Portfolio Rebalancing:

As per Para 4.5.5 of SEBI Master Circular no. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026 and circulars issued thereunder, in case of change in constituents of the index due to periodic review, the portfolio of the scheme will be rebalanced within 7 calendar days.

As per Para 7.24 of SEBI Master Circular no. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026, the scheme shall deploy the funds garnered in an NFO within 30 business days from the date of allotment of units.

In an exceptional case, if the AMC is not able to deploy the funds in 30 business days, reasons in writing, including details of efforts taken to deploy the funds, shall be placed before the Investment Committee of the AMC. The Investment Committee, if so desired, can extend the timelines up to thirty (30) business days from the date of completion of mandated deployment period.

Short Term Defensive Consideration:

Subject to Para 1.9.1.(b) of SEBI Master circular no. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026 and circulars issued thereunder, the asset allocation pattern indicated above may change for a short-term period on defensive considerations, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be rebalanced within 7 calendar days from the date of deviation and further action may be taken as specified under SEBI Circulars/ AMFI guidelines issued from time to time. In the event of involuntary corporate action, the scheme shall dispose the securities not forming part of the underlying index within 7 days from the date allotment/ listing.

B. Where Will the Scheme Invest?

The Scheme shall invest in the following securities as per the limits specified in the asset allocation table of Scheme, subject to SEBI (MF) Regulations.

- a. The net assets of the Scheme will be invested in stocks constituting the **Nifty Capital Markets Index** and / or its exchange traded derivatives. This would be done by investing in the stocks comprising the **Nifty Capital Markets Index** in approximately the same weightage that they represent in the **Nifty Capital Markets Index** and / or investing in derivatives including futures contracts and options contracts on the Index
- b. The Scheme may take equity derivatives or index derivatives position subject to the guidelines issued by SEBI from time to time and in line with the overall investment objective of the Scheme.
- c. Equity and equity related securities including convertible bonds and debentures and warrants carrying the right to obtain equity shares.
- d. Securities created and issued by the Central and State Governments and/or repos/reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
- e. Debt obligations of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee (including but not limited to Indian Government Bond, State Development Loans issued and serviced at the Public Debt Office, Bonds issued by Central & State Government PSU's which are guaranteed by Central or State Governments)
- f. Corporate debt (of both public and private sector undertakings) including Non-convertible debentures (including bonds) and non-convertible part of convertible securities having residual maturity of upto 91 days.
- g. Units of Mutual Fund Schemes;
- h. Short Term Deposits of banks (both public and private sector) and development financial institutions to the extent permissible under SEBI (MF) Regulations;
- i. Money market instruments permitted by SEBI/RBI, having maturities of up to one year but not limited to:
 - Certificate of Deposits (CDs).
 - Commercial Paper (CPs)
 - Triparty repo on Government securities or treasury bills, Bills re-discounting, as may be permitted by SEBI from time to time.
- j. Securities Lending as permitted by SEBI from time to time

Transfer of investments from one scheme to another scheme in the same Mutual Fund, shall be allowed, in lines with para 13.19 of SEBI Master Circular No. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026

C. What are the Investment Strategies?

To achieve the investment objective, the scheme will follow passive investment strategy with investments in stocks in the same proportion as in **Nifty Capital Markets Index**. The investment strategy would revolve around reducing the tracking error to the least possible through rebalancing of the portfolio, taking into account the change in weights of stocks in the index as well as the incremental collections/redemptions from the Scheme. Such rebalancing shall be done in accordance with timelines prescribed by SEBI from time to time.

Index Scheme being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus, there is no additional element of volatility or stock concentration on account of fund manager decisions.

A small portion of the net assets will be held as cash or will be invested in debt and money market instruments (as mentioned under asset allocation section) permitted by SEBI/RBI including TREPS or in alternative investment for the TREPS as may be provided by the RBI, to meet the liquidity requirements under the Scheme.

The Scheme may take an exposure to equity derivatives of constituents or index derivatives of the underlying index for short duration when securities of the index are unavailable, insufficient or for rebalancing at the time of change in index or in case of corporate actions, as permitted by SEBI from time to time.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

The Scheme may use SLBM for earning additional income for the scheme with a lesser degree of risk.

Scheme may invest in the units of Mutual Fund schemes of Kotak Mahindra Mutual Fund or any other Mutual Funds in terms of the prevailing SEBI (MF) Regulations.

Portfolio Turnover:

Portfolio Turnover is a term used to measure the volume of trading that occurs in a Scheme's portfolio during a given time period. Kotak Nifty Capital Markets Index Fund is a passively managed open-ended index scheme. It is therefore expected that there would be a number of subscriptions and redemptions on a daily basis. Hence, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in Nifty Capital Markets Index Fund. The Scheme has no specific target relating to portfolio turnover.

D. How Will the Scheme Benchmark Its Performance?

The performance of the Scheme is measured against Nifty Capital Markets Index (Total Return Index)

Justification for adoption of benchmark:

Nifty Capital Markets Index aims to track the performance of stocks from the Nifty 500 index which represent the capital market theme. The largest 20 stocks from eligible basic industries are selected based on 6-month average free-float market capitalization.

The composition of the aforesaid benchmark is such that, it is most suited for comparing the performance of the scheme.

E. Who Manages the Scheme?

Mr. Satish Dondapati and Mr. Jeetu Valechha will be the designated Fund Managers for the Scheme.

Mr. Abhishek Bisen will be the Fund Manager for debt securities of the Scheme.

