B. WHERE WILL THE SCHEME INVEST

The Scheme will invest in securities which are constituents of CRISIL IBX SDL Index – June 2034, Government Securities, Money Market instruments, including Triparty Repo and units of liquid mutual fund.

Money market instrument's includes commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, and any other like instruments as specified by the Reserve Bank of India from time to time

A brief narration of Money Market Instruments is as under:

1. Certificate of Deposits (CDs) is a negotiable money market instrument issued by scheduled commercial banks and select all- India Financial Institutions that have been permitted by the RBI to raise short term resources.
2. Commercial Paper (CPs) is an unsecured negotiable money market instrument issued in the form of a promissory note, generally issued by the corporates, primary dealers and all India Financial Institutions as an alternative source of short term borrowings. They are issued at a discount to the face value as may be determined by the issuer. CP is traded in secondary market and can be freely bought and sold before maturity.
3. Treasury Bills (T-Bills) are issued by the Government of India to meet their short term borrowing requirements. T-Bills are issued for maturities of 91 days, and 364 days. T-bills are issued at a discount to their face value and redeemed at par.
4. Triparty Repo
5. Securities created and issued by the Central Governments as may be permitted by RBI, securities guaranteed by the Central Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills). Central Government Securities are sovereign debt obligations of the Government of India with zero-risk of default and issued on its behalf by RBI. They form part of Government's annual borrowing programme and are used to fund the fiscal deficit along with other short term and long term requirements. Such securities could be fixed rate, fixed interest rate with put/call option, zero coupon bond, floating rate bonds, capital indexed bonds, Fixed Interest security with staggered maturity payment etc.

The Fund Manager reserves the right to invest in such instruments and securities as may be permitted from time to time and which are in line with the investment objective of the scheme, subject to regulatory approvals if any'.

C. WHAT ARE THE INVESTMENT STRATEGIES:

The Scheme will track the CRISIL – IBX SDL Index – June 2034 Index Fund and will use a “passive” or indexing approach to endeavour to achieve scheme's investment objective. Unlike other funds, the scheme will not try to “beat” the market it tracks and do not seek temporary defensive positions when market decline or appear overvalued. The AMC does not make any judgments about the investment merit of a particular security nor will it attempt to apply any economic, financial or market analysis. Indexing eliminates active management risks with regard to over/underperformance vis-à-vis a benchmark.

Since the scheme is an index fund, the scheme will only invest in the securities constituting the underlying index. However, under certain circumstances the scheme may temporarily hold securities which are not part of the index. For example, including but not limited to the below situations:

1. post allotment of the scheme until full deployment is achieved,
2. the portfolio may hold securities not included in the respective underlying index as result of certain changes in the underlying index such as reconstitution, addition, deletion etc.

The fund manager's endeavor would be to rebalance the portfolio in order to mirror the index; however, there may be a short period where the constituents of the portfolio may differ from that of the underlying index.

The Scheme may also invest a portion of its portfolio in government securities with residual maturity of upto 1 year, money market instruments including triparty repo and units of liquid mutual fund to manage the liquidity requirement. The scheme will use a “passive” or indexing approach to achieve scheme’s investment objective.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE

The First Tier benchmark of the Scheme is **CRISIL – IBX SDL Index – June 2034 Index Fund**. The same has been chosen as this Scheme primarily invests in securities which are constituents of **CRISIL – IBX SDL Index – June 2034 Index Fund**. Thus, the composition of the aforesaid benchmark is such that it is most suited for comparing performance of the Scheme.

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

The first NAV will be calculated and announced not later than 5 business days from the date of allotment in the NFO. Subsequently, the NAV of the Scheme shall be computed and declared on each business day. The NAV under the Scheme would be rounded off to 4 decimals and Units will be allotted upto three decimal places as follows or such other formula as may be prescribed by SEBI from time to time:

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provision}}{\text{Number of Units outstanding under Scheme on the Valuation Date}}$$

NAV will be disclosed in the manner as specified prescribed under SEBI (Mutual Funds) Regulations, 2026 and in Chapter 9 of SEBI Master Circular for Mutual Funds dated March 20, 2026. NAV can also be viewed on www.sbimf.com and www.amfiindia.com.

