Section I – INTRODUCTION

A. RISK FACTORS

STANDARD RISK FACTORS

- Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the objectives of the Scheme will be achieved.
- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down depending on the various factors and forces affecting capital markets and money markets.
- Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the Scheme and may not necessarily provide a basis of comparison with other investments.
- Aditya Birla Sun Life Nifty PSE ETF is the name of the Scheme and does not, in any manner, indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1,00,000 made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

SCHEME SPECIFIC RISK FACTORS

Some of the scheme specific risk factors are included as below but are not limited to the following:

- **Liquidity Risk:** Trading in units of the scheme on the Exchange may be halted because of market conditions or for reasons that, in view of the Exchange authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter"

rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the scheme will continue to be met or will remain unchanged.

- **Regulatory Risk:** Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Market Maker/ Large Investor to arbitrage resulting into wider premium/ discount to NAV.
- **Passive Management of Investments:** Scheme shall follow a passive investment strategy and shall provide exposure to constituents of the underlying index with an aim to track its performance and yield. The scheme's performance may be affected by the general price decline in the stock markets relating to the underlying Index. The scheme shall invest in constituents of the underlying index regardless of their investment merit. The scheme does not aim to take any defensive position in case of falling markets nor shall the scheme attempt to make individual stock selection. ETF being a passive management tool does not carry risk of active fund management. An actively managed mutual fund manager, on the other hand, can tailor portfolio holdings which are beyond the mandate of an ETF. ETFs are passively managed and hence the risk associated with the particular ETF corresponds closely to the risk of the underlying asset subclass the scheme is tracking.
- **Active Market:** Although the scheme is proposed to be listed on exchange, there can be no assurance that an active secondary market will be developed or maintained. The AMC and the Trustees will not be liable for delay in trading of Units on Stock Exchange due to the occurrence of any event beyond their control. For an investor in less than creation unit size, exchange quotes may not be always available.
- **Tracking Error:** The Fund Manager may not be able to invest the entire corpus in the same proportion as in the underlying index due to various factors such as fees, expenses of the scheme, corporate action, cash balance, changes in underlying index and regulatory policies which may affect the AMCs/schemes ability to achieve close correlation with the underlying index. Tracking error may be accounted by the various reasons which includes expenses, cash balance to meet redemptions, time to reallocate the portfolio subsequent to changes in the underlying index etc. ABSLAMC will endeavor to keep the tracking error as low as possible.

“Tracking Error” is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the scheme. Tracking Error may arise including but not limited to the following reasons: -

- a. Expenditure incurred by the fund.
- b. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- c. Securities trading may halt temporarily due to circuit filters.
- d. Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents, etc.
- e. Rounding off quantity of shares in underlying index.
- f. Payout of IDCW.
- g. Disinvestments to meet redemptions, recurring expenses, payouts of IDCW, etc.
- h. Execution of large buy / sell orders
- i. Transaction cost (including taxes and insurance premium) and recurring expenses
- j. Realisation of Unit holders' funds

It will be the endeavor of the fund manager to keep the tracking error as low as possible.

- **Redemption Risk:** Investors may note that even though this is an open ended scheme, the Scheme would repurchase units in creation unit size only. Thus, if the unit holding is less than the creation unit size then it can be sold only through the secondary market on the exchange where the units are to be listed, subject to rules and regulations of the Stock Exchange. The AMC will appoint Market Maker(s) to provide liquidity in secondary market on an ongoing basis. The Market Maker(s) would offer daily two-way quote in the market.
- The market price of the ETF unit like any other listed security is largely dependent on two factors viz. the intrinsic value of the unit (or NAV) and demand and supply of the units in the market. Sizeable demand or supply of the units in exchange may lead to market price of the units to quote at premium or discount to NAV. Hence, the units of the scheme may trade above or below the NAV. However, given that the investors can transact with AMC directly beyond the creation unit size of the scheme there should not be a significant variation (large premium or discount) and it may not sustain due to the arbitrage opportunity available.

- The index reflects the prices of securities at a point in time, which is the price at close of business day on National Stock Exchange of India Limited (NSE). The scheme, however, may trade these securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be identical to the closing price of each scrip on that day on the NSE. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance from NSE closing prices.
- The performance of the index will have a direct bearing on the performance of the scheme. Hence, any composition change made by the index service provider in terms of weightage or stocks selection will have an impact on the scheme.
- The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to circuit filters in the securities, liquidity and volatility in security prices.
- The units of the Scheme will be compulsorily issued in dematerialised form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control. Further, Investors may note that buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/ broker, payment of brokerage, securities transactions tax and such other costs.