F. How Is the Scheme Different from Existing Schemes of The Mutual Fund?

Kotak Nifty Capital Markets Index Fund is a passive scheme and thus aims to replicate the underlying index, subject to tracking errors. It is the only index fund of Kotak Mahindra Mutual Fund which will invest in stocks from the Nifty 500 index which represent the capital market theme. The largest 20 stocks from eligible basic industries are selected based on 6-month average free-float market capitalization as

per index methodology. Hence this scheme is different from other existing Equity Index schemes of Kotak Mahindra Mutual Fund

The list of existing schemes under Equity Index schemes are given below:

1. Kotak Nifty 200 Momentum 30 Index Fund
2. Kotak Nifty 50 Index Fund
3. Kotak Nifty Financial Services Ex-Bank Index Fund
4. Kotak Nifty Next 50 Index Fund
5. Kotak Nifty Smallcap 50 Index Fund
6. Kotak BSE Housing Index Fund
7. Kotak Nifty 100 Low Volatility 30 Index Fund
8. Kotak BSE PSU Index Fund
9. Kotak Nifty Midcap 50 Index Fund
10. Kotak Nifty India Tourism Index Fund
11. Kotak Nifty Midcap 150 Momentum 50 Index Fund
12. Kotak Nifty 50 Equal Weight Index Fund
13. Kotak Nifty 100 Equal Weight Index Fund

G. How Has the Scheme Performed?

This is a new scheme to be launched and does not have any performance track record

H. Additional Scheme Related Disclosures

Since the scheme is a new fund to be launched, the following disclosures are not applicable

- i. **Scheme's portfolio holdings:** Not Applicable
- ii. **Disclosure of name and exposure to Top 7 issuers, stocks, groups and sectors as a % of NAV of the scheme -** Not Applicable
- iii. **Portfolio Disclosure –** Not Applicable
- iv. **Functional website link to the respective addendums to the SID after the last update of SID:** Not Applicable.

- v. **Portfolio Turnover Ratio:** Not Applicable
- vi. **Aggregate investment in the Scheme by the concerned scheme Fund Manager:** Not Applicable.

For any other disclosure w.r.t investments by key personnel and AMC directors including regulatory provisions in this regard kindly refer SAI.

vii. Investments of AMC in the Scheme

The AMC may invest in the Scheme subject to the SEBI (MF) Regulations. Under the Regulations, the AMC is not permitted to charge any investment management and advisory services fee on its own investment in the Scheme.

Pursuant to Regulation 22(3)(a) of the SEBI (MF) Regulations, 2026 and para 7.13.3 of SEBI Master circular no. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026, AMC shall not be required to invest minimum amount as a percentage of AUM in the Scheme.

Details of Investments of AMC in the Scheme will be available in the given link. – Not Applicable.

Part III- OTHER DETAILS

A. Computation Of NAV

The AMC shall compute NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

The AMC shall value its investments according to the valuation norms (Valuation Policy includes computation of NAV in case of investment in foreign securities), as specified in the Seventh Schedule of the Regulations, or such guidelines / recommendations as may be specified by SEBI from time to time. The broad valuation norms are detailed in the Statement of Additional Information.

NAV of Units under the Scheme will be calculated as shown below:

NAV =	Market or Fair Value of Scheme's investments	+	Current assets including Accrued Income	-	Current Liabilities and provisions including accrued expenses
	No. of Units outstanding under the Scheme/Option.				

As per para 9.2.3 of SEBI Master circular No. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026, all expenses and incomes accrued upto the date of valuation shall be incorporated into the computation of net asset value. For this purpose, while major expenses like management fees and other periodic expenses shall be accrued on a day-to-day basis, other minor expenses and income need not be so accrued, provided the non-accrual does not affect the NAV calculations by more than 1%.

As per para 9.2.4 of SEBI Master circular No. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026, any changes in securities and in the number of units be recorded in the books of accounts no later than the first valuation date following the date of the transaction. If this is not possible given the frequency of the NAV disclosure, the recording may be delayed upto a period of 7 calendar days following the date of the transaction, provided that as a result of the non-recording, the NAV calculations shall not be affected by more than 1%.

As per para 9.2.5 of SEBI Master circular No. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026, in case the NAV of a scheme differs by more than 1%, due to nonrecording of the transactions, the investors or scheme/s as the case may be, shall be paid the difference in amount as follows:

- (a) If the investors are allotted units at a price higher than NAV or are given a price lower than NAV at the time of sale of their units, they shall be paid the difference in amount by the scheme.
- (b) If the investors are charged lower NAV at the time of purchase of their units or are given higher NAV at the time of sale of their units, asset management company shall pay the difference in amount to the scheme. The AMC may recover the difference from the investors.

NAV for the Schemes and the repurchase prices of the Units will be calculated and announced at the close of each Business Day. The NAV shall be computed upto three decimals. The NAV of Direct Plan will be different than the NAV of Regular Plan.

Computation of NAV will be done after considering IDCWs paid, if any, and the distribution tax thereon,

if applicable. Therefore, once IDCWs are distributed under the IDCW Option, the NAV of the Units under the IDCW Option would always remain lower than the NAV of the Units issued under the Growth Option. The income earned and the profits realized in respect of the Units issued under the Growth Option remain invested and are reflected in the NAV of the Units.

Illustration for Computation of NAV:

NAV=	Market or Fair Value of Scheme's investments	+	Current assets including Accrued Income	-	Current Liabilities and provisions including accrued expenses	
	No. of Units outstanding under the Scheme/Option.					
10.109=	10,01,00,000.00	+	10,00,000.00	-	10,000.00	10,10,90,000.00
			1,00,00,000.00			1,00,00,000.00

As required under the Regulations, the asset management company shall ensure that exit load of an open-ended mutual fund scheme shall not exceed three per cent of the Net Asset Value of the scheme.

For other details such as policies w.r.t computation of NAV, rounding off, procedure in case of delay in disclosure of NAV etc. refer to SAI.

B. New Fund Offer (NFO) Expenses

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationery, bank charges etc.

The AMC shall ensure that no NFO expenses will be charged to the Scheme.

C. Annual Scheme Recurring Expenses

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below.

