NAV will be disclosed under SEBI (Mutual Funds) Regulations, 1996. NAV can also be viewed on www.sbimf.com and www.amfiindia.com.

AMC shall disclose the NAV on the AMFI website (www.amfiindia.com) and on the website of the Fund by 10.00 a.m. the following business day. In case of any delay, the reasons for such delay would be explained to AMFI and SEBI by the next day. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs.

Further, as per SEBI Regulations, the repurchase price shall not be lower than 95% of the NAV.

Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

Let's assume that the NAV of a Mutual Fund Scheme on April 01, 2018 is Rs. 10/-.

Purchase of mutual fund units:

The Purchase Price of the Units on an ongoing basis will be same as Applicable NAV.

Purchase Price = Applicable NAV

In the above example, purchase is done on April 01, 2018, when the Applicable NAV = Rs. 10/-
Therefore, Purchase Price = Rs. 10/-

As per existing Regulations, no entry load is charged with respect to applications for purchase / additional purchase of mutual funds units.

Redemption/Re-purchase of mutual fund units

The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any. In case of redemption, the amount payable to the investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)

Say, in the above example the exit load applicable is:

- a. For exit on or before 12 months from the date of allotment – 1.00%
- b. For exit after 12 months from the date of allotment – Nil.

Scenario 1: Redemption is done during applicability of exit load

In case the investor requests for redemption on or before 12 months i.e. on or before March 31, 2019; say December 1, 2018, when the NAV of the scheme is Rs. 12/- and the exit load applicable is 1%, so the Redemption amount payable to investor shall be calculated as follows:

$$\begin{aligned}\text{Redemption Price} &= \text{Applicable NAV} * (1 - \text{Exit Load}) \\ &= \text{Rs. } 12 * (1-1\%) = \text{Rs. } 11.988/-\end{aligned}$$

Scenario 2: Redemption is done when the exit load is NIL

In case the investor requests for redemption after 12 months i.e. after March 31, 2019; say April 1, 2019, when the NAV of the scheme is Rs. 12/- and the exit load applicable is NIL, so the Redemption amount payable to investor shall be calculated as follows:

$$\begin{aligned}\text{Redemption Price} &= \text{Applicable NAV} * (1 - \text{Exit Load}) \\ &= \text{Rs. } 12 * (1-0) = \text{Rs. } 12/-\end{aligned}$$

The aforesaid example does not take into consideration any applicable statutory levies or taxes. Accordingly, the redemption amount payable to investor shall further reduce to the extent of applicable statutory levies or taxes.

Note: The aforesaid disclosure has been made pursuant to SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2018/92 dated June 05, 2018.

Illustration on Computation of NAV:

If the net assets of the Scheme are Rs. 10,55,40,345.34 and units outstanding are 1,00,00,000 then the NAV per unit will be computed as follows: $10,55,40,345.34 / 1,00,00,000 = \text{Rs. } 10.5540 \text{ p.u.}$ (rounded off to four decimals)

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc.

The entire New Fund Offer expenses for the launch the Scheme will be borne by the AMC.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated that the expenses upto 1.00% per annum as per regulation 52(6)(a) (plus additional expenses as allowed under regulation 52(6A)) of the daily net asset will be charged to the scheme. The maximum annual recurring expenses that can be charged to the Scheme, excluding issue or redemption expenses, whether initially borne by the mutual fund or by the asset management company, but including the

investment management and advisory fee shall be within the limits stated in Regulations 52 read with Chapter 10 of SEBI master circular for Mutual Funds dated May 19, 2023.

The AMC may charge the investment and advisory fees within the limits of total expenses prescribed under Regulation 52 of the SEBI (Mutual Funds) Regulations. Any other expenses which are directly attributable to the Scheme, may be charged with the approval of the Trustee within the overall limits as specified in the Regulations except those expenses which are specifically prohibited.

These estimates have been made in good faith as per the information available to the Investment Manager based on past experience and are subject to change inter-se. Types of expenses charged shall be as per the SEBI (MF) Regulations.

