I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Schemes invest fluctuate, the value of your investment in the Schemes may go up or down
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Schemes.
- The names of the Schemes do not in any manner indicate either the quality of the Schemes or their future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operations of the Scheme beyond the initial contribution of ₹ 2,00,000/- (Rupees Two Lacs Only) made by it towards the setting up of the Mutual Fund.
- The present schemes are not guaranteed or assured return schemes.

Schemes Specific Risk Factors

1. Risks associated with Fixed Income and Money Market Instruments:

Price Risk/Interest Risk
Fixed Income and Money Market Instruments carry price risk (also known as interest rate risk). Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rate falls, the prices increase. In case of floating rate instruments, the general level of price risk is low (as compared to fixed rate instruments), however, these instruments are also subject to some amount of interest rate risk as the spread over the benchmark rate may change. Prices of long-term securities generally fluctuate more in response to interest rate changes than prices of short-term securities. Prices of bonds/money market instruments traded change frequently (up or down) which in turn leads to changes in the NAV of the scheme which holds such securities.

Credit Risk
Credit risk or default risk refers to the risk that the issuer of a fixed income security may default on interest payment or paying back the principal amount on maturity. In case of Government Securities, there is minimal credit risk. Lower rated or unrated securities carry a higher credit risk as compared to higher rated securities.

Liquidity or Marketability Risk
The ability of a fund to execute sale/purchase orders is dependent on the liquidity of the underlying securities. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. The securities that are listed on the stock exchange carry lower liquidity risk, but the ability to sell these securities is limited by the overall trading volumes. Further, different segments of Indian financial markets have different settlement cycles and may be extended significantly by unforeseen circumstances.

Re-investment Risk
This refers to the risk that intermediate cash flows received from a security is re invested at a different rate than assumed at the time of purchase.

Prepayment Risk
Certain fixed income securities give an issuer a right to call back its securities before their maturity date. This right is generally exercised when interest rate has declined. The proceeds received when such right is exercised may get invested at lower yield as the interest rate have declined. This risk of deploying proceeds at lower rate is known as prepayment risk.

2. Risks associated with investments in Government Securities:
The Government Securities Market is the largest and most liquid market in India, with the large participants being banks, non-banking finance companies, insurance companies and provident funds which are required by statutes to invest in Government securities. The government securities are being issued in a tenure starting from 3m upto 40 years at present. It is more liquid in nature because of large investor base as compared to corporate bonds. Since, it is being issued over long tenure compared to corporate bonds, it carries higher interest rate risk on long tenure securities. Since the security is sovereign in nature, the credit risk is minimal.

3. Risks associated with Investing in ADR/ GDR and Foreign Securities:
Subject to necessary approvals, a Scheme may also invest in overseas financial assets as permitted under the applicable regulations. The value of an investment in a foreign issuer may depend on general global economic factors or specific economic and political factors relating to the country or countries in which the foreign issuer operates. To the extent the assets of the Scheme are invested in overseas financial assets, there may be risks associated with fluctuations in foreign exchange rates, restriction on repatriation of capital and earnings under the exchange control regulations and transaction procedure in overseas market. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls, political circumstances, bi-lateral conflicts or prevalent tax laws.

Investment in foreign securities carries currency risk. Currency risk is a form of risk that arises from the change in price of one currency against other. The exchange risk associated with a foreign denominated instrument is a key element in foreign investment. This risk flows from differential monetary policy and growth in real productivity, which results in differential inflation rates. The risk arises because currencies may move in relation to each other.

4. Risks associated with Investing in Derivatives:
Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by a Fund Manager involve uncertainty and decision of a Fund Manager may not always be profitable. No assurance can be given that a Fund Manager will be able to identify or execute such strategies.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments. Other risks include risk of mis-pricing or improper valuation and the inability of the derivative to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby a Scheme may not be able to sell or purchase derivative quickly enough at a fair price.

5. Risks associated with Investing in Securitised Debt:

The Scheme may invest in domestic securitized debt such as asset backed securities (ABS) or mortgage backed securities (MBS). Asset Backed Securities (ABS) are securitized debts where the underlying assets are receivables arising from various loans including automobile loans, personal loans, loans against consumer durables, etc. Mortgage backed securities (MBS) are securitized debts where the underlying assets are receivables arising from loans backed by mortgage of residential / commercial properties. ABS/MBS instruments reflect the undivided interest in the underlying pool of assets and do not represent the obligation of the issuer of ABS/MBS or the originator of the underlying receivables. The ABS/MBS holders have a limited recourse to the extent of credit enhancement provided. If the delinquencies and credit losses in the underlying pool exceed the credit enhancement provided, ABS/MBS holders will suffer credit losses. ABS/MBS are also normally exposed to a higher level of reinvestment risk as compared to the normal corporate or sovereign debt.

