The scheme seeks to actively allocate across passive domestic Equity Index Funds / Equity Exchange Traded Funds spanning sectors and market capitalizations. Since, the Nifty 500 represents majority of India's listed market capitalization and provides broad exposure across sectors and large, mid, and small caps, it is the most suitable benchmark. These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. In case of any deviation, the portfolio shall be rebalanced within 30 business days.

Deployment of NFO Proceeds in Triparty Repo or any other instrument as may be permitted by SEBI:

In accordance with provision no. 1.7.3 of SEBI Master Circular on Mutual Fund dated March 20, 2026, the scheme may deploy NFO proceeds, before closure of NFO period, in 'The Clearing Corporation of India Ltd.'s (CCIL) TREPS'. AMCs will not charge any investment management and advisory fees on funds deployed in Triparty repo on Government Securities. B. WHERE WILL THE SCHEME INVEST

In line with the investment allocation pattern of the scheme, the scheme will invest in:

- i) Units of Passive Equity Mutual Fund schemes in multiple sectors.
- ii) Debt & Money Market Instruments including Reverse repo, Triparty repo on Government securities or treasury bills and/or Other similar instruments.

C. WHAT ARE THE INVESTMENT STRATEGIES ?

The Scheme shall follow an active investment strategy. The scheme will allocate its assets among existing sectoral passive schemes depending upon Fund Manager assessment and parameters like macro-economic conditions, fundamental outlook of relevant sectors and factors such as Momentum etc. The Fund Manager will try to assess the economic conditions, market conditions and future outlook in order to understand the drivers of growth for different sectors.

Though the Scheme will primarily invest in Schemes of Tata Mutual Fund, it will also have the flexibility to invest in schemes of other Mutual Funds. The selection of the underlying funds shall be made on the basis of the Fund Manager assessment & parameters as stated above.

The Scheme can also invest in Debt & Money Market Instruments including Reverse repo, Triparty repo on Government securities or treasury bills and/or other similar instruments as stated above in Asset Allocation Section.

Portfolio Turnover Policy:

Portfolio turnover in the scheme will be a function of market opportunities. It is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. The AMC will endeavor to optimize portfolio turnover to optimize risk adjusted return keeping in mind the cost associated with it. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of investment opportunities that exist in the market. Portfolio Turnover is not applicable to the Fund of Funds Scheme.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Scheme Benchmark:
Nifty 500 Index (TRI)

Benchmark Selection Rationale:

The composition of the benchmark is such that it is most suited for comparing performance of the Scheme.

The scheme seeks to actively allocate across passive Equity Mutual Fund schemes in multiple sectors and market capitalizations. Since, the **Nifty 500** represents majority of India's listed market capitalization and provides broad exposure across sectors and large, mid, and small caps, it is the most suitable benchmark.

The Trustees reserves the right to change the benchmark in future, if a benchmark better suited to the investment objective of the Scheme is available subject to SEBI (Mutual Fund) Regulations & Circulars issued from time to time.

The performance of the scheme shall be benchmarked to the Total Return (TRI) variant of the benchmark.

Tata Multi Sector Passive FOF is an open ended fund of fund scheme investing in units of passive equity mutual fund schemes in multiple sectors.

Existing FOF schemes of Tata Mutual Fund (Tata Gold ETF Fund of Fund, Tata Silver ETF Fund Of Fund, Tata Nifty India Digital ETF Fund of Fund) invest in Gold, Silver or Digital ETFs respectively or in case of Tata Income Plus Arbitrage Active FOF the underlying exposure is in debt oriented mutual fund schemes and arbitrage based mutual fund schemes.

However, this scheme (Tata Multi Sector Passive FOF) actively allocates across domestic Equity Index Funds / Equity ETFs based on the Fund Manager's dynamic assessment of macro-economic conditions, fundamental outlook of relevant sectors and factors such as Momentum etc. and is therefore distinct from the existing FoF schemes.