I. Introduction

A. Definitions/interpretation

Please refer the definitions/interpretation as disclosed on our website under: <https://www.sbimf.com/offer-document-sid-kim>

B. Risk factors

Scheme Specific Risk Factors:

Mutual Fund Units involve investment risks including the possible loss of principal. Scheme specific risk factors are summarized below:

I. Risks associated with investing in Funds of Funds Scheme

The Scheme may invest predominantly in units of silver exchange traded funds. Hence the Scheme's performance may depend upon the performance of the underlying mutual fund scheme. Any change in the investment policies or the fundamental attributes of the underlying scheme could affect the performance of the Scheme. The Portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying scheme where the Scheme has invested and will not include the investments made by the underlying Scheme. The fund assets are predominantly invested in units of silver exchange traded funds and valued at the market price of the said units on the exchange. The same may be at a variance to the underlying NAV of the fund, due to market expectations, demand supply of the units, etc. To that extent the performance of scheme shall be at variance with that of the underlying scheme. Investors may please note that they will be bearing the expenses of the fund of fund scheme in addition to the expenses of the underlying scheme in which the fund of fund scheme makes investment.

SBI Silver ETF Fund of Fund would be investing in the units of SBI Silver ETF. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the underlying scheme of mutual funds wherein the Scheme has invested. As a result, the time taken by the Mutual Fund for the redemption of units may be significant in the event of a high number of redemption requests or a restructuring of the scheme. In view of the above, the Trustee has a right in its sole discretion, to limit redemptions under certain circumstances as described under the section titled 'Right to Limit Redemptions' in SID.

Tracking Error Risk

Tracking error means the variance between daily returns of the underlying benchmark (silver in this case) and the NAV of the scheme for any given period. NAV of the Scheme is dependent on valuation of silver. Silver has to be valued as per the formula provided by SEBI in paragraph 3.2.3 of the SEBI Master circular for Mutual Funds dated May 19, 2023. NAV so computed may vary from the price of Silver in the domestic market.

Factors such as the fees and expenses of the Scheme, cash balance, changes to the Underlying assets and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying assets of the scheme. The Scheme's returns may therefore deviate from those of its Underlying assets.

Tracking error could be the result of a variety of factors including but not limited to:

- i. Delay in the purchase or sale of silver due to Illiquidity of silver,
- ii. Delay in realisation of sale proceeds,
- iii. Creating a lot size to buy the required amount of silver
- iv. The scheme may buy or sell the silver at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.

- v. The potential for trades to fail, which may result in the Scheme not having acquired silver at a price necessary to track the benchmark price.
- vi. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
- vii. Disinvestments to meet redemptions, recurring expenses, IDCW payouts etc.
- viii. Execution of large buy / sell orders
- ix. Transaction cost (including taxes and insurance premium) and recurring expenses
- x. Use of silver related derivative instruments, as and when allowed by regulations
- xi. Rebalancing of the portfolio

The Mutual Fund is not assuring any Income Distribution cum capital withdrawal (IDCW) nor is it assuring that it will make any IDCW distributions. All IDCW distributions are subject to the availability of distributable surplus and would depend on the performance of the scheme.

II. Investments under the scheme may also be subject to the following risks:

Market Risk

The Scheme's NAV will react to the prices of Silver. The investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in Silver prices, market movements and over longer periods during market upturns.

Additionally, the prices of Silver may be affected by several factors such as global silver supply and demand, investors' expectations with respect to the rate of inflation, currency exchange rates, interest rates, etc. Crises may motivate large-scale sales of silver, which could decrease the domestic price of silver.

Some of the key factors affecting Silver prices are as follows:

Asset Class Risk

The domestic price of Silver may vary from time to time. Further, the returns from the types of securities in which a Scheme invests may underperform returns from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under performance in comparison of the general securities markets.

Macro-economic factors

The global trend of rising interest rates also had a positive impact on silver prices. Silver being regarded as a physical asset would lose its luster in a deflationary environment as Silver is used effectively as an inflation hedge.