At present in Indian market, following types of loans are securitized:
Auto Loans (cars / commercial vehicles /two wheelers)
Residential Mortgages or Housing Loans
Consumer Durable Loans
Personal Loans
Corporate Loans

The main risks pertaining to each of the asset classes above are described below:

Auto Loans (cars/ commercial vehicles/ two wheelers)
The underlying assets (cars etc) are susceptible to depreciation in value whereas the loans are given at high loan to value ratios. Thus, after a few months, the value of asset becomes lower than the loan outstanding. The borrowers, therefore, may sometimes tend to default on loans and allow the vehicle to be repossessed. These loans are also subject to model risk. i.e if a particular automobile model does not become popular, loans given for financing that model have a much higher likelihood of turning bad. In such cases, loss on sale of repossessed vehicles could be higher than usual.

Commercial vehicle loans are susceptible to the cyclicality in the economy. In a downturn in economy, freight rates drop leading to higher defaults in commercial vehicle loans. Further, the second hand prices of these vehicles also decline in such an economic environment.

Housing Loans

Housing loans in India have shown very low default rates historically. However, in recent years, loans have been given at high loan to value ratios and to a much younger borrower class. The loans have not yet gone through the full economic cycle and have not yet seen a period of declining property prices. Thus the performance of these housing loans is yet to be tested and it need not conform to the historical experience of low default rates.

Consumer Durable Loans

The underlying security for such loans is easily transferable without the bank's knowledge and hence repossession is difficult. The underlying security for such loans is also susceptible to quick depreciation in value. This gives the borrowers a high incentive to default.

Personal Loans

These are unsecured loans. In case of a default, the bank has no security to fall back on. The lender has no control over how the borrower has used the borrowed money. Further, all the above categories of loans have the following common risks:

All the above loans are retail, relatively small value loans. There is a possibility that the borrower takes different loans using the same income proof and thus the income is not sufficient to meet the debt service obligations of all these loans.

In India, there is insufficiency of ready comprehensive and complete database regarding past credit record of borrowers. Thus, loans may be given to borrowers with poor credit record. In retail loans, the risks due to frauds are high.

Corporate Loans

These are loans given to single or multiple corporates. The receivables from a pool of loans to corporates are assigned to a trust that issues pass through certificates in turn. The credit risk in such PTCs is on the underlying pool of loans to corporates. The credit risk of the underlying loans to the corporates would in turn depend of economic cycles.

6. Risks associated with Securities Lending:

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply with can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

7. Risks associated with Short Selling:

The Scheme may enter into short selling transactions, subject to SEBI and RBI Regulations. Short positions carry the risk of losing money and these losses may grow unlimited theoretically if the price of the stock increases without any limit which may result in major losses to the Scheme. At times, the participants may not be able to cover their short positions, if the price increases substantially. If numbers of short sellers try to cover their position simultaneously, it may lead to disorderly trading in the stock and thereby can briskly escalate the price even further making it difficult or impossible to liquidate short position quickly at reasonable prices. In addition, short selling also carries the risk of inability to borrow the security by the participants thereby requiring the participants to purchase the securities sold short to cover the position even at unreasonable prices.

8. Settlement Risk:

Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Portfolio to make purchases in intended securities due to settlement problems could cause the Portfolio to miss certain investment opportunities.

9. Regulatory Risk:

The value of the securities may be affected by uncertainties such as changes in government policies, changes in taxation, and other developments in the laws and regulations.

10. Risk Associated with Unlisted Securities:
Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted domestic securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

11. Risks associated with investing in Foreign Securities/ Overseas investment:
The risk of investing in foreign securities carries exchange rate risks related to depreciation of foreign currency and the country risks, in addition to the risks of securities in domestic securities. The country risks would include events such as change in regulations or political circumstances like introduction of extraordinary exchange rate controls, restrictions on repatriation of capital due to exchange rate controls, bi-lateral political tensions leading to immobilization of overseas financial assets and the prevalent tax laws of the respective jurisdiction for the execution of trades or otherwise.
The foreign securities are issued and traded in foreign currencies. As a result, their values may be affected by changes in exchange rates between foreign currencies and the Indian Rupee as well as between currencies of countries other than India. Restrictions on currency trading that may be imposed by developing market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries.

12. Risks associated with investing in Tri Party Repo through CCIL (TREPS):
The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall". As per the waterfall mechanism, after the defaulter‟s margins and the defaulter‟s contribution to the default fund have been appropriated, CCIL‟s contribution is used to meet the losses. Post utilization of CCIL‟s contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members.

Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme(s) shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2) (c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. REQUIREMENT OF MINIMUM AVERAGE ASSETS UNDER MANAGEMENT (AAUM)

The Scheme shall maintain an average AUM of Rs. 20 crore on half yearly rolling basis. In case, the average AUM falls below Rs. 20 crore, the AMC shall scale up the AUM of such Scheme within a period of six months so as to maintain the average AUM of Rs. 20 crore on half yearly rolling basis, failing which the Scheme shall be wound up in accordance with the provisions of Regulation 39 (2) (c) of SEBI (Mutual Funds) Regulations, 1996 as amended from time to time.

- The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any of the tax consequences that may arise, in the event that a Scheme is wound up for the reasons and in the manner provided in 'Statement of Additional Information ('SAI')'.