Below mentioned is the comparison of this fund of fund scheme with other existing fund of fund schemes of Tata Mutual Fund:

Sr No	Scheme Name

PART III- OTHER DETAILS

A. COMPUTATION OF NAV

Net Asset Value ("NAV") of the Units shall be determined as of the close of each Business Day.

NAV shall be calculated in accordance with the following formula:

$$\text{NAV} = \frac{\text{Market Value of Scheme's Investments} + \text{Accrued Income} + \text{Receivables} + \text{Other Assets} - \text{Accrued Expenses} - \text{Payables} - \text{Other Liabilities}}{\text{Number of Units Outstanding}}$$

Illustration of computation of NAV:

Consider Market Value of Scheme's Investments: Rs. 125000, Accrued Income: Rs. 15000, Receivables: Rs. 20000, Other Assets: Rs. 5000, Accrued Expenses: Rs. 7000, Payables: Rs. 12000, Other Liabilities: Rs. 8000 & Number of Units Outstanding of the scheme: 1000

$$\text{NAV} = \frac{125000 + 15000 + 20000 + 5000 - 7000 - 12000 - 8000}{1000} = \text{Rs. } 138.0000 \text{ per unit.}$$

The computation of Net Asset Value, valuation of Assets, computation of applicable Net Asset Value (related price) for ongoing Sale, Redemption, Switch and their frequency of disclosure shall be based upon a formula in accordance with the Regulations and as amended from time to time including by way of Circulars, Press Releases, or Notifications issued by SEBI or the Government of India to regulate the activities and growth of Mutual Funds. The NAVs of the fund shall be rounded off up to four decimals.

The valuation of investments including ETCD's shall be based on the principles of fair valuation specified in Schedule VII of the SEBI (Mutual Funds) Regulations, 2026 and guidelines issued by SEBI /AMFI from time to time. Investment Policy & Valuation policy for participation in ETCDs are in place. * Please refer Para V. of SAI on 'Investment valuation norms for securities & other assets' for details.

Each option of the Regular Plan & Direct Plan will have a separate NAV.

Illustration of Calculation of Sale & Repurchase Price:

Assumed NAV Rs. 11.00 per unit

Entry Load: NIL

Exit Load 1%

Sale Price = NAV + (Entry Load(%) * NAV)

Sale Price = 11 + (0% * 11)

Sale Price = 11 + 0

Sale Price = Rs. 11/-

Repurchase Price = NAV – (exit load (%) * NAV)

Repurchase Price = 11 – (1%*11)

Repurchase Price = 11 – 0.11

Repurchase Price = Rs.10.89

Repurchase/ Resale is at Net Asset Value (NAV) related prices with repurchase/ resale loads as applicable (within limits) as specified under SEBI Regulations 2026, While determining the price of the units, the fund will ensure that the repurchase price is not lower than 97 per cent of the Net Asset Value.

I. INTRODUCTION

A. DEFINITIONS / INTERPRETATION

Functional weblink that contains detailed description: Kindly visit <https://www.tatamutualfund.com/statutory-disclosures/other-statutory-disclosures>.

B. RISK FACTORS

Standard Risk Factors:

- Mutual Fund investments are subject to market risks, read all scheme-related documents carefully.
- Investment in Mutual Fund Scheme Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- Mutual Funds and securities investments are subject to market risks and there can be no assurance and no guarantee that the Scheme will achieve its objective.
- As with any investment in stocks, shares and securities, the NAV of the Units under this Scheme can go up or down, depending on the factors and forces affecting the capital markets.
- Past performance of the previous Schemes, the Sponsors or its Group / Affiliates / AMC / Mutual Fund is not indicative of and does not guarantee the future performance of the Scheme.
- The sponsors are not responsible or liable for any loss resulting from the operations of the scheme beyond the initial contribution of Rs. 1 lakh made by them towards setting up of the mutual fund.
- Tata Multi Sector Passive FOF is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme, or its future prospects or the returns. Investors therefore are urged to study the terms of the scheme carefully and consult their Tax and Investment Advisor before investing in the Scheme.
- The scheme is not guaranteed or assured return scheme.