Risks associated with investment in Equity and Equity related instruments:

- Equity and Equity related securities by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors.
- The NAVs of schemes investing in equity will fluctuate as the daily prices of the individual securities in which they invest fluctuate and the units when redeemed may be worth more or less than their original cost.
- The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the units of the Scheme may fluctuate and can go up or down.
- In respect of investments in equity and equity-related instruments, there may be risks associated with trading volumes, settlement periods and transfer procedures that may restrict liquidity of investments in equity and equity-related securities. In the event of inordinately large number of redemptions or of a restructuring of the schemes' investment portfolio, there may be delays in the redemption of units.
- Investment made in to be listed equity or equity-related securities may only be realizable upon listing of these securities. Settlement problems could cause the Scheme to miss certain investment opportunities.
- Investors may note that Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.
- Though the constituent stocks of most indexes are typically liquid, liquidity differs across stocks. Due to the heterogeneity in liquidity in the capital market segment, trades on this segment may not get implemented instantly.

Risk Factors associated with investments in Fixed Income Securities:

The Scheme intends to invest not less than 95% of its corpus in the securities representing Nifty PSE Index. As this Scheme will invest in the stocks belonging to Nifty PSE Index, the Scheme will have insignificant debt/ market investments. Therefore, the Scheme is not significantly susceptible to risks associated with debt/ money markets.

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation Yield-to-Maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more-risky than bonds, which are AAA rated.
- The above are some of the common risks associated with investments in fixed income and money market securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

Risk Factors associated with Listing of units:

- Listing of units of the scheme on stock exchange does not necessarily guarantee liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained.
- Trading in the units of the Scheme on the Exchange may be halted because of market conditions, including any halt in the operations of Depository Participants or for reasons that in view of the Exchange Authorities or SEBI, trading in the units is suspended and / or restricted. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange rules of 'circuit filter'. There can be no assurance that the requirements of Stock Exchange necessary to maintain the listing of units of scheme will continue to be met or will remain unchanged.
- Further, the Scheme being listed on stock exchange, the investors wishing to redeem their units may do so through stock exchange at prevailing listed price on such Stock Exchange.
- The Units of the scheme may trade above or below their face value / NAV. The NAV of the scheme will fluctuate with changes in the market value of schemes holdings. The trading prices of units of the scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand which may even lead the units to quote at significant premium or discount to NAV.
- **Regulatory Risk:** Any changes in trading regulations by the Stock Exchange or SEBI, inter alia, may also result in wider premium/ discount to the NAV of the Scheme. Although the Units are proposed to be listed on the Stock Exchange, the AMC and the Trustees will not be liable for any loss suffered by investors due to delay in listing of units of the Scheme on the Stock Exchange or due to connectivity problems with the depositories due to the occurrence of any event beyond their control.
- As the units of the Scheme may be held in electronic (Demat) mode through depositories, the records of the depository shall be final with respect to the number of units available to the credit of unitholder, settlement of trades, in lieu of such units held in electronic (demat) form, by the Mutual Fund will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.

Risk Factors associated with Securities Lending and Borrowing:

Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate

benefits accruing on the securities borrowed. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lenders of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Scheme may not be able to sell lent out securities, which can lead to temporary illiquidity & loss of opportunity

Risks Factors Associated with Creation Of Segregated Portfolio:

Different types of securities in which the scheme would invest carry different levels and types of risk as given in the Scheme Information Document of the scheme. In addition to the same, unitholders are requested to also note the following risks with respect to Segregated Portfolio:

Liquidity Risk: A lower level of liquidity affecting an individual security (ies) or an entire market may have an adverse bearing on the value of the Segregated Scheme's assets. This may more importantly affect the ability to sell particular securities with minimal impact cost as and when necessary to meet requirement of liquidity or to sell securities in response to triggers such as a specific economic/corporate event. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of a few of the investments. This may impact the NAV of the segregated portfolio and could result into potential loss to the Unit holders.

