Explanation:

In case of securities where the principal is to be repaid in a single payout, the maturity of the securities shall mean residual maturity.

In case the principal is to be repaid in more than one payout, then the maturity of the securities shall be calculated on the basis of weighted average maturity of security.

In case the maturity of the security falls on a non-business day, then the settlement of securities will take place on the next business day

Inter-scheme transfers of securities held in other schemes having maturity of upto 91 days only be permitted in the Scheme.

The securities may be acquired through secondary market operations, primary issues/offerings, other public offers, Private Placement and negotiated deals amongst other mechanisms.

For detailed definition and applicable regulations/guidelines for each instrument please refer Section II.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme will track its Underlying Index and will use a “passive” or indexing approach to endeavor to achieve scheme’s investment objective. All investments of the Scheme would be in Tri-Party REPO, Repo in Government Securities, Reverse Repos and similar other overnight instruments and other Money Market Instruments (with maturity not exceeding 91 days).

RISK CONTROL

Investments made by the Scheme would be in accordance with the investment objective of the Scheme and provisions of SEBI Regulations. Since the investing requires disciplined risk management, the AMC has adequate safeguards for controlling risk in the portfolio construction process. The risk control process involves reducing risk through portfolio diversification wherever possible, taking care however not to dilute the returns in the process. It is the belief of the AMC that the diversification would help to achieve desired level of consistency in returns.

PORTFOLIO TURNOVER

Portfolio Turnover is a term used to measure the volume of trading that occurs in a Scheme's portfolio during a given time period. The scheme being a passively managed open-ended exchange traded fund, it is expected that there would be a number of subscriptions and redemptions on a daily basis. Hence, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in the Index. The Scheme has no specific target relating to portfolio turnover. The effect of higher portfolio turnover could be higher brokerage and transaction costs.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Benchmark: BSE Liquid Rate Index

Justification for Benchmark-

BSE Liquid Rate Index is designed to measure the returns from a daily rolling deposit at the Tri-Party Repo (TREP) rate.

The aforesaid Index is calculated in Indian rupees using the TREP rate for transactions maturing on the following business day and with settlement T+0. Rates used are provided by Clearing Corporation of India Ltd (CCIL). The index represents the performance of a daily rolling deposit and does not undergo a rebalancing.

As the Scheme will invest in Tri-Party Repos, BSE Liquid Rate Index is a suitable benchmark for the scheme.

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

The NAV of the Units of a Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

NAV of Units under each Scheme may be calculated by either of the following methods shown below:

$$\text{NAV Per Unit (Rs.)} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under the Scheme}}$$

The numerical illustration of the above method is provided below.

Market or Fair Value of Scheme's investments (Rs.) = 11,42,53,650.00

Current Assets (Rs.) = 10,00,000.00

Current Liabilities and Provisions (Rs.) = 5,00,000.00

No. of Units outstanding under the Scheme = 1,00,00,000

$$\text{NAV Per Unit (Rs.)} = \frac{11,42,53,650.00 + 10,00,000.00 - 5,00,000.00}{1,00,00,000} = 11.4754$$

N.B.: The aforesaid provisions pertaining to "Calculation of NAV" shall apply in respect of each individual Scheme and/or plan as the case may be. The NAV per Unit above is rounded off to four decimals.

The NAV will be calculated as of the close of every Business Day.

NAVs will be rounded off to four decimal places. The valuation of the Schemes' assets and calculation of the Schemes' NAVs shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

While determining the price of the units, the mutual fund shall ensure that the repurchase price of Scheme is not be lower than 97% Net Asset Value as provided under SEBI (MF) Regulations. For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

Further, the investors are requested to note following in accordance with the SEBI Circular read along with the clarification issued by AMFI:

- (i) when PRC cell classification is changed into a cell with either a higher interest rate risk or credit risk, mutual funds shall intimate to all unit holders about the change in the PRC value post completion of the fundamental attribute change (FAC) process. This shall be in addition to the intimation to unit holders about the proposed FAC and the 30-day exit period, prior to the change.
- (ii) the change in the PRC value due to investment actions, price changes, rating changes, etc. shall be determined as part of the day-end post trade compliance check and if the day end PRC value is higher than the maximum risk specified for either of the risks, it shall be rebalanced within a period specified in the Scheme Information Document of the Scheme. Such rebalancing shall be monitored by the Investment Management Committee of the AMC. However, the rule relating to maximum residual maturity of the instrument as per clause 17.5.4 of SEBI Master Circular shall be part of pre-trade checks. Further, only a permanent change in the PRC positioning of a scheme into a higher risk cell will be regarded as a FAC.

At all points of time, positioning of the Debt ETF Scheme in the Potential Risk Class (PRC) matrix shall be in the same cell as that of positioning of the index in the PRC matrix.

F. INTRODUCTION TO EXCHANGE TRADED FUNDS

An ETF is a passively managed product that provides exposure to an index or a basket of securities with the objective of generating returns as close to the index as possible. The key benefit of an ETF over traditional open-ended index funds is liquidity and availability of real-time market price on stock exchange. They can be bought and sold on the exchange at prices that are usually close to the actual intra-day NAV of the Scheme. ETFs provide investors a fund that closely tracks the performance of an index with the ability to buy/sell on an intra-day basis. ETFs are structured in a manner which allows

creating new units (called creation units) and redeem outstanding units directly with the fund, thereby ensuring that ETFs trade close to their actual NAVs.

ETFs are usually passively managed funds wherein subscription/redemption of units works on the concept of exchange with underlying securities. In other words, large investors/institutions can purchase units by depositing the underlying securities with the mutual fund/AMC and can redeem by receiving the underlying shares in exchange of units. Units can also be bought and sold directly on the exchange. ETFs have all the benefits of indexing such as diversification, low cost and transparency. As ETFs are listed on the exchange, costs of distribution are much lower and the reach is wider. These savings in cost are passed on to the investors in the form of lower costs. Furthermore, exchange traded mechanism helps reduce minimal collection, disbursement and other processing charges.

Tracking Error of ETFs is likely to be low as compared to a normal index fund. Due to the Creation/Redemption of units through the in-kind mechanism the mutual fund can keep lesser funds in cash. Also, time lag between buying/selling units and the underlying shares is much lower.

Benefits of ETFs

- a. Can be easily bought / sold like any other stock on the exchange through terminals spread across the country.
- b. Can be bought / sold anytime during market hours at prices that are expected to be close to actual NAV of the Scheme. Thus, investor invests at nearly the real-time prices as opposed to end of day prices.
- c. Ability to put limit orders.
- d. Protects long-term investors from the inflows and outflows of short-term investors. This is because the fund does not bear extra transaction cost when buying/selling due to frequent subscriptions and redemptions.
- e. Flexible as it can be used as a tool for gaining instant exposure to the equity markets, equitising cash, for arbitraging between the cash and futures market.

Market for ETFs:

ETFs being passive in nature can be useful for various kinds of investors. It could be for experienced investors who recognize the impact of cost on their eventual investment outcomes or relatively inexperienced / newer investors who are considering starting to invest but are not sure how, and therefore need a simple instrument that gives them access to the broad market or to specific sectors they believe in. Over the past few years, there has been a good growth in the number of investors as well as the assets under management for ETFs. The primary categories of ETFs in India are: Nifty 50 and Sensex based ETFs, Government Disinvestment mandates like CPSE, Bharat 22 and Bharat Bond, Banking Sector ETFs, and Gold ETFs. There are also few fixed income, smart beta, sectoral and thematic ETFs, tracking specified indices. Given the ETF market globally has grown significantly over the past few years, there is a strong case that the size and breadth of the ETF market has a potential go up in India in years to come.

G. Tracking error, Tracking Difference Risk & Debt Index Replication Factor:

Tracking error:

Tracking Error is defined as the standard deviation of the difference between daily returns of the index and the NAV of the Scheme.