The AMC shall update the NAVs on the website of Association of Mutual Funds in India - AMFI (www.amfiindia.com) by 11.00 p.m. on each business day. In case of any delay, the reasons for such delay would be explained in writing to AMFI and reported to SEBI in quarterly CTR. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons for the delay and explaining when the Fund would be able to publish the NAVs.

Further, as per SEBI (MF) Regulations, 2026, the repurchase price shall not be lower than 97% of the NAV.

Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

Let's assume that the NAV of a Mutual Fund Scheme on April 01, 2018 is Rs. 10/-.

Purchase of mutual fund units:

The Purchase Price of the Units on an ongoing basis will be same as Applicable NAV.

Purchase Price = Applicable NAV

In the above example, purchase is done on April 01, 2018, when the Applicable NAV = Rs. 10/-
Therefore, Purchase Price = Rs. 10/-

As per existing Regulations, no entry load is charged with respect to applications for purchase / additional purchase of mutual funds units.

Redemption/Re-purchase of mutual fund units

The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any. In case of redemption, the amount payable to the investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load, if any)

Say, in the above example the exit load applicable is:

- a. For exit on or before 12 months from the date of allotment – 1.00%
- b. For exit after 12 months from the date of allotment – Nil.

Scenario 1: Redemption is done during applicability of exit load

In case the investor requests for redemption on or before 12 months i.e. on or before March 31, 2019; say December 1, 2018, when the NAV of the scheme is Rs. 12/- and the exit load applicable is 1%, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)
= Rs. 12 * (1-1%) = Rs. 11.88/-

Scenario 2: Redemption is done when the exit load is NIL

In case the investor requests for redemption after 12 months i.e. after March 31, 2019; say April 1, 2019, when the NAV of the scheme is Rs. 12/- and the exit load applicable is NIL, so the Redemption amount payable to investor shall be calculated as follows:

Redemption Price = Applicable NAV * (1 - Exit Load)
= Rs. 12 * (1-0) = Rs. 12/-

The aforesaid example does not take into consideration any applicable statutory levies or taxes. Accordingly, the redemption amount payable to investor shall further reduce to the extent of applicable statutory levies or taxes.

Note: The aforesaid disclosure has been made pursuant to Clause 9.1 of SEBI Master Circular for Mutual Funds dated March 20, 2026.

Illustration on Computation of NAV:

If the net assets of the Scheme are Rs. 10,55,40,345.34 and units outstanding are 1,00,00,000 then the NAV per unit will be computed as follows: $10,55,40,345.34 / 1,00,00,000 = \text{Rs. } 10.5540 \text{ p.u.}$ (rounded off to four decimals)

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc. The entire New Fund Offer expenses for the launch the Scheme will be borne by the AMC.

C. ANNUAL SCHEME RECURRING EXPENSES

All expenses of the scheme shall be clearly identified and paid from the scheme. The expenses charged to the scheme shall be subject to the Base Expense Limits, Brokerage Limits, Transaction Cost and Statutory Levies permissible under the SEBI (Mutual Funds) Regulations, 2026 and SEBI Master Circular for Mutual Funds as amended from time to time. Any expenditure in excess of the base limits specified in the Regulations shall be borne by the asset management company or the trustees or sponsors. Further, all the expenditures pertaining to launch of new fund offer till the date of allotment of mutual fund units to investors shall be borne by the asset management company or trustees or sponsor.

Total Expense Ratio (TER), representing the total of all expenses charged to the scheme as specified under Regulation 67(1), shall be computed as follow:

$TER = (A) \text{ Base Expense Ratio (BER)} + (B) \text{ Brokerage Cost} + (C) \text{ Transaction Cost incurred for the purpose of execution of trade} + (D) \text{ Statutory levies (including GST)}$

(A) Base Expense Ratio (BSR) [Regulation 66(4), (5), (6) and (7) of SEBI MF Regulations, 2026]:

The AMC has estimated that upto 0.90% of the daily net assets of the scheme shall be charged to the scheme as expenses. For the actual current expenses being charged, the investor shall refer to the website of the mutual fund.