Credit risk: The scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated. Investment in unrated securities may be riskier compared to investment in rated instruments due to non-availability of third party assessment on the repayment capability of the issuer. As the securities are unrated, an independent opinion of the rating agency on the repayment capability of the issuer will not be available. The issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. This may impact the NAV of the segregated portfolio and resultant loss to the Unit holders.

Listing of units: Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV.

Tracking Error & Tracking Difference:

Tracking Error Risk:

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance and changes to the underlying index and regulatory restrictions, lack of liquidity which may result in Tracking Error. Hence it may affect AMC's ability to achieve close correlation with the underlying index of the Scheme. The Scheme's returns may therefore deviate from its underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the Scheme. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible.

Tracking errors are inherent in ETFs and such errors may cause the scheme to generate returns which are not in line with the performance of the Nifty PSE Index or one or more securities covered by / included in the Nifty PSE Index and may arise from a variety of factors including but not limited to:

- Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and realisation of sale proceeds and / or the registration of any securities transferred and resulting delays in reinvesting them.
- The Nifty PSE Index reflects the prices of securities at close of business hours. However, the Fund may buy or sell the securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the NSE.

- The constituent stocks of the underlying index may be revised periodically by either excluding or including new securities. In such an event, the Fund will endeavour to reallocate its portfolio but the available investment/ disinvestment opportunities may not permit precise mirroring of the underlying index in a short period of time.
- The charging of expenses to the scheme including investment management fees and custodian fees.
- The potential for trades to fail, which may result the Schemes not having acquired shares at a price necessary to track the index.
- The holding of a cash position and accrued income prior to distribution and accrued expenses.
- Disinvestments to meet redemptions, recurring expenses, etc.

AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However, this may vary due to the reasons mentioned above or any other reasons that may arise and particularly when the markets are very volatile. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any.

The Scheme will disclose the tracking error based on past one year rolling data, on a daily basis, on the website of AMC and AMFI. In case the Scheme has been in existence for a period of less than one year, the annualized standard deviation will be calculated based on available data.

Tracking Difference: The tracking difference i.e. the annualized difference of daily returns between the index and the NAV of the Scheme will be disclosed on the website of the AMC and AMFI, on a monthly basis, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units.

B. Risk Mitigation Strategies

Risk Description	Risk Mitigants/management strategy
<p>Market Risk The scheme is vulnerable to movements in the prices of securities invested by the scheme, which could have a material bearing on the overall returns from the scheme. The value of the scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume, volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets</p>	<p>Market risk is inherent to an equity scheme. Being a passively managed scheme, it will invest in the securities included in its Underlying Index</p>
<p>Liquidity risk The liquidity of the scheme's investments is inherently restricted by trading volumes in the securities in which it invests</p>	<p>As such the liquidity of stocks that the scheme invests into could be relatively low. The fund will try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time and not affected by illiquidity of the underlying stocks</p>
<p>Tracking Error risk (Volatility/ Concentration risk): The performance of the Scheme may not be commensurate with the performance of their underlying Index viz. Nifty Bank TRI on any given day or over any given period</p>	<p>Over short to medium period, scheme may carry the risk of variance between portfolio composition and Benchmark. The objective of the Scheme is to track the performance of the Underlying Index over the same period, subject to tracking error. The Scheme would endeavor to maintain a low tracking error by actively aligning the portfolio in line with the index.</p>

Section II – INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

Aditya Birla Sun Life Nifty PSE ETF is an open ended Exchange Traded Fund tracking Nifty PSE Index.

B. INVESTMENT OBJECTIVE

The investment objective of the Scheme is to generate returns that are in line with the performance of Nifty PSE Index, subject to tracking errors.

The Scheme does not guarantee/indicate any returns. There is no assurance that the investment objective of the Scheme will be achieved.

C. ASSET ALLOCATION AND INVESTMENT PATTERN

Under normal circumstances, the asset allocation of the Scheme will be as follows:

Instrument	Allocation (% of total Assets)		Risk Profile
	Minimum	Maximum	
Equity and Equity related instruments constituting Nifty PSE Index	95%	100%	Very High
Cash, Money Market & Debt instruments	0%	5%	Low to Moderate

Money Market Instruments include commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity upto one year, call or notice money, certificate of deposit, usance bill and any other like instruments as specified by the Reserve Bank of India from time to time subject to regulatory approvals, if any.

Investment in Debt instruments (for liquidity purpose) will be of less than 1-year residual maturity.