The AMC has estimated that the following percentage of daily net assets of the scheme will be charged to the scheme as expenses. For the actual current expenses being charged, the investor should refer to the website of the mutual fund viz. www.kotakmf.com

As per Regulation 67 of SEBI (MF) Regulations, 2026, the total of all expenses charged to the investors of the scheme, shall be total of expense charged within the base limit specified under sub-regulation 7 of regulation 66, brokerage cost permitted under sub regulation 9 of regulation 66, transaction cost incurred for the purpose of execution of trade as referred under sub-regulation 10 of regulation 66, and statutory levies.

Statutory levies @ (including GST) on brokerage and transaction cost	As applicable

@ As per regulation 2(yy), statutory levy means imposed by state government and central government such as GST, STT, Stamp duty, etc.

\$ As per para 11.9 of SEBI Master circular no HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026, the AMC/Mutual Fund shall annually set apart at least 1 basis point (i.e. 0.01%) of daily net asset of the Scheme within the maximum limit of Base Expense Ratio as per Regulation 66(7) of SEBI (MF) Regulations for investor education, awareness and financial inclusion.

* With reference to para 11.6 of SEBI Master circular no HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026, additional distribution commission shall be payable to distributors for onboarding (i) new individual investors (new PAN) from B 30 cities at the mutual fund industry level and (ii) new women individual investors (new PAN) from Top 30 and B 30 cities.

AMCs shall pay additional commission to distributors for onboarding eligible new investors subject to conditions as specified under para 11.6 of SEBI Master circular no HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026.

The structure of such additional commission shall be as under:

Investment Mode	Commission Structure
Lump Sum Investment	1% of the amount of the first application subject to a maximum of ₹2,000, provided the investor remains invested for a minimum period of one year
Systematic Investment Plan (SIP)	1% of the total investment made during the first year, subject to a maximum of ₹2,000

The additional distribution commission shall be paid from the 1 basis points on daily net assets, mandated to be set apart annually by AMCs for investor education, awareness and financial inclusion initiatives, subject to adequate claw back provisions.

Distributors shall be eligible to receive the additional commission for mobilizing investments from new women investors from Top-30 cities and in cases where the commission for new investment from B-30 cities has not been claimed for the same woman investor/investment. Dual incentives for the same investor/investment shall not be permitted.

Brokerage cost as referred under sub-regulation 9 of regulation 66

The following brokerage cost may be charged to the scheme under Regulation 66(9), -

- Brokerage cost incurred for the purpose of execution of trade shall be charged to the scheme over and above base expenses ratio upto 6 bps and 2 bps for cash market transactions and derivatives transactions respectively. Any payment towards brokerage costs, over and above the said 6 bps and 2 bps for cash market transactions and derivatives transactions respectively shall be part of the base expense ratio limit specified under Regulation 66(7).

Transaction cost incurred for the purpose of execution of trade as referred under sub-regulation 10 of regulation 66:

Transaction cost incurred for the purpose of execution of trade namely regulatory levies and any other expenses charged by the stock exchanges, clearing corporation, and clearing house, as applicable shall be charged to scheme over and above base total expenses ratio prescribed in Regulation 66(7)

Statutory Levies charge to Investors

All Statutory levies imposed by state government and central government shall be charged to the scheme in addition to the maximum limit of BER as prescribed in Regulation 66(7).

No charges other than the charges covered under base expense ratio, brokerage cost, transaction cost, statutory levy and exit load including levies as may be specified by the Board, shall be charged to the investors. Any expenses other than those specified in sub-regulation (4), sub-regulations (5), sub-regulation(6), sub-regulation (9) and sub-regulation (10), shall be borne by the asset management company or trustee or sponsors.

Expense Structure for Direct Plan – The annual recurring expenses will be within the limits specified under the SEBI (Mutual Funds) Regulations, 2026.

Commission/ Distribution expenses will not be charged in case of Direct Plan. The TER of Direct Plan will be lower than Regular Plan.

As per Para 11.3.5. of SEBI Master Circular no. SEBI Master circular no HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026, all fees and expenses charged in a direct plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in a regular plan.

However, Direct Plan shall have a lower expense ratio than the Regular Plan. The expenses would exclude distribution expenses, commission, etc and no commission for distribution of Units will be paid / charged under Direct Plan.

Illustration of impact of expense ratio on scheme's returns:

Particulars	Regular Plan	Direct Plan
Amount Invested at the beginning of the year	10,000	10,000
Annual Returns before Expenses	800	800
Expenses other than Distribution Expenses	75	75
Distribution Expenses / Commission	25	-
Returns after Expenses at the end of the Year	700	725

Illustration is given to understand the impact of expense ratio on a scheme return and this should not be construed as an indicative return of the scheme. The expenses of the Direct Plan under the Scheme will be lower to the extent of distribution expenses/ commission.

TER for the Segregated Portfolio

1. AMC shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
2. The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
3. The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
4. The costs related to segregated portfolio shall in no case be charged to the main portfolio.

The aforesaid estimates are made in good faith by the Investment Manager and are subject to change inter se among the various heads of expenses and between the Plans. It may also be noted that the total expenses of the Plans will also be subject to change within the overall limits of expenses under Regulation 67. Actual expenses under any head and / or the total expenses may be more or less than the estimates. The Investment Manager retains the right to charge the actual expenses to the scheme, however the expenses charged will not exceed the statutory limit prescribed by the Regulations. There will be no sub limit on management fee, and it shall be within the overall TER specified above

D. Load Structure

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are

variable and are subject to change from time to time. For the current applicable structure, please refer to the website of www.kotakmf.com or may call at 18003091490 or your distributor.

Type of Load	Load chargeable (as %age of NAV)
Entry Load*	In terms of Para 11.7.1 of SEBI Master circular no. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026, no entry load will be charged on purchase/ additional purchase / switch-in.
Exit Load	NIL

Units issued on reinvestment of IDCW shall not be subject to entry and exit load

* In terms of Para 11.7 of SEBI Master Circular no. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026, no entry load will be charged on purchase / additional purchase / switch-in. The commission as specified in aforesaid circular, if any, on investment made by the investor shall be paid by the investor directly to the Distributor, based on his assessment of various factors including the service rendered by the Distributor.