Thus Tracking Error is the extent to which the NAV of the Scheme moves in a manner inconsistent with the movements of the Scheme's benchmark index on any given day or over any given period of time due to any cause or reason whatsoever including but not limited to expenditure incurred by the Scheme, Income Distribution cum Capital Withdrawal payouts if any, whole cash not invested at all times as it may keep a portion of funds in cash to meet redemption etc.

Tracking Difference:

Tracking Difference is defined as the annualized difference of daily returns between the index and the NAV of the ETF Schemes.

Tracking difference of the Scheme shall be disclosed on the website of the AMC i.e. www.dspim.com and AMFI, on a monthly basis, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units.

Debt Index Replication Factor:

Debt Index Replication Factor (DIRF) indicates how closely the Scheme tracks the underlying benchmark index. For this purpose, the Scheme shall be considered to completely replicate an individual issuer if the Scheme portfolio has the same issuer in the exact same percentage akin to the Index. DIRF for the Scheme shall be disclosed on the AMC's website on monthly basis.

Annualized tracking difference averaged over one year period for Debt ETF scheme shall not exceed 1.25%. In case the average annualized tracking difference over one year period for Debt ETF scheme is higher than 1.25%, the same shall be brought to the notice of the Board of Trustees with corrective actions taken by the AMC, if any.

B. Risk factors

Scheme Specific Risk Factors

Risk of Substantial Redemptions in ETFs:

- The Scheme(s) at times may receive large number or large value of direct redemption requests as per the provision of the SID.
- The liquidity of underlying investments may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances beyond the influence of the AMC. The inability of the Scheme to sell intended securities due to liquidity & settlement problems, could cause delay for processing the large number of direct redemptions. The Trustee, in the general interest of the Unit holders of the Schemes offered under this SID and

keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Working Day depending on the total “Saleable Underlying Stock” available with the Fund.

Risk Factors associated with investments in passive schemes:

i. Passive Investments:

As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets. The value of the Scheme’s investments, may be affected generally by factors affecting equity markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.

The scheme will be investing only in the securities included in the underlying index and will be exposed to additional concentration risk in cases where the underlying index has concentration towards any specific sector, theme or market capitalization. The AMC will not have any option to reduce the concentration risk by diversifying the investments.

ii. Tracking Error and Tracking Difference Risk:

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the respective scheme, corporate actions, cash balance, changes to the underlying index and regulatory policies which may affect AMC’s ability to achieve close correlation with the underlying index of the scheme. The scheme’s returns may therefore deviate from those of its underlying index. **“Tracking Error” is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the respective scheme. “Tracking Difference” is the annualized difference of daily returns between the Index and the NAV of the scheme (difference between fund return and the index return).** Tracking Error and Tracking difference may arise including but not limited to the following reasons:

- i. Expenditure incurred by the fund.
- ii. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be invested at all time as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- iii. Securities trading may halt temporarily due to circuit filters.
- iv. Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.
- v. Rounding off of quantity of shares in underlying index.
- vi. Dividend payout.
- vii. Disinvestments to meet redemptions, recurring expenses, IDCW payouts etc.
- viii. Execution of large buys / sell orders
- ix. Transaction cost (including taxes and insurance premium) and recurring expenses
- x. Realization of Unit holders funds
- xi. Index providers may either exclude or include new scrips in their periodic review of the scrips that comprise the underlying index. In such an event, the Fund will try to reallocate its portfolio but the available investment/reinvestment opportunity may not permit absolute mirroring immediately.

SEBI Regulations (if any) may impose restrictions on the investment and/or divestment activities of the Scheme. Such restrictions are typically outside the control of the AMC and may cause or exacerbate the Tracking Error.