The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum subject to compliance with para 2.8.2 of SEBI Master Circular on Mutual Funds dated May 19, 2023. However, this may vary when the markets are very volatile. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to the performance of the Underlying Index.

In accordance with para 5.2 and 5.8.2.1 of para 5.8 of SEBI Master Circular on Mutual Funds dated May 19, 2023, the cumulative gross exposure through equity, debt and such other securities/assets as may be permitted by the Board from time to time subject to regulatory approvals, if any shall not exceed 100% of the net assets of the scheme.

Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. SEBI vide letter dated November 3, 2021 has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities.

In accordance with Clause 3.4 of SEBI Master Circular on Mutual Funds dated May 19, 2023, the underlying index shall comply with the portfolio concentration norms as prescribed.

Exposure limit for Securities Lending and Borrowing:

Subject to SEBI (MF) Regulations and in accordance with Securities Lending Scheme, 1997, para 12.11 of SEBI Master Circular on Mutual Funds dated May 19, 2023, as amended from time to time, the Scheme may engage in Stock Lending subject to the following limits:

- (i) Not more than 20% of the net assets of the Scheme can be deployed in Stock Lending; and
- (ii) Not more than 5% of the net assets of the Scheme can be deployed in Stock Lending to a single intermediary level.

The Scheme shall not invest in securitised debt, Credit Default Swaps, Repo in Corporate Debt Securities, Tri-party Repos, Other Mutual Funds, Certificate of Deposits, REITs and InvITs, ADR/GDR,

foreign securities, debt instruments with special features and Structured Obligations / Credit Enhancements.

Change in Asset Allocation

Rebalancing due to short term defensive consideration:

Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, and political and economic factors. Such changes in the investment pattern will be for short term and defensive considerations as per para 1.14.1.2 of SEBI Master Circular on Mutual Funds dated May 19, 2023. However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only not exceeding 7 calendar days, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders.

Rebalancing due to passive breach

Pursuant to provisions of 3.6.7 of SEBI Master Circular on Mutual Funds dated May 19, 2023 rebalancing the portfolio of the Scheme shall be as follows:

- In case of change in constituents of the index due to periodic review including corporate actions, the portfolio will be rebalanced within 7 calendar days.
- Any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations will be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.

D. INVESTMENT BY SCHEME

Subject to the SEBI (MF) Regulations, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities:

1. The Scheme will invest in Securities which are constituents of the Nifty PSE Index.
2. Money Market Instruments includes commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity upto one year, call or notice money, certificate of deposit, usance bill and any other like instruments as specified by the Reserve Bank of India from time to time subject to regulatory approvals, if any.
3. Commercial Paper (CPs).

The securities mentioned above could be listed or to be listed, secured or unsecured, and of varying maturity, as enabled under SEBI Regulations/ circulars/ RBI. The securities may be acquired through Initial Public Offerings (IPOs), secondary market operations, private placement, rights offer or negotiated deals

The Scheme will track Nifty PSE Index and is a passively managed scheme. The investment decisions will be determined as per the Nifty PSE Index. In case of any change in the index due to corporate actions or change in the constituents of Nifty PSE Index, relevant investment decisions will be determined considering the composition of the Nifty PSE Index.

E. INVESTMENT STRATEGY

The scheme will be managed passively with investments in stocks in a proportion to the weightage of these stocks in the Nifty PSE Index. The investment strategy would revolve around reducing the tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the index as well as the incremental collections / redemptions in the scheme. Rebalancing of the scheme shall also be carried out whenever there is a change in the underlying index or any change due to corporate action with respect to the constituents of the underlying index within 7 calendar days. The Scheme may also invest in cash and debt/ money market instruments, in compliance with Regulations to meet liquidity and expense requirements.

Portfolio Turnover

The Scheme shall be a passively managed, index linked, open ended, exchange traded fund. It is therefore expected that there would be a number of subscriptions and redemptions on a daily basis through Market Makers and Large Investors. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in the Index.

The Scheme has no explicit constraints either to maintain or limit the portfolio turnover. It would also be difficult to have any reasonable accuracy in estimating the likely portfolio turnover. However, the fund manager intends to avoid any transactions in the portfolio unless there is any subscription, redemption or change in the underlying Index. Thus, given the structure and objective of the portfolio, the portfolio turnover is likely to be low.