Any imposition or enhancement of Load in future shall be applicable on prospective investments only. For any change in load structure AMC will issue an addendum and display it on the website/Investor Service Centres. In case of changes in load structure the addendum carrying the latest applicable load structure shall be attached to all KIM and SID already in stock till it is updated.

Investors may obtain information on loads on any Business Day by calling the office of the AMC or any of the Investor Service Centres. Information on applicability of loads will also be provided in the Account Statement.

As required under the Regulations, the asset management company shall ensure that exit load of an open-ended mutual fund scheme shall not exceed three per cent of the Net Asset Value of the scheme.

The investor is requested to check the prevailing load structure of the scheme before investing.

SECTION II

I. INTRODUCTION

A. Definitions/Interpretation

The detailed definitions/ interpretations refer to the link on website of the mutual fund viz. <https://www.kotakmf.com/Information/statutory-disclosure/disclosuresrelatedtosidandkim>

B. Risk Factors

Scheme Specific Risk Factors

Tracking errors are inherent in any index fund and such errors may cause the schemes to generate returns which are not in line with the performance of the Nifty Capital Markets Index or one or more securities covered by/ included in the Nifty Capital Markets Index and may arise from a variety of factors. Delayed realizations, cash for redemptions can result into tracking error, including transactions costs of investments etc.

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV trading price, yield, total return and/or its ability to meet its objectives.

- 1) The NAV of the units is closely related to the value of stocks that form a part of the benchmark index. The value of this will react to stock market movements and may result in changes in the NAV of units under the scheme. There could also be movements in the scheme's NAV due to changes in interest rates, macro-economic and political developments and over longer periods during market downturns;
- 2) Tracking error may have an impact on the performance of the scheme. However, KMAMC will endeavor to minimize the tracking error through regular rebalancing of the portfolio.
- 3) The Scheme is a passively managed scheme and provides exposure to the benchmark and tracking its performance and yield. The Schemes performance may be affected by a general price decline in the stock markets. The Scheme invests in the stocks comprising the index regardless of their investment merit. The Mutual Fund does not attempt to take defensive positions in declining markets.
- 4) As the scheme proposes to invest not less than 95% of the net assets in securities comprising of Nifty Capital Markets Index, any deletion of stocks from or addition to in Nifty Capital Markets Index may require sudden and immediate liquidation or acquisition of such stocks at the prevailing market prices irrespective of whether valuation of stocks is attractive enough. This may not always be in the interest of unitholders.
- 5) The performance of the Nifty Capital Markets Index will have a direct bearing on the performance of the scheme. Hence any composition change by virtue of weightage or stocks selection will have an impact on the scheme.
- 6) Capital Gains Impact: Investors who trade in Kotak Nifty Capital Markets Index Fund may be subject to Long Term Capital Gains or Short Term Capital Gains. Investors are requested to consult their tax / legal consultants before investing in the scheme.
- 7) The scheme will attract provisions of take over regulations, if KMMF invests in more than 10% of the paid up capital of a company and therefore may result into tracking errors and / or may not be able to accept further subscription in the Scheme.
- 8) The Index reflects the prices of securities at a point in time, which is the price at close of business day on the stock exchange. The Scheme, however, may at times trade these securities at different points in time during the trading session and therefore the prices at which the Plan trade may not be identical to the closing price of each scrip on that day on the BSE / NSE. In addition, the Scheme may opt to

trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from BSE / NSE closing prices.

Risks specific to investing in securities forming part of Nifty Capital Markets Index :

Kotak Nifty Capital Markets Index Fund is passively a managed Index Scheme i.e. the amount collected under the scheme is invested in securities of companies comprising the underlying index in the same weightages as they have in the underlying index. The composition of the underlying index is subject to changes that may be affected periodically by the Index Service Provider. Performance of the underlying index will have a direct bearing on the performance of the scheme. The extent of the Tracking error may have an impact on the performance of the scheme.

Risks associated with Capital Markets or Equity Markets, (i.e. Markets in which Equity Shares or Equity oriented instruments are issued and traded)

- **Price fluctuations and Volatility:**

Mutual Funds, like securities investments, are subject to market and other risks and there can be neither a guarantee against loss resulting from an investment in the Scheme nor any assurance that the objective of the Scheme will be achieved. The NAV of the Units issued under the Scheme can go up or down because of various factors that affect the capital market in general, such as, but not limited to, changes in interest rates, government policy and volatility in the capital markets. Pressure on the exchange rate of the Rupee may also affect security prices.

- **Concentration / Sector Risk:**

When a Mutual Fund Scheme, by mandate, restricts its investments only to a particular sector; there arises a risk called concentration risk. If the sector, for any reason, fails to perform, the portfolio value will plummet, and the Investment Manager will not be able to diversify the investment in any other sector. Investments under this scheme will be predominantly in equity or equity related stocks spanning across the selected theme. Hence the concentration risks could be high.

- **Liquidity Risks:**

Liquidity in Equity investments may be affected by trading volumes, settlement periods and transfer procedures. These factors may also affect the Scheme's ability to make intended purchases/sales, cause potential losses to the Scheme and result in the Scheme missing certain investment opportunities. These factors can also affect the time taken by KMMF for redemption of Units, which could be significant in the event of receipt of a very large number of redemption requests or very large value redemption requests. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustees, under certain circumstances as described in the Statement of Additional Information.

