payments due. All possible care is generally taken in structuring the transaction so as to minimize the risk of the sale to Trust not being construed as a “True Sale”. Legal opinion is normally obtained to the effect that the assignment of Receivables to Trust in trust for and for the benefit of the Investors, as envisaged herein, would constitute a true sale.

Bankruptcy of the Investor’s Agent

If Investor’s agent, becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of Investor’s Agent to the assets/receivables is not in its capacity as agent/Trustee but in its personal capacity, then an Investor could experience losses or delays in the payments due under the swap agreement. All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor’s Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor’s Agent. Legal opinion is normally obtained to the effect that the Investors Agent’s recourse to assets/receivables is restricted in its capacity as agent and trustee and not in its personal capacity.

Credit Rating of the Transaction/Certificate

The credit rating is not a recommendation to purchase, hold or sell the Certificate in as much as the ratings do not comment on the market price of the Certificate or its suitability to a particular investor. There is no assurance by the rating agency either that the rating will remain at the same level for any given period of time or that the rating will not be lowered or withdrawn entirely by the rating agency.

Risk of Co-mingling

The Servicers normally deposit all payments received from the Obligors into the Collection Account. However, there could be a time gap between collection by a Servicer and depositing the same into the Collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the Loan Agreements may not be segregated from other funds of the Servicer. If the Servicer fails to remit such funds due to Investors, the Investors may be exposed to a potential loss. Due care is normally taken to ensure

that the Servicer enjoys highest credit rating on stand alone basis to minimize Co-mingling risk.

7. Risks associated with segregated portfolio

- Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
- Security comprising of segregated portfolio may not realise any value
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV

8. Risk associated with Securities Lending & Short Selling

- Purchasing a security entails the risk of the security price going down. Short selling of securities (i.e. sale of securities without owning them) entails the risk of the security price going up thereby decreasing the profitability of the short position. Short selling is subject to risks related to fluctuations in market price, and settlement/liquidity risks. If required by the Regulations, short selling may entail margin money to be deposited with the clearing house and daily mark to market of the prices and margins. This may impact fund pricing and may induce liquidity risks if the fund is not able to provide adequate margins to the clearing house. Failure to meet margin requirements may result in penalties being imposed by the exchanges and clearing house.
- Engaging in securities lending is subject to risks related to fluctuations in collateral value and settlement/liquidity and counterparty risks. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity and in turn cannot protect from the falling market price of the said security.

9. Risks associated with Securities Lending and Borrowing (SLB)

Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. The risks in security lending consist of the failure of intermediary / counterparty, to comply with the terms of agreement entered into between the lender of securities i.e. the scheme and the intermediary / counterparty. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The scheme may not be able to sell lent out securities, which can lead to temporary illiquidity & loss of opportunity.

10. Risk associated with investments in REITs and InvITS:

- Market Risk: REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related

factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.

- **Price-Risk or Interest-Rate Risk:** REITs & InvITs run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Liquidity Risk:** This refers to the ease with which securities can be sold. There is no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities for which a liquid market exists.
- **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or IDCW pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

11. Risks associated with investing in Tri-Party Repo through CCIL (TREPS)

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall". As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

12. Risks factors associated with processing of transaction through Stock Exchange Mechanism:

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognised stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing/settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s).

13. Risk on Right to limit redemption:

Subject to the approval of Board of Directors of the AMC and Trustee Company and immediate intimation to SEBI, a restriction on redemptions may be imposed by the Scheme under certain exceptional circumstances, which the AMC / Trustee believe that may lead to a systemic crisis or event that constrict liquidity of most securities or the efficient functioning of markets. Please refer to the paragraph "Right to Limit Redemptions" for further details.

14. Risks associated with investment in mutual fund units:

Investment in units of Mutual Fund scheme involves investment risks such as, but not limited to, trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal. The value of units of mutual fund scheme may fluctuate based on the price / value / interest rates of the underlying securities in which the mutual fund scheme invests. The value of underlying securities may be affected, inter-alia, by changes in market environment, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures. The NAV is also exposed to price/interest rate risk and credit risk and may be affected inter-alia, by the counterparty's ability or willingness to meet its contractual obligations, government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee. Investment in units of mutual fund scheme is also exposed to risk of suspension of subscriptions / redemptions of the units, change in fundamental attributes etc. Since the Scheme may invest in schemes of Mutual Funds, scheme specific risk factors of each such mutual fund scheme will be applicable to the Scheme portfolio.

C. Risk mitigation strategies

The Fund by utilizing a holistic risk management strategy will endeavour to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in debt and designed risk management strategies, which are embedded in the investment process to manage such risks.

Nature of Risk	Risk Mitigation Measures by AMC
For making investment in equity schemes	
Liquidity Risk: Trading volumes, settlement periods and transfer procedures may restrict the liquidity of underlying investments.	All trades are executed on the two leading exchanges, the NSE and BSE. The internal investment process incorporates the days required to sell as an important criteria for investment decisions. Further, the days required to liquidate an investment is actively monitored by our internal systems. This ensures that the liquidity risk in the portfolio is minimized.
Settlement Risk: Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Schemes to make intended securities' purchases due to settlement problems could cause the Schemes to miss certain investment opportunities.	The portfolio invests only in stocks listed on the Bombay Stock Exchange and/or the National Stock Exchange. Both these exchanges are regulated by SEBI. The counterparty risk and settlement risk for all trades on the NSE is guaranteed by the National Securities Clearing Corporation Ltd. (a wholly owned subsidiary of the NSE); and by the Trade Guarantee Fund of BSE. Fixed income investments for equity schemes are limited to highly liquid money market instruments and used only as a cash management tool. Therefore, this minimizes the settlement risk in the portfolio.
Volatility Risk: Equity securities and equity related securities are volatile and prone to price fluctuations on a daily basis.	The schemes has a diversified portfolio to counter the volatility in the prices of individual stocks. Diversification in the portfolio reduces the impact of