Scheme Specific Risk Factors:**1) Risk associated with Illiquidity of the underlying constituents:**

The liquidity of security may change depending on market conditions leading to changes in the liquidity premium linked to the price of the security. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio.

2) Risk associated with Tracking error of the underlying funds:

Factors such as the fees and expenses of the Scheme, Corporate Actions, Cash balance, changes to the Underlying Index and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying Index of the Scheme. The Scheme's returns may therefore deviate from those of its Underlying Index, generally known as "Tracking Error" risk. Being an open-ended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet ongoing redemptions.

Index Providers undertake periodic reviews of the securities that are represented in the Index and from time to time may exclude existing securities or include new ones. In such an event, the scheme will endeavor to reallocate its portfolio to mirror the changes. However, the reallocation process may not occur instantaneously and permit precise mirroring of the Index during this period.

3) Risk associated with Rebalancing and reconstitution in multiple counts:

Historically rebalancing cycles cause change in weights & entry exit of most stocks. Thus, resetting the portfolio while replication would cause tracking error

4) Risk associated with Multisector Fund of Fund scheme :

The Scheme will invest in sector specific underlying schemes based on research and analysis of past performance of the schemes/sectors in line with the investment objective i.e. will invest predominantly in Units of Passive Equity Mutual Fund schemes of select sectors. Since the investment is made only in select sectors, at time this may result in higher volatility and risk.

Investing in a multisector fund of fund scheme is based on the premise that the Scheme will invest in sectors belonging to only few specific sectors selected after thorough analysis of past performance. In line with the investment objective, the Scheme will invest predominantly in Units of Passive Equity Mutual Fund schemes of the selected sectors. This will limit the capability of the scheme to invest in other sectors and hence will be affected by the risks associated with the sector followed by the underlying schemes in which the FOF makes investments.

Since the scheme will invest in select sectors, the risk involved in the investment will be more concentrated as compared to investment in Diversified underlying schemes. Owing to the high concentration risk for sectorial schemes in which this FOF will invest, the risk of capital loss is highest.

5) Risk associated with FOF

As the FoF invests in the underlying ETF through stock exchange, the market price of underlying ETF may be different from its Indicative Net Asset Value (INAV)/NAV, which may affect the performance of the scheme.

6) Risks associated with Debt / Money Markets Instruments:**Interest Rate Risk**

As with debt/money instruments, changes in interest rate may affect the price of the money market instrument(s) and ultimately Scheme's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the scheme is reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Credit Evaluation Process for the investments in Debt Securities

In-house credit evaluation team has the necessary capability of conducting independent due diligences of credit risk. From credit evaluation perspective, companies are broadly classified under two sectors - Industrials and Financial Institutions. Industrials include Manufacturing and trading companies, while Financial Institutions include Banks and Non-Banking Financial Companies (NBFCs). The set of parameters for evaluation of credits for these sectors are different.

Broad guidelines for the appraisal of Industrials for short-term and long-term exposure include, but are not restricted to:

- External Ratings threshold: Investment is made only if the issuer credit rating is at least 'investment grade' (BBB- or above) for Long-term debt by a credit rating agency recognized by SEBI. In the short-term, investment is made in top notch (A1+ or equivalent) rated debt instruments. However, this is subject to review from time to time and investment committee / Board of AMC approval is required for any exception.

Each company is internally appraised based on various parameters including, but not restricted to:

1. Business Fundamentals: Product/Service offerings, Market Position, Competitive Landscape, and Product cycle etc.
2. Regulatory environment: Support/intervention, developmental stage of industry, level of regulation

C. RISK MITIGATION STRATEGIES**1. Risk mitigation measures for Tracking error of the underlying funds**

The scheme shall endeavour that the tracking error based on past one year rolling data shall not exceed 2%. However, at times, the tracking error may exceed/vary due to market conditions/other factors.