It will be the endeavor of the fund manager to keep the tracking error as low as possible. However, in case of events like, dividend received from underlying securities, rights issue from underlying securities, and market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances may result in tracking error. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

Risks pertaining to transacting in listed units of scheme /ETFs:

- i. **Absence of Prior Active Market:** Although the Scheme is listed on Stock Exchange, there can be no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the Units of the Scheme would be infrequent.
- ii. **Trading in Units may be Halted:** Trading in the Units of the Schemes on Stock Exchange may be halted because of market conditions or for reasons that in view of Stock Exchange or SEBI, trading in the Units of the Schemes are not advisable. In addition, trading of the Units of the Scheme are subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange and SEBI circuit filter rules. There can be no assurance that the requirements of Stock Exchange necessary to maintain the listing of the Units of the Schemes will continue to be met or will remain unchanged.
- iii. **Units of the Schemes May Trade at Prices Other than NAV:** The Units of the Schemes may trade above or below their NAV. The NAV of the Schemes will fluctuate with changes in the market value of the holdings of the Schemes. The trading prices of the Units of the Schemes will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the Schemes. However, given that Units of the Schemes can be created and redeemed in Creation Units directly with the Fund, it is expected that large discounts or premiums to the NAV of Units of the Schemes will not sustain due to arbitrage opportunity available.
- iv. **Other Risk related to listed units:** The units will be issued only in dematerialized form through depositories. The records of the depository are final with respect to the number of units available to the credit of unit holder. Settlement of trades, repurchase of units by the mutual fund during the liquidity window depend upon the confirmations to be received from depository (ies) on which the mutual fund has no control.

Investors may note that the scheme would only repurchase units from the Market Makers & Large Investors in eligible Creation Unit Size. Thus unit holdings less than the eligible Creation Unit Size can only be sold through the secondary market on the exchanges

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognised stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing/settlement, etc. upon which the Fund has no control. However, units of the Scheme can only be subscribed in demat mode. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s).

Any changes in trading regulations by Stock Exchange or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.

Risk Factors associated with investments in Cash and Cash Equivalents:

- **Price-Risk or Interest-Rate Risk:** Cash and cash equivalents run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. However, Cash and

cash equivalents in this scheme are intended to be held till maturity. For such securities held till maturity, there will not be any interest rate risk at the end of the tenure.

- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation Yield-to-Maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer.
- **Reinvestment Risk:** Investments in cash and cash equivalents may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain cash and cash equivalents give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.

Risk factors associated with investment in Tri-Party Repo:

The mutual fund is a member of securities segment and Triparty Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund

Market Risk

The NAV of the Scheme will react to the securities market movements. The Investor may lose money over short or long periods due to fluctuation in the Scheme's NAV in response to factors such as economic, political, social instability or diplomatic developments, changes in interest rates and perceived trends in stock prices, market movements and over longer periods during market downturns. Investments may be adversely affected by the possibility of expropriation or confiscatory taxation, imposition of withholding taxes on Income Distribution cum Capital Withdrawal or interest payments, limitations on the removal of funds or other assets of the Scheme. In case of any event beyond the control of the manager if an asset becomes illiquid it is possible that the Scheme may not be able to immediately sell certain types of illiquid Securities. The purchase price and subsequent valuation of restricted and illiquid Securities may reflect a discount, which may be significant, from the market price of comparable Securities for which a liquid market exists. The scheme envisages to invest in highly liquid securities and thus we believe this risk is minimal to the scheme

Regulatory Risk: Any changes in trading regulations by NSE/BSE or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.

Asset Class Risk:

The returns from the types of Securities in which the Scheme invests may underperform returns of

general Securities markets or different asset classes. Different types of Securities tend to go through cycles of out-performance and under-performance in comparison of Securities markets.

Calculation of NAV:

From time to time, materiality thresholds may apply in so far as it relates to errors in the calculation of NAV in accordance with SEBI Regulations. Unit holders should note that the AMC may not pay the Unit holders or the Scheme the amount of any difference in circumstances where any such materiality thresholds provided under SEBI Regulations are not exceeded. Therefore such differences may lead to a different economic result than if such amounts were paid and such errors, which are deemed to be immaterial, will not lead to a reissued and corrected NAV.

As a result, Investors/ Unit holders who have Subscribed for or Redeemed Units of the Scheme on a day on which the materiality thresholds had been applied, the Investors / Unit holders may receive a different economic result than they would have received had the error in calculation of the NAV not happened.