- The tax benefits described in this Scheme Information Document and Statement of Additional Information are as available under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India as on the date of this Scheme Information Document and the Unit holders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in a Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Unit holder is advised to consult his / her own professional tax advisor.

- The Mutual Fund may disclose details of the investor's account and transactions there under to those intermediaries whose stamp appears on the application form. In addition, the Mutual Fund may disclose such details to the bankers, as may be necessary for the purpose of effecting payments to a investor. The Fund may also disclose such details to regulatory and statutory authorities/bodies as may be required or necessary.

- In case the AMC or its Sponsor or their affiliates/associates or group companies make substantial investments, either directly or indirectly in a Scheme, present or future, redemption of units by these entities may have an adverse impact on the performance of a Scheme. This may also affect the ability of the other Unit holders to redeem their units.

- As the liquidity of a Scheme's investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Fund for Redemption of Units may be significant in the event of an inordinately large number of Redemption requests or of a restructuring of a Scheme's portfolio. In view of this, the Trustee has the right, in its sole discretion, to limit redemptions under certain circumstances - please refer to the section "**Right to Limit Redemptions**" in this document.

- In terms of the Prevention of Money Laundering Act, 2002, the Rules issued there under and the guidelines/circulars issued by SEBI regarding the Anti Money Laundering (AML Laws), all intermediaries, including Mutual Funds, have to formulate and implement a client identification i.e. Know Your Customer programme, verify and maintain the record of identity and address(es) of investors.

- If after due diligence the Trustee / AMC has reason to believe that any transaction is suspicious in nature as regards money laundering, the AMC shall report such transactions to competent authorities under PMLA and rules/guidelines issued thereunder by SEBI/RBI, furnish any such information in connection therewith to such authorities and take any other actions as may be required for the purposes of fulfilling its obligations under PMLA and rules/guidelines issued thereunder without obtaining prior approval of the Unitholder/any other person. In this connection the Trustee / AMC reserves the right to reject any such application at its discretion.

- The need to Know Your Customer (KYC) is vital for the prevention of money laundering. The Trustee / AMC may seek information or obtain and retain documentation used to establish identity. It may re-verify identity and obtain any missing or additional information for this purpose. The Trustee / AMC shall have absolute discretion to reject any application or prevent further transactions by a Unit holder, if after due diligence, the Investor / Unit holder / a person making the payment on behalf of the Investor does not fulfill the requirements of the Know Your Customer (KYC).

- The Product labeling mandated by SEBI is to provide investors an easy understanding of the risk involved in the kind of product / scheme they are investing to meet their financial goals. The Riskometer categorizes the schemes of Fund under different levels of risk based on the respective scheme's investment objective, asset allocation pattern, investment strategy and typical investment time horizon of investors. Therefore, the schemes falling under the same level of risk in the Riskometer may not be similar in nature. Investors are advised before investing to evaluate a scheme not only on the basis of the Product labeling (including the Riskometer) but also on other quantitative and qualitative factors such as performance, portfolio, fund managers, asset manager, etc. and shall also consult their financial advisers, if they are unsure about the suitability of the scheme before investing. The AMC shall monitor and review the Riskometer on annual basis and in view of this, current position of Riskometer as laid out for the Scheme is subject to change.

This Scheme Information Document sets forth concisely the information about the Schemes that a prospective investor ought to know before investing. This Scheme Information Document will remain effective till a material change (other than a change in Fundamental Attributes and within the purview of this Scheme Information Document) occurs and thereafter the changes shall be filed with SEBI and circulated to the unitholders. II INFORMATION ABOUT THE SCHEMES

A. TYPE OF THE SCHEME

Name of the Scheme	Type of Scheme
Taurus Liquid Fund	An open-ended liquid scheme

B. WHAT IS THE INVESTMENT OBJECTIVE OF THE SCHEME?

To generate steady and reasonable income, with low risk and high level of liquidity from a portfolio of money market securities and high quality debt. However, there is no assurance that the investment objective of the scheme will be realised

C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

D. WHERE WILL THE SCHEME INVEST?

E. WHAT ARE THE INVESTMENT STRATEGIES?

Investment Pattern and Risk Profile
Under normal circumstances, the asset allocation pattern will be as under:-

Instruments	% of Portfolio	Risk Profile
Repo/ Reverse Repo/TREPS	0-100%	Low
Money Market Instruments (Mibor Linked Instruments, T-Bills, CPs, CDs) and/or other short term debt instruments (Floating Rate Notes, Short Tenor NCDs, PTCs and G-Secs) upto a maturity of 91 days.	0-100%	Low

Securitised debt upto 40% of the corpus

Derivatives may be used upto 50% of the Scheme's net assets to hedge in order to protect the interest of the unitholders of the Scheme.

The AMC retains the option to alter the asset allocation depending on liquidity considerations or on account of high levels of subscriptions or redemptions relative to the fund size, or upon considerations that optimize returns of the Scheme through investment opportunities or upon various defensive regulations and political and economic factors. In addition, as part of the investment process, the Investment Monitoring Committee of the AMC will conduct a periodic review of the asset allocation and may suggest rebalancing of the portfolio.