Investment in other Schemes

The Scheme may, in line with its investment objectives, invest in another Scheme under the management of ABSLAMC or of any other Asset Management Company. The aggregate interscheme investment by Aditya Birla Sun Life Mutual Fund under all its Schemes, other than fund of fund schemes, taken together, in another Scheme managed by ABSLAMC or in any other Scheme of any other Mutual Fund, shall not be more than 5% of the net asset value of the Fund. No fee shall be charged by the AMC on any investment in another Scheme under the management of ABSLAMC or of any other Asset Management Company.

Investments in the Scheme by the AMC, Sponsor or their Associates

Pursuant to Regulation 25(16A) of the SEBI (MF) Regulations, 1996 and para 6.9 of SEBI Master Circular on Mutual Funds dated May 19, 2023, AMC shall not be required to invest minimum amount as a percentage of AUM in the Scheme.

The AMC may invest in the scheme during the continuous offer period subject to the SEBI (MF) Regulations, 1996. As per the existing SEBI (MF) Regulations, the AMC will not charge investment management and advisory fee on the investment made by it in the scheme. The Sponsor, Trustee and their associates may invest in the scheme on an ongoing basis subject to SEBI (MF) Regulations & circulars issued by SEBI and to the extent permitted by its Board of Directors from time to time.

Alternative to launch of NFO, the AMC may contribute the initial fund for unit creation. Subsequently, the AMC can transfer the units of the Scheme to MMs or other investors, subject to compliance with all applicable provisions for launch of the Scheme.

Investment of Subscription Money

The AMC shall commence investment out of the NFO proceeds received in accordance with the investment objectives of the Scheme only on or after the closure of the NFO period. The Mutual Fund/ AMC can however deploy the NFO proceeds in Tri-party Repo on Government securities or treasury bills before the closure of NFO period. However, AMCs shall not charge any investment management and advisory fees on funds deployed in Tri-party Repo on Government securities or treasury bills during the NFO period. The appreciation received from investment in Tri-party Repo on Government securities or treasury bills shall be passed on to investors.

Further, in case the minimum subscription amount is not garnered by the scheme during the NFO period, the interest earned upon investment of NFO proceeds in Tri-party Repo on Government securities or treasury bills shall be returned to investors, in proportion of their investments, along with the refund of the subscription amount.

Borrowing by the Mutual Fund

Under the SEBI (MF) Regulations, the Mutual Fund is allowed to borrow to meet the temporary liquidity requirements of its Scheme for the purpose of Redemption of Units or the payment of interest to the Unit holders. Further, as per the SEBI (MF) Regulations, the Mutual Fund shall not borrow more than 20% of the Net Assets of the scheme and the duration of such borrowing shall not exceed a period of six months. The Mutual Fund may raise such borrowings after approval by the Trustee from Sponsor or any of its Associate / Group Companies or Banks in India or any other entity at market related rates prevailing at the time and applicable to similar borrowings. The security for such borrowings, if required, will be as determined by the Trustee.

F. EXCHANGE TRADED FUND (ETF)

ETFs are innovative products that provide exposure to an index or a basket of securities that trade on the exchange like a single stock. ETFs have a number of advantages over traditional open-ended index funds as they can be bought and sold on the exchange at prices that are usually close to the actual intra-day NAV of the Scheme. ETFs are an innovation to traditional mutual funds as ETFs provide investors a fund that closely tracks the performance of an index with the ability to buy/sell on an intra-day basis. Unlike listed close ended funds, which trade at substantial premiums or more frequently at discounts to NAV, ETFs are structured in a manner which allows to create new units and redeem outstanding units directly with the fund, thereby ensuring that ETFs trade close to their actual NAVs.

ETFs are usually passively managed funds wherein subscription/redemption of units work on the concept of exchange with underlying securities. In other words, large investors/institutions can purchase units by depositing the underlying securities with the mutual fund/AMC and can redeem by receiving the underlying shares in exchange of units. Units can also be bought and sold directly on the exchange.

ETFs have all the benefits of indexing such as diversification, low cost and transparency. As ETFs are listed on the exchange, costs of distribution are much lower and the reach is wider. These savings in cost are passed on to the investors in the form of lower costs. Furthermore, exchange traded mechanism helps reduce minimal collection, disbursement and other processing charges. The structure of ETFs is such that it protects long-term investors from inflows and outflows of short-term investor. This is because the fund does not bear extra transaction cost when buying/selling due to frequent subscriptions and redemptions.