Risks associated with Debt / Money Markets (i.e. Markets in which Interest-bearing Securities or Discounted Instruments are traded)

a) Credit Risk:

Securities carry a Credit risk of repayment of principal or interest by the borrower. This risk depends on micro-economic factors such as financial soundness and ability of the borrower as also macro-economic factors such as Industry performance, Competition from Imports, Competitiveness of Exports, Input costs, Trade barriers, Favorability of Foreign Currency conversion rates, etc.

Credit risks of most issuers of Debt securities are rated by Independent and professionally run rating agencies. Ratings of Credit issued by these agencies typically range from "AAA" (read as "Triple A"

denoting "Highest Safety") to "D" (denoting "Default"), with about 6 distinct ratings between the two extremes.

The highest credit rating (i.e. lowest credit risk) commands a low yield for the borrower. Conversely, the lowest credit rated borrower can raise funds at a relatively higher cost. On account of a higher credit risk for lower rated borrowers' lenders prefer higher rated instruments further justifying the lower yields.

b) Price-Risk or Interest-Rate Risk:

From the perspective of coupon rates, Debt securities can be classified in two categories, i.e., Fixed Income bearing Securities and Floating Rate Securities. In Fixed Income Bearing Securities, the Coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the Floating Rate Securities, on the other hand, the coupon rate changes - 'floats' - with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury Bill.

Fixed Income Securities (such as Government Securities, bonds, debentures and money market instruments) where a fixed return is offered, run price-risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, the payment-frequency of such coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in interest rates in the financial system. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof. However, debt securities in the scheme are intended to be held till maturity. For such securities held till maturity, there will not be any interest rate risk at the end of the tenure.

Floating rate securities issued by a government (coupon linked to treasury bill benchmark or a real return inflation linked bond) have the least sensitivity to interest rate movements, as compared to other securities. The Government of India has already issued a few such securities and the Investment Manager believes that such securities may become available in future as well. These securities can play an important role in minimizing interest rate risk on a portfolio.

c) Risk of Rating Migration:

The following table illustrates the impact of change of rating (credit worthiness) on the price of a hypothetical AA rated security with a maturity period of 3 years, a coupon of 10.00% p.a. and a market value of Rs. 100. If it is downgraded to A category, which commands a market yield of, say, 11.00% p.a., its market value would drop to Rs. 97.53 (i.e. 2.47%) If the security is up-graded to AAA category which commands a market yield of, say, 9.00% p.a. its market value would increase to Rs102.51 (i.e. by 2.51%). The figures shown in the table are only indicative and are intended to demonstrate how the price of a security can be affected by change in credit rating.

Rating	Yield (% p.a.)	Market Value (Rs.)
AA	10.00	100.00
If upgraded to AAA	9.00	102.51
If downgraded to A	11.00	97.53

d) Basis Risk:

During the life of floating rate security or a swap the underlying benchmark index may become less active and may not capture the actual movement in the interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.

e) Spread Risk:

In a floating rate security, the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions the spreads may move adversely or favorably leading to fluctuation in NAV.

f) Reinvestment Risk:

Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

g) Liquidity Risk:

The scheme would endeavor to invest in relatively liquid & investment grade corporate debt within the debt portion. The corporate debt market is relatively illiquid vis-a- vis the government securities market. There could therefore be difficulties in exiting from corporate bonds in times of uncertainties. Liquidity in a scheme therefore may suffer. Even though the Government Securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described in the Statement of Additional Information (SAI).

Risk Associated with Investment in Derivatives Market

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments. There are certain risks inherent in derivatives. These are:

- a) Liquidity risk pertains to how saleable a security is in the market. All securities/instruments irrespective of whether they are equity, bonds or derivatives may be exposed to liquidity risk (when the sellers outnumber buyers) which may impact returns while exiting opportunities.

In case of investments in index futures, the risk would be the same as in the case of investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.

- b) Credit Risk – The credit risk in derivative transaction is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a IRS / IRF derivative transaction. With the implementation of physical settlement of stocks in equity derivative

segment, though there is an element of risk of stock / funds not being received, the same is mitigated due to settlement guarantee similar to equity cash market segment.

- c) Interest Rate Risk – interest rate is one of the variables while valuing derivatives such as futures & options. For example, with everything remaining constant, when interest rates increase, the price of Call option would increase. Thus, fluctuations in interest rates would result in volatility in the valuation of derivatives.
- d) Model Risk - A variety of models can be used to value options. Hence, the risk to the fund is that the fund manager buys a particular option using a particular valuation model (on the basis of which the option seems to be fairly priced or cheap) but the market is valuing it using another valuation model and according to which the option may be expensive.
- e) The risk (loss) for an option buyer is limited to the premium paid, while the risk (loss) of an option writer is unlimited, the latter's gain being limited to the premiums earned. The writer of a put option bears a risk of loss if the value of the underlying asset declines below the strike price. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the strike price.

Numerical example of risk involved (For illustration purposely only)

Due to ease of execution and settlement, index futures are an efficient way of buying / selling an Index compared to buying / selling a portfolio of physical shares representing an Index. Index futures can be an efficient way of achieving a Scheme's investment objectives. Index futures may do away with the need for trading in individual components of the Index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the scripts. Index futures can also be helpful in reducing transaction costs and processing costs on account of ease of execution of one trade compared to several trades of shares comprising the Index and will be easy to settle compared to physical portfolio of shares representing an Index

The National Stock Exchange and the Bombay Stock Exchange introduced Index futures on Nifty (NSE-50) and Sensex (BSE 30) for three serial months. For example, in the month of April 2024, three futures were available i.e. May, June and July 2024, each expiring on the last working Thursday of the respective month

Let us assume the Nifty Index was 19,638.3 as on May 30, 2025 and three future indices were available as under:

Month	Bid Price	Offer Price
Jun 2025	19708	19710
July 2025	19824	19828
Aug 2025	19930	19940

The Fund could buy an Index of Jun 2025 as on May 30, 2025 at an offer price of 19710. The Fund would have to pay the initial margin as regulated by the exchanges and settle its Index position with daily marked to market i.e. receive profits/pay losses on a daily basis.