Pursuant to SEBI circular No SEBI/IND/CIR/NO 13/150975/09 dated January 2, 2009 the Scheme shall make investments only in Debt and Money Market instruments with Maturity of upto 91 days.

Explanation:
a. In case of securities where the principal is to be repaid in a single payout the maturity of the securities shall mean residual maturity. In case the principal is to be repaid in more than one payout then the maturity of the securities shall be calculated on the basis of weighted average maturity of security.
b. In case of securities with put and call options (daily or otherwise) the residual maturity of the securities shall not be greater than 91 days.
c. In case the maturity of the security falls on a non-business day then settlement of securities will take place on the next business day.

The above requirement shall also apply to Inter-scheme transfer of Securities.

Investment Strategy

The fund management team will endeavor to maintain a consistent performance in the scheme by maintaining a balance between safety, profitability and high liquidity aspects of various investments. The fund manager will try to achieve an optimal risk return balance for management of the fixed income portfolios.

The investments in debt instruments carry various risks like interest rate risk, liquidity risk, default risk, purchasing power risk etc. While they cannot be done away with, they can be minimized by diversification and effective use of hedging techniques. No investment shall be made in foreign debt securities including foreign securitized debt.

The fund management team will take an active view of the interest rate movement by keeping a close watch on various parameters of the Indian economy, as well as developments in global markets.

Investment views / decisions will be taken on the basis of the following parameters:
1. Prevailing interest rate scenario
2. Quality of the security / instrument (including the financial health of the issuer)
3. Maturity profile of the instrument
4. Liquidity of the security
5. Growth prospects of the company / industry
6. Any other factors in the opinion of the fund management team

The Fund Management team proposes to use analytical risk management tools like VAR / convexity/ modified duration for effective portfolio management.

Change in Investment Pattern / Portfolio Rebalancing

Subject to the SEBI Regulations, the asset allocation pattern indicated above may change from time to time, depending on liquidity considerations or on account of high levels of subscriptions or redemptions relative to fund size, or upon considerations that optimise returns of the Scheme through investment opportunities or upon various defensive considerations including market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions may vary depending upon the perception of the AMC, the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and only for defensive consideration. The fund manager will endeavour to restore asset allocation in line with the specified asset allocation pattern within 1 month in most cases.

Note on Debt & Money Market in India

The market for fixed-income securities in India can be briefly divided into the following segments:

- The money market – The market for borrowing/lending monies, and
- The securities market – The market for trading in securities,
- The derivatives market – The market for fixed income derivatives

A predominantly institutional market, the key market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates. Provident / pension funds are also present, but not in a very active manner.

The Money Market

The money market can be classified into two broad categories

The market for clean borrowing / lending
The market for collateralized borrowing/ lending

The market for clean borrowing or lending i.e. borrowing / lending without the backing of any collateral consists of –

Call Money: The market for overnight borrowing / lending
Notice Money: The market for borrowing / lending from 2 days to a fortnight.

Term Money: The market for borrowing / lending from a fortnight to six months

The market for collateralised borrowing / lending broadly consists of Repo transactions: These are repurchase obligation transactions in which the borrower tenders securities to the lender which is bought back by the borrower on the repurchase date. The price difference between the sale and repurchase of the securities is the implicit interest rate for the borrowing /lending. The eligible underlying securities for these transactions are currently government securities/treasury bills and Corporate Bond.

Tri-Party Repos (TREPS) : The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. TREPS can be issued/bought/sold for a minimum of one day to maximum of 364 days.

The Securities Market

The market for fixed-income securities can be broadly classified into

- The market for money market (short term) instruments
- The market for Government securities
- The market for Corporate Bonds
- The market for other instruments such as securitized debt/ PTCs etc

Money market securities are generally discount securities maturing within one year at the time of issuance. Instruments satisfying this criterion are treasury bills (obligations of the government), commercial paper (obligations of the corporate sector) and certificate of deposit (obligations of banks).

Government securities are medium / long-term debt obligations of the government. The market for government securities is the most liquid segment of the Indian debt market. Most of the secondary market trading is concentrated in government securities.

Trading in government securities is now done mostly through an electronic trading, reporting and settlement platform developed by the Reserve Bank of India (RBI) called Negotiated Dealing System (NDS). The role of brokers which was an important element of the Indian bond market therefore stands reduced to that extent.

Trading in corporate bonds is relatively subdued (in comparison to government securities). Price discovery and trading in this segment is still carried out through the telephone. Attempts at improving the trading, settlement and risk management practices for trading corporate bonds are currently underway.

Trading in other instruments such as securitized debt is relatively scarce. Price discovery and trading in this segment too is through the telephone.

The Floating rate securities market is at a nascent stage in India. The coupon rate in floating rate securities is linked to an acceptable benchmark. Floating rate securities generally have a coupon rate, which is reset over a regular period depending on the benchmark chosen. The market widely uses the MIBOR benchmarks announced by Independent agencies such as NSE and Reuters. When benchmark interest rate rises, the income generated on these floating rate securities also rise. When the benchmark interest rates fall, the income generated on these floating rate securities also fall.