Tracking Error of ETFs is likely to be low as compared to a normal index fund. Due to the Creation/Redemption of units through the in-kind mechanism the mutual fund can keep lesser funds in cash. Also, time lag between buying/selling units and the underlying shares is much lower.

ETFs are highly flexible and can be used as a tool for gaining instant exposure to the equity markets, equitizing cash or for arbitraging between the cash and futures market.

Benefits of ETFs

- Can be easily bought / sold like any other stock on the exchange through terminals spread across the country.

- b. Can be bought / sold anytime during market hours at prices that are expected to be close to actual NAV of the Scheme. Thus, investor invests at real-time prices as opposed to end of day prices.
- c. No separate form filling for buying / selling units. It is just a phone call to your broker or a click on the net.
- d. Ability to put limit orders.
- e. Minimum investment for an ETF is one unit.
- f. Protects long-term investors from the inflows and outflows of short-term investors.
- g. Flexible as it can be used as a tool for gaining instant exposure to the equity markets, equitizing cash or for arbitraging between the cash and futures market.
- h. Helps in increasing liquidity of underlying cash market.
- i. Aids low cost arbitrage between futures and cash market.

Risks of ETFs

- a. Absence of Prior Active Market: Although the units of ETFs are listed on the Stock Exchange for trading, there can be no assurance that an active secondary market will develop or be maintained.
- b. Lack of Market Liquidity: Trading in units of ETFs on the Stock Exchange on which it is listed may be halted because of market conditions or for reasons that, in the view of the concerned Stock Exchange or Market Regulator, trading in the ETF Units is inadvisable. In addition, trading in the units of ETFs is subject to trading halts caused by extraordinary market volatility pursuant to 'circuit filter' rules. There can be no assurance that the requirements of the concerned Stock Exchange necessary to maintain the listing of the units of ETFs will continue to be met or will remain unchanged.
- c. Units of Exchange Traded Funds May Trade at Prices Other than NAV: Units of ETFs may trade above or below their NAV. The NAV of Units of ETFs may fluctuate with changes in the market value of a Scheme's holdings.

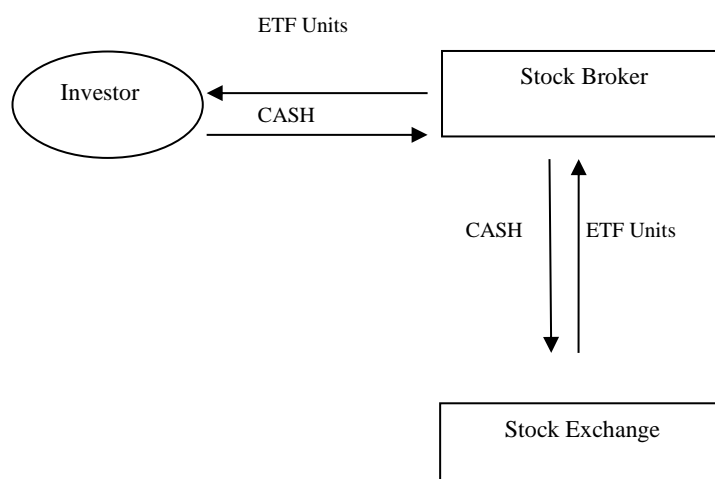

The trading prices of units of ETF will fluctuate in accordance with changes in their NAVs as well as market supply and demand. However, given that ETFs can be created/ redeemed in Creation Units, directly with the fund, large discounts or premiums to the NAVs will not sustain due to arbitrage possibility available.

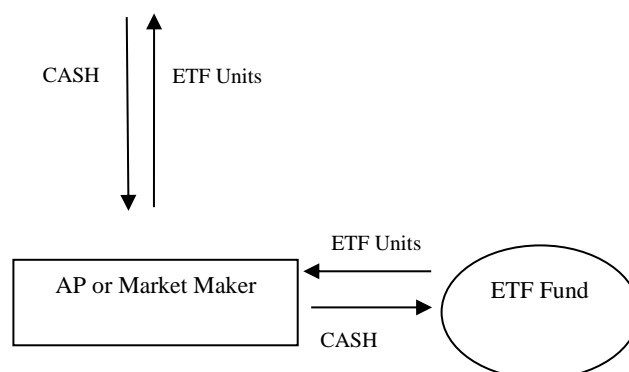

ILLUSTRATION OF WORKING OF ADITYA BIRLA SUN LIFE NIFTY PSE ETF:

There are 2 ways in which an investor can buy an ETF.