The following is a hypothetical example of a typical index future trade and the associated costs compared with physical stocks.

(Amount in Rupees)			
Particulars	Index Future	Actual Stocks	Purchase Price
Index as on May 30, 2025	19638.3	19638.3	

Jun 2025 Futures Cost	19710	
A. Execution Cost		
Carry costs (19710-19638.3)	71.7	Nil
B. Brokerage Cost		
Assumed at 0.02% for Index Future and 0.05% for spot stocks (0.02% of 19710) (0.05% of 19638.3)	3.94	9.82
C. Securities Transaction Tax STT for Index Futures is Nil STT for Spot Stocks is 0.10% (0.10% of 19638.3)	Nil	19.64
D. Gains on Surplus Funds (Assuming 6% return on 81% of the money left after paying (19% margin) (6% x 19638.3 x 81% x 27 days ÷ 365)	(70.6)	Nil
Cash Market/ Sale Price at expiry	19800	19800
E. Brokerage on Sale		
Assumed at 0.02% for Index Future and 0.05% for Spot stocks (0.02% of 19800) (0.05% of 19800)	3.96	9.9
F. Securities Transaction Tax STT for Index Futures is 0.0125% STT for Spot Stocks is 0.10% (0.0125% of 19800) (0.10% of 19800)	2.48	19.8
Total Cost (A+B+C-D+E+F)	11.48	59.16
Profit	150.22	102.54

As the above example demonstrates, the cost differential between purchasing Index Future and 50 stocks comprising Nifty (NSE-50) is a function of the carrying cost, the interest earned available to Fund Managers and the brokerage cost applicable in both cases. However, as mentioned earlier, as the Indian equity markets continues to have limitations in execution of trades due to the lack of adequate liquidity and the concept of circuit breakers, index future can allow a fund to buy all the stocks comprising the index at a nominal additional cost.

Please note that the above example is hypothetical in nature and the figures, brokerage rates etc. are assumed. In case the execution and brokerage costs on purchase of Index Futures are high and the returns on surplus funds are less, buying of index future may not be beneficial as compared to buying stocks comprising the Index. The actual return may vary based on actuals and depends on final guidelines / procedures and trading mechanism as envisaged by stock exchanges and other regulatory authorities.

Risk associated with Securities Lending:

In the case of securities lending, there is a possibility of recalling securities lent at a higher premium than at which the security is lent or unable to recall due to low volume. Additional risk on securities lending is that there can be temporary illiquidity of the securities that are lent out and the Fund may not be able to sell such lent-out securities, resulting in an opportunity loss. In case of a default by counterparty, the loss to the Fund can be equivalent to the securities lent.

Risks associated with segregated portfolio

- Investor holding units of segregated portfolio may not be able to liquidate their holding till the time realisable value is recovered.
- Security comprising of segregated portfolio may realise lower value or may realise zero value.
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.
- Ascertaining fair value of segregated securities may be difficult in the absence of an active securities market

Risks associated with Tracking errors/difference:

Tracking error means the extent to which the NAV of the fund moves in a manner inconsistent with the movements of the benchmark index on any given day or over any given period of time due to any cause or reason whatsoever including but not limited to expenditure incurred by the scheme, IDCW payouts if any, whole cash not invested at all times as it may keep a portion of funds in cash to meet redemption etc. The tracking error i.e. the annualized standard deviation of the difference in daily returns between the underlying index or goods and the NAV of the Scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMC, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. However, the Fund will endeavor to limit the tracking error within 2% limits. Tracking difference is the difference of return between the scheme and benchmark annualized over 1 year, 3 year, 5 years, 10 years and since inception period.

Tracking error/ difference could be the result of a variety of factors including but not limited to:

- Delay in the purchase or sale of stocks within the benchmark due to
 - Illiquidity in the stocks, circuit filters on the stocks
 - Impact, if any, of securities received on corporate action.
- Delay in realisation of sale proceeds, receipt of information of inflows from RTA/ Banks etc.
- The scheme may buy or sell the stocks comprising the index at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
- Investments in securities must be made in whole numbers; therefore, the quantity of shares should be rounded accordingly.
- The potential for trades to fail, which may result in the Scheme not having acquired the securities at a price necessary to track the benchmark price
- Index providers may either exclude or include new scrips in their periodic review of the stocks that constitute the underlying index. In such situations the scheme will endeavor to rebalance the portfolio in line with the index. But may not be able to mirror the index immediately due to the available investment/reinvestment opportunity.
- The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
- Disinvestments to meet redemptions, recurring expenses, payouts of IDCW etc.
- Execution of large buy / sell orders
- Delay in credit of securities
- Transaction cost and recurring expenses
- Delay in realisation of Unit holders' funds
- Levy of margins by exchanges

SEBI / other Regulatory restrictions on investments and/ or divestments by the scheme / Mutual Fund,

which are outside the control of AMC, which may further cause / impact the tracking error.

Risk associated with investment in Government securities and Triparty repo on Government securities or treasury bills:

- The mutual fund is a member of securities segment and Triparty repo on Government securities or treasury bills trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Triparty repo on Government securities or treasury bills trades are settled centrally through the infrastructure and settlement systems provided by CCIL; Thus, reducing the settlement and counter party risks considerably for transactions in the said segments.
- The members are required to contribute towards margin obligation (Initial / Mark to Market etc.) as per bye-laws of CCIL as also an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in discharging their obligation. As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members as determined by CCIL.
- Thus, the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).
- CCIL maintains two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty repo on Government securities or treasury bills trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Risk associated with investing in Units of Mutual Fund Schemes:

Investment in units of Mutual Fund scheme involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal. As the price / value / interest rates of the underlying securities in which the mutual fund scheme invests fluctuates, the value of units of mutual fund scheme may go up or down. The value of underlying securities may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures; the NAV is also exposed to Price/Interest-Rate Risk and Credit Risk and may be affected inter-alia, by government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee. Investment in units of mutual fund scheme is also exposed to risk of suspension of subscriptions / redemptions of the units, change in fundamental attributes, application of swing pricing, Segregation of portfolios etc. Swing pricing / segregation of portfolios risks may amongst other things realise lower and/or nil value on redemption of underlying units. Since the Scheme may invest in schemes of Mutual Funds, scheme specific risk factors of each such mutual fund schemes will be applicable to the Scheme portfolio.