Increasingly more companies are raising resource through floating rate securities. Most of such securities are in the form floating rate debentures at a spread over NSE MIBOR. The Government of India has also started issuing floating rate securities. Such floating rate issuances reduce the interest rate risk of the portfolio in which these securities are held.

FEATURES

i) Borrowing by the Mutual Fund

The Schemes may borrow from anybody - corporate including TAMCO, Sponsor and Commercial Banks, up-to a

maximum of 20% of the net assets of the Scheme for a maximum duration of 6 months, in order to meet the temporary liquidity needs of the Schemes, for the purpose of re-purchase, redemption of units or payment of interest or dividend to the unitholders, as per clause 44(2) of SEBI (Mutual Fund) Regulations, 1996.

ii) Portfolio Turnover

"Portfolio Turnover" is the term used by any Mutual Fund for measuring the amount of trading that occurs in a Scheme's portfolio during the given period. All the schemes being open-ended schemes, it is expected that there would be a number of subscriptions and repurchase on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. However, a high turnover would not significantly affect the brokerage and transaction costs.

The Fund will endeavor to balance the increased cost on account of higher portfolio turnover with the benefits derived thereof. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of arbitrage opportunities that exist for scrips / securities held in the portfolio rather than an indication of a change in Fund view on a scrip, etc.

iii) Investment in Derivative Instruments

The Scheme may invest in derivatives instruments such as Interest Rate Swaps (IRS), Forward Rate Agreements (FRAs) Interest Rate Options and/or Interest Rate Futures (IRF) or such other instruments as may be permitted under the Regulations, in a recognized stock exchange, subject to the frame work specified by SEBI and within the parameters approved by the Trustee company .

The Schemes may use techniques and instruments such as trading in derivative instruments to hedge the risk of fluctuations in the value of the investment portfolio. The Schemes will use derivative instruments for the purpose of hedging and portfolio balancing. Hedging does not mean maximisation of returns but only reduction of systematic or market risk inherent in the investment.

A derivative is an instrument whose value is derived from the value of one or more of the underlying assets which can be commodities, precious metals, bonds, currency, etc. Common examples of Derivative instruments are Interest Rate Swaps, Forward Rate Agreements, Futures, Options, etc. The Scheme may use one or more of the derivative instruments to hedge against a decline in the value of the securities held in the portfolio.

Example 1: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is soft and call rates are unlikely to spurt over the next three months. The fund manager would therefore prefer to receive a higher rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days fixed interest rate from overnight floating rate.

1. Say Notional Amount : ₹ 2 crores
2. Benchmark : NSE MIBOR
3. Tenor : 91 Days
4. Fixed Rate : 10.25%
5. At the end of 91 days;
6. The Scheme pays : compounded call rates for 91 days is 9.90%
7. TMF receives: Fixed rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives ₹ 20000000 x 0.35% x91 / 365 = 17452. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

Interest Rate Swap (IRS)

All swaps are financial contracts, which involves exchange (swap) of a set of payments owned by one party for another set of payments owned by another party, usually through and intermediary (market maker). An IRS can be defined as a contract between two parties (Counter Parties) to exchange, particular dates in the future, one series of cash flow, (fixed interest) for another series of cash flows (variable or floating interest) in the same currency and on the same principal for an agreed period of time. The exchange of cash flows need not occur on the same date.

Forward Rate Agreements (FRA)
A FRA is an agreement between two counter parties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date, based on a notional amount, for an agreed period. In short, in a FRA, interest rate is fixed now for a future period. The special feature of FRAs is that the only payments is the difference between the FRA rate and the Reference rate and hence are single settlement contracts. As in the case of IRS, notional amounts are not exchange.

Interest Rate Futures (IRF)
An Interest Rate Futures contract is "an agreement to buy or sell a debt instrument at a specified future date at a price that is fixed today." The underlying security for Interest Rate Futures is either Government Bond or T-Bill. Currently Exchange traded Interest Rate Futures are standardized contracts based on 6 year, 10 year and 13 year Government of India Security and 91-day Government of India Treasury Bill (91DTB). All futures contracts available for trading are cash settled.

SEBI Regulations applicable to trading in derivatives :

In accordance with SEBI Circular No Cir/IMD/DF/11/2010 dated August 18, 2010, the following exposure limits for investment in derivatives will be applicable to the schemes. These restrictions are general in nature. Some of the clauses mentioned below will not apply to Taurus Liquid Fund (e.g. clauses that deal with equity derivatives) since the scheme does not intend to invest in the said underlying securities.

i) The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the Net Assets of the Schemes.
ii) Schemes shall not write options or purchase instruments with embedded written options.
iii) The total exposure related to option premium paid must not exceed 20% of the Net Assets of the Scheme.
iv) Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.

   b) Hedging position cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point1.
   c) Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
   d) The quantity of underlying associated with the derivative position taken for hedging purpose does not exceed the quantity of the existing position against which hedge has been taken.
vi) Schemes may enter into plan vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
vii) Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point1.
viii) Definition of exposure in case of Derivative Positions
   Each position taken in derivative shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Future Price * Lot Size * Number of Contracts
Short Future	Future Price * Lot Size * Number of Contracts
Option bought	Option Premium paid * Lot Size * Number of Contracts