1. Once the scheme reopens for subscription, the units can be bought or sold directly on the exchange
2. The Fund/AMC allows cash/exchange of Portfolio Deposit for Purchase of Units of the Scheme in Creation Unit size by Large investors/Market Makers.

Working of ETF through stock exchange

Working of ETF through Mutual Fund

Procedure for creation of units in Creation Unit size:

- The Fund/AMC allows cash/exchange of Portfolio Deposit for Purchase of Units of the Scheme in Creation Unit size by Large investors/Market Makers.
- Purchase request for Creation Unit shall be made by such Investor to the Fund/AMC where upon the Fund/AMC will arrange to buy the underlying portfolio Securities. The Portfolio Deposit and/or Cash Component will be exchanged for units of the Scheme in Creation Unit size.

Creation of Units in exchange of Portfolio Deposit:

The requisite securities constituting the Portfolio Deposit have to be transferred to the Fund's Depository Participant account while the Cash Component has to be paid to the Custodian/AMC. On confirmation of the same by the Custodian/AMC, the AMC will create and transfer the equivalent number of Units of the Scheme into the Investor's Depository Participant account and pay/ recover the Cash Component and transaction handling charges, if any.

Creation of Units in Cash: For subscription of Units of the Scheme in Creation Unit Size will be made by payment of requisite Cash, as determined by the AMC equivalent to the cost incurred towards the purchase of predefined basket of securities that represent the underlying index (i.e. Portfolio Deposit), Cash Component and transaction handling charges, if any, only by means of payment instruction of Real Time Gross Settlement (RTGS) / National Electronic Funds Transfer (NEFT) or Funds Transfer Letter / Transfer Cheque of a bank where the Scheme has a collection account.

- The Creation Unit will be subject to transaction handling charges incurred by the Fund/AMC. Such transaction handling charges shall be recoverable from the transacting Market Maker or Large Investors.
- The Portfolio Deposit and/or Cash Component for units of the Scheme may change from time to time due to changes in the Underlying Index on account of corporate actions and changes to the index constituents.

Investors are requested to note that the Units of the Scheme will be credited into the Investor's Depository Participant account only on receipt of Cash Component and transaction handling charges, if any.

Procedure for Redemption in Creation Unit size

- The requisite number of Units of the Scheme equivalent to the Creation Unit has to be transferred to the Fund's Depository Participant account and the Cash Component to be paid to the AMC/Custodian.
- On confirmation of the same by the AMC, the AMC will transfer the Portfolio Deposit to the Investor's Depository Participant account and pay/recover the Cash Component and transaction handling charges, if any.
- The Fund may allow cash Redemption of the Units of the Scheme in Creation Unit size by Large Investors / Market Maker.
- Such Investors shall make Redemption request to the Fund/AMC whereupon the Fund/AMC will arrange to sell underlying portfolio Securities on behalf of the Investor.

Accordingly, the sale proceeds of portfolio Securities, after adjusting the Cash Component and transaction handling charges will be remitted to the Investor.

Note:

1. The Creation Unit size may be changed by the AMC at their discretion and the notice of the same shall be published on AMC's website.
2. Transaction handling charges include brokerage, Securities transaction tax, regulatory charges if any, depository participant charges, uploading charges and such other charges that the mutual fund may have to incur in the course of cash subscription/redemption or accepting the Portfolio Deposit or for giving a portfolio of securities as consideration for a redemption request. Such transaction handling charges shall be recoverable from the transacting Market Maker or Large Investors.
3. The Portfolio Deposit and / or Cash Component for the Scheme may change from time to time due to change in NAV.
4. The Fund may from time to time change the size of the Creation Unit in order to equate it with marketable lots of the underlying securities.
5. Large investors can transact directly with the Fund for an amount greater than INR 25 crores.

In case of difference in rating by multiple CRAs, the most conservative rating will be considered. Creation of segregated portfolio will be based on issuer level credit events and as mentioned above implemented at the ISIN level.

Further, segregated portfolio may also be created in case of unrated debt or money market instruments of an issuer that does not have any outstanding rated debt or money market instruments. However, such segregation may be done only in case of actual default of either the interest or principal amount by the issuer of such instruments. The Fund shall inform AMFI immediately about the actual default by the issuer. AMFI will disseminate the information about the actual default by the issuer to all AMCs post which the Fund may segregate the portfolio of debt or money market instruments of the said issuer.

