The performance of the scheme will be benchmarked to the performance of **CRISIL-IBX AAA Financial Services Index – Sep 2027**

Rationale for adoption of benchmark: The Scheme seeks to invest in the constituents of CRISIL-IBX AAA Financial Services Index – Sep 2027 subject to tracking error. Therefore, the composition of CRISIL-IBX AAA Financial Services Index – Sep 2027 makes it most suited to compare the performance of the Scheme.

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per Unit of the scheme will be computed by dividing the net assets of the scheme by the number of Units outstanding under the scheme on the valuation date. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

NAV of Units under the scheme shall be calculated as shown below:

$$\begin{aligned} & \text{Market or Fair Value of the scheme's Investments} \\ & + \text{Current Assets (including accrued income)} \\ & - \text{Current Liabilities and Provisions (including accrued expenses)} \end{aligned}$$

$$\text{NAV (Rs.) per Unit} = \frac{\text{Market or Fair Value of the scheme's Investments} + \text{Current Assets (including accrued income)} - \text{Current Liabilities and Provisions (including accrued expenses)}}{\text{No. of Units outstanding under the scheme}}$$

The AMC will calculate and disclose the NAV of the scheme on every business day. The NAVs of the Scheme will be calculated upto four decimals and units allotted upto three decimals. NAVs of the growth option and IDCW option will be different after the declaration of the first IDCW.

Illustration of computation of NAV:

If the net assets of the Scheme are Rs.10,55,34,567.12 and units outstanding are 100,00,000, then the NAV per unit will be computed as follows:

$$10,55,34,567.12 / 100,00,000 = \text{Rs. } 10.5534 \text{ p.u. (rounded off to four decimals)}$$

In accordance with SEBI (MF) Regulations, while determining the price of the units, the mutual fund shall ensure that the repurchase price of the scheme is not lower than 95 per cent of the Net Asset Value.

Note: Where as a result of a Redemption/ Switch arising out of excess holding by an investor beyond 25% of the net assets of the schemes in the manner envisaged under para 6.11 of SEBI Master Circular on Mutual Funds dated June 27, 2024, such Redemption / Switch will not be subject to Exit load.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationery, bank charges etc. All the NFO expenses of the Scheme shall be borne by the AMC.

- It is assumed that the expenses charged are evenly distributed throughout the year.

- The expenses of the Direct Option under the Scheme will be lower to the extent of the above-mentioned distribution expenses/ commission. The NAVs of Direct Plan and Regular Plan will be different.
- Calculations are based on assumed NAVs, and actual returns on your investment may be more, or less.
- Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to consult his or her own financial advisor.

The addendum will be circulated to all the distributors / brokers so that the same can be attached to all Scheme Information Documents and Key Information Documents already in stock.
- II. Arrangements will be made to display the addendum in the Scheme Information Document in the form of a notice in all the Investor Service Centres and distributors / brokers office.

E. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Section II**I. INTRODUCTION****A. DEFINITIONS/INTERPRETATION**

In this Scheme Information Document, the words and expressions shall have the meaning specified in the following link, unless the context otherwise requires.

<https://mutualfund.adityabirlacapital.com/forms-and-downloads/disclosures>

Interpretation

For all purposes of this Scheme Information Document, except as otherwise expressly provided or unless the context otherwise requires, the terms defined in this Scheme Information Document include the plural as well as the singular. Pronouns having a masculine or feminine gender shall be deemed to include the other. Words and expressions used herein but not defined herein shall have the meanings respectively assigned to them therein under the SEBI Act or the SEBI (MF) Regulations.

B. RISK FACTORS**SCHEME SPECIFIC RISK FACTORS****Portfolio Concentration Risk:**

The Scheme may concentrate its investments in the securities of certain issuers of Financial Services sector and will be subject to the risks associated with such concentration. In addition, the Scheme may be exposed to higher levels of volatility and risk than would generally be the case in a more diverse fund portfolio of debt securities.

Tracking Error & Tracking Difference:

While the objective of the Scheme is to closely track the index, the performance may not be commensurate with the performance of the underlying Index on any given day or over any given period. Such variations are commonly referred to as the tracking error.

Tracking Error Risk:

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance and changes to the underlying index and regulatory restrictions, lack of liquidity which may result in Tracking Error. Hence it may affect AMC's ability to achieve close correlation with the underlying index of the Scheme. The Scheme's returns may therefore deviate from its underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the Scheme. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible.

Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the Crisil-IBX AAA Financial Services Index – Sep 2027 Fund or one or more securities covered by / included in the Crisil-IBX AAA Financial Services Index – Sep 2027 Fund and may arise from a variety of factors including but not limited to:

1. Any delay in the purchase or sale of shares due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of IDCW, etc.

2. The index reflects the prices of securities at a point in time, which is the price at close of business day on the stock exchange. The scheme, however, may trade the securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be identical to the closing price of each scrip on that day on the respective exchange. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance from closing price considered in the Index.
3. CRISIL Indices Limited undertakes periodic reviews of the securities that are represented in the Index and from time to time may exclude existing securities or include new ones. In such an event, the scheme will endeavor to reallocate its portfolio to mirror the changes. However, there allocation process may not occur instantaneously and may not permit precise mirroring of the Index during this period.
4. The potential of trades to fail may result in the scheme not having acquired the security at the price necessary to mirror the index.
5. Transaction and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees.
6. Being an open ended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet on going redemptions.
The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to circuit filters in the securities, liquidity and volatility in security prices.