In accordance with SEBI circular DNPD/Cir-29/2005 dates September 14, 2005 (including circular issued by SEBI/RBI/FEMA and other Regulatory bodies thereafter from time to time). In addition to the above, SEBI vide its circular SEBI/HO/IMD/DF2/CIR/P/2017/109 dated September 27, 2017 has laid down the following guidelines for exposure to Interest Rate Futures (IRF)

Exposure Limits

In addition to the existing provisions of SEBI circular No.IMD/DF/11/2010 dated August 18, 2010, the following are prescribed:

i. To reduce interest rate risk in a debt portfolio, mutual funds may hedge the portfolio or part of the portfolio (including one or more securities) on weighted average modified duration basis by using Interest Rate Futures (IRFs). The maximum extent of short position that may be taken in IRFs to hedge interest rate risk of the portfolio or part of the portfolio is as per the formula given below:

$$\frac{\text{(Portfolio Modified Duration*Market Vale of the Portfolio)}}{\text{(Futures Modified Duration*Futures Price/PAR)}}$$

ii. In case the IRF used for hedging the interest rate risk has different underlying security(s) than the existing position being hedged, it would result in imperfect hedging.

iii. Imperfect hedging using IRFs may be considered to be exempted from the gross exposure, upto maximum of 20% of the net assets of the scheme, subject to the following:

a) Exposure to IRFs is created ***only for hedging*** the interest rate risk based on the weighted average modified duration of the bond portfolio or part of the portfolio.

b) Mutual Funds are permitted to resort to imperfect hedging, without it being considered under the gross exposure limits, if and only if, the correlation between the portfolio or part of the portfolio *(excluding the hedged portions, if any)* and the IRF is atleast 0.9 at the time of initiation of hedge. In case of any subsequent deviation from the correlation

criteria, the same may be rebalanced within 5 working days and if not rebalanced within the timeline, the derivative positions created for hedging shall be considered under the gross exposure computed in terms of Para 3 of SEBI circular dated August 18, 2010. The correlation should be calculated for a period of last 90 days.

Explanation: If the fund manager intends to do imperfect hedging upto 15% of the portfolio using IRFs on weighted average modified duration basis, either of the following conditions need to be complied with:
i. The correlation for past 90 days between the portfolio and the IRF is at least 0.9 or

ii. The correlation for past 90 days between the part of the portfolio (excluding the hedged portions, if any) i.e. at least 15% of the net asset of the scheme (including one or more securities) and the IRF is at least 0.9.

c) At no point of time, the net modified duration of part of the portfolio being hedged should be negative.
d) The portion of imperfect hedging in excess of 20% of the net assets of the scheme should be considered as creating exposure and shall be included in the computation of gross exposure in terms of Para 3 of SEBI circular dated August 18, 2010.

iv. The basic characteristics of the scheme should not be affected by hedging the portfolio or part of the portfolio (including one or more securities) based on the weighted average modified duration.

Explanation: In case of long term bond fund, after hedging the portfolio based on the modified duration of the portfolio, the net modified duration should not be less than the minimum modified duration of the portfolio as required to consider the fund as a long term bond fund.
v. The interest rate hedging of the portfolio should be in the interest of the investors.

4. Mutual Fund schemes may imperfectly hedge their portfolio or part of their portfolio using IRFs, subject to the following conditions:

i. Prior to commencement of imperfect hedging, existing schemes shall comply with the provisions of Regulation 18 (15A) of SEBI (Mutual Funds) Regulations, 1996 and all unit holders shall be given a time-period of at least 30 days to exercise the option to exit at prevailing NAV without charging of exit load.

The risks associated with imperfect hedging shall be disclosed and explained by suitable numerical examples in the offer documents and also needs to be communicated to the investors through public notice or any other form of correspondence.

ii. In case of new schemes, the risks associated with imperfect hedging shall be disclosed and explained by suitable numerical examples in the offer documents.

Disclosure of Derivative Positions
5. In addition to the existing provisions, the mutual funds shall also make the following disclosures:
i. Separately disclose the hedging positions through IRF (both perfectly and imperfectly) in respective debt portfolios as per the format prescribed in para-13 of SEBI circular no.IMD/DF/11/2010 dated August 18, 2010,

ii. Investment in interest rate derivatives (both IRS/IRF) shall also be disclosed in the monthly portfolio disclosure as per para-H of SEBI Circular No. CIR/IMD/DF/21/2012 dated September 13, 2012 and

iii. Disclosure of the details of interest rate derivatives (both IRS/IRF) used for hedging along with debt and money market securities transacted on its website and also forwarded to AMFI as per para-B(3) of SEBI Circular No.Cir/IMD/DF/6/2012 dated February 28, 2012.

RISK MANAGEMENT/ MITIGATION STRATEGIES

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in equity and debt markets. The Fund has identified the following risks of investing in equity and debt instruments and designed risk management strategies to mitigate and manage such risks.