The Base Expenses are the recurring expenses for operating the scheme including the Investment and Advisory Fee charged by the Asset Management Company (AMC), Registrar and Transfer Agents' fees, Marketing and Selling costs etc., but excluding Statutory Levy applicable, if any, on the said expenses and Transaction Cost.

The Base Expenses that may be charged to the scheme under various heads specified in Regulations 66(4), 66(5) and 66(6) of SEBI MF Regulations, 2026 are illustrated in the table below:

The aforesaid expenses are fungible within the overall maximum limit prescribed under SEBI (Mutual Funds) Regulations. This means that mutual fund can charge expenses within overall limits, without any internal cap on the aforesaid expenses head.

(B) Brokerage Cost [Regulation 66(9)]:

A scheme may charge expense incurred towards brokerage, for the purpose of execution of trade, over and above the base expense ratio subject to a maximum of 0.06 percent of trade value in case of cash market transactions and 0.02 per cent of trade value in case of derivatives transactions. Expense charged towards brokerage, over and above the specified limit, shall be part of the base expense ratio limit specified above.

(C) Transaction Cost [Regulation 66(10)]:

In terms of paragraph 11.6 of SEBI Master Circular for Mutual Funds dated March 20, 2026, mutual fund distributors shall be eligible for an additional commission for onboarding

- (ii) new women individual investors (new PAN) from both Top 30 and B-30 cities.
- (iii) The top 30 cities shall mean top 30 cities based on AMFI data on 'AUM by Geography – Consolidated Data for Mutual Fund Industry' as at the end of the previous financial year.

The structure of such additional commission shall be as under:

Investment mode	Commission
Lump Sum Investment	1% of the amount of the first application subject to a maximum of ₹2,000, provided the investor remains invested for a minimum period of one year
Systematic Investment Plan (SIP)	1% of the total investment made during the first year, subject to a maximum of ₹2,000.

This additional commission will be paid over and above the existing trail commissions and will be funded from the Investor Education Fund, subject to adequate claw back provisions.

2. Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc., vis-à-vis the Regular Plan and no commission shall be paid from Direct Plan. Both the plans i.e. Direct & Regular shall have common portfolio. However, Regular Plan and Direct Plan shall have different NAVs.
3. The Mutual Fund would disclose daily Total Expense Ratio (TER) of scheme on the mutual fund website and on the website of AMFI in a format prescribed by the SEBI. Any change in the BER in comparison to previous BER charged to the scheme/plan will be communicated to investors and the notice of such change in BER will be updated on the website, at least three working days prior to effecting such change, in the manner specified by SEBI from time to time. Investors can refer <https://www.sbimf.com/en-us/disclosure/total-expense-ratio-of-mutual-fund-schemes> for Total Expense Ratio (TER) details.
4. All scheme-related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the scheme only within the regulatory limits and not from the books of the AMC, its associate, sponsor, trustee or any other entity through any route. However, certain expenses that are very small in value but high in volume may be paid out of AMC's books. Such expenses can be paid out of AMC's books at actuals or not exceeding 2 BPS of respective scheme AUM, whichever is lower. A list of such miscellaneous expenses has been provided by AMFI in consultation with the Board.

Illustration of impact of expense ratio on schemes returns:

Particulars	Regular Plan	Direct plan
Opening NAV (INR Rs) -> (a)	100	100
Scheme's Gross return for the year -> (b)	10%	10%
Closing NAV before charging expenses -> (c)	110	110
Total Expense charged in (INR Rs) -> (d)	1.0	0.75
NAV after charging expenses -> (e) = (c) - (d)	109.0	109.25
Net Return to the investor	9.00%	9.25%

1. The above computation assumes no investment/ redemption made during the year. The investment is made in the Growth option of the scheme.
2. The above computation is simply to illustrate the impact of expenses of the scheme. The actual expenses charged to the scheme will not be more than the amount that can be charged to the scheme as mentioned in this SID.
3. It is assumed that expenses charged are evenly distributed throughout the year. Tax impact on customers has not been considered due to the individual nature of this impact.
4. Calculations shown in the above table are for illustrative and understanding purposes only and actual returns may differ from those considered above

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.sbimf.com) or may call at (toll free no. 1800 209 3333/1800 425 5425.) or your distributor.