All the above factors may not only affect the prices of securities but also the time taken by the Fund for redemption of Units, which could be significant in the event of receipt of a very large number of redemption requests or very large value redemption requests. The liquidity of the assets may be affected by other factors such as general market conditions, political events, bank holidays and civil strife. In view of this, redemption

may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustees, under certain circumstances as described elsewhere in the SAI.

C. Risk Mitigation Strategies

Type of Risks	Measures/ Strategies to control risks
Equity Markets/ Equity Oriented Instruments	• Market Risk and Volatility: Market risk is a risk inherent to an equity scheme. Being a passively managed scheme, it will invest in the securities included in its Underlying Index. • Concentration / Sector Risk: Index Fund being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus, there is no additional element of volatility or stock concentration on account of fund manager decisions. The Risk Mitigation strategy revolves around minimizing the Tracking error through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Underlying Index as well as the incremental collections into / redemptions from the Scheme. • Liquidity Risks: As such the liquidity of some stocks that the scheme invests into could be relatively low. The fund will endeavor to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks.
Debt and Money Market instruments	• Credit Risk: Management analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken. • Price-Risk or Interest-Rate Risk: The Scheme may primarily invest the debt portion of the portfolio in money market instruments, units of Liquid and Overnight schemes thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities. • Risk of Rating Migration: The Scheme may primarily invest the debt portion of the portfolio in short-term money market instruments, units of Liquid and Overnight schemes thereby mitigating the risk of rating migration generally associated with long-term securities • Basis Risk: The debt allocation of scheme is primarily cash management strategy and such strategy returns are expected to reflect the very short term interest rate hence investment is done in short term debt and money market instruments. • Spread Risk: The Scheme may primarily invest the debt portion of the portfolio in short-term money market instruments, units of Liquid and Overnight schemes thereby mitigating the risk of spread expansion which is generally associated with long-term securities

	• Reinvestment Risk: The debt allocation of scheme is primarily cash management strategy and such strategy returns are expected to reflect the very short-term interest rate hence investment is done in short term debt and money market instruments. Reinvestment risks will be limited to the extent of debt instruments, which will be a very small portion of the overall portfolio value. • Liquidity Risk: The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. The Scheme may, however, endeavor to minimize liquidity risk by primarily investing the debt portion of the portfolio in relatively liquid short-term money market instruments, units of Liquid and Overnight schemes.
Derivatives	The Scheme may take an exposure to equity derivatives of constituents or index derivatives of the underlying index for short duration when securities of the index are unavailable, insufficient or for rebalancing at the time of change in index or in case of corporate actions, as permitted. All derivatives trade will be done only on the exchange with guaranteed settlement. Exposure with respect to derivatives shall be in line with regulatory limits and the limits specified in the SID.
Securities Lending	The SLB shall be operated through Clearing Corporation/Clearing House of stock exchanges having nation-wide terminals who are registered as Approved Intermediaries (AIs).” The risk is adequately covered as Securities Lending & Borrowing (SLB) is an Exchange traded product. Exchange offers an anonymous trading platform and gives the players the advantage of settlement guarantee without the worries of counter party default. The fund manager will endeavor to recall the securities in case lent securities are to be sold.
Segregated Portfolio	In such an eventuality, it will be AMC’s endeavor to realise the segregated holding in the best interest of the investor at the earliest.
Tracking errors/ Tracking Differences	Over a short period, the Scheme may carry the risk of variance between portfolio composition and Benchmark. The objective of the Scheme is to closely track the performance of the Underlying Index over the same period, subject to tracking error. The Scheme would endeavor to maintain a low tracking error by actively aligning the portfolio in line with the Index.
Government securities and Triparty repo on Government securities or treasury bills:	As a member of securities segment and Triparty repo segment, maintenance of sufficient margin is a mandatory requirement. CCIL monitors these on a real time basis and requests the participants to provide sufficient margin to enable the trades etc. Also there are stringent conditions / requirements before registering any participants by CCIL in these segments. Since settlement is guaranteed the loss on this account could be minimal though there could be an opportunity loss.
Units of overnight & liquid mutual fund schemes	Liquidity is generally high in both overnight as well as liquid schemes.
Risks specific to investing	To mitigate the risks, the fund focuses on minimizing tracking error through

in securities forming part of Nifty Capital Markets Index	efficient replication and timely portfolio rebalancing in line with index changes.
--	--

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

The measures mentioned above is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