Following are the measures that would help in minimizing the tracking error:

i) Risk mitigation measures for Rebalancing and reconstitution in multiple counts:

The Fund manager of the underlying scheme would endeavor to rebalance the securities at the earliest to minimize the tracking error.

ii) Risk mitigation measures for Sector not performing:

This strategy was communicated as very high risk and guided as being part of satellite portfolio of the investor.

<p>Concentration Risk Concentration risk represents the probability of loss arising from heavily lopsided exposure to a particular group of sectors or securities.</p>	<p>The Scheme will try and mitigate this risk by investing in underlying schemes investing in different companies/sectors so as to maintain optimum diversification and keep stock-specific concentration risk relatively low.</p>
<p>Market Risk The scheme is vulnerable to movements in the prices of securities invested by the scheme, which could have a material bearing on the overall returns from the scheme</p>	<p>Market risk is a risk which is inherent to an equity scheme. The underlying schemes may use derivatives to limit this risk.</p>
<p>Liquidity risk The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.</p>	<p>As such the liquidity of stocks that the underlying schemes invest into could be relatively low. The underlying schemes will try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time.</p>

II. INFORMATION ABOUT THE SCHEME

A. Where will the scheme invest ?

In line with the investment allocation pattern of the scheme, the scheme will invest in:

- i) Units of Passive Equity Index Funds in multiple sectors,
- ii) Units of Passive Equity Exchange Traded Funds in multiple sectors.
- iii) Debt & Money Market Instruments including Reverse repo, Triparty repo on Government securities or treasury bills and/or Other similar instruments.

Overview of Debt Market:

The major players in the Indian Debt Markets are banks, financial institutions, insurance companies and mutual funds. The instruments in the market can be broadly categorized as those issued by corporate, banks, financial institutions and those issued by state/central governments. The risk associated with any investments are – credit risk, interest rate risks and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The liquidity risk in the corporate securities market is higher compared to those of government securities. The liquidity risk in the corporate securities market is higher compared to those of government securities. Liquidity in the corporate debt market has been improving due to the entry of more players and due to various measures taken by the regulators to increase the liquidity and transparency such as introduction of repo in corporate bonds, Credit Default Swaps, compulsory reporting of secondary market OTC transactions on exchange platforms to name a few. Moreover, the recent successful introduction of Interest Rate Future on the benchmark 10-year Government Bond will also be likely to increase the depth in the debt market.

The market participants in the corporate debt and gilt markets are banks, financial institutions, mutual funds, corporates, insurance companies, FPIs, primary dealers and provident funds. The main debt instruments in the market are those issued by Corporates and State/Central Governments. Corporate papers carry credit risk while government securities are believed to carry no credit risk. The main risks with investments in debt securities are interest rate risk, credit risk and liquidity risk. Interest rate risk associated with debt instruments depends on the macroeconomic environment. It includes both market price changes due to changes in yields as well as coupon reinvestment rate risk. Corporate papers carry higher liquidity risk as compared to gilts due to the depth of the gilt market.

Money Market:

Money market encompasses a wide range of instruments with maturities ranging from one day to a year, issued by Government, Banks and corporates etc. and traded in markets of varying liquidity. The risk associated with any investments are – credit risk, interest rate risk and liquidity risk. However, such risks are lower in the case of money market instruments compare to other debt instruments. Further, within the gamut of money market instruments as available in the market, such risks are very low in the case of instruments issued by government. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk.

The following table attempts to give a broad overview of the available instruments in the financial markets and their risk return profile. The data given in the table is based on market conditions around the date of the Offer document and can at best be considered indicative:

The HIRE Act includes the Foreign Account Tax Compliance Act (FATCA), which now forms a part of the US-IR Code. The regulations for FATCA have undergone revision since 2010 and the final regulations make the FATCA provisions effective from July 1, 2014.

The objective of FATCA is to detect "US Persons", who evade US taxes by using financial account maintained outside US. The US persons are defined as those who have either US citizenship or US residency. The FATCA stipulates reporting on -

- i. US taxpayers about certain foreign financial accounts and offshore assets.
- ii. Foreign Financial Institutions (FFIs) about financial accounts with them of US taxpayers or foreign entities in which US taxpayers hold substantial ownership interest.

FFIs (including mutual funds in India) are required to periodically report information on accounts of US persons, who maintain balances above a threshold. In the event of a default in the reporting of information on accounts of US taxpayers, a withholding of 30% of the payment made from US sources will be imposed on the recalcitrant account holders and non-participating Financial Institutions. SEBI vide its circular no. CIR/MIRSD/2/2014 dated June 30, 2014, has advised that Government of India and US Government have reached an agreement in substance on the terms of an Inter-Governmental Agreement (IGA) to implement FATCA and India is now treated as having an IGA in effect from April 11, 2014. 2. SIPrise facility:

SIPrise is an optional facility offered by Tata Mutual Fund (TMF) for its eligible schemes (Growth option). This facility is aimed to encourage investors to invest regularly through Systematic Investment Plans (SIP) in TMF schemes for pre-defined tenure. Post SIP period (Investors have an option to select pause period) the accumulated units will be switched from the source scheme to the target scheme. Investors also have an option to select the source scheme as the target scheme. In this case, there would not be any unit transfer through systematic transfer plan (STP). The investor would receive periodic amount through systematic withdrawal plan (SWP) till the units are available.

Tata Multi Sector Passive FOF is considered as eligible Source Scheme for "SIPrise" facility.

The terms and conditions of this facility are as follows:

a) Systematic Investment Plan (SIP)

The SIPs registered under this facility would be subject to investment of minimum amount as specified in the KIM cum application form from time to time for the eligible source schemes.

Default SIP trigger date under this facility will be the 10th calendar day of the month. In case, the trigger date falls on a non- business day, the SIP would be triggered on the next business day.

The SIP will be registered for monthly frequency only.

In case the SIP is terminated prior to the pre-defined tenure, STP and SWP will continue as defined in the initial request. In any case, the STP and SWP amount will be limited till the units are available.

Existing units already available in the source scheme before opting for the SIPrise facility and any additional units added to the source scheme in any manner in addition to this facility will also be automatically moved to the Target scheme through the scheduled STPs till the units are available. The amount so moved to the target scheme would be on a first in first out (FIFO) basis. Any earlier option chosen by the investor earlier would automatically get revised to this extent.

Top-Up SIP is allowed under this feature. The investor may choose to increase their SIP amount by Rs. 500 or multiples of Rs. 500.

b) Systematic Transfer Plan (STP)

A Systematic Transfer Plan (STP) will start one year prior to that of the SWP.

Yearly STP amount will be equal to 15 times the monthly SWP amount from the target scheme or till the units are available.

c) Systematic Withdrawal Plan (SWP)

Investors need to choose the scheme (target scheme) from where the monthly SWP is required to be made to their registered bank account & the required periodic amount by means of withdrawal via systematic withdrawal plan (SWP) from target scheme. In case, the investors do not choose the desired SWP amount, they will receive the default SWP amount (likely amount to be withdrawn) which would be initial monthly SIP amount under this facility till the units last.

The SWP will start after the SIP tenure or after the pause period, if any, as chosen by the investor.

The SWP amount selected shall not be less than the initial SIP amount opted by the investor.

Investors have an option to opt for pause after the SIP tenure as mentioned at the time of initial registration under this facility. The minimum pause period is 0 years. If the pause is not opted, the starting month (i.e. 1st trigger month) for SWP will be the subsequent month of the last SIP instalment month.

Existing units already available before STP in the target scheme and additional units added to the target scheme will also form a part of the redemption proceeds through the scheduled SWP till the units are available. The SWP amount would be triggered on first in first out (FIFO) basis.

The SWP date will be same as that of the SIP date. In case, the trigger date is a non- business day, the SWP will be made on the next business day.

The SWP will be done from the Growth Options of eligible open-ended schemes of Tata Mutual Fund as stated in annexure to this addendum.

The SWP will continue till the units are available in the scheme.

Common Features

Once opted for this facility investors / unitholders cannot change the Source scheme, target scheme, initial SIP Amount, SIP Tenure, Pause Period and required periodic SWP Amount.

STP will be done when the target scheme is different from the source scheme at prevailing NAV in the respective scheme (s).

Partial redemption or switch out of the units in the source or target scheme will not affect the SIP, STP & SWP already registered under this facility. Investors are required to note that the STP & SWP will be continued for the period chosen by the investor or till the units are available in the source and target scheme respectively.

Investor has option to withdraw from this SIP facility at any stage by providing a separate request to discontinue/cease the SIP, STP & SWP registration.

Minor/s are not eligible to register for this facility. Applications in the name of minors, filled in by guardians, will also not be accepted.

This Facility is not available where units are in held in DEMAT mode.

Pledged or Frozen Units will not be transferred (i.e. through STP). The same is also not available for withdrawal by the investor (i.e. through SWP) unless the investor / unitholder provides the necessary valid documents to prove that the pledge/freeze status has been withdrawn/changed.

Investors can opt to withdraw through lumpsum either partially or in entirety till the units are available in the source and / or target scheme at any time during the tenure of this facility. Accordingly, the balance units will be considered for SIP, STP & SWP under this facility.

Each STP & SWP will continue for the chosen amount or till units last.

Default trigger date i.e. 10th calendar day of the month is only applicable for this facility.

Tata Mutual Fund reserves the right to reject any application in case the investor does not fulfil any criteria of this facility

In case the date falls during a non-business day / book closure period the immediate next Business Day will be considered for this purpose.

The Authorised Investor Service Center may terminate SWP on receipt of a notice from the unitholder. It will terminate automatically if all units are liquidated or withdrawn from the account or upon the receipt of notification of death or incapacity of the unitholder.

The amount thus withdrawn by redemption shall be converted into units at the applicable NAV on the scheduled day and such units will be subtracted from the unit balance of that unitholder. The net amount will be considered for allotment in the target scheme and units will be allotted as per the applicable NAV of the target scheme. Unitholders may change the amount of STP. However, the STP amount selected cannot be below the specified minimum redemption amount of the source scheme and should meet the minimum investment amount criteria of the target scheme. A change in STP amount can be done by giving two weeks prior written notice to the registrars. In case the total income includes such specified income, surcharge on such specified income shall not exceed 15%.

Further, Health and Education Cess to be levied at the rate of 4% on aggregate of base tax and surcharge.

@ Surcharge at 7% on base tax is applicable where total income of domestic corporate unit holders exceeds Rs 1 crore but does not exceed 10 crores and at 12% where total income exceeds 10 crores. However, surcharge at flat rate of 10% to be levied on base tax for the companies opting for lower rate of tax of 22%/15%.

Further, "Health and Education Cess" to be levied at the rate of 4% on aggregate of base tax and surcharge.

Further, the domestic companies are subject to minimum alternate tax (except for those who opt for lower rate of tax of 22%/15%) not specified in above tax rates.

Note 1 - Capital gains from transfer of units of "specified mutual fund schemes" acquired on or after 1st April 2023 are treated as short term capital gains taxable at applicable slab rates, irrespective of the period of holding of such mutual fund units.

For this purpose, "specified mutual fund" means (a) a mutual fund scheme investing more than 65% of its total proceeds in debt and money market instruments; or (b) a fund of fund investing 65% or more of its total proceeds in units of a mutual fund scheme referred to in (a).