Nature of expense	Charge (% of NAV)
Entry Load	Not Applicable,
Exit Load	Nil The AMC reserves the right to modify / change the load structure on a prospective basis.

Please note that no Exit Load shall be levied for switching between Plans within the said Scheme.

The investor is requested to check the prevailing load structure of the scheme before investing.

Any imposition or enhancement in the load shall be applicable on prospective investments only. At the time of changing the load structure, the mutual fund may consider the following measures to avoid complaints from investors about investment in the schemes without knowing the loads:

- i. The AMC shall be required to issue an addendum and display the same on its website immediately.
- ii. The addendum shall be circulated to all the distributors/brokers/Investor Service Centre (ISC) so that the same can be attached to all KIM and SID already in stock till it is updated.
- iii. Latest applicable addendum shall be a part of KIM and SID. (E.g. in case of changes in load structure the addendum carrying the latest applicable load structure shall be attached to all KIM and SID already in stock till it is updated).
- iv. Further, the account statements shall continue to include applicable load structure.

In accordance with SEBI (MF) Regulations, 2026, the repurchase price will not be lower than 97% of the NAV

SECTION II

I. Introduction

A. Definitions/interpretation

Please refer the definitions/interpretation as disclosed on our website under: <https://www.sbimf.com/offer-document-sid-kim>

B. Risk factors

Scheme specific risk factors

A. Risks associated with investment in units of mutual fund:

Investment in Mutual Fund Units involves investment risks, including but not limited to risks such as liquidity risk, volatility risk, default risk including the possible loss of principal. The Mutual Fund is not assuring any Income Distribution cum capital withdrawal (IDCW) nor is it assuring that it will make any IDCW distributions. All IDCW distributions are subject to the availability of distributable surplus and would depend on the performance of the scheme. Scheme-specific risk factors are summarized below:

- **Liquidity risk** – The liquidity of the scheme’s investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme’s investment portfolio, these periods may become significant. In view of the same, the right to limit redemptions (including suspending redemptions) under certain circumstances will be in accordance with Clause 5.3 of SEBI Master Circular for Mutual Funds dated March 20, 2026.
- **Volatility risks:** There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification across companies and sectors within PSUs.
- **Default risk** - Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

B. Risks associated with investment in TREPs:

1. **Interest rate risk:** This risk arises from uncertainty in the rate at which cash flows from the securities may be reinvested. While the rate of interest for TREPs remains closely correlated to the repo rate, it also may vary based on inter-bank lending demand & supply. Hence, there remains a risk of rate at which TREPs will get re-invested.
2. **Settlement risk:** Since the settlement for TREPs happens through CCIL, the risk of default from counterparty is limited. However, in case a clearing member fails to honour their settlement obligations, the “Default Waterfall” mechanism is used to make complete the settlement process. As per the waterfall mechanism, 1st step. the defaulter’s margins and the defaulter’s contribution to the default fund have been appropriated; 2nd step: CCIL’s contribution is used to meet the losses; 3rd step: Post utilization of CCIL’s contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Hence, the scheme is subject to the risk of loss to the extent of initial margin and default fund contribution being invoked in the event of failure of any settlement obligations.

C. Debt & money market instruments under the scheme may be subject to the following risks:

1. **Credit risk:** Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuers' ability to meet the obligations.
2. **Liquidity Risk** pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
3. **Interest Rate risk** is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The value of investments will appreciate/depreciate if the interest rates fall/rise. However, if the investments are held on till maturity of the investments, the value of the investments will not be subjected to this risk.
4. **Reinvestment risk:** This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
5. **Performance Risk:** Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
6. **Prepayment Risk:** The Scheme may receive payment of monthly cashflows earlier than scheduled, which may result in reinvestment risk.
7. **Market Risk:** Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities.
8. The Net Asset Value (NAV) of the Scheme, to the extent invested in Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

D. Risks associated with investing in State Development Loans (SDL)

Market Liquidity risk with fixed rate SDL, even though the SDL market is relatively liquid when compared to other corporate bond instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by state governments undergo any adverse changes. Interest Rate risk associated with SDL - while SDL generally carry relatively minimal credit risk since they are issued by the respective State Governments, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is, however, not unique to SDL, it exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.