Risk of Changes in Borrowing Rates

The Scheme may borrow funds on a temporary basis within the limits set forth under the SEBI Regulations. The Scheme may choose to only borrow from the Custodian of the Scheme, and the borrowing rate imposed by the Custodian of the Scheme may change due to market conditions. As a consequence thereof, the borrowing rates imposed by the Custodian may not be the most competitive. The cost that would be allocated to the scheme would be as per the SEBI circular & guidelines issued from time to time.

C. RISK MITIGATION STRATEGIES

Tracking error & Tracking Difference Risk:

The Investment Manager would monitor the tracking error and tracking difference of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. The investment manager will endeavor to maintain low cash levels to minimize tracking error and tracking difference

Risk associated with Cash and Cash Equivalents: The scheme will invest in securities as per the intended allocation and thus this risk are low as compared to other risk mentioned above. The AMC will endeavor to minimize the Liquidity Risk, Interest Rate Risk, Reinvestment Risk.

Transaction in listed units: The AMC with help of market makers will monitor and ensure liquidity on the exchanges for trading the units of the ETF.

II. Information about the scheme:

A. Where will the scheme invest

Subject to the Regulations and the disclosures as made under the section “How the Scheme will allocate its Assets”, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities:

1. Repos & Reverse Repos - Repo (Repurchase Agreement) or Reverse Repo is a transaction in which two parties agree to sell and purchase the same security with an agreement to purchase or sell the same security at a mutually decided future date and price. The transaction results in collateralized borrowing or lending of funds.
2. TREPS - TREPs is a money market instrument that enables entities to borrow and lend against sovereign collateral security. The maturity ranges from 1 day to 90 days and can also be made available upto 1 year. Central Government securities including T-bills are eligible securities that can be used as collateral for borrowing through TREPs.

3. Treasury Bills - Treasury bills (T-bills) are short-term government securities issued at a discount to their face value and mature within one year. They do not pay periodic interest but provide returns by maturing at their full face value, with the difference between the purchase price and the maturity value representing the investor's earnings. T-bills are considered low-risk investments due to government backing.
4. Government Securities - Securities created and issued by the Central Government and/or a State Government (including Treasury Bills) or Government Securities as defined in the Government Securities Act, 2006, as amended or re-enacted from time to time.
5. The portfolio of the Scheme shall adhere to the following conditions:
The Scheme will make investment in/purchase money market securities with maturity of upto 91 days only. In case of securities with put and call options (daily or otherwise), the residual maturity shall not be greater than 91 days.

Explanation:

In case of securities where the principal is to be repaid in a single payout, the maturity of the securities shall mean residual maturity.

In case the principal is to be repaid in more than one payout, then the maturity of the securities shall be calculated on the basis of weighted average maturity of security.

In case the maturity of the security falls on a non-business day, then the settlement of securities will take place on the next business day

Inter-scheme transfers of securities held in other schemes having maturity of upto 91 days only be permitted in the Scheme.

The securities mentioned in, "Where will the Scheme(s) invest?", could be listed, to be listed, unlisted, privately placed, secured, unsecured, rated or unrated (subject to the rating or equivalency requirements discussed above) and of any maturity. The securities may be acquired through secondary market operations, primary issues/offering, other public offers, Private Placement and negotiated deals amongst other mechanisms.

Applicable guidelines/other details where the scheme will invest:

Inter scheme asset transfer

However, any permanent change in the positioning of a Scheme into a cell resulting in a risk (in terms of credit risk or duration risk) which is higher than the maximum risk specified for the chosen PRC cell, shall be considered as a fundamental attribute change of the Scheme in terms of Regulation 18(15A) of SEBI (Mutual Fund) Regulations, 1996. The Unitholders are given an option for a period of atleast 30 calendar days to exit at the prevailing Net Asset Value without any exit load.

D. Index methodology

ABOUT THE INDEX

BSE Liquid Rate Index is designed to measure the returns from a daily rolling deposit at the Tri-Party Repo (TREP) rate.