Process of creation of segregated portfolio:

ABSLAMC will decide on creation of segregated portfolio on the day of credit event and will seek approval of ABSLTPL. Post that ABSLAMC will immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. ABSLAMC will also disclose in the press release that the segregation shall be subject to trustee approval. Additionally, the said press release will be prominently disclosed on the website of the AMC. ABSLAMC will ensure that till the time the trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.

The segregated portfolio shall be effective from the day of credit event, post approval of Trustee.

ABSLAMC will issue a press release immediately post approval of ABSLTPL with all relevant information pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.

An e-mail or SMS will be sent to all unit holders of the concerned Scheme. The NAV of both segregated and main portfolio will be disclosed from the day of the credit event. All existing unit holders in the Scheme as on the day of the credit event shall be allotted equal number of units in the segregated portfolio as held in the main portfolio.

No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, ABSLAMC will enable listing of units of segregated portfolio on recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer request.

If the trustees do not approve the proposal to segregate portfolio, AMC shall issue a press release immediately informing investors of the same.

Valuation and processing of subscriptions and redemptions

The valuation will take into account the credit event and the portfolio will be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder.

All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing

circular on applicability of NAV. However, in case of segregated portfolio, applicability of NAV will be as under:

1. Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
2. Investors subscribing to the Scheme will be allotted units only in the main portfolio based on its NAV.

In case ABSLTPL does not approve the above valuation process, all subscription and redemption applications will be processed based on the NAV of total portfolio.

Disclosure requirements

A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event will be communicated to the investors within 5 working days of creation of the segregated portfolio. Further, adequate disclosure of the segregated portfolio will also appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the Scheme. Further, the NAV of the segregated portfolio will be declared on daily basis.

The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc. The scheme performance required to be disclosed at various places will include the impact of creation of segregated portfolio. The scheme performance will clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery (ies), if any, will be disclosed as a footnote to the scheme performance. These disclosures regarding the segregated portfolio will be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/written-off.

The investors of the segregated portfolio will be duly informed of the recovery proceedings of the investments of the segregated portfolio and status update will be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Total Expense Ratio (“TER”) for the Segregated Portfolio

ABSLAMC will not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio. The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence. The legal charges related to recovery of the investments of the segregated portfolio will be charged to the segregated portfolio in proportion to the amount of recovery. However, the same will be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, will be borne by ABSLAMC. The costs related to segregated portfolio will in no case be charged to the main portfolio.

Monitoring by Trustees

In order to ensure timely recovery of investments of the segregated portfolio, Trustees will ensure that, the ABSLAMC puts in sincere efforts to recover the investments of the segregated portfolio. Upon recovery of money, whether partial or full, it will be immediately distributed to the investors in proportion to

their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio. Further, an Action Taken Report (ATR) on the efforts made by the ABSLAMC to recover the investments of the segregated portfolio will be placed in every Trustee meeting till the investments are fully recovered/ written-off.

The Trustees will monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, trustees will ensure that there is a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

Creation of segregated portfolio will be optional and at the discretion of ABSLAMC.

D. COMPUTATION OF NET ASSET VALUE

The Net Asset Value (NAV) per Unit of the scheme will be computed by dividing the net assets of the scheme by the number of Units outstanding under the scheme on the valuation date. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI Regulations, or such norms as may be specified by SEBI from time to time.

NAV of Units under the scheme shall be calculated as shown below:

$$\text{NAV (Rs.) per Unit} = \frac{\begin{aligned} &\text{Market or Fair Value of the scheme's Investments} \\ &+ \text{Current Assets (including accrued income)} \\ &- \text{Current Liabilities and Provisions (including accrued expenses)} \end{aligned}}{\text{No. of Units outstanding under the scheme}}$$

The AMC will calculate and disclose the NAV of the scheme on every business day. The NAVs of the Scheme will be calculated upto 4 decimals.

Illustration of computation of NAV:

If the net assets of the Scheme are Rs.10,55,34,567.12 and units outstanding are 100,00,000, then the NAV per unit will be computed as follows:
 $10,55,34,567.12 / 100,00,000 = \text{Rs. } 10.5534 \text{ p.u. (rounded off to four decimals)}$