E. Risks associated with investing in Government of India Securities:

Market Liquidity risk with fixed rate Government of India Securities even though the Government of India Securities market is more liquid compared to other debt instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by Reserve Bank of India undergo any adverse changes.

Interest Rate risk associated with Government of India Securities - while Government of India Securities generally carry relatively minimal credit risk since they are issued by the Government of India, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is not unique to Government of India Securities. It exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.

F. Tracking Difference Risk:

The Fund Manager may not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the scheme, corporate actions, cash balance, changes to the underlying index and regulatory policies which may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index.

Tracking Difference is the Annualized difference of daily returns between the index or goods and the NAV of the ETF/ Index Fund.

Tracking Difference shall be disclosed by all ETFs/ Index Funds on the website of the AMC and AMFI, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units

Tracking Difference shall be disclosed only if the scheme has completed 1 year period. Tracking difference is to be disclosed on a monthly basis on www.sbimf.com and AMFI website.

G. Tracking Error Risk:

The Fund Manager may not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance, changes to the underlying index and regulatory policies which may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index. Tracking error of the scheme is calculated using standard deviation of difference of daily returns between the scheme and the underlying index annualized over 1 Year Period.

H. Passive Investments

As the scheme proposes to invest not less than 95% of the net assets in the securities of the underlying Index, the scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select securities or to take defensive positions in declining markets.

I. Concentration Risk

The scheme will predominantly invest in SDLs and may have limited or no diversification to any other types of fixed income securities within its portfolio. This could have implications on the performance of the scheme. The scheme may be more sensitive to economic, business, political or other changes that may directly impact the SDL spreads etc. and this may lead to sizeable fluctuation in the Net Asset Value of the scheme.

J. Risks associated with segregated portfolio

Different types of securities in which the scheme would invest carry different levels and types of risk as given in the Scheme Information Document of the scheme. In addition to the same, unitholders are requested to also note the following risks with respect to Segregated Portfolio: Investor holding units of segregated portfolio may not be able to liquidate their holding till the time there is recovery of money from the issuer. Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity, as there may not be active trading of units in the stock market. Further trading price of units on the stock market may be at a significant discount compared to the prevailing NAV. Securities which are part of the segregated portfolio may or may not recover any money, either fully or partially.

K. Right to Limit Redemptions

The Trustee, in the general interest of the unit holders of the underlying scheme and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of units which can be redeemed on any business day depending on the total "Saleable Underlying Stock" available with the fund. For details, refer Section on 'Right to limit Redemption'

L. Asset Class Risk

The returns from the types of securities in which the scheme invest may underperform returns of general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison of securities markets.

M. Risks associated with Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in which case the securities might go in for auction. In the event of exceptional circumstances resulting in non-availability of securities in auction, such transactions would be financially closed-out at appropriate rates as per exchange regulations. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned.

C. Risk mitigation strategies:

The scheme aims to track the CRISIL IBX SDL Index – June 2034 Index before expenses. The index is tracked on a regular basis and changes to the constituent, if any, are replicated in the portfolio with the purpose of minimizing tracking error.

Investments in debt, Money market instruments carry various risks such as inability to sell securities, interest rate risk, liquidity risk, default risk, reinvestment risk etc.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For risk control, the following may be noted:

Liquidity risks:

Securities in the underlying index are selected by applying liquidity as one of the criteria and hence the portfolio of CRISIL IBX SDL Index – June 2034 Index is reasonably liquid. Liquidity issues in the scheme are not envisaged.

Interest Rate Risk:

Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk.

Volatility risks:

This being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus, there is no additional element of volatility or stock concentration on account of fund manager decisions. The fund manager would endeavor to keep cash levels at the minimal to control tracking error.

They are issued at a discount to the face value as may be determined by the issuer. CP is traded in secondary market and can be freely bought and sold before maturity.

They form part of Government's annual borrowing programme and are used to fund the fiscal deficit along with other short term and long term requirements. DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Portfolio Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks), Treasury Bills (issued by RBI) and the Triparty Repo.