The Scheme will disclose the tracking error based on past one year rolling data, on a daily basis, on the website of AMC and AMFI. In case the Scheme has been in existence for a period of less than one year, the annualized standard deviation will be calculated based on available data.

Tracking Difference: The tracking difference i.e. the annualized difference of daily returns between the index and the NAV of the Scheme will be disclosed on the website of the AMC and AMFI, on a monthly basis, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units.

The annualized tracking difference averaged over one year period shall not exceed 1.25%. In case the average annualized tracking difference over one year period for the Scheme is higher than 1.25%, the same will be brought to the notice of trustees with corrective actions taken by the AMC, if any.

Passive Investments:

The Scheme is not actively managed. Since the Scheme is linked to index, it may be affected by a general decline in the Indian markets relating to its underlying index. The Scheme as per its investment objective invests in Securities which are constituents of its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

Risk specific to investing in companies forming part of CRISIL-IBX AAA Financial Services Index – Sep 2027:

The underlying companies forming part of CRISIL-IBX AAA Financial Services Index – Sep 2027 has AAA rated bonds which are well researched. As per methodology, the issuers and ISIN are selected considering the liquidity measure. The risk to investing in these securities would emanate from debt market risk in general or through sectoral exposure in Financial service sector. Also, a risk may arise in case the sector to which the company belongs may not perform in line with the broader market.

Risk Factors associated with investments in Fixed Income Securities:

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.
- The above are some of the common risks associated with investments in fixed income and money market securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

Risks Factors Associated with Creation of Segregated Portfolio:

Different types of securities in which the scheme would invest carry different levels and types of risk as given in the Scheme Information Document of the scheme. In addition to the same, unitholders are requested to also note the following risks with respect to Segregated Portfolio:

Liquidity Risk: A lower level of liquidity affecting an individual security (ies) or an entire market may have an adverse bearing on the value of the Segregated Scheme's assets. This may more importantly affect the ability to sell particular securities with minimal impact cost as and when necessary to meet requirement of liquidity or to sell securities in response to triggers such as a specific economic/corporate event. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of a few of the investments. This may impact the NAV of the segregated portfolio and could result into potential loss to the Unit holders.

Credit risk: The scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated. Investment in unrated securities may be riskier compared to investment in rated instruments due to non-availability of third party assessment on the repayment capability of the issuer. As the securities are unrated, an independent opinion of the rating agency on the repayment capability of the issuer will not be available. The issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. This may impact the NAV of the segregated portfolio and resultant loss to the Unit holders.

Listing of units: Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV.

C RISK MITIGATION STRATEGIES

1. **Market/Volatility Risk** (Risk arising due to price fluctuations and volatility, having material impact on the overall returns of the Scheme.): The Scheme, being a Target Maturity Date index fund structure, will replicate the index in a passive manner. Also, the index has little duration risk at the time of maturity. Based on that, we expect to mitigate intermittent price volatility in the underlying assets. Investors who remain invested until the maturity of the Scheme are expected to mitigate market / volatility risk to large extent.
2. **Credit risk** (Risk associated with repayment of investment): The Scheme will invest in sovereign securities as permitted under the Asset Allocation Pattern. These instruments are either sovereign rated or bear low credit risk. Thus, this risk is mitigated to some extent.
3. **Liquidity risk** (Risk arising due to inefficient Asset Liability Management, resulting in high impact costs): The index designed in such a manner that the securities that are liquid in the secondary markets form a part of the portfolio. i.e. Securities with high Liquidity score* and/or high ISIN outstanding form a part of the portfolio of the index (and ultimately the fund). Thus, the risk is mitigated through index design itself.
4. **Concentration risk** (Risk arising due to over exposure in few securities): Index and the portfolio of the scheme seek to be in compliance with the concentration norms laid out in SEBI Master Circular on Mutual Funds dated June 27, 2024 which ensures that the concentration risk is mitigated.
5. **Event risk** (Price risk due to company or sector specific event) The Scheme will invest in sovereign securities as permitted under the Asset Allocation Pattern. Sovereign instruments have little credit migration risk.
6. **Performance risk** (Risk arising due to change in factors affecting the market): The Scheme will be passively managed and in accordance with the norms stipulated in SEBI Master Circular on Mutual Funds dated June 27, 2024, in case of unavailability of issuances forming part of the index.

*As defined in the index methodology

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

5. **The non-convertible part of convertible securities** – Convertible securities are securities which can be converted from Debt to Equity shares. The non-convertible part cannot be converted into Equity shares and work like a normal debt instrument.
6. **Pass through Certificate (PTC)** (Pay through or other Participation Certificates) represents beneficial interest in an underlying pool of cash flows.
