→ SIP Top-up facility

Investors may avail fixed SIP Top-up facility where they have an option to increase the amount of the SIP Installment by a fixed amount at predefined intervals.

SIP Top-up facility shall be available for SIP Investments through any mode such as NACH/ECS/DIRECT DEBIT/ Standing Instruction (SI)/ UPI mandate as per arrangements with banks or payment aggregators. The Top-up amount should be in multiples of ₹1 only. Monthly and quarterly SIP offers top-up frequency at yearly intervals.

An Illustration: How to calculate the SIP Top-up amount?

SIP Period : 01-Jan-2023 to 01-Dec-2024 (2 Years)

Monthly SIP Installment Amount : ₹ 2,000

SIP Date : 1st of every month (24 installments)

Top-up Amount: ₹ 1,000

Top-up Frequency: Yearly

SIP Instalments shall be as follows:

Installment No.	From Date	To Date	Monthly SIP amount in ₹	SIP Top up amount in ₹	Increased SIP amount in ₹
1 to 12	01-Jan-23	31-Dec-23	2,000	N.A.	2,000
13 to 24	01-Jan-24	31-Dec-24	2,000	1,000	3,000

Top-up cap option:

Unit holders have an option to cap the SIP Top-up amount based on either a fixed predefined amount or date as detailed below:

Top-up cap amount: Investor has an option to cap the SIP Top-up amount once the SIP installment (including Top-up amount) reaches a fixed predefined amount.

Thereafter the SIP installment will remain constant till the end of SIP tenure.

Top-up cap month-year: Investor has an option to provide an end date to the SIP Top-up amount. It is the date from which Top - up to the SIP installment amount will cease and the SIP installment will remain constant till the end of SIP tenure. If none of the above options for Top-up cap is selected by the investor, the SIP Top-up will continue as per the SIP end date and Top-up amount specified by the investor.

Illustration 1: How to fix Top-up cap amount?

SIP Period: 01-Jan-2023 to 01-Dec-2027 (5 Years)

Monthly SIP Installment Amount: ₹ 2,000

SIP Date: 1st of every month (60 installments)

Top-up Amount: ₹ 1,000

Top-up Frequency: Yearly

Top-up cap amount (including SIP Installment): ₹ 5,000

Installment No.	From Date	To Date	Monthly SIP amount in ₹	SIP Top up amount in ₹	SIP installment including Top up in ₹
			(A)	(B)	(A+B)
1 to 12	01-Jan-23	31-Dec-23	2,000	N.A.	2,000
13 to 24	01-Jan-24	31-Dec-24	2,000	1,000	3,000
25 to 36	01-Jan-25	31-Dec-25	3,000	1,000	4,000
37 to 48	01-Jan-26	31-Dec-26	4,000	1,000	5,000
49 to 60	01-Jan-27	31-Dec-27	5,000	N.A.	5,000

It may be seen in the above illustration that once the Topup cap amount (including the SIP installment) reaches ₹ 5,000, the SIP installment amount starting January 1, 2027 remains constant.

Illustration 2: How to fix top-up cap month-year?

SIP Period: 01-Jan-2023 to 01-Dec-2027 (5 Years)

Monthly SIP Installment Amount: ₹ 2,000

SIP Date: 1st of every month (60 installments)

Top-up Amount: ₹ 1,000

Top-up Frequency: Yearly

Top-up cap month - year: 01-Jan-2026

SIP Instalments shall be as follows:

Installment No.	From Date	To Date	Monthly SIP amount in ₹	SIP Top up amount in ₹	SIP installment including Top up in ₹
			(A)	(B)	(A+B)
1 to 12	01-Jan-23	31-Dec-23	2,000	N.A.	2,000
13 to 24	01-Jan-24	31-Dec-24	2,000	1,000	3,000
25 to 36	01-Jan-25	31-Dec-25	3,000	1,000	4,000
37 to 48	01-Jan-26	31-Dec-26	4,000	1,000	5,000
49 to 60	01-Jan-27	31-Dec-27	5,000	N.A.	5,000

It may be seen in the above illustration that after 1-Jan-2026 (the pre- defined Top up cap month-year), the SIP installment amount remains constant.

The AMC / Trustee reserves the right to change the terms and conditions of this facility at a later date on a prospective basis. The AMC / Trustee reserves the right to withdraw the SIP Top-up facility.

→ SIP PAUSE FACILITY

The Fund offers Systematic Investment Plan (“SIP”) Pause facility (“the Facility”) for investors who wish to temporarily pause their SIP in the Schemes of the Fund.

The terms and conditions of the Facility are as follows:

1. This Facility is available for SIPs with Monthly and Quarterly frequencies.
2. The maximum number of installments that can be paused using this facility are 3 (three) consecutive installments for SIPs registered with Monthly frequency and 1 (one) for SIPs registered with Quarterly frequency. Thereafter, automatically the balance SIP installments (as originally registered) will resume.
3. SIP pause requests should be submitted at least 15 days before the requested start date.
4. SIP Pause once registered cannot be cancelled.
5. The Investor understands and acknowledges that the SIP Pause facility is merely a transaction related facility offered by the Company; and the Investor unconditionally and irrevocably agrees that the AMC or Fund will not be liable for:
 - (i) acting in good faith on any instructions received from the Investor;
 - (ii) any force majeure events that are beyond the control of any person; and

(iii) any error, default, delay or inability of the AMC or the Fund or its Agents to act on all or any of the instructions from the Investor. The Investor hereby assumes and undertakes the entire risk of using the Facility and agrees to take full responsibility for the same.

The Trustee reserves the right to change / modify the terms and conditions of the Facility or withdraw the Facility.

→ **Systematic Transfer Plan (STP)**

STP is a facility given to the Unit holders to transfer sums on a periodic basis from one scheme to another schemes launched by the Mutual Fund from time to time by giving a single instruction.

Investors can opt for the STP by investing a lump sum amount in one scheme of the fund and providing a standing instruction to transfer sums at regular intervals.

Particulars	Frequency	Details
Frequency and Transaction Dates	Daily	Every Business Day
	Weekly	
	Fortnightly	
	Monthly	
Minimum number of transfers and minimum amount per STP	Daily	₹ 100/- each per transfer
	Weekly	
	Fortnightly	
	Monthly	

An investor if choosing 29th, 30th or 31st of a month as the STP date, then the STP date will be automatically considered as the first business day of the following month.

If any STP transaction due date falls on a non-Business day, then the respective transactions will be processed on the immediately succeeding Business Day for both the schemes.

Default Frequency - Monthly

The Trustee/ AMC reserves the right to introduce STPs at any other frequencies or on any other dates as the AMC may feel appropriate from time to time. In the event such a day is a Holiday, the transfer would be affected on the next Business Day.

→ **Systematic Withdrawal Plan (SWP)**

Unit holders have the benefit of availing the choice of Systematic Withdrawal Plan (SWP). The SWP allows the Unit holder to withdraw a specified sum of money each month/quarter/ half-yearly/ yearly from his investments in the Schemes. SWP is ideal for investors seeking a regular inflow of funds for their needs. It is also ideally suited to retirees or individuals, who wish to invest lump sum and withdraw from the investment over a period of time. The amount thus withdrawn by redemption will be converted into Units at Applicable NAV and the number of Units so arrived at will be subtracted from the Units balance to the credit of that Unit holder. The Unit holder may avail of this Option, after the close of the New Fund Offer Period. Unit holders will have the option to change the amount or the period of withdrawals. The SWP may be terminated by a Unit holder and it will terminate automatically if all the Units are liquidated or withdrawn from the account or the holdings fall below Rs.100/- (subject to the Unit holder failing to invest sufficient funds to bring the value of their holdings to the minimum amount of ₹100/- after the completion of SWP, within 30 days after the balance shall have fallen below the minimum holdings) or upon the Mutual Fund's receipt of notification of death or incapacity of the first Unit holder.

Default Option : Monthly option

Minimum SWP installment size is ₹100/- and in multiples of ₹ 1 thereafter.

→ **Switching Options**

Unit holders under the Scheme have the option to switch part or all of their Unit holdings in the Scheme to any other Scheme offered by the Mutual Fund from time to time. The Mutual Fund also provides the investors the flexibility to switch their investments from any other scheme(s) / plan (s) offered by the Mutual Fund to this Scheme. This option will be useful to Unit holders who wish to alter the allocation of their investment among the scheme(s) / plan(s) of the Mutual Fund in order to meet their changed investment needs. The Switch will be affected by way of a Redemption of Units from the Scheme at Applicable NAV, subject to Exit Load, if any and reinvestment of the Redemption proceeds into another Scheme offered by the Mutual Fund at Applicable NAV and accordingly the Switch must comply with the Redemption rules of the Switch out Scheme and the Subscription rules of the Switch in Scheme.