Risk associated with portfolio construction: AMC has incorporated adequate safeguards to manage risks in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. Fund Management team has adequate processes in place for identifying & analyzing the various risk ratios. Various checks have been put in place to adhere to the Investment Restrictions. AMC is using Miles Moneyware Fundware as Front Office System.

Market Liquidity Risk and investment in unlisted securities: Fund Manager would invest in those securities that are expected to have more market liquidity. The first access to liquidity is through cash and fixed income securities. The investment in unlisted securities will be minimal and regularly monitored by Investment Monitoring Committee.

Quality Risk or risk of investing in unsustainable/ weak companies: Investment universe is carefully selected to only include high quality businesses.

Concentration Risk: Investment will be made as far as possible across the market capitalization spectrum and industries/sectors keeping the Investment Objective of the Scheme in view.

Credit Rating Risk: The endeavor is to invest in fixed income securities which have high credit quality and preferably have high rating from rating agencies such as CRISIL, ICRA, CARE or India Ratings & Research. The probability of rating downgrade is low.The due diligence performed by the fund management team before assigning credit limits should mitigate company specific issues.

Interest Rate Risk: Interest rate risk is managed by meticulous determination of average maturity of the portfolio. Extensive analysis of macro economic conditions is carried out to form a view of future interest rates and to position the portfolio accordingly.

Risk associated with Stock Lending: At present, there is no significant activity in the Securities Borrowing and Lending market. The Fund has so far not participated in Securities Lending market. However, we understand the risks associated with the securities lending business and the AMC will have appropriate controls (including limits) before initiating any transactions.

Procedure followed for investment decisions & Risk control measures (Applicable to Liquid scheme)

The Indian debt market is in a phase of rapid transformation with liquidity and investment opportunities arising in various debt segments along with the introduction of new instruments. The fund manager will try to allocate assets of the scheme between various fixed income securities with the objective of achieving optimal risk adjusted returns. After doing a thorough research on the general macroeconomic condition, political environment, systemic liquidity, inflationary expectations, corporate performance and other economic considerations the portfolio duration and credit exposures will be decided.

The AMC has an internal policy for selection of assets of the portfolio. The portfolio is constructed taking into account ratings from different rating agencies, rating migration, credit premium over the price of a sovereign security, general macro economic conditions affecting liquidity and interest rates and such other criteria. Such an internal policy from time to time lays down maximum/minimum exposure for different ratings, norms for investing in unrated paper, liquidity norms, and so on. Through such norms, the Scheme is expected to maintain a high quality portfolio and manage credit risk well. Investments may be made in instruments, which, in the opinion of the Fund Manager, are of an acceptable credit risk and chance of default is minimum. The Fund Manager will normally invest in those debt securities that are rated investment grade by a domestic credit rating agency such as CRISIL, ICRA, CARE, FITCH etc. The Fund Manager will generally be guided by, but not restrained by, the ratings announced by various rating agencies on the assets in the portfolio.

The Board of TAMCO has also constituted an Investment Monitoring Committee comprising of two Independent Directors and Managing Director of the Company. Investment Monitoring Committee Meeting is held every month and reviews Investments/disinvestments made since last meeting, Research Reports etc.

AMC has incorporated adequate safeguards to manage risks in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. Fund Management team has adequate processes in place for identifying & analyzing the various risk ratios. Various checks have been put in place to adhere to the Investment Restrictions. AMC is using Miles Moneyware Fundware as Front Office System.