•Stamp Duty

With effect from 1st July 2020 a stamp duty @ 0.005% of the transaction value would be levied on mutual fund investment transactions. Accordingly, the number of units allotted on purchases, switch-ins, SIP/STP instalments and including IDCW reinvestment to the unitholders would be reduced to that extent.

•Provisions in relation to segregated portfolios of a mutual fund scheme are as follows –

As per clause (101) of the section 2 of the Act, in case of a capital asset, being a unit or units in a segregated portfolio referred to in section 73(1) of the Act, there shall be included the period for which the original unit or units in the main portfolio were held by the assessee.

As per Sr. No. 11 and 12 of Table to section 73(1) of the Act, the cost of acquisition for units of segregated portfolios and main portfolio to be computed as provided in column C of the below table, namely:-

Sl. No.	Description of the capital asset	Cost of acquisition
A	B	C
11	Capital asset being a unit or units in the segregated portfolio.	<p>Computed as per the following formula:</p> $X = (A*B) / C$ <p>where,</p> <p>X = cost of acquisition of the unit or units in segregated portfolio;</p> <p>A = cost of acquisition of unit or units in the total portfolio;</p> <p>B = Net Asset Value of the asset transferred to the segregated portfolio; and</p> <p>C = Net Asset Value of the total portfolio immediately before segregation of portfolios.</p>
12	Capital asset being original units held by the unit holder in the main portfolio.	The cost of acquisition of such original units as reduced by the amount as so arrived at under serial number 11.

Note: For the purposes of the table in sub-section (1) of section 73 of the Act, in respect of the entries against serial number 11 and 12, the expressions "main portfolio", "segregated portfolio" and "total portfolio" shall have the same meanings as respectively assigned to them in applicable Securities and Exchange Board of India regulations.

A per sub-clause (a) of clause (101) section 2 of the Act defines the expression "short term capital asset" to be a capital asset held by an assessee for not more than twenty-four months immediately preceding the date of its transfer. Further, sub-clause (b) of clause (101) section 2 of the Act provides that where the capital asset is a security listed on a recognised stock exchange in India, the provisions of this sub-clause shall have effect as if for the words "twenty-four", the words "twelve months" had been substituted.

If the unit or units in a segregated portfolio are held for twenty-four months or less from the original date of acquisition of units in the Main portfolio then the same will constitute 'short term capital assets' and any capital gains arising therefrom shall be considered as 'short term capital gain'. On the contrary, if the unit or units in a segregated portfolio are held for more than twenty-four months from the original date of acquisition of units in the Main portfolio then the same will constitute 'long-term capital assets' and any capital gains arising therefrom shall be considered as 'long term capital gain'.

Example:

Suppose Mr. X had invested in a scheme of a mutual fund on 01-01-2015 when the NAV was Rs. 10. On May 1, 2019, when NAV of the scheme was Rs. 20, segregation of portfolio was created due to a credit event. Post creation of the segregated portfolio, the NAV of the main portfolio was Rs. 16 and the segregated portfolio was Rs 4. Hence, the proportion is 80:20 of the total portfolio. The cost of acquisition of the main portfolio and the segregated portfolio should be taken as Rs. 8 and Rs. 2 respectively. Similarly, the period of holding of the units of the main portfolio and the segregated portfolio should be reckoned from 1st January 2015.

The information stated above is based on Tata Mutual Fund understanding of the tax laws and only for the purpose of providing general information to the unit holders of the schemes. In view of the individual nature of tax implications, each unit holder is advised to consult with his or her own tax advisors with respect to the specific tax and other implications arising out of the restructuring.

Any tax liability arising post redemption on account of change in tax treatment with respect to Tax on Income Distribution/Capital Gain Tax, by the tax authorities, shall be solely borne by the investors and not by the AMC or Trustee Company.