Silver ETF Risk

SBI Silver ETF in which scheme will be investing, invests in Silver and Silver related instruments. NAV of the Silver ETF & NAV of the scheme will change with the change in the prices of underlying assets. The prices of Silver may be affected by several factors such as demand and supply of Silver, change in political, economical environment and government policy, inflation trends, currency exchange rates, interest rates, etc.

Lack of Market Liquidity

Trading in SBI Silver ETF on the Exchange may be halted because of market conditions or for reasons that in the view of the market authorities or SEBI, trading in SBI Silver ETF is not advisable. In addition, trading in SBI Silver ETF is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules. There can be no assurance that the requirements of the market necessary to maintain the listing of SBI Silver ETF will continue to be met or will remain unchanged. SBI Silver ETF may suffer liquidity risk from domestic as well as international market.

- III. **Risks associated with investment in units of mutual fund:** Investment in Mutual Fund Units involves investment risks, including but not limited to risks such as liquidity risk, volatility risk, default risk including the possible loss of

principal. • Liquidity risk – The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the Trustees may limit redemptions (including suspending redemptions) under certain circumstances as specified under the Scheme Information Document. • Volatility risks: There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. • Default risk - Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

IV. Risks associated with investment in TREPs:

Interest rate risk: This risk arises from uncertainty in the rate at which cash flows from the securities may be reinvested. While the rate of interest for TREPs remains closely correlated to the repo rate, it also may vary based on inter-bank lending demand & supply. Hence, there remains a risk of rate at which TREPs will get re-invested.

Settlement risk : Since the settlement for TREPs happens through CCIL, the risk of default from counterparty is limited. However, in case a clearing member fails to honour their settlement obligations, the "Default Waterfall" mechanism is used to make complete the settlement process. As per the waterfall mechanism, 1st step. the defaulter's margins and the defaulter's contribution to the default fund have been appropriated; 2nd step: CCIL's contribution is used to meet the losses; 3rd step: Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Hence, the scheme is subject to the risk of loss to the extent of initial margin and default fund contribution being invoked in the event of failure of any settlement obligations.

V. Risks associated with investing in Government of India Securities: Market Liquidity risk with fixed rate Government of India Securities even though the Government of India Securities market is more liquid compared to other debt instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by Reserve Bank of India undergo any adverse changes.

Interest Rate risk associated with Government of India Securities - while Government of India Securities generally carry relatively minimal credit risk since they are issued by the Government of India, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is not unique to Government of India Securities. It exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.

VI. Passive Investments: As the scheme proposes to invest not less than 95% of the net assets in SBI Silver ETF, the scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its underlying fund. The Scheme invests in the underlying fund regardless of their investment merit.

VII. Concentration Risk: The scheme will invest its assets in SBI Silver ETF, which will be invested in silver and / or silver related instruments and may have limited or no diversification to any other types of instruments / investment avenues within its portfolio. This could have implications on the performance of the scheme.

C. Risk mitigation strategies

The AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For the mitigation of the above mentioned risk-factors in underlying schemes, the Fund-Manager will follow an

internal selection/allocation process approved by Investment Committee and Risk Department.

The Fund-Manager will be responsible for taking investment decisions, scheme selection, portfolio construction and timing of investment decisions within the approved framework.

The process will help to ensure the monitoring of the following within underlying schemes and for Money-Market exposures:

For risk control, the following may be noted:

Liquidity risks:

The liquidity of the FoF will be determined by the time taken by the Mutual Fund for the redemption of units in the underlying scheme which may be significant in the event of a high number of redemption requests or a restructuring of the scheme. The liquidity of the underlying scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by ensuring that investment is in line with the internal selection/allocation process approved by Investment Committee and Risk Department.

Volatility risks:

Investments in underlying scheme will have all the risks associated with the underlying schemes including performance of silver prices, interest rate risk, volatility etc. There is the risk of volatility in markets due to external factors like liquidity flows, economic policy etc. Volatility Risk can be partly mitigated by ensuring that judicious investments are made in line with the internal selection/allocation process approved by Investment Committee and Risk Department.