There is no minimum amount prescribed for dividend amount sweep to the Target Scheme via DSO. Accordingly, the provision for 'Minimum Application Amount' specified in the respective Target Scheme's SID will not be applicable for investment made via DSO. 1. Under the Dividend Sweep Option (DSO), the investors may opt to automatically transfer (invest) the net dividend amount (i.e., net of statutory levy / taxes, if any) payable under the Scheme (hereinafter referred to as "Source Scheme") into any other scheme (hereinafter referred to as "Target Scheme") of Taurus MutualFund on the ex-dividend date (i.e., the immediate next business day after the Record Date) into the Target Scheme specified by the investor, at the applicableNAV of the Target Scheme and accordingly applicable number of units will be allotted in the Target Scheme, subject to the terms and conditions of the respectiveTarget Scheme. 2. Consequently, any dividend declared between the date of acceptance of theDSO Enrollment Form and date of registration thereof by the Registrar will be paid out or reinvested in the Source Scheme, as applicable. 9. Unit holders will have the right to opt out of DSO facility at any time by submitting a written request. It is expressly clarified that the dividends so swept and invested in Target Scheme shall be constructive payment of dividends to the Unit holder/s and constructive receipt of the same amount from each Unit holder for investment in units of Target Scheme. It is further clarified that the dividend amount transferred would be treated as switch-in / subscription transaction in the Target Scheme and will be liable to PAN and KYC provisions, as may be applicable. 13. TMF is not guaranteeing or assuring any dividend under any of the schemes. All dividend distributions are subject to investment performance of the respective schemes, availability of distributable surplus and at the discretion of the Trustee. 14. The AMC reserves the right to change/ modify the terms and conditions of the DSO without prior notice or without assigning any reason thereof. In case of ongoing subscription, this period of 5 working days will be computed from the later of the date of credit of funds or receipt & time-stamping of the application/online transaction. In the event of delay beyond 5 working days, interest @ 15% pa shall be payable from the day following the 5th working day till the date of actual remittance/credit of funds in the investor's bank account or dispatch of the warrant. iv) 1) There could be a scenario where after the initial delayed payment (+interest) is made as per i), ii) & iii) above, the investor comes back with 'funds not received' request, owing to some error at AMC/RTA's end. In such a case, the 'fresh' payment should be made with no further interest added, provided the payment/dispatch date of 'fresh' amount is within the maximum days permitted for the initial payment (Maximum Initial Payment Date - MIPD) viz. 10 working days (Redemption)/30 calendar days (Dividend)/5 working days (refund of Subscription). However, if there is a delay beyond the MIPD, then – a) Interest @ 15% pa will be computed for actual no. of calendar days beyond MIPD till date of issuance/payment provided the investor has approached the AMC/RTA (for correction) within 30 days from the date of receipt (issuance date, in case of an instrument) of the initial delayed payment. b) If, however, such correction request is received after 30 days, then interest may be paid for a maximum of 30 days from the date of receipt (issuance date) of the initial payment. iv)2) If the request for correction is received from the investor without any error on the part of AMC/RTA, no interest shall be payable, provided the corrected instrument/instruction is issued by AMC/RTA with the MIPD or 10 working days from the date of receipt of the request for correction, whichever is later. For any delay beyond such date, interest shall be payable @ 15% pa till the date of actual payment, based on the number of calendar days. Some more details regarding the above – 1) If the interest so computed is less than ₹ 1, then it should be rounded up to ₹ 1 and paid. 2) The interest amount should be paid simultaneously on the same date on which the corrected amount is issued/paid.

Restrictions, if any, on the right to freely retain or dispose of units being offered.	**Right to Limit Purchase & Redemptions** The Trustee may, in the general interest of the Unit Holders of the Scheme and when considered appropriate to do so based on unforeseen circumstances / unusual market conditions, limit the total number of Units which may be redeemed on any Business Day to 5% of the total number of Units then in issue, under the Scheme and option(s) thereof, or such other percentage as the Trustee may determine. Any Units which consequently are not redeemed on a particular Business Day, will be carried forward for Redemption to the next Business Day, in order of receipt. Redemptions so carried forward will be priced on the basis of the Applicable NAV (subject to the prevailing Load) of the Business Day on which Redemption is made. Under such circumstances, to the extent multiple Redemption requests are received at the same time on a single Business Day, redemptions will be made on a pro-rata basis, based on the size of each Redemption request, the balance amount being carried forward for Redemption to the next Business Day. Pursuant to SEBI Circular No. SEBI/HO/IMD/DF2/CIR/P/2016/57 dated May 31, 2016 the redemption/ purchase may be restricted under any Schemes of Taurus Mutual Fund only after the approval of Board of Taurus Asset Management Company Limited (TAMCO) and the Board of Taurus Investment Trust Company Limited (TITCO) when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the effective functioning of markets such as: i. Such cases can only be considered if they are reasonably unpredictable and occur in spite of appropriate diligence of third parties, adequate and effective disaster recovery procedures and systems. Restriction on redemption may be imposed for a specified period of time not exceeding 10 working days in any 90 days period. The following procedure shall be followed when restriction on redemption is imposed: i. No restriction would be imposed on redemption requests upto INR 2 lakhs Where redemption requests are above INR 2 lakhs, TAMCO shall redeem the first INR 2 lakh without such restriction and the remaining part over and above INR 2 lakhs would be subject to the restriction imposed.

Illustration of Impact of expense ratio on scheme's returns

To see how expense ratios can affect the investments over time, let's compare the returns of several hypothetical investments that differ only in expense ratio. The following table depicts the returns on Rs10, 000 initial investment, assuming an average annualized gain of 10%, with different expense ratios (0.50%, 1%, 1.50%, 2%):

		Expenses Ratio			
Year	**10% Gain (₹)**	**0.50%**	**1.00%**	**1.50%**	**2.00%**
0	10000.00	10000.00	10000.00	10000.00	10000.00
1	11000.00	10950.00	10900.00	10850.00	10800.00
2	12100.00	11990.50	11881.50	11773.00	11668.00
3	13310.00	13129.00	12951.92	12775.33	12610.00
4	14641.00	14375.00	14116.00	13874.00	13632.00
5	16105.10	15739.00	15386.00	15064.00	14742.00
	Less Received	366.1	719.1	1041.1	1363.1
	Less (Percentage)	2.27	4.47	6.46	8.46

If an investor had invested ₹10,000 in the scheme with a 2.00% expense ratio, the value of the investment would be ₹14742 after 5 years. Whereas, if the investor had invested ₹ 10,000 in a scheme with 0.50% expense ratio, the investment would be worth ₹ 15739 after 5 years.
