Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations, legislative amendments and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute.

These proportions can vary depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unit holders. In accordance with para 1.9.1(b) of SEBI Master

Circular on Mutual Funds, such changes in the investment pattern will be for short term on defensive considerations only and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.

B. WHERE WILL THE SCHEME INVEST

The fund will invest in units of domestic passive funds (ETFs/ Index Funds) that invest in equity and equity related instruments including debt and money market instruments depending on the asset allocation pattern and Investment objective of the Fund of Funds scheme as indicated in this document. The money collected under this scheme shall be invested only in transferable securities.

As per the SEBI guidelines, a Fund of funds scheme shall not invest its assets other than in schemes of mutual funds, except to the extent of funds required for meeting the liquidity requirements for the purpose of repurchases or redemptions.

Subject to the Regulations and other prevailing Laws as applicable, the corpus of the Scheme can be invested in any (but not exclusively) of the following Securities:

1. **Units of Domestic ETFs and Index Funds -** The Scheme will primarily invest in units of passively managed domestic Exchange Traded Funds (ETFs) and Index Funds of Motilal Oswal Mutual Fund and/or other mutual funds.
2. **Open-ended Liquid Schemes and Money Market Schemes -** The Scheme may invest in open-ended liquid mutual fund schemes registered with SEBI and/or schemes investing predominantly in money market instruments/securities to manage short-term liquidity.
3. **Money Market Instruments - T**he Scheme may invest in a variety of money market instruments, including but not limited to Commercial Papers (CPs)**,** Certificates of Deposit (CDs)**,** Treasury Bills (T-Bills)**,** Bills Rediscounting**,** Tri-party Repo (TREPS) on Government securities or T-Bills, Securities issued by Government Agencies/PSUs, Non-Convertible Securities and Repo/Reverse Repo transactions (including in corporate bonds).
4. **Debt Instruments Permitted by SEBI/RBI -** The Scheme may invest in debt and money market instruments as permitted by SEBI and RBI from time to time.
5. Any other instruments / securities, which in the opinion of the fund manager would suit the investment objective of the scheme subject to compliance with extant Regulations after seeking necessary approval, whenever required.

For detailed derivatives strategies, please refer SAI.

For detailed information about where will the scheme invest, kindly refer Section II.

C. WHAT ARE THE INVESTMENT STRATEGIES

The Scheme aims to generate long term capital appreciation by predominantly investing in passively managed Domestic Equity funds such as Exchange Traded Funds (ETFs) /Index Funds that provide diversified exposure across all segments of market capitalization including large-cap, mid-cap and small-cap equities. By investing in ETFs and Index Funds, the scheme aims to offer low-cost access to a broad

equity market exposure, making it an efficient solution for investors seeking diversification without active stock selection risk.

The Scheme will invest in any (but not exclusively) of following category of Schemes:

A. Domestic Exchange Traded Funds (ETFs)
B. Domestic Index Funds

The schemes may buy/sell the units of the underlying scheme in Creation Unit Size using either the **cash route** or the **stock exchange route**. The facility to transact in creation units directly with the respective AMCs enables the scheme to access units more efficiently, especially during periods of low liquidity in the secondary market.

The fund manager will have the flexibility to dynamically allocate across different market cap segments using passive instruments, enabling a cost-effective and broad-based participation in the equity markets.

The scheme will invest up to 5% of the assets may be allocated to liquid schemes or money market instruments to manage day-to-day liquidity requirements of the scheme efficiently.

Securities Lending

Subject to the SEBI Regulations as applicable from time to time, the Scheme may, participate in securities lending.

Portfolio Turnover

Portfolio Turnover is defined as the lower of sales or purchase divided by the average corpus during a specified period of time. The Scheme, being an open ended Scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis. However, it is difficult to measure with reasonable accuracy the likely turnover in the portfolio of the Scheme.

Tracking Error Scheme

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Scheme and the NAV of the Scheme. The fund assets will be predominantly invested in the Underlying Scheme and which is valued at the market price of the said units on the principal exchange. The same may be at a variance to the underlying NAV of the Scheme.

Theoretically, the corpus of the Scheme has to be fully invested in the Underlying Scheme completely. However, it is not possible to invest as per the objective due to reason that the Scheme has to incur expenses, regulatory policies, lack of liquidity, etc. The Scheme's returns may therefore deviate from those of its Underlying Scheme. Tracking Error may arise due to the following reasons :-

1. Fees and expenses of the Scheme.
2. Halt in trading on the Stock exchange due to circuit filter rules
3. Cash balance held by the Scheme due to subscriptions, redemption, etc.
4. Delay in receipt of cash flows
5. Non- availability of units of Underlying Scheme or the Underlying Scheme is temporary closed for subscription

6. Lack of liquidity on Stock Exchange
7. The Scheme has to invest in the Underlying Scheme in whole numbers and has to round off the quantity of units.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The performance of the Scheme will be benchmarked to Nifty 500 Total Return Index.

Considering that the scheme predominantly invests in units of equity ETFs and index funds with the objective of achieving long-term capital growth, and given its mandate to provide diversified exposure across market capitalizations—large, mid and small caps—it is appropriate to benchmark the scheme against the Nifty 500 Total Return Index (TRI). This index offers a comprehensive representation of the equity market and is aligned with the scheme's investment strategy.

Total Return variant of the index (TRI) will be used for performance comparison.

PART III- OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per unit under the Scheme will be computed by dividing the net assets of the Scheme by the number of units outstanding on the valuation day. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The Net Asset Value (NAV) of the units under the Scheme shall be calculated as follows:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's investments} + + \text{Current Assets - Current Liabilities and Provision}}{\text{No. of Units outstanding under Scheme on the Valuation Day}}$$

The NAV will be calculated up to four decimals.

The NAV shall be calculated and disclosed on each business day on AMFI's website www.amfiindia.com and also on www.motilaloswalmf.com. The NAV shall be calculated and announced by 10.00 a.m. on next working day.

Hence, for the purposes of valuation and calculating NAV of the Scheme for a particular day, the last available prices of units of underlying ETFs on NSE or BSE shall be considered (which would be the previous day's closing prices). This will enable the disclosure of the NAV of the Scheme before the deadline as provided by SEBI guidelines.

ILLUSTRATION OF NAV:
If the net assets of the Scheme, after considering applicable expenses, are Rs.10,45,34345.34 and units outstanding are 10,00,0000, then the NAV per unit will be computed as follows:

10,45,34,345.34 / 10,00,000 = Rs. 10.4534 per unit (rounded off to four decimals)

Repurchase/ Resale is at Net Asset Value (NAV) related prices with repurchase/ resale loads as applicable (within limits) as specified under SEBI Regulations 2026, While determining the price of the units, the fund will ensure that the repurchase price is not lower than 97 per cent of the Net Asset Value.

D. LOAD STRUCTURE

Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the Scheme. This exit load charged (net of GST) will be credited back to the Scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC www.motilaloswalmf.com or may call at toll free no. 1800-200-6626 or your distributor.

No Load shall be imposed for switching between Options within the Scheme. Further, it is clarified that there will be no exit load charged on a switch-out amongst the plans within the same scheme.

The AMC shall ensure the repurchase price will not be lower than 97% of the Applicable NAV.

The investor is requested to check the prevailing load structure of the Scheme before investing.

Any imposition or enhancement in the load structure shall apply on a prospective basis and in no case the same would affect the existing investors adversely. No Load shall be imposed for switching between Options within the Scheme.

Under the Scheme, the AMC reserves the right to modify/alter the load structure if it so deems fit in the interest of smooth and efficient functioning of the scheme, subject to maximum limits as prescribed under the SEBI Regulations. SECTION II

I. INTRODUCTION

A. DEFINITIONS/INTERPRETATION

All references to "Master Circular" refer to Master Circular for Mutual Funds no. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 issued by SEBI dated March 20, 2026 as amended from time to time

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of para 7.19. of SEBI Master circular on mutual funds would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. RISK FACTORS

Scheme Specific Risk Factors
The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, yield, return and/or its ability to meet its objectives.

- **Risks associated with investing in Funds of Fund Scheme/ Underlying Schemes**

a. As the investors are incurring expenditure at both the Fund of Funds level and the schemes into which the Fund of Funds invests, the returns that they may obtain may be materially impacted or may at times be lower than the returns that investors directly investing in such schemes obtain.

b. Movements in the Net Asset Value (NAV) of the Underlying Schemes may impact the performance of Motilal Oswal Diversified Equity Flexicap Passive Fund of Funds. Any change in the investment policies or fundamental attributes of the Underlying Schemes will affect the performance of Motilal Oswal Diversified Equity Flexicap Passive Fund of Funds.

c. Again as the Fund of Funds scheme may shift the weightage of investments between schemes into which it invests, the expenses charged being dependent on the structure of the underlying schemes (being different) may lead to a non-uniform charging of expenses over a period of time.

d. The Scheme may invest predominantly in Passive Schemes. Hence the Scheme's performance may depend upon the performance of the underlying mutual fund scheme. Any change in the investment policies or the fundamental attributes of the underlying scheme could affect the performance of the Scheme. Since Motilal Oswal Diversified Equity Flexicap Passive Fund of Funds will invest primarily in a combination of the specified equity and debt schemes of Motilal Oswal Mutual Fund, scheme specific risk factors of the Underlying Schemes will be applicable. Investors who intend to invest in Motilal Oswal Diversified Equity Flexicap Passive Fund of Funds are required to and deemed to have understood the risk factors of the Underlying Schemes.

e. The Portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying scheme where the Scheme has invested and will not include the investments made by the underlying Scheme.

f. The fund assets are predominantly invested in Passive Schemes and valued at the market price of the said units on the exchange. The same may be at a variance to the underlying NAV of the fund, due to market expectations, demand supply of the units, etc. To that extent the performance of scheme shall be at variance with that of the underlying scheme.

g. The liquidity of the Scheme's investments may be inherently restricted in the event of an inordinately large number of redemption requests, or of a re-structuring of the Scheme's investment portfolio, these periods may become significant.

h. The NAV of the scheme to the extent invested in Money market/ Liquid schemes are likely to be affected by changes in the prevailing rates of interest and are likely to affect the value of the Scheme's holdings and thus the value of the Scheme's Units.

- **Risks associated with investing in Equities**

a. Investments in the equity shares of the Companies constituting the Underlying Index are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro-economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.
b. The Scheme would invest in the Underlying Index/ETF Schemes in the. Hence, the risk associated with the corresponding Underlying Index would be applicable to the Scheme. The Underlying Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The Fund would invest in the Index/ETF Schemes regardless of investment merit, research, without taking a view of the market and without adopting any defensive measures. The Fund would not select securities in which it wants to invest but is guided by the Underlying Index/ETF Schemes. As such the Scheme is passively managed.

- **Market Risk**

The Scheme's NAV will react to stock market movements. The value of investments in the scheme may go down over a short or long period due to fluctuations in Scheme's NAV in response to factors such as performance of companies whose stock comprises the underlying portfolio, economic and political developments, changes is government policies, changes in interest rates, inflation and other monetary factors causing movement in prices of underlining investments.

- **Passive Investments**
  The Scheme as per its investment objective invests in the units of the Underlying schemes regardless of their investment merit.

- **Right to Limit Redemptions**
  Pursuant to para 5.3 of SEBI Master Circular on mutual funds, the Trustee, in the general interest of the Unitholders of the Scheme offered under this SID and keeping in view of unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day subject to the guidelines/circulars issued by the Regulatory Authorities from time to time.

  For detailed restrictions, please refer to Section II Part D, "**Right to Limit Redemptions.**"

- **Risk Factors relating to Portfolio Rebalancing**
  In the event that the asset allocation of the Scheme deviates from the ranges as provided in the asset allocation table in this SID, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme then the AMC would notify the Board of the Trustee Company and the Investment Committee of the AMC with appropriate justifications.

- **Asset Class Risk**
  The returns from the types of securities in which the Scheme invests may under perform from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison with the general securities markets.

- **Selection Risk**
  The risk that a security chosen will underperform the market for reasons that cannot be anticipated.

- **Risk associated with investing in fixed income securities and Money Market Instruments**
  a. **Credit risk:** Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e. will be unable to make timely principal and interest payments on the security). Because of these risk debentures are sold at a yield spread above those offered on Treasury securities, which are sovereign obligations and generally considered to be free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the actual changes in the perceived level of credit risk as well as the actual event of default.

  b. **Counterparty risk:** Counterparty refers to the counterparty's inability to honor its commitments (payment, delivery, repayment, etc.) and to risk of default. This risk relates to the quality of the

counterparty to which the scheme has exposures. Losses can occur in particular for the settlement/delivery of financial instruments.

c. **Interest Rate risk:** This risk is associated with movements in interest rate depends on various factors such as government borrowing, inflation, economic performance etc. The value of investments will appreciate/depreciate if the interest rates fall/rise. However, if the investments are held on till maturity of the investments, the value of the investments will not be subjected to this risk.

d. **Reinvestment risk:** This risk arises from uncertainty in the rate at which cash flows from the securities may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.

e. **Liquidity or Marketability Risk:** This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market.

f. Different types of fixed income securities in which the Scheme would invest carry different levels and types of risk. Accordingly, the Scheme risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, bonds, which are AAA rated, are comparatively less risky than bonds, which are AA rated.

g. The Net Asset Value (NAV) of the Scheme, to the extent invested in Debt and Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

h. <u>Settlement Risk</u>

Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are un invested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well-developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.

- **<u>Risks associated with investing in Government of India Securities</u>**

a. Market Liquidity risk with fixed rate Government of India Securities even though the Government of India Securities market is more liquid compared to other debt instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case

the relevant guidelines issued by Reserve Bank of India undergo any adverse changes.

b. Interest Rate risk associated with Government of India Securities - while Government of India Securities generally carry relatively minimal credit risk since they are issued by the Government of India, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is not unique to Government of India Securities. It exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.

- **Market Trading Risks**

a. **Absence of Prior Active Market:** Although the scheme will be listed on stock exchange, there can be no assurance that an active secondary market will develop or be maintained.

b. **Lack of Market Liquidity:** Trading in the units of the scheme on stock exchange may be halted because of market conditions or for reasons that in view of stock exchange or SEBI, trading in the units of the scheme are not advisable. In addition, trading of the units of the scheme are subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of stock exchange necessary to maintain the listing of the units of the scheme will continue to be met or will remain unchanged.

c. **Units of the scheme may trade at prices other than NAV:** The units of the scheme may trade above or below their NAV. The NAV of the scheme will fluctuate with changes in the market value of scheme holdings. The trading prices of the units of the scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the units of the scheme. However, given that units of the scheme can be created and redeemed in creation units directly with the fund, it is expected that large discounts or premiums to the NAV of units of the scheme will not sustain due to arbitrage opportunity available.

d. **Regulatory Risk:** Any changes in trading regulations by stock exchange or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.

e. **Right to Limit Redemptions:** The Trustee, in the general interest of the unit holders of the scheme and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of units which can be redeemed on any business day depending on the total "Saleable Underlying Stock" available with the fund.

f. **Redemption Risk:** Investors may note that even though the Scheme is open-ended Scheme, the Scheme would ordinarily repurchase units in creation unit size. Thus unit holdings less than the creation unit size can only be sold through the secondary market on the exchange.

g. **Asset Class Risk:** The returns from the types of securities in which the scheme invest may underperform returns of general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison of securities markets.

h. The units will be issued only in demat form through depositories. The records of the depository are final with respect to the number of units available to the credit of unit holder. Settlement of trades, repurchase of units by the mutual fund depends up on the confirmations to be received from depository (ies) on which the mutual fund has no control.

- **Risks associated with investing in TREPS Segments**

  The mutual fund is a member of securities and TREPS segments of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in TREPS segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.

- **Tracking Error Risk**

  The Fund Manager would not be able to invest the entire corpus exactly in the Underlying Scheme due to certain factors such as the expenses, regulatory policies, lack of liquidity, etc., which may result in Tracking Error. Hence it may affect AMC's ability to achieve close correlation with the Underlying Scheme. The Scheme's returns may therefore deviate from its Underlying Scheme. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the Underlying Scheme and the NAV of the Scheme. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis. There can be no assurance or guarantee that the Scheme will achieve any particular level of Tracking Error relative to performance of the Underlying Scheme.

- **Risks associated with Segregated portfolio:**

  The AMC / Trustee shall decide on creation of segregated portfolio of the Scheme in case of a credit event/actual default at issuer level. Accordingly, Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer. The Security comprised of segregated portfolio may not realise any value. Further, listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Trading through mutual fund trading platforms of BSE and/ or NSE

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

- **General Risk Factors**

  Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Units of the Scheme can go up or down because of various factors that affect the capital markets in general.

  As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances.

- **Risk associated with potential change in Tax structure**

  This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

- **Risk Control**

  Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.

D. RISK MITIGATION STRATEGIES

Risk & Description specific to the Scheme	Risk Mitigation / Management Strategy
Market Risk The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume, volatility in the capital markets, interest rates, currency exchange rates, changes in	Market risk is a risk which is inherent to an equity scheme. Understand the working of the markets and respond effectively to market movements. The scheme may use derivatives to limit this risk.

policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets.	
Liquidity risk The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which they invests.	The Scheme will try to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks.
Derivatives Risk As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives since derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds.	Derivatives will be used in the form of Index Options, Index Futures and other instruments as may be permitted by SEBI. All derivatives trade will be done only on the exchange with guaranteed settlement. The AMC monitors the portfolio and regulatory limits for derivatives through its front office monitoring system. Exposure to derivatives of stocks or underlying index will be done based on requisite research. Exposure with respect to derivatives shall be in line with regulatory limits and the limits specified in the SID. No OTC contracts will be entered into.
Risks associated with money market investment	
Market Risk/ Interest Rate Risk As with all fixed income securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.	The Scheme may invest in money market instruments having relatively shorter maturity thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities.
Liquidity or Marketability Risk This refers to the ease with which a security can be sold at or near to its valuation yield- to maturity (YTM).	The Scheme may invest in money market instruments having relatively shorter maturity. While the liquidity risk for short maturity securities may be low, it may be high in case of medium to long maturity securities.

Credit Risk Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).	Management analysis may be used for identifying company specific risks. Management's past track record may also be studied.
Interest rate risk Price volatility due to movement in interest rates	Control the portfolio duration and periodically evaluate the portfolio structure with respect to existing interest rate scenario.
Reinvestment Risk The rate at which interim cash flows can be reinvested may be lower than that originally assumed	Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value. Exposure to Debt and Money market instruments will be in the form of TREPs and other liquid assets