	high fluctuations in daily individual stock prices on the portfolio.
For making investment in fixed income and money markets	
Credit Risk: Debt securities are subject to the risk of an issuer's inability to meet principal and interest payments on the obligations.	The fund has a rigorous credit research process. The credit team analyses and approves each issuer before investment by the schemes. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.
Liquidity Risk: The corporate debt market is relatively illiquid vis-à-vis the government securities market. Even though the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.	The scheme is envisaged to be actively managed portfolios. The liquidity and volatility of a security are important criteria in security selection process. This ensures that liquidity risk is minimized.
Investing in unrated securities: Lower rated or unrated securities are more likely to react to developments affecting the market and the credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more sensitive to economic conditions than higher rated securities.	The scheme has a rigorous credit research process and as such all investments, rated or unrated, are analyzed and approved by the credit team before investment by the schemes. Further there is a regulatory and internal cap on exposure to unrated issuers, limiting exposure to unrated securities.
Investing in unlisted securities: The Schemes may invest in securities which are not quoted on a stock exchange ("unlisted securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market and there can be no assurance that the Schemes will realise its investments in unlisted securities at a fair value.	The schemes will predominantly invest in listed securities and in some instances, invest in securities which are expected to be listed. Further, listing of debt securities typically has no significant impact on the liquidity, trading volatility and price discovery.
Settlement Risk: Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.	The AMC has a well laid out processes and systems, which mitigate operational risks attached with the settlement process.
Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Plans are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally	Reinvestment risk is an inherent feature of the portfolio management process. It may be managed, to a certain extent, by seeking to invest in securities with relatively low intermittent cash flows.

assumed.

Position of Debt Market in India

The Indian debt market, one of the largest in Asia, is developing rapidly buoyed by a multitude of factors including new instruments, increased liquidity, deregulation of interest rates and improved settlement systems. The major players in the Indian debt markets today are banks, financial institutions, insurance companies, pension funds, provident funds and mutual funds. The instruments in the market can be broadly categorized as those issued by corporates, banks, financial institutions and those issued by state/central governments. The risks associated with any investments are - credit risk, interest rate risk and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities carry zero credit risk. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The largest segment of the Indian Debt market consists of the Government of India securities where the daily average trading volume is in excess of around Rs. 50,000 crores, with instrument tenors ranging from short dated Treasury Bills to long dated securities extending upto 50 years. The Corporate bond market, though relatively less liquid, is also fast developing with an increased participation from the banks, financial institutions, mutual funds, provident funds, insurance companies and corporate treasuries. Public Financial Institutions, Public Sector Undertakings and Private AAA Corporates are the major issuers. Corporate bonds majorly are issued as fixed rate bonds. The yield curve usually tends to be positive sloping i.e. yield of shorter dated securities being lower than that of longer dated ones.

The money markets in India essentially consist of call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at specified price), Tri-Party Repo, commercial papers (CPs, short term unsecured promissory note, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). A predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates.

The various instruments currently available for investments are:

The AMC, at its discretion at a later date, may choose to alter or add other modes of payment.

	<p>Effect of IDCW:</p> <p>Upon payment of IDCW (including reinvestment of IDCW), the NAV attributable to Units in the respective IDCW Option will stand reduced by the IDCW amount, statutory levy, if any. The NAV of the Growth Option will remain unaffected by the payment of IDCW.</p> <p>Although the Scheme will have a common portfolio for both Growth and IDCW Options, the NAVs of the two Options will be distinctly different after declaration of the first IDCW to the extent of income distributed, distribution tax and statutory levy thereon.</p>
Allotment (Detailed procedure)	<p>All applicants will receive full and firm allotment of Units, provided the applications are complete in all respects and are found to be in order. The AMC retain the sole and absolute discretion to reject any application. Allotment to NRIs/FPIs will be subject to RBI approval, if any, required.</p> <p>An applicant in a scheme whose application has been accepted shall have the option either to receive the statement of accounts or to hold the units in dematerialised form and the asset management company shall issue to such applicant, a statement of accounts specifying the number of units allotted to the applicant or issue units in the dematerialized form as soon as possible but not later than five working days from the date of closure of the initial subscription list or from the date of receipt of the application.</p> <p>In case of Unit holder who have provided their e-mail address the Fund will provide the Account Statement only through e-mail message, subject to Regulations and unless otherwise required. In cases where the email does not reach the Unit holder, the Fund / its Registrar & Transfer Agents will not be responsible, but the Unit holder can request for fresh statement. The Unit holder shall from time to time intimate the Fund / its Registrar & Transfer Agent about any changes in his e-mail address.</p> <p>All Units will rank <i>pari passu</i>, among Units within the same Option in the Scheme concerned as to assets, earnings and the receipt of IDCW distributions, if any, as may be declared by the Trustee.</p> <p>In case the Unit Holder desires to hold Units in dematerialized/rematerialized form at a later date, the request for conversion of Units held in non-dematerialized form into dematerialized form or vice-versa should be submitted along with a dematerialized/rematerialized request form to their Depository Participants.</p>
Refund	<p>If application is rejected, full amount will be refunded within 5 working days of rejection of application. If refunded later than 5 working days @ 15% p.a. for delay period will be paid and charged to the AMC.</p>