→ **OTM – ONE TIME MANDATE ('FACILITY')**

OTM is a simple and convenient facility that enables the Unit holders to transact in the Schemes of the Fund by submitting OTM - One Time Mandate registration with the Fund through e-NACH or UPI autopay facility.

It is a one - time registration process wherein the Unit holder(s) of the Scheme(s) of the Fund authorizes his / her bank to debit their account upto a certain specified limit per transaction, on request received from the Fund, as and when the

	<p>transaction is undertaken by the Unit holder, without the need of submitting cheque or fund transfer letter with every transaction thereafter.</p> <p>This Facility is only available to Unit holder(s) of the Fund who have been assigned a folio number by the AMC.</p> <p>Unit Holder(s) are requested to note that the AMC reserves the right to amend the terms and conditions, or modify, or discontinue the Facility for existing as well as prospective investors at any time in future.</p> <p>→ <u>Transactions through the Stock Exchange</u></p> <p>Facilitating Transactions through recognised Stock Exchange Infrastructure.</p> <p>→ <u>Process for Investments made in the name of Minor through a Guardian</u></p> <p>Payment for investment shall be accepted from the bank account of the minor or from a joint account of the minor with the guardian only, else the transaction is liable to get rejected. 8.	Credit Default Swap transactions	

The scheme shall make investment in derivatives as permitted under the SEBI (MF) regulations for hedging and non hedging purposes within the exposure limits as may be prescribed under the SEBI Master Circular for Mutual Funds.

Change in Asset Allocation:

The above mentioned investment pattern is indicative and subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may vary from time to time, on account of various factors. As per SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021, the Fund Manager, may deviate from the above investment pattern for a short term period on defensive considerations. The same will be rebalanced within 30 calendar days and further action may be taken as specified under SEBI Circulars/ AMFI guidelines issued from time to time.

Short term defensive consideration:

Subject to para 1.9.1(b) of the SEBI Master Circular for Mutual Funds, dated March 20, 2026, the asset allocation pattern indicated above may change for a short term period on defensive considerations, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be rebalanced within 30 calendar days from the date of deviation and further action may be taken as specified under SEBI Circulars/ AMFI guidelines issued from time to time.

Portfolio rebalancing in case of passive breach:

Further, as per Paragraph 3.11 of the Master Circular dated March 20, 2026, as may be amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Scheme within 30 Business Days. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it

so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of the mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in Paragraph 3.11 of the Master Circular dated March 20, 2026.

Timelines for deployment of Funds mobilized in a New Fund Offer (NFO)

Pursuant to para 7.24 of the SEBI Master Circular for Mutual Funds dated March 20, 2026, the funds mobilized during the New Fund Offer (NFO) shall be deployed in accordance with the asset allocation pattern of the scheme within 30 business days from the date of allotment of units. In exceptional cases where the AMC is not able to deploy the funds within this period, shall provide an explanation, including details of the efforts made to deploy the funds, to the Investment Committee of the AMC. The Investment Committee may extend the deployment timeline by up to 30 business days and shall provide recommendations to ensure timely deployment in the future.

B. WHERE WILL THE SCHEME INVEST?

The corpus of the Scheme shall be invested in accordance with the investment objective of the scheme which will include but not limited to:

The Scheme would invest all its funds in:

1. Equity & Equity Related Instruments
2. Debt & Debt Related Instruments
3. InvITs
4. ETCs (Gold and Silver)
5. Gold ETFs
6. Silver ETFs
7. Any other instruments as may be permitted by SEBI from time to time.

Please refer to Section II in page no. 45 for more details on the above instruments.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme intends to follow an active strategy with an internal asset allocation model that invests in units of Equity, Debt & Commodity. In the early years, a greater portion of the investment is allocated to higher risk assets such as equity as compared to debt. This allocation becomes more balanced during the mid-years and gradually shifts as the scheme approaches its target year — with a larger portion moving towards debt and cash instruments over time. This systematic shift towards more conservative investments is designed to reduce the risk of any significant reduction in the value of an investment in the scheme as it approaches the target date.

The glide path and the applicable asset allocation ranges at each stage are set out in the section "HOW WILL THE SCHEME ALLOCATE ITS ASSETS?" of this SID.

Equity Investments

In the early years of the Scheme — when the years to maturity are higher — the Scheme will maintain a significantly higher allocation to equity and equity related instruments in order to benefit from long-term compounding and capital appreciation. The Fund Manager will seek to invest across market capitalisation in companies that demonstrate:

- a) reasonable growth prospects and earnings visibility;
- b) sound financial strength and balance sheet quality;
- c) sustainable and defensible business models; and
- d) valuations that offer reasonable potential for capital appreciation relative to their intrinsic worth.

The Scheme aims to maintain a reasonably diversified equity portfolio at all times, without concentration risk in any single sector or stock beyond prudent limits.

Arbitrage Opportunities

For the period when the years to maturity are less than 10 years, the Scheme may additionally seek to generate income through equity arbitrage opportunities — including Index/Stock Spot vs. Index/Stock Futures, Index Futures vs. Stock Futures, Futures of the same stock with different expiry months, and corporate action or event-driven strategies such as dividend arbitrage, buyback arbitrage, or merger-related arbitrage in the cash or derivatives market — subject to the conditions and limits as prescribed under SEBI Master Circular for Mutual Funds dated March 20, 2026. The total investment in equity and equity related instruments, including arbitrage exposure, shall remain within the limits specified in the asset allocation table of the Scheme.

Debt and Money Market Investments

As the Scheme progresses along its glide path, allocation to debt and money market instruments will increase progressively. Debt investments shall be restricted to instruments rated AA and above with a residual maturity not exceeding the target maturity of the Scheme.

Investment in debt securities and money market instruments shall be guided by credit quality, liquidity, interest rate outlook and the remaining tenure of the Scheme. The Fund Manager will seek to optimise risk-adjusted returns within the debt portfolio while ensuring alignment with the overall conservative objective of the glide path in the later years.

Gold ETFs, Silver ETFs and ETCDs

The Scheme may invest in Gold/Silver ETFs, and Exchange Traded Commodity Derivatives (ETCDs), where ETCDs shall be based only on Gold and Silver, in accordance with the permissible limits under the asset allocation table. These instruments are intended to provide portfolio diversification and act as a partial hedge against inflation and equity market volatility..

InvITs

The Scheme may invest in units of Infrastructure Investment Trusts (InvITs) for the purpose of portfolio diversification, subject to the limits prescribed under SEBI (Mutual Funds) Regulations, 2026 and applicable guidelines issued by SEBI from time to time.

Use of Derivatives

The Scheme may use derivative instruments such as futures and options, or any other derivative instruments that are permissible under applicable regulations, for the purposes of hedging, non-hedging, portfolio rebalancing and portfolio management. The use of derivatives for purposes other than hedging shall be subject to restrictions as prescribed under the SEBI (Mutual Funds) Regulations, 2026..

For detailed derivative strategies, please refer to the Statement of Additional Information (SAI).

Covered Call Strategy

For the period when the equity allocation of the Scheme is active, the Scheme may, at the discretion of the Fund Manager, write call options under a covered call strategy to generate additional income from the equity portfolio. Such options shall be written only on constituent stocks of NIFTY 50 and BSE SENSEX that are held in the Scheme's portfolio and are not hedged through any other derivative instrument. The notional value of call options written shall not exceed 15% of the total market value of equity shares held in the Scheme, and the shares underlying such options shall not exceed 30% of the unencumbered shares of any particular company held in the Scheme. The risks associated with this strategy are disclosed in the Risk Factors section of the SID. The strategy shall be used subject to the conditions and limits prescribed under Para 13.15.1(b) of the SEBI Master Circular for Mutual Funds dated March 20, 2026.

Risk Control

Investments made by the Scheme will be in accordance with the investment objectives of the Scheme and the provisions of the SEBI (Mutual Funds) Regulations, 2026. The AMC will incorporate adequate safeguards for controlling risks in the portfolio construction process. The primary risk management mechanism of the Scheme is the glide path itself — by design, equity exposure reduces and debt exposure increases as the Scheme approaches its target maturity date of 2041, progressively reducing portfolio volatility and drawdown risk in the years closer to maturity. In addition, diversification across asset classes — equity, debt, gold, silver and InvITs — is expected to reduce the impact of adverse movements in any single asset class on overall portfolio returns.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Though every endeavor will be made to achieve the objective of the Scheme, the AMC/Sponsors/Trustee does not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.