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and TREPS are guaranteed and done by a central counterparty, the Clearing corporation of India (CCIL). Money market deals involving CD's and CP's are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE (ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments as on June 19, 2026:

Instruments	Indicative yield range
Overnight rates	5.15-5.20
90 day Commercial Paper	6.60-6.65
91-day T-bill	5.20-5.25
1 year G-Sec	5.75-5.80
5 year G – Sec	6.45-6.50
10 year G-Sec	6.80-6.85
1 year AAA Bond	7.40-7.45
5 year AAA Bond	7.40-7.45

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows

into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally, when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP's and CD's which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments

D. Index methodology (for index funds, ETFs and FOFs having one underlying domestic ETF)-

ABOUT THE INDEX:

Index objective: Seeks to track the performance of liquid SDL issuers with total outstanding greater than Rs. 5,000 crores.

Index Features:

State issuers with a minimum outstanding of Rs. 5,000 crores, having the security with highest liquidity.

Securities Selection Methodology

Issuer Selection:

1. All states with issuances maturing in the eligible period will be shortlisted.
2. 10 most liquid issuers based on liquidity score as evaluated during the index inception date with minimum total outstanding of Rs. 5,000 crores will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected.
3. Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

1. For each issuer selected, most liquid security based on liquidity score in the previous quarter as evaluated during the index inception date will be selected. Securities maturing in eligible period before the target date, with minimum amount outstanding of Rs. 1,000 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
2. UDAY bonds will be excluded.

Weighing Approach:

1. Weights to the issuers will be divided equally as on the base date of the index. The weights may vary on account of relative price movements.
2. Weights will be reset during every rebalancing.

Rebalancing and Downgrade:

1. The index constituents will be reviewed on a semi-annual basis.
2. If any issuer becomes eligible, it will be added during the rebalancing, and the weights will be reset.
3. If the total number of SDL issuers falls below 10, when issuers are excluded due to any reason, new issuers will be added as per the criteria stated above.
4. Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
5. As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to the following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.

- In case due to any reason it is not possible to reinvest as per the above criteria, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
- If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

The effective date of the above rebalancing shall be first working day of the month or the quarter.

Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on a unplanned market off, will mature on the next working day.

Index Termination

The index shall mature on June 30, 2034

- **Flex Systematic Transfer Plan in all the open-ended schemes of SBI Mutual Fund offering Systematic Transfer Plan (STP) facility:**

Flex Systematic Transfer Plan is a facility wherein an investor under a designated open-ended Scheme can opt to transfer variable amounts linked to the value of his investments on the date of transfer at pre-determined intervals from designated open-ended scheme (source scheme) to the Growth option of another open-ended scheme (target scheme).

Terms and conditions of Flex STP are as follows:

- The amount to be transferred under Flex STP from source scheme to target scheme shall be calculated using the below formula:
Flex STP amount = [(fixed amount to be transferred per installment x number of installments already executed, including the current installment) - market value of the investments through Flex STP in the Transferee Scheme on the date of transfer]
- The first Flex STP installment will be processed for the fixed installment amount specified by the investor at the time of enrolment. From the second Flex STP installment onwards, the transfer amount shall be computed as per formula stated above.
- Flex STP would be available for Weekly, Monthly and Quarterly frequencies.
- Weekly Flex STP can be done on 1st / 8th / 15th / 22nd of every month.
- Flex STP is available from “Daily / Weekly” IDCW plans of the source schemes.
- Flex STP is available only in “Growth” option of the target scheme.
- If there is any other financial transaction (purchase, redemption or switch) processed in the target scheme during the tenure of Flex STP, the Flex STP will be processed as normal STP for the rest of the installments for a fixed amount.
- A single Flex STP Enrolment Form can be filled for transfer into one Scheme/Plan/Option only.
- In case the date of transfer falls on a Non-Business Day, then the immediate following Business Day will be considered for the purpose of determining the applicability of NAV.

- The complete application form for enrolment / termination for Flex STP should be submitted, at least 10 days prior to the desired commencement/ termination date.
- All other terms & conditions of Systematic Transfer Plan are also applicable to Flex STP.

Swing STP

Swing STP is a facility wherein investor can opt to transfer an amount at regular intervals from source scheme of SBI Mutual Fund (SBIMF) to a target scheme of SBIMF including a feature of reverse transfer from target scheme into the source scheme, in order to achieve the targeted market value on each transfer date in the target scheme. This ensures that the market value on each date of the transfer rises by a specified amount at every frequency irrespective of the market price. For example if investor decides that the value of their investment in the target scheme should appreciate by Rs. 1000 per month, then each month investor will invest only to the extent of the shortfall. If appreciation in the target scheme is higher than the target value then this excess value is reverse transferred to the source scheme. Thus the amount to be transferred will be arrived at on the basis of the difference between the target market value and the actual market value of the holdings in the target scheme on the date of transfer.

Terms & conditions of Swing STP are as follows:

- Source scheme: All open ended schemes (Excluding SBI Long Term Equity Fund and ETF schemes) of SBI Mutual Fund.
- Target scheme: Growth option in all open ended schemes (Excluding SBI Long Term Equity Fund and ETF schemes) of SBI Mutual Fund.
- Frequency: Weekly, Monthly and Quarterly intervals. In case the Frequency is not indicated, Monthly frequency shall be treated as the Default Frequency.
- Dates: The dates of transfers/ default dates shall be as under:

Frequency	Dates of Transfers	Default Date
Weekly Interval	1 st , 8 th , 15 th & 22 nd of every month	-
Monthly Interval	1 st , 5 th , 10 th , 15 th , 20 th , 25 th & 30 th In case of February last working day)	10th of every month
Quarterly Interval	1 st , 5 th , 10 th , 15 th , 20 th , 25 th & 30 th (In case of February last working day) The beginning of the quarter could be any month e.g. January, May, November, etc.	10th of every quarter

In case the date of transfer falls on a non-Business Day, the immediate next Business day will be considered for the purpose of determining the applicability of NAV and processing the transaction.

- The minimum amount for the first installment shall be as follows:

- Weekly & Monthly frequency: Rs. 1,000 and in multiples of Re. 1
- Quarterly frequency: Rs. 3,000 and in multiples of Re. 1
- Minimum number of installments
- Weekly & Monthly frequency: 12
- Quarterly frequency: 4
- If there is any other financial transaction (purchase / redemption / switch / SIP / DTP etc.) processed in the target scheme/plan/option during the tenure of Swing STP, the Swing STP will be processed as normal STP for the rest of the installments for the fixed amount.
- Amount of transfer: The first Swing STP installment will be processed for the installment amount specified by the investor at the time of enrollment. From the second Swing STP installment onwards, the transfer amount will be derived by the following formula:

(First installment amount X Number of installments including the current installment) – Market Value of the investments through Swing STP in the target scheme/plan/option on the date of transfer.

In case on the STP date, the amount (as specified above) to be transferred is not available in the source scheme/plan/option in the investor's folio, the residual amount will be transferred to the target scheme/plan/option and Swing STP will be closed. Investors have an option to consider earlier investments in the target scheme for calculating Swing STP amount.

- Reverse Transfer: On the date of transfer, if the market value of the investments in the target scheme/plan/option through Swing STP is higher than the target market value (first installment amount X number of installments including the current installment), then a reverse transfer will be effected from the target scheme/plan/option to the source scheme/plan/option to the extent of the difference in the amount, in order to arrive at the target market value.
- **Top-up option:** Investor can choose Swing STP based on fixed amount installment and additionally investor has an option to choose top-up option. Under this, investor can indicate an absolute amount or percentage (in annualized terms) by which each installment amount will be increased. Amount of transfer will be calculated by taking into consideration of the target market value (including top-up amount) and actual market value of the investments in the target scheme.
- Amount of transfer: The first Swing STP installment will be processed for the first installment amount specified by the investor at the time of enrollment. From the second Swing STP installment onwards, the transfer amount will be derived by the following formula:

In case Top-up amount mentioned as absolute amount:

	<p>Target market value Minus Market Value of the investments through Swing STP in the target scheme/plan/option on the date of transfer. Target market value = (Target market value at the time of last installment + First installment amount + (Top-up absolute amount X Number of installments excluding the current installment)).