II. INFORMATION ABOUT THE SCHEME

D. Where Will the Scheme Invest?

Securities/ Instruments	Definitions
Equity and equity related securities including convertible bonds and debentures and warrants carrying the right to obtain equity shares, units of Real Estate Investment Trusts (REITs);	Equity shares is a security that represents ownership interest in a company.
	Equity related instruments include convertible debentures, convertible preference shares, warrants carrying the right to obtain equity shares, equity derivatives, units of Real Estate Investment Trusts (REITs) and such other instrument as may be specified by the Board from time to time.
	Derivative is a financial instrument whose value is based upon the value of an underlying equity shares or indices. The equity derivatives may be in the following form: Futures - Futures Contract means a legally binding agreement to buy or sell the underlying security / indices on a future date at an agreed price. Options - Options Contract is a type of Derivatives Contract which gives the buyer/holder of the contract the right (but not the obligation) to buy/sell the underlying asset at a predetermined price within or at end of a specified period. The buyer / holder of the option purchases the right from the seller/writer for a consideration which is called the premium. The seller/writer of an option is obligated to settle the option as per the terms of the contract when the buyer/holder exercises his right. The underlying asset could include securities, an index of prices of securities etc. “REIT” or “Real Estate Investment Trust” means a person that pools rupees fifty crores or more for the purpose of issuing units to at least two hundred investors so as to acquire and manage real estate asset(s) or property(ies), that investors receive the income generated therefrom without giving them the day-to-day control over the management and operation of such real estate asset(s) or property(ies).
Securities created and issued by the Central and State Governments and/or repos/reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)	Government Security (G-Sec) is a tradeable instrument issued by the Central Government or the State Governments. It acknowledges the Government’s debt obligation. They are generally long term with maturity of one year or more. In India, the Central Government issues both, treasury bills and bonds or dated securities while the State Governments issue only bonds or dated securities, which are called the State Development Loans (SDLs). G-Secs carry practically no risk of default and, hence, are called risk-free gilt-edged instruments. Repos / Reverse Repos enables collateralized short term borrowing and lending through sale/purchase operations in the such government securities.
Debt obligations of domestic Government agencies and statutory bodies, which may or	These are instruments are issued by various government agencies and bodies (including but not limited to Indian Government Bond, State Development Loans issued and serviced at the Public Debt Office, Bonds

may not carry a Central/State Government guarantee (including but not limited to Indian Government Bond, State Development Loans issued and serviced at the Public Debt Office, Bonds issued by Central & State Government PSU's which are guaranteed by Central or State Governments);	issued by Central & State Government PSU's which are guaranteed by Central or State Governments. They can be issued at discount, par or premium.
Corporate debt (of both public and private sector undertakings) including Nonconvertible debentures (including bonds) and non-convertible part of convertible securities;	These are financial instruments issued by companies (both public and private) to raise long-term funds through public issues. They are generally rated by credit rating agencies.
Short Term Deposits of banks (both public and private sector) and development financial institutions to the extent permissible under SEBI Regulations;	Short Term Deposits are offered by Scheduled Commercial Banks (both public and private sector banks) with a fixed/floating interest rate and maturity date.
Money market instruments permitted by SEBI/RBI, having maturities of up to one year but not limited to: · Certificate of Deposits (CDs). · Commercial Paper (CPs) · Tri-party Repo, Bills re-discounting, as may be permitted by SEBI from time to time.	• "Certificate of Deposit" or "CD" is issued by Scheduled Commercial Banks (SCBs) and All-India Financial Institutions. There is a term period of 7 days to 1 year for CDs that are issued by SCBs, whereas the term period ranges from 1 year to 3 years for CDs issued by financial institutions. CDs are usually issued at a discounted rate and redeemed at par. • "Commercial Paper" or "CP" is a short-term instrument issued by corporates and financial institutions CPs are usually issued at a discounted rate and redeemed at par. The tenor of CP ranges from 7 days to 1 year. • Treasury bills or T-bills, which are money market instruments, are short term debt instruments issued by the Government of India and are presently issued in three tenors, namely, 91 day, 182 day and 364 day. Treasury bills are zero coupon securities and pay no interest. Instead, they are issued at a discount and redeemed at the face value at maturity. • Triparty Repo (TREPS) is a type of repo contract where a third entity (apart from the borrower and lender), called a Tri-Party Agent, acts as an intermediary between the two parties to the repo to facilitate services like collateral selection, payment and settlement, custody and management during the life of the transaction.

	• Repos / Reverse Repos enables collateralized short term borrowing and lending through sale/purchase operations in debt instruments (including corporate bonds). • Bills Re-discounting is an instrument where a financial institution discounts the bills of exchange that it has discounted previously with another financial institution.
Units of Mutual Funds Schemes	Mutual fund means a fund established in the form of a trust to raise monies through the sale of units to the public or a section of the public under one or more schemes for investing in securities, money market instruments, gold or gold related instruments, silver or silver related instruments, real estate assets and such other assets and instruments as may be specified by the SEBI from time to time.
Securities Lending & Borrowing as permitted by SEBI from time to time	Securities Lending and Borrowing is a process through which shares or stocks are lent or borrowed from other investors or financial firms at a specified time and price.

E. What Are the Investment Restrictions?

As per the Trust Deed read with the SEBI (MF) Regulations, the following investment restrictions apply in respect of the Scheme at the time of making investments.

All investments by a mutual fund scheme in equity shares and equity related instruments shall only be made provided such securities are listed or to be listed.

1. The Mutual Fund under all its Scheme(s) shall not own more than 10% of any company's paid up capital carrying voting rights or ten per cent of units of REITs issued by a single issuer, as the case may be. Provided, investment in the asset management company or the trustee company of a mutual fund shall be governed by clause (a), of sub-regulation (1), of regulation 6.
2. As per Clause 13.1 of SEBI Master circular no. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026, the Scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and nonmoney market instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorised to carry out such activity under the Act. Such investment limit may be extended to 12% of the NAV of the scheme with the prior approval of the Board of Trustees and the Board of directors of the asset management company.

Within the limits specified in clause 13.1 of SEBI Master circular no. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026, a mutual fund scheme shall not invest more than:

- a. 10% of its NAV in debt and money market securities rated AAA issued by a single issuer; or
- b. 8% of its NAV in debt and money market securities rated AA issued by a single issuer; or
- c. 6% of its NAV in debt and money market securities rated A and below issued by a single issuer.

The above investment limits may be extended by up to 2% of the NAV of the scheme with prior approval of the Board of Trustees and Board of Directors of the AMC, subject to compliance with the overall 12% limit specified in clause 13.1 of SEBI Master circular no. HO/24/13/11(1)2026-IMD-POD-1/I/7602/2026 dated March 20, 2026.