PORTFOLIO TURNOVER:

Portfolio Turnover is a term used to measure the volume of trading that occurs in a Scheme's portfolio during a given time period. The scheme being a Life Cycle Fund, investing in multiple asset classes as defined under the Section 'HOW WILL THE SCHEME ALLOCATE ITS ASSETS?' it is expected that there would be a number of subscriptions and redemptions on a daily basis. Hence, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in the Index. The Scheme has

no specific target relating to portfolio turnover. The effect of higher portfolio turnover could be higher brokerage and transaction costs.

Portfolio Turnover Ratio: Not Applicable as this is a new scheme.

D. HOW WILL SCHEME BENCHMARK ITS PERFORMANCE?

The performance of the scheme will be benchmarked to the performance of the following:

65% Nifty 200 TRI + 5% Domestic prices of Physical Gold + 5% Domestic prices of Physical Silver + 25% CRISIL 10 year Gilt Index.

The composition of the aforesaid benchmark is such that it is most suited for comparing performance of the scheme.

The Trustees reserves the right to change the benchmark in future, if a benchmark better suited to the investment objective of the Scheme is available post prior intimation/ approval of SEBI.

E. WHO MANAGES THE SCHEME?

vi. **Investments of AMC in the Scheme**

In terms of sub-regulation 3(a) in Regulation 22 of SEBI (MF) Regulations, 2026 read along with para 7.13 of the SEBI Master Circular for Mutual Funds, dated March 20, 2026 and AMFI Best Practice Guidelines Circular No.100 /2022 - 23 on 'Alignment of interest of AMCs with the Unitholders of the Mutual Fund schemes', the AMC shall invest such amounts in such schemes of the mutual fund, based on the risks associated with the schemes, as may be specified by the SEBI from time to time.

In line with SEBI Regulations and circulars issued by SEBI from time to time, the AMC may invest its own funds in the scheme(s). Further, the AMC shall not charge any Investment Management and Advisory fees on its investment in the Scheme (s), unless allowed to do so under SEBI Regulations in the future.

For details of mandatory investments by AMC in the scheme visit www.zerodhafundhouse.com.

III. OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per Unit of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding under the Scheme on the valuation date. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time. Additionally, the closing price of the units of ETFs on the stock exchange shall be used for valuation by the Scheme investing in such ETFs.

In case of any conflict between the Principles of Fair Valuation and valuation guidelines specified by SEBI, the Principles of Fair Valuation shall prevail.

NAV of Units of under the Scheme shall be calculated as shown below:

NAV (₹) per Unit =

Market or Fair Value of the Scheme's Investments + Current Assets - Current Liabilities and Provisions
No. of Units outstanding under each Scheme

The NAV of the Scheme will be calculated at the close of every Business Day.

The NAV of the Scheme will be calculated up to 4 decimal places.

Methodology for calculation of sale and repurchase price.

Pursuant to para 9.2 of SEBI Master Circular for Mutual Funds, dated March 20, 2026 on “Go Green Initiative in Mutual Funds”, the methodology of calculating the sale and repurchase price of units is explained with an illustration below:

A) Sale Price:

The Sale Price for a valid purchase will be the Applicable NAV of the respective Scheme i.e. Sale Price = Applicable NAV.

For a valid purchase request of ₹ 10,000, where the applicable NAV is ₹ 10, the units will be allotted as below:

Purchase Amount - ₹ 10,000 Applicable NAV - ₹ 10 No. of Units - 1,000 Units <i>(Purchase Amount/Applicable NAV)</i>
--

Please note that the entry load has been abolished with effect from August 01, 2009 as per para 11.7 of the SEBI Master Circular for Mutual Funds, dated March 20, 2026 . Hence, Sale price is equal to the applicable NAV.

B) Repurchase Price:

The Repurchase Price for a valid repurchase will be the applicable NAV reduced by any exit load (say 1%, if redeemed before completion of 1 year). i.e. applicable NAV - (applicable NAV X applicable exit load)

For a valid repurchase request where the applicable NAV is ₹ 10, the repurchase price will be as follows :

Applicable NAV - ₹ 10 Exit Load - 1% $= 10 - (10 \times 1\%)$ $= 10 - (0.1)$ = ₹ 9.9

Therefore, for the repurchase for 1,000 units, the Investor will receive the proceeds as given below:

No. Of Units - 1,000 Repurchase Price = ₹9.9 $= 1000 \times 9.9$ = ₹ 9,900
--

Note: Transaction charges and other charges/expenses, if any, borne by the investors have not been considered in the above illustration(s).

The Mutual Fund will ensure that the Redemption Price will not be lower than 97% of the Applicable NAV provided that the difference between the Redemption Price and the Subscription /Purchase Price at any point in time shall not exceed the permitted limit as prescribed by SEBI from time to time, which is currently 3% calculated on the Subscription/ Purchase Price. The Purchase Price shall be at applicable NAV.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. kindly refer to SAI.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution, marketing and advertising, registrar expenses, printing and stationery, bank charges etc. The NFO expenses shall be borne by the AMC.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses incurred for the Scheme. These expenses include but are not limited to Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs, listing fee, etc.

The AMC has estimated that the following expenses will be charged to the Scheme as permitted under Regulation 66 and Regulation 67 of SEBI (MF) Regulations. For the actual current expenses being charged, the investor should refer to the website of the Mutual Fund viz. www.zerodhafundhouse.com

Expense Head	% of daily net assets (estimated) (p.a.)
Investment Management and Advisory Fees	Upto 2.10%
Trustee Fees and Expenses ¹	
Audit Fees and Expenses	
Custodian Fees and Expenses	
RTA Fees and Expenses	
Marketing and Selling Expenses	
Cost related to Investor Communication	
Cost of fund transfer from one location to another	
Cost of providing account statements	
Cost of Statutory Advertisements	
Cost towards investor education and awareness ²	
Brokerage and Transaction cost over and above 0.06% and 0.02% on value of trades for cash and derivative market trades only	
Other Expenses	
Maximum Base Expense Ratio (BER) permissible under Regulation 66 (7)⁴	

Statutory levies (including GST) on expenses other than Investment Management and Advisory Fees ³	As per Prevailing and actual rates
Statutory levies (including GST) on Investment Management and Advisory Fees ³	
Statutory levies (including GST) on brokerage and transaction cost ³	

Recurring expenses (BER) under Regulation 66(7)(c) - During equity oriented phase of the glide path (equity allocation of 65% and above)

On the first Rs. 500 crores of the daily net assets — 2.10% p.a.

On the next Rs. 250 crores of the daily net assets — 1.90% p.a.

On the next Rs. 1,250 crores of the daily net assets — 1.60% p.a.

On the next Rs. 3,000 crores of the daily net assets — 1.50% p.a.

On the next Rs. 5,000 crores of the daily net assets — 1.40% p.a.

On the next Rs. 40,000 crores of the daily net assets — Base expense ratio reduction of 0.05% for every increase of Rs. 5,000 crores of daily net assets or part thereof.

On balance of the assets — 0.95% p.a.

The base expense ratio of the scheme shall be the sum of expenses mentioned at regulation 66(4), 66(5) and 66 (6) but excluding statutory levy applicable, if any, on the said expenses and transaction cost[^] specified under regulation 66(10).

[^]Transaction cost incurred for the purpose of execution of a trade shall mean regulatory levies and any other expenses charged by the stock exchanges, clearing corporation, and clearing house, as applicable. Such transaction costs shall not form part of the base expense ratio.

Total Expense Ratio (TER)

The total of all expenses charged to the investors of the Scheme, as mentioned under the definition of 'Total Expense Ratio' under the SEBI (Mutual Funds) Regulations, 2026, shall comprise: (a) expenses charged within the Base Expense Ratio (BER) limit specified under Regulation 66(7); (b) brokerage and transaction costs permitted under Regulation 66(9); (c) transaction costs incurred for the purpose of execution of trade as referred to under Regulation 66(10); and (d) statutory levies charged to the investors.

¹ *Trustee Fees and Expenses*

In accordance with the Trust Deed constituting the Mutual Fund, the Trustee is entitled to receive, in addition to the reimbursement of all costs, charges, and expenses, a fee of upto INR 15,00,000 per quarter (aggregate across all schemes), to be allocated to individual schemes in proportion to their average AUM for the preceding quarter.

² *Investor Education and Awareness initiatives*

As per para 11.9 of Master Circular, the AMC shall annually set apart at least 2 basis points p.a. (i.e. 0.02% p.a.) on daily net assets of the Scheme within the limits of base expense ratio limits prescribed under Regulation 66 of SEBI (MF) Regulations for investor education and awareness initiatives undertaken

³ Refer Point (3) below on GST on various expenses.

⁴ The expenses towards Investment Management and Advisory Fees under Regulation 66 (4) and the various sub-heads of recurring expenses mentioned under Regulation 66 (5) of SEBI (MF) Regulations are fungible in nature. Thus, there shall be no internal sub-limits within the expense ratio for expense heads mentioned under Regulation 66 (4) and (5) respectively.

The purpose of the above table is to assist the Investor in understanding the various costs and expenses that an Investor in the Scheme will bear directly or indirectly. The figures in the table above are estimates. The actual expenses that can be charged to the Scheme will be subject to limits prescribed from time to time under the SEBI (MF) Regulations.

GST

GST shall be charged as follows: -

- A. GST on investment management and advisory fees shall be charged to the Scheme in addition to the maximum limit of BER as prescribed in Regulation 66 (7) of the SEBI (MF) Regulations.
- B. GST on other than investment management and advisory fees, if any, shall be charged to the Scheme in addition to the maximum limit of BER as prescribed in Regulation 66 (7) of the SEBI (MF) Regulations.

Such expenses include, by way of illustration and without limitation: (a) Trusteeship fees; (b) Custodian fees; and (c) Index / benchmark licensing fees etc.

- C. GST on brokerage and transaction cost paid for execution of trade, if any, shall be charged to the Scheme in addition to the maximum limit of BER as prescribed under Regulation 66 of the SEBI (MF) Regulations.

The base expense ratio (excluding statutory expenses such as GST) of the Scheme including the Investment Management and Advisory Fee shall not exceed the limits stated in Regulation 66 of the SEBI (MF) Regulations.

The mutual fund would update the current expense ratios on the website (www.zerodhafundhouse.com) at least three working days prior to the effective date of the change and update the TER under the Section titled “Disclosures” under the sub-section titled “Total Expense Ratio of Mutual Funds”.

Illustration: Impact of Expense Ratio on Scheme's return

Expense ratio, normally expressed as a percentage of Average Assets under Management, is calculated by dividing the permissible expenses under the Regulations by the average net assets.

To further illustrate the above, for the Scheme under reference, suppose an Investor invested ₹ 10,000/- (after deduction of stamp duty) under the Direct Plan, the impact of 1% expenses charged will be as under:

Particulars	Direct Plan
Amount invested at the beginning of the year (Rs.)	10,000
Returns before expenses (Rs.)	1,500
Expenses (Rs.)	150
Returns after expenses at the end of the year (Rs.)	1350
Returns (per annum in %)	13.50%

Note(s):

- *The purpose of the above illustration is to purely explain the impact of expense ratio charged to the plan under the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments.*
- *It is assumed that the expenses charged are evenly distributed throughout the year.*
- *Calculations are based on assumed NAVs, and actual returns on your investment may be more, or less.*
- *Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to seek appropriate advice.*

All scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the scheme only within the regulatory limits and not from the books of AMC, its associate, sponsor, trustees or any other entity through any route in terms of SEBI Master Circular for Mutual Funds, dated March 20, 2026, subject to the clarifications provided by SEBI to AMFI vide letter dated February 21, 2019 on implementation of SEBI Circular dated October 22, 2018 on Total Expense Ratio (TER) and performance disclosure for Mutual Fund.

D. LOAD STRUCTURE

Details of Load Structure - Exit Load:

The Scheme carries an exit load as prescribed under Annexure 1B of the SEBI Master Circular for Mutual Funds dated March 20, 2026 in order to inculcate financial discipline and encourage investors to remain invested for the long term in alignment with the Scheme's glide path strategy and target maturity objective. The exit load shall be applicable as under:

Period of Holding	Exit Load Applicable
Up to 1 year	3%
More than 1 year and up to 2 years	2%
More than 2 years and up to 3 years	1%

More than 3 years*	NIL*
--------------------	------

*The Trustee / AMC reserves the right to modify / change the Load structure if it so deems fit in the interest of smooth and efficient functioning of the Mutual Fund.

- The exit load shall be computed based on the date of allotment of units for each purchase transaction, including each installment of a Systematic Investment Plan (SIP) or Systematic Transfer Plan (STP), treated independently.
- In case of switch transactions, the exit load applicable to the Scheme from which the switch is made shall apply.
- The exit load, net of Goods and Services Tax (GST) as applicable, shall be credited back to the Scheme.
- For the purpose of charging Exit Load, the units would be considered on First In First Out (FIFO) basis.
- AMC shall not charge any load on issue of bonus units and units allotted on reinvestment of dividend (if applicable) for existing as well as prospective investors and any imposition or enhancement of Exit Load in the load shall be applicable on prospective investments only.

Any imposition or enhancement of Exit Load in the load shall be applicable on prospective investments only. At the time of changing the load structure the AMC / Mutual Fund may adopt the following procedure:

- (i) The addendum detailing the changes will be attached to Scheme Information Document and Key Information Memorandum and displayed on our website www.zerodhafundhouse.com.
- (ii) The introduction of the Load along with the details will be mentioned in the acknowledgement issued to the investors on submission of the application and will also be disclosed in the Account Statement or in the covering letter issued to the Unit holders after the introduction of such Load.
- (iii) A public notice shall be given in respect of such changes in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated.
- (iv) Any other measures which the mutual funds may feel necessary.

SECTION - II

I. Introduction

A. Definitions/Interpretations

In this Scheme Information Document, the words and expressions shall have the meaning specified in the following link, unless the context otherwise requires.

B. Risk Factors

Standard Risk Factors

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price/ value/ interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on the various factors and forces affecting the capital markets and money markets.
- Past performance of the Sponsors and their affiliates / AMC / Mutual Fund does not guarantee future performance of the Scheme of the Mutual Fund.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of ₹1 lakh each made by them towards setting up the Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Scheme Specific Risk Factors

The Scheme invests directly in equity and equity related instruments, debt and money market instruments, Infrastructure Investment Trusts (InvITs), Exchange Traded Commodity Derivatives (ETCDs) based on Gold and Silver, Gold and Silver ETFs in accordance with a pre-defined glide path strategy with a target maturity date. The asset allocation of the Scheme shifts progressively over time from an equity-oriented portfolio in the early years to a more conservative, debt-oriented portfolio as the target maturity date approaches.

The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates, commodity prices, currency movements, and risks associated with trading volumes, liquidity and settlement systems across the multiple asset classes in which the Scheme invests. Some of the risks are listed below.

Risk associated with underlying scheme (Gold and Silver ETFs):

To the extent the Scheme's assets are invested in Gold and Silver ETFs, the risks associated with the underlying Gold and Silver ETFs, will also be applicable. The scheme may invest in units of Gold and Silver ETFs. Accordingly, the NAV of the scheme will react to Gold/Silver price movements.

- Investors should be aware that there is no assurance that gold/silver will maintain its long-term value in terms of purchasing power in the future. In the event that the price of gold/silver declines, the value of investment is expected to decline proportionately.
- The returns from physical gold/silver may underperform returns from the various general securities markets or different asset classes other than gold/silver. Different types of securities tend to go through cycles of out-performance and under-performance in comparison to the general securities markets.
- The scheme may invest in Gold and Silver ETFs. The units may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of the holdings. The trading prices will fluctuate in accordance with changes in their NAV as well as market supply and demand. However, given that units of Gold and Silver ETFs can be created and redeemed in Creation Units, it is expected that large discounts or premiums to the NAV will not sustain due to arbitrage opportunities available.
- Value of Gold and Silver ETF Units could decrease if unanticipated operational or trading problems arise.

In case of investment in Gold and Silver ETFs, the scheme can subscribe to the units of Gold and Silver ETFs according to the value equivalent to unit creation size as applicable. If subscriptions received are not adequate enough to invest in creation unit size, the subscriptions may be deployed in debt and money market instruments which will have a different return profile compared to gold/silver returns profile. The units issued under the Scheme, when invested in Gold and Silver ETFs, will derive liquidity from the underlying Gold/Silver ETFs having creation / redemption process in creation unit size of predefined quantity of physical gold/silver (e.g. 1 kg in case of gold or 30kg in case of silver). At times prevailing market conditions may affect the ability of the underlying Gold and Silver ETFs to sell gold/silver against the redemption request received.

Furthermore, the endeavor would always be to get cash on redemptions from the underlying Gold and Silver ETFs. However, in case the underlying Gold/Silver ETFs are unable to sell for any reason, and deliver physical gold/silver, there could be delay in payment of redemption proceeds pending such realization.

Additionally, the Scheme will derive liquidity from trading units of underlying Gold and Silver ETFs on the exchange(s) in the secondary market which may be inherently restricted by trading volumes, settlement periods and transfer procedures. There is no assurance that an active secondary market for Gold and Silver ETFs will be developed and maintained, in such times, the processing of redemption requests at times may be delayed. In the event of an inordinately large number of redemption requests, or re-structuring of the Scheme's investment portfolio, the processing of redemption requests may be delayed.

Risks associated with Equity and Equity Related Instruments:

Equity and equity related instruments including equity shares, equity derivatives and units of Real Estate Investment Trusts (REITs) by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of equity and equity related instruments may fluctuate due to factors affecting the securities markets such as price volatility, volumes traded, interest rates, currency exchange rates, changes in law or policies of the Government, taxation laws,

political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issued under the Scheme may be adversely affected.

Equity and equity related instruments listed on the stock exchange carry lower liquidity risk; however the Scheme's ability to sell these investments is limited by the overall trading volume on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, if there is a subsequent decline in the value of securities held in the Scheme's portfolio.

To the extent the Scheme invests in units of REITs, the NAV of the Scheme will be impacted by the performance of the underlying real estate assets held by those REITs. The value of REIT units may be affected by factors specific to the real estate sector, including changes in property prices, rental yields, occupancy rates, interest rate movements, regulatory changes governing the real estate sector, and changes in SEBI (Real Estate Investment Trusts) Regulations, 2014. Distributions from REITs are not guaranteed and are dependent on the cash flows generated by the underlying real estate assets. A reduction or deferral of distributions by a REIT could adversely impact the returns of the Scheme to the extent of its investment in that REIT. Further, while REIT units are listed on stock exchanges, trading volumes may at times be limited, which may impact the Scheme's ability to enter or exit REIT positions at desired prices without incurring material impact cost.

Investments in equity and equity related instruments involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

Risks associated with Debt and Money Market Instruments or Fixed Income Securities:

Debt and Money Market Instruments or Fixed Income Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.

Credit Risk: This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency. For periods when the years to maturity of the Scheme are less than 5 years, debt investments shall be restricted to instruments rated AA and above with residual maturity not exceeding the target maturity of the Scheme, in accordance with the applicable SEBI circular. Notwithstanding this restriction, the following credit-related risks remain applicable

Interest-Rate Risk: Fixed income securities such as government bonds, corporate bonds and Money Market Instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of

fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded. As the Scheme's allocation to debt increases in the later years of the glide path, the Scheme's overall sensitivity to interest rate movements will increase correspondingly.

Liquidity Risk: The Indian debt market is such that a large percentage of the total traded volumes on particular days might be concentrated in a few securities. Traded volumes for particular securities differ significantly on a daily basis. Consequently, the scheme might have to incur a significant "impact cost" while transacting large volumes in a particular security.

Reinvestment Risk: Investments in fixed income securities carry reinvestment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

Basis Risk: The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements. This may result in loss of value of the portfolio.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. During the tenure of the security this spread may move adversely or favourably leading to fluctuations in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Risk of Rating Migration: It may be noted that the price of a rated security would be impacted with the change in rating and hence, there is risk associated with such migration.

Counterparty and Settlement Risk: Corporate Bond Repo will be settled between two counterparties in the OTC segment unlike in the case of TREPS transactions where CCIL stands as central counterparty on all transactions (no settlement risk). Settlement risk in reverse repo will be mitigated by requiring the counterparty (entity borrowing funds from the Mutual Fund) to deliver the defined collateral in the account of the MF before the cash is lent to the counterparty. Further, the Mutual Fund will also have a limited universe of counterparties, but not limited to, comprising Scheduled Commercial Banks, Primary Dealers, Mutual Funds and National Financial Institutions.

Legislative Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the scheme.

Risk factors associated with processing of transactions through Stock Exchange Mechanism

The trading mechanism introduced by the Stock Exchange(s) is configured to accept and process transactions for mutual fund Units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other authorized Stock Exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing /settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the Stock Exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized Stock Exchange(s). Accordingly, there could be negative

impacts to the investors such as delay or failure in allotment / redemption of units. The Fund and the AMC are not responsible for the negative impacts.

Risks associated with segregated portfolio:

The unit holders may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange.

The risks associated in regard to the segregated portfolio are as follows:

- The investors holding units of the segregated portfolio may not be able to liquidate their holdings till the time of recovery of money from the issuer.
- The security comprising the segregated portfolio may not realize any value.
- Listing units of the segregated portfolio on a recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units of the segregated portfolio on the stock exchange.
- The trading price of units on the stock exchange may be significantly lower than the prevailing Net Asset Value (NAV) of the segregated portfolio.

Risk associated with Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

The AMC shall adhere to the following limits should it engage in Stock Lending:

1. Not more than 20% of the net assets of a Scheme can generally be deployed in Stock Lending.
2. Not more than 5% of the net assets of a Scheme can generally be deployed in Stock Lending to any single approved intermediary / counterparty.

Risk associated with Equity Derivatives (

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and the decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of equity derivatives are different from or possibly greater than, the risks associated with investing directly in equity securities and other traditional investments.

Trading in derivatives has the following risks:

- An exposure to derivatives in excess of the hedging requirements can lead to losses.
- An exposure to derivatives, when used for hedging purpose, can also limit the profits from a genuine investment transaction.
- Derivatives carry the risk of adverse changes in the market price.
- Illiquidity Risk i.e., risk that a derivative trade may not be executed or reversed quickly enough at a fair price, due to lack of liquidity in the market.

The Fund may use derivatives instruments like equity futures & options, or other derivative instruments as permitted under the Regulations and Guidelines. Usage of derivatives will expose the Scheme to liquidity risk, open position risk, and opportunities risk etc. Such risks include the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. In case of the derivative strategies, it may not be possible to square off the cash position against the corresponding derivative position at the exact closing price available in the Value Weighted Average Period.

Numerical Example:

The following illustrative examples are provided to help investors understand the risks arising from the use of derivative instruments by the Scheme. These examples are hypothetical and for illustrative purposes only; actual outcomes will vary based on market conditions and portfolio composition at any given time.

Example 1: Risk Associated with Equity Derivatives

Assume the Scheme's equity portfolio is Rs. 80 crore and the Scheme receives a fresh inflow of Rs. 10 crore pending deployment into equities. The Fund Manager buys Nifty 50 index futures worth Rs. 10 crore to gain immediate market exposure pending direct equity investment. The following scenarios illustrate the impact of equity futures on portfolio returns:

Scenario	Equity Portfolio(Rs. Crore)	Futures Position(Rs. Crore)	Market Move	Equity Gain/ (Loss)(Rs. Crore)	Futures Gain/ (Loss)(Rs. Crore)	Net Portfolio Gain/ (Loss)(Rs. Crore)
No derivatives,Market rises	80	Nil	+10%	+8.00	Nil	+8.00
With long futures,Market rises	80	+10 (Long)	+10%	+8.00	+1.00	+9.00
No derivatives,Market falls	80	Nil	-10%	(8.00)	Nil	(8.00)
With long futures,Market falls	80	+10 (Long)	-10%	(8.00)	(1.00)	(9.00)

Assumptions: Equity portfolio = Rs. 80 crore; Futures long position = Rs. 10 crore (notional); Market move applied uniformly to both equity portfolio and futures position. The above is a simplified illustration; actual futures P&L will depend on contract price, lot size, margin requirements and settlement price on NSE/BSE.

As the above illustration shows, equity derivatives amplify both gains and losses relative to holding only the underlying equity portfolio. When the market rises, the futures position generates an additional gain; however, when the market falls, the futures position magnifies the loss. This risk is inherent in the leveraged nature of derivative instruments.

Risk associated with Debt Derivatives

The Scheme may invest in debt derivative instruments as may be allowed under the SEBI (Mutual Funds) Regulations, 2026 and applicable SEBI guidelines from time to time. These instruments may be used for hedging interest rate risk or managing portfolio duration, and may also be used for non-hedging purposes within the limits prescribed under the applicable SEBI Master Circular for Mutual Funds dated March 20, 2026.

The risks associated with the use of debt derivatives are different from or possibly greater than the risks associated with investing directly in debt and money market instruments. Key risks include:

- (i) Basis Risk — the underlying benchmark of a swap or floating rate instrument, such as MIBOR or T-Bill rates, may become less active or cease to accurately reflect prevailing market interest rate movements, resulting in an imperfect hedge and potential loss of portfolio value;
- (ii) Counterparty Risk — debt derivatives such as IRS and FRAs are predominantly over-the-counter (OTC) instruments in India and do not carry a central counterparty guarantee, exposing the Scheme to the credit risk of the counterparty to the transaction;
- (iii) Interest Rate Risk — adverse movements in interest rates may result in mark-to-market losses on derivative positions held by the Scheme; and
- (iv) Valuation Risk — the valuation of OTC debt derivatives may be based on pricing models or indicative market quotes that may not always reflect the realisable value of the instrument. An exposure to debt derivatives in excess of hedging requirements can lead to losses, and where used for hedging, may limit the upside from the underlying debt portfolio.

Numerical Example:

The following illustrative examples are provided to help investors understand the risks arising from the use of derivative instruments by the Scheme. These examples are hypothetical and for illustrative purposes only; actual outcomes will vary based on market conditions and portfolio composition at any given time.

Assume the Scheme holds Rs. 50 crore in fixed rate bonds with an average modified duration of 5 years and enters into an IRS on a notional of Rs. 25 crore (hedging 50% of the portfolio), paying a fixed rate of 8% per annum and receiving 6-month MIBOR. The following scenarios illustrate the impact of a 100 basis point (1%) change in interest rates:

Scenario	Fixed Rate Bond Portfolio(Rs. Crore)	IRS Notional(Rs. Crore)	Rate Change(bps)	Bond MTM Gain/(Loss)(Rs. Crore)	IRS Gain/(Loss)(Rs. Crore)	Net Impact(Rs. Crore)
No IRS hedge,Rates rise 100 bps	50	Nil	+100 bps	(2.50)	Nil	(2.50)
With IRS hedge,Rates rise 100 bps	50	25(pay fixed,receive floating)	+100 bps	(2.50)	+1.25	(1.25)
No IRS hedge,Rates fall 100 bps	50	Nil	-100 bps	+2.50	Nil	+2.50
With IRS hedge,Rates fall 100 bps	50	25(pay fixed,receive floating)	-100 bps	+2.50	(1.25)	+1.25

Assumptions: Debt portfolio = Rs. 50 crore; Average modified duration = 5 years; IRS notional = Rs. 25 crore (partial hedge); Bond MTM Gain/(Loss) = Modified Duration × Rate Change × Portfolio Value; IRS Gain/(Loss) = Modified Duration × Rate Change × IRS Notional (with sign reversed for pay-fixed/receive-floating structure). The above is a simplified illustration; actual IRS P&L will depend on MIBOR levels, counterparty terms, accrued interest and AMFI/SEBI prescribed valuation norms.

As illustrated above, the IRS hedge reduces the portfolio's sensitivity to adverse interest rate movements (rising rates), thereby limiting mark-to-market losses on the bond portfolio. However, in a scenario where interest rates fall (favourable for bond prices), the IRS position generates a loss that offsets a portion of the bond portfolio's mark-to-market gain. This demonstrates that derivative hedging, while reducing downside risk, also limits upside participation — a trade-off inherent in the use of hedging instruments. Additionally, in case the IRS hedge is imperfect (i.e., the underlying benchmark, such as MIBOR, does not move in line with the portfolio's interest rate exposure), the hedge may not fully offset the bond portfolio's gains or losses, resulting in residual basis risk

Risks associated with Writing of Call Option Under a Covered Call Strategy

The Scheme may write call options under a covered call strategy in accordance with Para 13.15.1(b) of the SEBI Master Circular for Mutual Funds dated March 20, 2026. While the strategy is intended to generate additional income through option premiums, it carries certain risks. In a sharply rising market, the Scheme's upside participation in the underlying stock is capped at the strike price, and the Scheme may forgo capital appreciation above such price. Incorrect pricing of the option premium, including failure to account for corporate actions such as dividends or record dates, may result in suboptimal income from the strategy. Further, where a call option has been written on a stock, the Fund Manager's ability to sell that stock freely may be constrained by the requirement to maintain compliance with applicable regulatory limits at all times. The call options written are marked to market daily and any resulting losses are reflected in the NAV of the Scheme until the position is closed or expired.

Illustration: Writing a Call Option Under a Covered Call Strategy

Assume the Scheme holds 10,000 shares of a NIFTY 50 constituent company, purchased at ₹1,400 per share, currently trading at ₹1,500. The Fund Manager writes a call option on 2,000 shares at a strike price of ₹1,600, receiving a premium of ₹30 per share. Total premium income = ₹60,000 (₹30 × 2,000 shares).

Scenario A — Stock price stays below ₹1,600 at expiry: The option expires unexercised. The Scheme retains all 2,000 shares and keeps the ₹60,000 premium as additional income, factored into the daily NAV.

Scenario B — Stock price rises to ₹1,750 at expiry: The option is exercised. The Scheme delivers 2,000 shares at ₹1,600. It earns a capital gain of ₹200 per share (₹1,600 – ₹1,400 cost) plus the ₹30 premium — an effective realisation of ₹1,630 per share. However, the Scheme foregoes the additional upside of ₹150 per share (₹1,750 – ₹1,600) that it would have earned had the shares not been subject to the covered call.

The above illustration is for explanatory purposes only and does not represent an actual or assured return.

Risk associated with investing in exchange traded commodity derivatives risks

Volatility in the commodities markets may be caused by changes in overall market movements, domestic and foreign political and economic events and policies, war, acts of terrorism, changes in domestic or foreign interest rates and/or investor expectations concerning interest rates, domestic and foreign inflation rates, investment and trading activities of mutual funds, hedge funds and commodities funds, and factors such as drought, floods, weather, livestock disease, embargoes, tariffs and other regulatory developments, or supply and demand disruptions. Because the Fund's performance is linked to the performance of volatile commodities, investors should be willing to assume the risks of potentially significant fluctuations in the value of the Fund's shares. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of investment strategies depends upon the ability of the fund manager(s) to identify such opportunities which may not be available at all times. Identification and execution of the strategies to be pursued by the fund manager(s) involve uncertainty and the decision of the fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risk associated with Equity Arbitrage

For periods when the years to maturity of the Scheme are less than 10 years, the Scheme may take equity arbitrage exposure of up to 50% of total assets, subject to the overall equity allocation limits prescribed by SEBI. Investors should note the following risks specifically associated with the arbitrage component of the Scheme's portfolio.

Arbitrage opportunities in the equity cash and derivatives markets may not always be available in adequate measure. The profitability of arbitrage strategies depends on the existence of pricing inefficiencies between the cash and futures markets. In periods of low market volatility or reduced

trading activity in derivatives markets, such opportunities may be limited or may offer lower spreads, resulting in returns from the arbitrage portion of the portfolio being lower than anticipated.

Changes in the regulatory framework governing equity derivatives, securities lending and borrowing, margin requirements or market microstructure may adversely impact the availability, execution or profitability of arbitrage strategies. Any such regulatory change could limit the Scheme's ability to deploy the intended allocation to arbitrage.

The execution of arbitrage strategies involves simultaneous transactions in the cash and derivatives segments of the exchange. Any failure or delay in executing one leg of an arbitrage transaction due to liquidity constraints, system failures, exchange disruptions or settlement issues may expose the Scheme to unintended directional market risk, resulting in losses.

Risks associated with Infrastructure Investment Trusts (InvITs)

The Scheme may invest in units of InvITs subject to the limits prescribed under the asset allocation table and applicable SEBI regulations. Investments in InvITs carry the following specific risks that investors should be aware of.

The performance of an InvIT is directly linked to the performance of the underlying infrastructure assets held by it such as roads, power transmission lines, gas pipelines or renewable energy assets. The revenues generated by these assets may be affected by project-specific risks, construction and completion risks, off-take risks, counterparty default by concession grantors or customers, changes in applicable regulations or government policy, force majeure events and macroeconomic conditions. A deterioration in the performance of the underlying infrastructure assets will directly impact the distributions and NAV of the InvIT, and consequently the value of the Scheme's investment.

InvIT units listed on stock exchanges may have significantly lower trading volumes compared to equity securities, which may limit the Scheme's ability to enter or exit InvIT positions at desired prices and in a timely manner. In the event of adverse market conditions or a broad decline in investor appetite for InvITs, the Scheme may be unable to liquidate its InvIT holdings without incurring a material impact cost.

Distributions from InvITs are not guaranteed and are dependent on the cash flows generated by the underlying assets after meeting debt obligations and operational expenses of the InvIT. A reduction, deferral or suspension of distributions by an InvIT could adversely impact the income and returns of the Scheme to the extent of its investment in that InvIT.

The valuation of InvIT units may be subject to significant fluctuations driven by changes in applicable regulations, tax treatment of InvIT distributions, interest rate movements, changes in the valuation of underlying infrastructure assets by independent valuers, and changes in the InvIT's distribution policy. As InvIT valuation methodologies differ from those applicable to equity or debt securities, the NAV impact of InvIT investments may not always be predictable or consistent with broader market movements.

Regulatory changes governing the InvIT framework including changes to SEBI (Infrastructure Investment Trusts) Regulations, 2014, concession agreements, or sector-specific regulations

applicable to the underlying assets may adversely affect the structure, operations, distributions or valuation of InvITs in which the Scheme invests.

C. Risk Mitigation Strategies

The AMC incorporates necessary framework in place for risk mitigation at an enterprise level, and scheme level in accordance with the Risk Management Framework prescribed by the SEBI. The Risk Management division of the AMC is an independent division within the organisation. Internal risk thresholds are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. The Risk Management Committee of the Board enables a dedicated focus on risk factors and the relevant risk mitigants from time to time. In addition, to minimise the major risks, the following measures are taken:

Risk description	Risk mitigation
Equity and Equity related instruments -	The Scheme will maintain a diversified equity portfolio across market capitalisations and sectors to mitigate concentration risk. Investments will focus on companies with sound financials, sustainable business models and reasonable valuations. REIT investments will be evaluated on underlying asset quality, occupancy, sponsor strength and distribution track record. Equity allocation reduces progressively in accordance with the glide path as the Scheme approaches its target maturity date, reducing overall equity market risk over time.
Government of India Securities	To the extent the Scheme invests in Government Securities, these carry sovereign backing and therefore entail negligible credit and default risk. The high depth and transparency of the G-Sec market helps minimise liquidity and execution risks. The Scheme may invest across maturities in Government Securities in accordance with the asset allocation and glide path, with duration managed actively in line with the interest rate outlook and the remaining tenure of the Scheme.
Debt and Money Market instruments	<ul style="list-style-type: none"> • Credit Risk: Management analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken. • Price-Risk or Interest-Rate Risk: Securities invested in are short term in nature thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities. • Basis Risk: Securities invested in are fixed rate securities and hence basis risk does not apply. This risk is generally associated with floating rate securities and has a higher bearing on long-term securities.

	<ul style="list-style-type: none"> • Spread Risk: Securities invested in are fixed rate securities and hence spread risk does not apply. This risk is generally associated with floating rate securities and has a higher bearing on long-term securities. • Reinvestment Risk: Scheme may primarily invest in securities maturing below 91 days. Reinvestment risk becomes more prevalent in long-term securities and lower time to maturity reduces the impact for the scheme. • Liquidity Risk: The Scheme will primarily invest in TREPS, government securities, overnight funds and other money market instruments thereby limiting liquidity risk. The liquidity risk for government securities and money market instruments may be low.
Gold ETFs, Silver ETFs and ETCs:	<ul style="list-style-type: none"> • Price Risk: Fluctuations in Gold and Silver prices are inherent to these instruments. Allocation to Gold ETFs, Silver ETFs and ETCs is capped at 0–10% of total assets, limiting overall NAV impact on the Scheme. Investments are evaluated based on macroeconomic conditions, inflation trends and correlation with other asset classes in the portfolio. • Liquidity Risk: The Scheme will invest in Gold and Silver ETFs listed on recognised stock exchanges with adequate secondary market depth. Position sizes will be managed to avoid forced or distress sales. • ETC Risk: Only exchange-traded Gold and Silver based contracts permitted — no OTC commodity derivatives. Cash-settled contracts preferred. Open interest and trading volumes assessed before entering positions. • Custody Risk: Physical Gold and Silver underlying the ETFs is held with custodians in insured vaults — the Scheme does not directly hold physical commodities.
Infrastructure Investment Trusts (InvITs):	<ul style="list-style-type: none"> • Project Execution and Revenue Risk: Investment restricted to listed, operational InvITs with established cash flows and regulatory compliance track record. Direct exposure to under-construction or development-stage assets avoided. Regulatory and policy developments affecting tariff structures and concession agreements monitored on an ongoing basis. • Operational Risk: Investment limited to listed InvITs subject to SEBI disclosure and governance norms. Material events and disclosures of underlying entities are monitored regularly. • Liquidity Risk: Position sizes managed prudently given relatively lower secondary market trading volumes of InvIT units compared to equity securities. • Distribution Risk: InvITs evaluated on debt coverage ratios, sponsor strength and historical distribution track record before investment.

Glide Path and Life Cycle Fund:	<ul style="list-style-type: none"> • The glide path itself is the primary risk control — progressive reduction in equity and increase in conservative asset classes systematically reduces portfolio volatility as the target maturity approaches, aiming to protect accumulated wealth in later years. • Asset allocation ranges at each stage are prescribed by SEBI and disclosed upfront in the SID, enabling investors to assess alignment with their financial goals before investing and at the time of redemption. • Portfolio rebalanced periodically to ensure compliance with prescribed glide path ranges. Transaction costs associated with rebalancing monitored and managed. • Merger with nearest maturity Life Cycle Fund, if triggered, will be undertaken only with positive consent from Unit Holders. Investors not consenting will have the option to exit the Scheme prior to merger. • The Scheme's diversification across multiple asset classes — equity, debt, Gold ETFs, Silver ETFs, , ETCDs and InvITs — at each stage of the glide path reduces dependence on any single asset class for returns.
Segregated Portfolio	<p>In such an eventuality it will be AMC's endeavour to realise the segregated holding in the best interest of the investor at the earliest.</p>
Equity Derivative risk:	<p>Equity derivative positions will be undertaken only on recognised stock exchanges in India within the exposure limits prescribed under the SEBI Master Circular for Mutual Funds. Open positions will be monitored against the underlying equity portfolio on a regular basis to manage directional risk and ensure compliance with applicable regulatory limits.</p>
Debt Derivative Risk	<p>Debt derivative instruments such as Interest Rate Swaps and Forward Rate Agreements will be used within the limits prescribed under the SEBI Master Circular for Mutual Funds. Counterparty risk will be managed by transacting only with eligible entities in accordance with applicable regulatory guidelines. All OTC debt derivative positions will be valued daily in accordance with prescribed valuation norms.</p>
Covered Call Strategy Risk	<p>Call options will be written only on constituent stocks of NIFTY 50 and BSE SENSEX that are held in the Scheme's portfolio and are not hedged through any other derivative instrument and within the limits prescribed under SEBI Regulations. All written call options are marked to market daily and gains or losses are factored into the daily NAV. The strategy will be deployed at the discretion of the Fund Manager based on prevailing market conditions.</p>

Securities Lending:	All securities lending and borrowing transactions are carried out through the SLB platform of the recognized stock exchanges. The Scheme adheres to the limits prescribed by SEBI for securities lending.
Equity Arbitrage:	<p>All arbitrage positions will be fully hedged; no unhedged directional equity risk carried under this strategy.</p> <ul style="list-style-type: none"> • Both legs of each arbitrage position executed simultaneously or near-simultaneously to minimise execution risk. • Total equity including arbitrage exposure maintained within overall equity allocation limits prescribed under the glide path and the regulations at all times. • Regulatory developments affecting equity derivatives and securities lending markets monitored on an ongoing basis to assess impact on arbitrage strategy viability.
Processing of transactions through Stock Exchange Mechanism:	The AMC has established appropriate internal controls, monitoring mechanisms, and reconciliation processes to manage risks associated with transactions processed through the Stock Exchange mechanism.

The Scheme's portfolio consists of equity and equity related instruments, debt and money market instruments, Infrastructure Investment Trusts (InvITs), Exchange Traded Commodity Derivatives (ETCDs) based on Gold and Silver , Gold/Silver ETFs, invested in accordance with a pre-defined glide path with a target maturity date. The Scheme will endeavour to maintain a diversified portfolio across asset classes and within each asset class, in accordance with the prescribed glide path ranges, to mitigate concentration risk and reduce the impact of adverse movements in any single asset class on overall portfolio returns.

The AMC has the necessary framework in place for risk mitigation at both enterprise level and scheme level, in accordance with the Risk Management Framework prescribed by SEBI. The Risk Management division of the AMC functions as an independent division within the organisation. Internal risk thresholds are defined across parameters including credit quality, concentration, liquidity, duration and glide path compliance, and are monitored on a regular basis. Risk indicators on various parameters are computed and reviewed periodically. The Risk Management Committee of the Board provides dedicated oversight of risk factors and the relevant risk mitigants from time to time.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

II. Information about the Scheme

A. Where will the Scheme Invest

The Scheme will invest directly across multiple asset classes in accordance with the investment objective and the pre-defined glide path as defined under the asset allocation table. The asset

allocation of the Scheme will shift progressively over time in accordance with the glide path, reducing equity exposure and increasing exposure to other conservative asset classes as the target maturity date approaches.

The corpus of the Scheme shall be invested in accordance with the investment objective in any (but not exclusively) the following securities, subject to the SEBI (Mutual Funds) Regulations, 2026 and applicable guidelines issued by SEBI from time to time:

Equity and Equity Related Instruments

- Equity shares listed on recognised stock exchanges in India
- Equity derivatives including futures and options on stocks and indices, for the purposes of hedging, portfolio rebalancing and efficient portfolio management
- Units of Real Estate Investment Trusts (REITs) listed on recognised stock exchanges in India
- Any other equity and equity related instruments as permitted by SEBI from time to time

Pending deployment of funds in accordance with the investment objective and glide path, the AMC may invest the funds of the Scheme in short-term deposits of scheduled commercial banks in accordance with applicable SEBI guidelines.

Any other instruments or securities as may be permitted by SEBI from time to time

B. What are the investment restrictions?

Pursuant to Regulations, specifically the Seventh schedule and amendments thereto, the following investment restrictions are currently applicable to the Scheme:

1. The Mutual Fund shall buy and sell securities on the basis of deliveries and shall in all cases of purchases, take delivery of relevant securities and in all cases of sale, deliver the securities.
2. The mutual fund shall get the securities purchased or transferred in the name of the mutual fund on account of the Scheme, wherever investments are intended to be of long-term nature.
3. Save as otherwise expressly provided under SEBI (MF) Regulations, the Mutual Fund shall not advance any loans for any purpose.
4. As per SEBI (MF) Regulations, the mutual fund under all its Scheme(s) will not own more than 10% of any company's paid-up capital carrying voting rights or ten per cent of units of REITs issued by a single issuer, as the case may be.

Provided that the Sponsor of the Fund, its associate or group company including the asset management company of the Fund, through the Scheme(s) of the Fund or otherwise, individually or collectively, directly or indirectly, shall not have 10% or more of the shareholding or voting rights in the asset management company or the trustee company of any other mutual fund.

Provided further that in the event of a merger, acquisition, scheme of arrangement or any other arrangement involving the sponsors of the mutual funds, shareholders of the asset management companies or trustee companies, their associates or group companies which results in the incidental acquisition of shares, voting rights or representation on the board of the asset management companies or trustee companies beyond the above specified limit, such exposure may be rebalanced within a period of one year of coming into force of such an arrangement.

5. The Scheme shall only invest in equity shares or equity related instruments which are listed or to be listed.
6. The Scheme shall not make any investment in:
 - H. Any unlisted security of an associate or group company of the Sponsor; or
 - I. Any security issued by way of private placement by an associate or group company of the Sponsor; or
 - J. The listed securities of group companies of the Sponsor, which is in excess of 25% of the net assets of the Scheme of the Fund.
 - K. any Fund of funds Scheme.
7. The cumulative gross exposure through all permissible investments viz. equity, debt and money market positions should not exceed 100% of the net assets of the Scheme.
8. The Scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities and other money market instruments.
 - A. Provided that the Scheme may invest in unlisted non-convertible debentures up to a maximum of 10% of the debt portfolio of the Scheme subject to such conditions as may be specified by SEBI from time to time.
 - B. Provided further that the Scheme shall comply with the norms under the above clauses within the time and in the manner as may be specified by SEBI.
 - C. Provided further that the norms for investments by the Scheme in unrated debt instruments shall be as specified by SEBI from time to time.
9. Further, the Scheme shall comply with provisions of SEBI Circular No. SEBI/HO/IMD/DF2/ CIR/P/ 2019/104 dated October 1, 2019 regarding investment in Debt and Money Market Instruments, as amended from time to time, to the extent applicable to the Scheme.
10. The Scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorised to carry out such activity under the SEBI Act. Such investment limit may be extended to 12% of the NAV of the Scheme with the prior approval of the Boards of the Trustee Company and the AMC;

Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and tri-party repos.

Provided further that investment within such limit can be made in mortgaged backed securitised debt which are rated not below investment grade by a credit rating agency registered with the Board. Considering the nature of the Scheme, investments in such instruments will be permitted up to 5% of its NAV.

11. The Scheme shall invest in Debt instruments having Structured Obligations/ Credit Enhancements in accordance with provisions of SEBI Circular No. SEBI/HO/ IMD/DF2/CIR/P/ 2019/104 dated October 1, 2019 as may be amended by SEBI from time to time. The same are currently as under:

The investment of the Scheme in the following instruments shall not exceed 10% of the debt portfolio of the Scheme and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the Scheme:

- Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade; and
- Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade.

For this purpose, a group means a group as defined under regulation 2 (x) of the Regulations and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

However, the above Investment limits shall not be applicable on investments in securitized debt instruments, as defined in SEBI (Public Offer and Listing of Securitized Debt Instruments) Regulations 2008.

Investment in debt instruments, having credit enhancements backed by equity shares directly or indirectly, shall have a minimum cover of 4 times considering the market value of such shares.

12. Transfer of investments from one Scheme to another Scheme in the same mutual fund, shall be allowed only if:

- a) such transfers are made at the prevailing market price for quoted Securities on spot basis.

Explanation: spot basis shall have the same meaning as specified by Stock exchange for spot transactions.

Provided that inter scheme transfer of money market or debt security (irrespective of maturity) shall take place based on prices made available by valuation agencies as prescribed by SEBI from time to time.

- b) the securities so transferred shall be in conformity with the investment objective of the Scheme to which such transfer has been made.

- c) inter Scheme Transfers are affected in accordance with the guidelines specified by para 13.19 of the SEBI Master Circular for Mutual Funds, dated March 20, 2026 as amended from time to time.

13. The Scheme may invest in other scheme(s) under the same AMC or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all Schemes under the same AMC or in Schemes under the management of any other asset management shall not exceed 5% of the net asset value of the Mutual Fund. Further, the Scheme shall not invest in any fund of funds scheme.
14. Pending deployment of funds of the Scheme in securities in terms of the investment objectives of the Scheme, the Fund may invest the funds of the Scheme in short term deposits of scheduled commercial banks subject to the following guidelines as specified by SEBI:
- B. "Short Term" for parking of funds shall be treated as a period not exceeding 91 days.
 - C. Short Term deposits shall be held in the name of the Scheme.
 - D. Total investment of the Scheme in short term deposit(s) of all the Scheduled Commercial Banks put together shall not exceed 15% of the net assets. However, this limit can be raised up to 20% of the net assets with prior approval of the Board of Trustees.
 - E. Investments in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
 - F. The Scheme shall not invest more than 10% of the net assets in short term deposit(s) of any one scheduled commercial bank including its subsidiaries.
 - G. The Scheme shall not invest in short term deposits of a bank which has invested in the Scheme. Trustees/ AMC shall also take steps to ensure that a bank in which the Scheme has short term deposit does not invest in the Scheme until the Scheme has short term deposit with such bank.
 - H. No investment management and advisory fees will be charged for such investments in the Scheme.
 - I. The aforesaid limits shall not be applicable to term deposits placed as margin for trading in the cash market.
 - J. However, the period for 'pending deployment' as stated above for the Scheme shall not exceed 7 days.
15. No mutual fund scheme shall invest more than 10 per cent of its NAV in the equity shares or equity related instruments of any entity, Provided that, the limit of 10 per cent shall not be applicable for investments in index fund or exchange traded fund or sector or industry specific scheme.
16. A mutual fund may invest in the units of InvITs subject to the following:
- (a) No mutual fund under all its schemes shall own more than 10% of units issued by a single issuer of InvIT; and
 - (b) A mutual fund scheme shall not invest –
 - i. more than 10% of its NAV in the units of InvIT; and
 - ii. more than 5% of its NAV in the units of InvIT issued by a single issuer.
- Provided that the limits mentioned in sub-clauses (i) and (ii) above shall not be applicable for investments in case of index fund or sector or industry specific scheme pertaining to REIT and InvIT.

17. A mutual fund scheme may invest in exchange traded commodity derivatives subject to such investment restrictions as may be specified by the Board from time to time.

The AMC may alter these above stated restrictions from time to time to the extent the SEBI (MF) Regulations change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its respective investment objective. The Trustee may from time to time alter these restrictions in conformity with the SEBI (MF) Regulations. Further, apart from the investment restrictions prescribed under SEBI (MF) Regulations, the Fund may follow any internal norms vis-à-vis restricting / limiting exposure to a particular scrip or sector, etc.

In terms of para 1.7 of the SEBI Master Circular for Mutual Funds, dated March 20, 2026, NFO proceeds may be deployed in TREPS before the closure of NFO period. However, no investment management and advisory fees will be charged on funds deployed in TREPSs during the NFO period. Further, the appreciation received from investment in TREPS shall be passed on to the investors. In case the minimum subscription amount is not garnered by the scheme during the NFO period, the interest earned on investment of NFO proceeds in TREPS shall be returned to investors, in proportion of their investments, alongwith the refund of the subscription amount. Since CBLO has been replaced with TREPS by Repurchase Transactions (Repo) (Reserve Bank) Directions, 2018 issued by the Reserve Bank of India (RBI) vide notification No. RBI/ 2018-19/24-FMRD. DIRD.01/14.03.038/2018-19 dated July 24, 2018, NFO proceeds may be deployed in TREPS before the closure of NFO period.