The aforesaid Index is calculated in Indian rupees using the TREP rate for transactions maturing on the following business day and with settlement T+0. Rates used are provided by Clearing Corporation of India Ltd (CCIL). The index represents the performance of a daily rolling deposit and does not undergo a rebalancing.

As the Scheme will invest in Tri-Party Repos, BSE Liquid Rate Index is a suitable benchmark for the scheme.

A detailed review of the Scheme and the performance of the Scheme vis-à-vis the benchmark will be placed before the board of directors of AMC and Trustee on a quarterly basis.

In terms of clause 1.8 of SEBI Master Circular, the board of directors of the AMC and Trustees may review the benchmark selection from time to time, and make suitable changes as to use of the benchmark or select an additional or replacement benchmark, or related to composition of the benchmark, whenever it deems necessary after recording an adequate justification for carrying out such change. However, change of benchmark and/or selecting additional benchmarks would be done in compliance with the relevant guidelines of SEBI in this regard.

The Fund Manager will bring to the notice of the board of directors of the AMC, specific factors if any, which are impacting the performance of the Scheme. The board of directors of the AMC on consideration of all relevant factors may, if necessary, give appropriate directions to the AMC. Similarly, the performance of the Scheme will be submitted to the Trustees. The Fund Manager / Chief Investment Officer will explain to the Trustees, the details on the Scheme's performance vis-à-vis the benchmark returns.

BSE Liquid Rate Index Calculation

The index is calculated by applying the return implied by the TREP rate to the previous day's index level.

$$IndexTRt = (1 + \frac{[T + 1, T]}{365} * rt) \times IndexTRt-1$$

where: $IndexTRt$ = Index Value on current index calculation day t

$IndexTRt-1$ = Index Value on previous index calculation day $t - 1$

$[T + 1,]$ = Number of days between next index calculation day $t + 1$ and current index calculation day t

rt = Weighted Average TREP Rate published by CCIL on current index calculation day t for T+0 settlement type with $[T + 1, T]$ days to maturity

Note: $IndexTRt$ calculated on current day is the face value of the rolling deposit maturing on following business day

Reconstitution: Not Applicable

Constituent Weightage and Impact Cost: Not Applicable

E. Principles of incentive structure for market makers -

AMC does not intend to provide any performance based incentive to its Market Maker. However, performance based incentives structure as and when provided to Market Makers shall be charged to the Scheme within the maximum permissible limit of TER and the appropriately disclosure in this regard shall be made.

F. Floors and ceiling within a range of 5% of the intended allocation against each sub class of asset, as per clause 13.6.2 of SEBI master circular for mutual funds

Not applicable

G. Other Scheme Specific Disclosures:

Listing and transfer of units	Listing of units: The Units of the scheme are listed on National Stock Exchange of India Limited and BSE Ltd and/or any recognised stock exchanges as may be decided by AMC from time to time. The Units of the Scheme may be bought or sold on all trading days at prevailing listed price on such Stock Exchange(s). The AMC will appoint Market Makers to provide liquidity in secondary market on an ongoing basis. The Market Maker(s) would offer daily two-way quote (buy and sell quotes) in the market. Transfer of units In accordance with clause 14.4.4 of SEBI Master circular, units of all DSP BSE Liquid Rate ETF which that are held in demat form, will be transferable and will be subject to the transmission facility in accordance with the provisions of SEBI (Depositories and Participants) Regulations, 2018 as may be amended from time to time. If a person becomes a holder of the Units consequent to operation of law, or upon enforcement of a pledge, the transfer may be effected in accordance with the provisions of SEBI (Depositories and Participants) Regulations, 2018, provided the transferee is otherwise eligible to hold the Units. Pledge of Units for Loans
-------------------------------	---

	Units can be pledged by the Unit Holders as security for raising loans, subject to any rules/restrictions that the Trustee may prescribe from time to time. Since the units shall be held in demat form, the rules of the respective DP will be applicable for pledge of the Units.