Credit Risks

Investments in debt & money market instruments will have credit risks resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations Credit Risk can be partly mitigated by ensuring that judicious investments are made in line with the internal selection/allocation process approved by Investment Committee and Risk Department.

Silver ETFs

The Scheme endeavors to mitigate risks associated with investing in physical silver like risk of loss, damage, theft and natural calamities/human actions by investing in approved Silver ETF/s with appropriate limits for each Silver ETF. These limits and controls are also aimed at minimizing the risks of Impact Costs, Exchange Rate and Liquidity Risks generally associated with Silver ETFs.

Risk Control

Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The fund will comply with all applicable exposure limits and take actions. Effective and continuous monitoring of the scheme shall be ensured and necessary actions, if any shall be taken, if required.

	Availability of Silver bars for creation of SBI Silver ETF	SBI MF appoints leading bullion banks to make silver bars available for creation of underlying scheme (SBI Silver ETF) and that in turn will help minimize tracking error
	Delay in receipt of subscription/SIP inflows	The inputs regarding cash flows by various modes of acceptance will be estimated on a daily basis by SBI MF. The subscription/redemption request will also be reported and used as a basis for planning investments in SBI Silver ETF. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error.
	Funds flows in Silver ETF FOF of value lesser than Creation lot size of SBI Silver ETF	For small amounts of inflows/outflows which are less than the creation size of SBI Silver ETF, the SBI Silver ETF Fund of Fund will buy/sell SBI Silver ETF units directly on the stock exchange without waiting for additional subscription redemption to minimize tracking error.
	The trade execution prices for SBI Silver ETF may be different from NAV of SBI Silver ETF.	The execution price of SBI Silver ETF will be a factor of demand/supply on the stock exchange. The difference tends to average out over a longer time horizon and that will moderate tracking error.
	The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses, funds to meet redemptions, recurring expenses etc.	SBI MF will keep offsetting the expenses/interest against the net inflows/ outflows and keep investing/redeeming the balance amount from SBI Silver ETF to minimize the tracking error in best interest of investors.

DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Portfolio Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) , Treasury Bills (issued by RBI) and the Triparty Repo

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and Triparty Repo are guaranteed and done by a central counterparty, the Clearing corporation of India (CCIL). Money market deals involving CD's and CP's are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE (ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments as on June 18, 2024:

Instruments	Indicative yield range
Overnight rates	6.70-6.75
90 day Commercial Paper	7.10-7.15
91-day T-bill	6.80-6.85
1 year G-Sec	7.00-7.05
5 year G – Sec	7.10-7.15
10 year G-Sec	7.15-7.20
1 year AAA Bond	7.60-7.65
5 year AAA Bond	7.65-7.70

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP's and CD's which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments.

Swing STP

Swing STP is a facility wherein investor can opt to transfer an amount at regular intervals from source scheme of SBI Mutual Fund (SBIMF) to a target scheme of SBIMF including a feature of reverse transfer from target scheme into the source scheme, in order to achieve the targeted market value on each transfer date in the target scheme. This ensures that the market value on each date of the transfer rises by a specified amount at every frequency irrespective of the market price. For example if investor decides that the value of their investment in the target scheme should appreciate by Rs. 1000 per month, then each month investor will invest only to the extent of the shortfall. If appreciation in the target scheme is higher than the

target value then this excess value is reverse transferred to the source scheme. Thus the amount to be transferred will be arrived at on the basis of the difference between the target market value and the actual market value of the holdings in the target scheme on the date of transfer.

Terms & conditions of Swing STP are as follows:

1. Source scheme: All open ended schemes (Excluding SBI Long Term Equity Fund and ETF schemes) of SBI Mutual Fund.
2. Target scheme: Growth option in all open ended schemes (Excluding SBI Long Term Equity Fund and ETF schemes) of SBI Mutual Fund.
3. Frequency: Weekly, Monthly and Quarterly intervals. In case the Frequency is not indicated, Monthly frequency shall be treated as the Default Frequency.
4. Dates: The dates of transfers/ default dates shall be as under:
