I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down
- Mutual Funds and securities investments are subject to market risks and there can be no assurance and no guarantee that the Scheme will achieve its objective.
- As with any investment in stocks, shares and securities, the NAV of the Units under this Scheme can go up or down, depending on the factors and forces affecting the capital markets.
- Past performance of the previous Schemes, the Sponsors or its Group / Affiliates / AMC / Mutual Fund is not indicative of and does not guarantee the future performance of the Scheme.
- The scheme may invest in long term debt securities which bears the interest rate risk. Volatility of interest rate may impact the scheme adversely
- The sponsors are not responsible or liable for any loss resulting from the operations of the scheme beyond the initial contribution of Rs. 1 lakh made by them towards setting up of the mutual fund.
- Tata Fixed Maturity Plan Series 36 Scheme A, Tata Fixed Maturity Plan Series 36 Scheme B, Tata Fixed Maturity Plan Series 36 Scheme C are only the names of the Scheme and does not in any manner indicate either the quality of the Scheme, its future prospects or the returns. Investors therefore are urged to study the terms of the Offer carefully and consult their tax and Investment Advisor before they invest in the Scheme.
- The present scheme is not a guaranteed or assured return scheme.

Scheme Specific Risk Factors:

Risk Factors With Respect To Listing Of The Scheme

- Buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/broker, payment of brokerage, securities transactions tax and such other costs.
- Trading in scheme could be restricted due to which market price may or may not reflect the true NAV of the scheme at any point of time. Also there can be no assurance that an active secondary market will develop or be maintained for the units of the Scheme.
- The market price of the units, like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the unit (or NAV), and (2) demand and supply of units in the market. Sizeable demand or supply of the units in Exchange may lead to market price of the units to quote at premium or discount to NAV.
- Where units are issued or later on converted in demat form through depositories, the records of the depository will be final with respect to the number of units available to the credit of unit holder. Settlement of trades, repurchase of units by the mutual fund upon maturity depends up on the confirmations to be received from depository (ies) on which the mutual fund has no control.
- Any change in Tax Laws applicable to mutual funds may affect the returns to the investor.

There are no assured or guaranteed returns under the scheme. Under no circumstances investors can claim/demand minimum returns under the scheme from Tata Asset Management Limited or Tata Trustee Company Limited or any of its directors or employees or agents/distributors of Tata Mutual fund. The returns of the investors will be depending upon the yield of the underlying portfolio which is subject to various risks mentioned in the Scheme Information Document.

Notwithstanding anything contained in the SID the provisions of SEBI (Mutual Funds) Regulations 1996 and guidelines thereunder shall be applicable. The Trustee Company would be required to adopt / follow any regulatory changes by SEBI / RBI etc and /or all circulars / guidelines received from AMFI from time to time if and from the date as applicable. The Trustee Company in such a case would be obliged to modify / alter any provisions / terms of the SID during / after the launch of the scheme by following the prescribed procedures in this regard.

Liquidity and Settlement Risks

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. From time to time, the Scheme will invest in certain securities of certain companies, industries, sectors, etc. based on certain investment parameters as adopted internally by TAML. While at all times the Asset Management Company will endeavour that excessive holding/investment in certain securities of

industries, sectors, etc. by the Scheme is avoided, the funds invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or during restructuring of the Scheme's investment portfolio.

Investment Risks

The value of, and income from, an investment in the Scheme can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Scheme's investment objective will be attained or that the Scheme be in a position to maintain the model percentage of investment pattern particularly under exceptional circumstances.

Different types of securities in which the scheme would invest in the SID carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

The scheme may use techniques and instruments for efficient portfolio management and to attempt to hedge or reduce the risk of such fluctuations. However these techniques and instruments if imperfectly used have the risk of the scheme incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any). The use of these techniques is dependent on the ability to predict movements in the prices of securities being hedged and movements in interest rates. There exists an imperfect correlation between the hedging instruments and the securities or market sectors being hedged. Besides, the fact that skills needed to use these instruments are different from those needed to select the Fund's / Scheme's securities. There is a possible absence of a liquid market for any particular instrument at any particular time even though the futures and options may be bought and sold on an organised exchange. The use of these techniques involves possible impediments to effective portfolio management or the ability to meet repurchase / redemption requests or other short-term obligations because of the percentage of the Scheme's assets segregated to cover its obligations.

Securities Lending Risks

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there is also be temporary illiquidity of the securities that are lent out and the scheme will not be able to sell such lent out securities until they are returned.

Interest Rate Risk

As with debt instruments, changes in interest rate may affect the Scheme's net asset value. Generally the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the schemes are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Risks associated with Derivatives

- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments".

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme(s) and individual Plan(s) under the Scheme(s) shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme(s)/Plan(s). These conditions will be complied with immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfillment with the condition of minimum 20 investors, the Scheme(s)/Plan(s) shall be wound up in accordance with Regulation 39 (2) (c) of SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25%

holding by a single investor on the date of allotment, the application to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within five business days from the date of closure of the New Fund Offer.

C. SPECIAL CONSIDERATIONS

Investors are urged to study the terms of the SID carefully before investing in this Scheme, and to retain this SID for future reference. The Mutual Fund may disclose details of the investor's account and transactions there under to those intermediaries whose stamp appears on the application form or who have been designated as such by the investor. In addition, the Mutual Fund may disclose such details to the bankers, as may be necessary for the purpose of effecting payments to the investor. The Fund may also disclose such details to regulatory and statutory authorities/bodies as may be required or necessary.

Pursuant to the provisions of Prevention of Money Laundering Act, 2002, if after due diligence, the AMC believes that any transaction is suspicious in nature as regards money laundering, on failure to provide required documentation, information, etc. by the unit holder the AMC shall have absolute discretion to report such suspicious transactions to FIU IND and / or to freeze the folios of the investor(s), reject any application(s) / allotment of units.

Tax Consequences

Redemption by the unit holders due to change in the fundamental attribute (if any, in future) of the scheme or due to any other reason may entail tax consequences for which the Trustees, AMC, Fund their Directors / employees shall not be liable.

II. INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

A close ended debt scheme.

B. INVESTMENT OBJECTIVE OF THE SCHEME

The investment objective of each scheme is to generate income and / or capital appreciation by investing in wide range of Debt and Money Market instruments having maturity in line with the maturity of the respective schemes. The maturity of all investments shall be equal to or less than the maturity of respective schemes.

C. ASSET ALLOCATION AND RISK PROFILE

Under normal circumstances, funds of the Scheme, shall (after providing for all ongoing expenses) generally be invested / the indicative asset allocation shall be as follows considering the objective of the Scheme:

Scheme A (370 days maturity)

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Maximum	Minimum	High/Medium/Low
Debt and Money Market Instruments	100	0	Medium to Low

Scheme B and Scheme C (maturity ranging between 01 to 18 months)

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Maximum	Minimum	High/Medium/Low
Debt and Money Market Instruments	100	0	Medium to Low

No investments would be made in domestic & foreign securitised debt.

Each scheme will have a separate portfolio.

Not more than 25% of the net assets of the scheme shall be deployed in securities lending. The Scheme would limit its exposure, with regards to securities lending, for a single intermediary, to the extent of 5% of the total net assets of the scheme at the time of lending.

The Scheme will have maximum derivative gross notional position of 50% of the net assets of the scheme. Investment in derivative instrument may be done for hedging and portfolio balancing.

For calculation of Gross Derivative Exposure, all types of derivative exposure i.e. long and short term will be aggregated. The aggregate exposure to Debt Instruments, Gross Derivative Exposure and Money Market instruments (excluding CBLO, REPO and others cash equivalents instruments) will not exceed 100% of the net assets of scheme.

The asset allocation among the various debt securities will be decided based upon the prevailing market conditions, macro economic environment and the performance of corporate sector, the debt market and other considerations.

The investment policies mentioned in this SID are in conformity with the provisions of various constitutional documents VIZ.MOA/AOA of the TAML/Trustee Company, IMA and the Trust Deed. Any change in the asset allocation affecting the investment profile of the scheme shall be effected only in accordance with the provisions of regulations 18-15A of SEBI (Mutual Funds) Regulations, 1996.

Overview of Debt Market:

The major players in the Indian Debt Markets are today are banks, financial institutions, insurance companies and mutual funds. The instruments in the market can be broadly categorized as those issued by corporate, banks, financial institutions and those issued by state/central governments. The risk associated with any investments are – credit risk, interest rate risk and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The liquidity risk in corporate securities market is higher compared to those of government securities. Liquidity in the corporate debt market has been improving due to the entry of more players and due to various measures taken by the regulators in this direction over a period of time. SEBI's directive of a compulsory rating by a rating agency for any [public issuance over 18 months is a case in point. In times to come, dematerialization, entry of private insurance companies and growth of fixed income mutual funds are expected to enhance liquidity in corporate debt market.

D. WHERE WILL THE SCHEME INVEST

The funds available under the Schemes will be invested primarily in securities such as

- Money Market Instruments like Commercial Paper, Certificate of Deposit, Treasury Bills and short term debt instruments etc. issued by various Corporates, Government - State or Central, Public Sector Undertakings,
- Non convertible portion of Convertible Debentures (Khokas), Non Convertible Debentures,
- Zero Interest Bonds, Deep Discount Bonds, Floating Rate Bonds/Notes,
- Government Securities,
- Derivative instruments like interest rate swaps, forward rate agreement, interest rate futures and such other derivative instruments as permitted by SEBI / RBI from time to time.

The above list is illustrative and not the exhaustive and may include other fixed income/debt securities as may be available /introduced in the market.

The securities mentioned above and such other securities, the Scheme is permitted to invest could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of maturity which is less than or equal to maturity of a scheme. The securities may be acquired through Initial Public Offerings (IPOs), secondary market operations, private placement, rights offers or negotiated deals. Notwithstanding the aforesaid, the proportion of investment in privately placed debentures and other unquoted debt instruments could be increased by the Trustee Company / Asset Management company to around 100% of the total assets / Funds available of the Scheme. For the possible impact on liquidity of the Scheme, which might be experienced due to investment of around 100% in privately placed debentures and other unquoted debt instruments, please refer to the Clause "Compulsory redemption / Redemption" and also to the Clause on "Liquidity & Settlement Risks" under Specific Risk Factors. The moneys collected under this Scheme shall be invested only in transferable securities in the money market or in the capital / debt market or in privately placed debentures or securitised debts or in Government securities.

Investment in Derivatives: The Scheme will have maximum Derivative Gross Notional Position of 50% of the net assets of the scheme. Investment in derivative instrument may be done for hedging and portfolio balancing. For calculation of Gross Derivative Exposure, all types of derivative exposure i.e. long and short term will be aggregated.

Securities in Lending: The Scheme may deploy funds of the scheme in securities lending.

Not more than 25% of the assets of scheme shall be deployed in securities lending. The Scheme would limit its exposure, with regards to securities lending, for a single intermediary, to the extent of 5% of the total net assets of the scheme at the time of lending.

As per SEBI (Mutual Fund) Regulations 1996,, the Scheme shall not make any investments in any un-listed securities of associate / group companies of the Sponsors. The Fund will also not make investment in privately placed securities issued by associate / group companies of the Sponsor. The Scheme may invest not more than 25% of the net assets in listed securities of Group companies. The Scheme may invest subscription money received from the investing public before close of the New Fund Offer period and /or pending allotment of Units, in money market instrument or in fixed deposits with schedule commercial banks as per SEBI regulations. In addition, TAML on being satisfied or receipt of the minimum subscription amount can commence investment out of the funds received, in accordance with the investment objective of the scheme,. Income earned (net of expenses) during the period prior to the date of allotment on units shall be merged with the income of the scheme on completion of the allotment of the Units. In the event of non receipt of the minimum subscription amount, the Trustee Company shall ensure that the entire amount collected as subscription money is refunded to the Unitholders notwithstanding any loss arising out of such investment during the interim period.

E. THE INVESTMENT STRATEGIES

The scheme is a close ended debt fund and its objective is to generate income and / or capital appreciation by investing in portfolio of Debt and Money Market instruments normally matures on or before the date of the maturity of the scheme .For the purpose of achieving the investment objective, each Scheme under the fund will invest in a portfolio of securities normally having maturity on or before the date of the maturity of the respective Schemes.

The Schemes would invest in debt securities of companies based on various criteria like sound professional management, Sound track record, industry scenario, growth prospects, liquidity of the securities, etc. The Scheme will emphasise on well managed, good quality companies with above average growth prospects whose securities can be purchased at a good yield and whose debt securities are rated above the Investment grade by a recognised authority like The Credit Rating and Information Services of India Limited (CRISIL), ICRA Limited, Credit Analysis and Research Limited (CARE) etc. In case of investments in debt instruments that are not rated, specific approval of the Board will be taken except in case of Government Securities being sovereign bonds. However, in case of investment in unrated securities prior board approval is not necessary if investment is within the parameters as stipulated by the board.

Under normal circumstances, up to 100 % of the fund will be invested in Debt and Money Market instruments

Risk Mitigation measures for Debt and related Investments:

Type of Risk	Measures to mitigate risk
Liquidity Risk	- Focus on good quality paper at the time of portfolio construction - Portfolio exposure spread over various maturity buckets to inline with maturity of a scheme.
Credit Risk	- In house dedicated team for credit appraisal - Issuer wise exposure limit - Rating grade wise exposure limit - Independent rating of scheme portfolio by recognized rating agency. - Periodical portfolio review by the Board of AMC
Interest Rate Risk	- Close watch on the market events - Active duration management - Cap on Average Portfolio maturity depending upon the scheme objective and strategy - Portfolio exposure spread over various maturities.
Regulatory Risk	Online monitoring of various exposure limits by the Front Office System also as a back up, manual control are implemented.

Trading in Derivatives

Subject to SEBI (Mutual Fund) Regulations, 1996, the Scheme may use techniques and instruments such as trading in derivative instruments to hedge the risk of fluctuations in the value of the investment portfolio. The Scheme shall enter into derivative transactions for the purpose of hedging and portfolio balancing. In accordance with the guidelines issued by the SEBI. The Scheme will have maximum derivative gross notional position of 50% of the net assets of the scheme. Investment in derivative instrument may be done for hedging and portfolio balancing. For calculation of Gross Derivative Exposure, all types of derivative exposure i.e. long and short term will be aggregated.

A derivative is an instrument whose value is derived from the value of one or more of the underlying assets which can be commodities, precious metals, bonds, currency, etc. Common examples of Derivative instruments are Interest Rate Swaps, Forward Rate Agreements

The scheme may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements or such other derivative instruments as may be introduced from time to time and as may be permitted under the SEBI (Mutual Fund) Regulations.

With effect from October 01, 2010 exposure to derivative shall be subject to following exposure limits as specified by SEBI vide its Circular no Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010 is given below:

- The cumulative gross exposure through debt and derivative positions shall not exceed 100% of the net assets of the scheme.
- The Mutual Fund shall not write options or purchase instruments with embedded written options.
- The total exposure related to option premium paid shall not exceed 20% of the net assets of the scheme.
- Cash or cash equivalents with residual maturity of less than 91 days will be treated as not creating any exposure.
- Exposure due to hedging positions shall not be included in the above mentioned limits subject to the following
 - Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - Hedging positions cannot be taken for existing derivative positions.
 - Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
- The Mutual Fund may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions shall be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases shall not exceed the value of respective existing assets being hedged by the scheme.
- Exposure to a single counterparty in such transactions shall not exceed 10% of the net assets of the scheme.

Interest Rate Swaps: An Interest Rate Swap is an agreement whereby two parties agree to exchange periodic interest payments. The amount of interest payments exchanged is based on some predetermined principal, called notional principal amount. The amount each counterparty pays to the other upon periodic interest rate multiplied by the notional principal amount. The only amount that is exchanged between the parties is the interest payment, not the notional principal amount.

Example A: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is bearish and call rates are likely to spurt over the next three months. The fund manager would therefore prefer to pay fixed rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days floating interest rate from overnight fixed rate.

1. Say Notional Amount: Rs. 2 crores
2. Benchmark: NSE MIBOR
3. Tenor: 91 Days
4. Fixed Rate: 9.90%
5. At the end of 91 days;
6. The Scheme pays: fixed rates for 91 days is 9.90%
7. TMF receives: compounded call rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives Rs. 2, 00, 00,000 x 0.35% x91 / 365 = 17,452. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

The Schemes of the fund are in cash, and the view of the fund manager is interest rates are expected to move down due to certain positive events which have occurred. In such cases the Schemes can enter into a received position (IRS) where the Schemes will receive a fixed rate for a specified maturity and pay the floating rate of interest. This is illustrated below.

Example B: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is soft and call rates are unlikely to spurt over the next three months. The fund manager would therefore prefer to receive a higher rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days fixed interest rate from overnight floating rate.

1. Say Notional Amount : Rs. 2 crores
2. Benchmark : NSE MIBOR
3. Tenor : 91 Days
4. Fixed Rate: 10.25%
5. At the end of 91 days;
6. The Scheme pays: compounded call rates for 91 days is 9.90%
7. TMF receives : Fixed rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives Rs. 2,00,00,000 x 0.35% x91 / 365 = 17,452. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

Forward Rate Agreements (FRA):

This is an agreement between two counterparties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date based on the notional amount, for an agreed period.

The interest rate benchmarks that are commonly used for floating rate in interest rate swaps are those on various Money Market Instruments. In Indian markets, the benchmark most commonly used is MIBOR.

The Schemes of the fund are reasonably invested, and the view of the fund manager is interest rates are expected to move up due to certain negative events which are expected to occur at a specified future date. In such cases the Schemes can enter into a paid position (FRA) at a specified date in the future where the Schemes will pay a fixed rate for a specified maturity and receive the floating rate of interest at a specified future date. This is illustrated below.

Example 1: Use of FRA

The fund Manager believes in 3 months time the interest rates will be higher and decides to enter into an FRA agreement 3x9 to protect the portfolio return. Say the manager wants to hedge 10% of the portfolio which is for the notional amount of Rs 2 crores where the bank agrees to pay 6% fixed, in case the 6 month OIS rate is greater than 6% the bank will pay the difference to the portfolio manager 3 months. Hence for 6 months say 3 months hence the OIS rate for six months is 6.50%

This like IRS is cash settled and the bank at the end of three months will pay the portfolio manager the following $(6.50-6.00) \times 181 \times 200,000,00 / (365 \times 100 + 6.50 \times 181) = \text{Rs } 48040.55$ for six months.

The Schemes of the fund are in cash, and the view of the fund manager is interest rates are expected to move down due to certain positive events which are expected to occur at a specified future date. In such cases the Schemes can enter into a received position (FRA) at a specified date in the future where the Schemes will receive a fixed rate for a specified maturity and pay the floating rate of interest at a specified future date. This is illustrated below.

Example 2: Use of FRA

The fund Manager believes in 3 months time the interest rates will be lower and decides to enter into an FRA agreement 3x9 to protect the portfolio return. Say the manager wants to hedge 10% of the portfolio which is for the notional amount of Rs 2 crores where the bank agrees to pay 6% fixed, in case the 6 month OIS rate is less than 6% the bank will pay the difference to the portfolio manager 3 months hence for 6 months say 3 months hence the OIS rate for six months is 5.50%

This like IRS is cash settled and the bank at the end of three months will pay the portfolio manager the following $(6.00-5.50) \times 181 \times 200,000,00 / (365 \times 100 + 5.50 \times 181) = \text{Rs } 48272.76$ for six months

Risks associated with Derivatives

- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments".

Portfolio Turnover

Since all the schemes are close ended schemes the portfolio turnover is expected to be low.

F. FUNDAMENTAL ATTRIBUTES

Following are the Fundamental Attributes of the scheme, in terms of Regulation 18 (15A) of the SEBI (MF) Regulations:

(i) Type of a scheme

A close ended Debt fund comprising of three schemes.

The maturity of all investments shall be equal to or less than the maturity of respective schemes.

Investment Pattern and Risk Profile:

Under normal circumstances, funds of the Scheme, shall (after providing for all ongoing expenses) generally be invested / the indicative asset allocation shall be as follows considering the objective of the Scheme:

Scheme A (370 days maturity)

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Maximum	Minimum	
Debt and Money Market Instruments	100	0	Medium to Low

Scheme B and Scheme C (maturity ranging between 01 to 18 months)

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Maximum	Minimum	
Debt and Money Market Instruments	100	0	Medium to Low

The Scheme will have maximum derivative gross notional position of 50% of the net assets of the scheme. Investment in derivative instrument may be done for hedging and portfolio balancing.

For calculation of Gross Derivative Exposure, all types of derivative exposure i.e. long and short term will be aggregated. The aggregate exposure to debt instruments, gross derivative exposure and money market instruments (excluding CBLO, REPO and others cash equivalents instruments) will not exceed 100% of the net assets of scheme.

No investments would be made in domestic & foreign securitised debt.

(iii) Terms of Issue

Liquidity: The Fund will not repurchase the units issued under the scheme till the maturity of the scheme. However, in order to provide the liquidity to the investors, the Units of the scheme are proposed to be listed on the BSE (In principle approval from BSE has been obtained vide letter dated 21.02.2011) as soon as possible from the date of allotment so that units of the scheme can be sold / transferred in the secondary market.

Aggregate fees and expenses charged to the scheme – Please refer section “IV FEES AND EXPENSES” for details.

In accordance with Regulation 18(15A) of the SEBI (MF) Regulations, the Trustees shall ensure that no change in the fundamental attributes of the Scheme(s) and the Plan(s) / Option(s) thereunder or the trust or fee and expenses payable or any other change which would modify the Scheme(s) and the Plan(s) / Option(s) thereunder and affect the interests of Unitholders is carried out unless:

- A written communication about the proposed change is sent to each Unitholder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
- The Unitholders are given an option for a period of 30 days to exit at the prevailing Net Asset Value without any exit load.

The new fund offer expenses will be borne by the AMC.

G. SCHEME BENCHMARK

For Scheme A,: Crisil Short Term Bond Index:

For Scheme B & C:

The Schemes having maturity between 01 to 12 months from the date of allotment: **Crisil Liquid Fund Index**

The schemes having a maturity of more than 12 months upto 18 months from the date of allotment: **Crisil Short Term Bond Fund Index**

The composition of the aforesaid benchmark is such that, they are most suited for comparing performance of the respective plans. The Trustees may change the benchmark in future if a benchmark better suited to the investment objective of the scheme is available.

I. Restrictions on Investments (as per seventh schedule of SEBI {Mutual Fund} Regulations 1996)

1. A mutual fund scheme shall not invest more than 15% of its NAV in debt instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorised to carry out such activity under the Act. Such investment limit may be extended to 20% of the NAV of the scheme with the prior approval of the Board of Trustees and the Board of Asset Management Company.

Provided that such limit shall not be applicable for investments in government securities.

Provided further that investment within such limit can be made in mortgaged backed securitised debts which are rated not below investment grade by a credit rating agency registered with SEBI.

- 1A. A mutual fund scheme shall not invest more than 10% of its NAV in unrated debt instruments issued by a single issuer and the total investment in such instruments shall not exceed 25% of the NAV of the scheme. All such investments shall be made with the prior approval of the Board of Trustees and the board of asset Management Company.
- 1B. No mutual fund scheme shall invest more than thirty percent of its net assets in money market instruments of an issuer:
Provided that such limit shall not be applicable for investments in Government securities, treasury bills and collateralized borrowing and lending obligations.
Debentures irrespective of any residual maturity period (above or below 1 year) shall attract the investment restrictions as applicable for debt instruments as specified under clause 1, 1A and 1B above.

2. Transfers of investments from one scheme to another scheme in the same mutual fund shall be allowed only if:-
(a) such transfers are done at the prevailing market price for quoted instruments on spot basis.
Explanation- "spot basis" shall have same meaning as specified by stock exchange for spot transactions.
(b) the securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made.
3. A scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate interscheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund.

Provided that this clause shall not apply to any fund of funds scheme.

4. Every mutual fund shall buy and sell securities on the basis of deliveries and shall in all cases of purchases, take delivery of relevant securities and in all cases of sale, deliver the securities:
Provided that a mutual fund may engage in short selling of securities in accordance with the framework relating to short selling and securities lending and borrowing specified by the SEBI:
Provided further that a mutual fund may enter into derivatives transactions in a recognized stock exchange, subject to the framework specified by the SEBI.
5. Every mutual fund shall, get the securities purchased or transferred in the name of the mutual fund on account of the concerned scheme, wherever investments are intended to be of long term nature.
6. Pending deployment of funds of a scheme in terms of investment objectives of the scheme, a mutual fund may invest them in short term deposits of schedule commercial banks, subject to such Guidelines as may be specified by the SEBI."

7. No mutual fund scheme shall make any investment in;
- any unlisted security of an associate or group company of the sponsor; or
 - any security issued by way of private placement by an associate or group company of the sponsor; or
 - the listed securities of group companies of the sponsor which is in excess of 25% of the net assets of the schemes.
- 8) No scheme of a mutual fund shall make any investment in any fund of fund scheme.

These investment limitations / parameters (as expressed / linked to the net asset / net asset value / capital) shall in the ordinary course apply as at the date of the most recent transaction or commitment to invest, and changes do not have to be effected merely because, owing to appreciations or depreciations in value, or by reason of the receipt of any rights, bonuses or benefits in the nature of capital or of any scheme of arrangement or for amalgamation, reconstruction or exchange, or at any repayment or redemption or other reason outside the control of the Fund, any such limits would thereby be breached. If these limits are exceeded for reasons beyond its control, TAML shall adopt as a priority objective the remedying of that situation, taking due account of the interests of the Unitholders.

In addition, certain investment parameters (like limits on exposure to Sectors, Industries, Companies, etc.) may be adopted internally by TAML, and amended from time to time, to ensure appropriate diversification / security for the Fund. The Trustee Company / TAML may alter these above stated limitations from time to time, and also to the extent the SEBI (Mutual Funds) Regulations, 1996 change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its investment objective. As such all investments of the Scheme will be made in accordance with SEBI (Mutual Funds) Regulations, 1996, including Schedule VII thereof.

Investment by the Fund and the Asset Management Company

According to the Clause 4 of Schedule 7 read with Regulation 44(1), of the SEBI (MF) Regulations, 1996, the scheme may invest in another scheme/plan/fund under the management of TAML or any other mutual fund without charging any fees. The aggregate inter-scheme investments made by all schemes/plans/funds under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund.

TAML (the AMC) may invest in the scheme(s)/plan(s)/fund(s), either in the initial issue or on an ongoing basis (from the secondary market), such amount, as they deem appropriate. The AMC shall not be entitled to charge any management fees on this investment in the scheme(s) / plan(s) / fund(s). Investments by the AMC will be in accordance with Regulation 24(3) of the SEBI (MF) Regulations, 1996.

Securities Lending by the Mutual Fund

Subject to the SEBI Regulations as applicable from time to time the Fund may, if the Trustee permits, engage in Stock Lending. Stock Lending means the lending of securities to another person or entity for a fixed period of time at a negotiated compensation in order to enhance returns of the scheme portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period. The AMC will adhere to the following strict internal limits should it engage in Stock Lending.

Not more than 25% of the net assets of the scheme can generally be deployed in stock lending and not more than 5% of the scheme can be can be deployed in Stock lending to any single counterparty. Collateral would always be obtained by the approved intermediary. Collateral value would always be more than the value of the security lent. Collateral can be in form of cash, bank guarantee, and government securities, as may be agreed upon with the approved intermediary, and would also be subject to a mark to market valuation on a daily basis.

Example:

A fund has a NCD (Non Convertible Debentures) of a company which it would wish to hold for a long period of time as a core holding in the portfolio as per the fund manager's plan. In that case the investors would be benefited only to the extent of the rise in the value of the NCD, from time to time if any, on the exchange. If the fund is enabled to lend the said security to a borrower who would be wanting to take advantage of the market fluctuations in its price, the borrower would return the security to the lender (scheme) at a stipulated time or on demand for a negotiated compensation. The fund's unitholders can enhance their returns to the extent of the compensation it will earn for lending the same. An adequate security or collateral will have to be maintained by the intermediary. This should always be higher than the cost of the security. Thus it is in the interest of the investors that returns can be enhanced by way of stock lending rather than hold the security only for capital appreciation potential.

Thus the scenario under which the fund would participate in stock lending would be:

- There is a holding of security eg 10,000 NCD of XYZ Ltd in the fund which the fund manager wants to be the core holding of the scheme for approximately 6 to 12 months.
- There is a borrower (not mutual fund) for the security, (who has taken a short position in the market and needs XYZ Ltd NCD to settle it) who is willing to put up a proper collateral for the same.(In all cases higher than the price of the script).
- The borrower is represented by a proper recognized intermediary.
- The agreement is to return the security or the amount so negotiated at a particular period of time or on demand.

Then the security will be lent by the fund and the unitholders would benefit from the additional compensation earned for lending, apart from the capital appreciation which also happens in that stock. Thus, to summarize, stock lending would be done by the scheme only in the following circumstances:

- If permitted by trustees and the extent SEBI regulations in that regard, from time to time.
- If such activity generates additional returns for the scheme and helps to enhance the scheme returns.
- If considering the above, and other factors all considered in totality, such activity is in the interest of unitholders in the scheme.

Securities Lending Risks

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there is also be temporary illiquidity of the securities that are lent out and the scheme will not be able to sell such lent out securities until they are returned.

J. PERFORMANCE OF THE SCHEME

Taxation

The information is provided for general information only. However, in view of the individual nature of the implications each investor is advised to consult his or her own tax advisors/authorised dealer with respect to the specific amount of tax and other implications arising out of his or her participation in the schemes.

Following is the tax treatment for investment in the scheme:

Dividend Distribution Tax is Payable by the Scheme		
Type of Scheme	Rate of Dividend Distribution Tax	
	Dividend paid to Resident Individuals & HUF's	Dividend paid to others Resident investors
Debt Fund	12.50%*	30%*

Tax on Capital Gains (Payable by the Investors)			
	Rate of Capital Gain Tax		
	All Resident Investors	Domestic Companies	Mutual Fund
Short Term Capital Gain	As per relevant Slab of Total Income chargeable to Tax	30%*	NA
Long Term Capital Gain			
With Indexation	20*	20*	NA
Without Indexation	10*	10*	NA

* The above mentioned Tax rates shall be increased by Surcharge @ 5.00% (only in case of domestic companies if their taxable income exceeds Rs. 1 crore) and, for all assesseees, the tax and surcharge would be further increased by Education Cess @ 2% and secondary and higher education cess @ 1%. In case of FIIs, Surcharge would be payable @ 2.5% of the tax if the taxable income exceeds Rs. 1 crore.

If any tax liability arising post redemption on account of change in tax treatment with respect to Dividend Distribution Tax/Capital Gain Tax, by the tax authorities, shall be solely borne by the investors and not by the AMC or Trustee Company.

For further details on taxation please refer the clause on taxation in SAI.

D. COMPUTATION OF NAV

Net Asset Value ("NAV") of the Units shall be determined daily as of the close of each Business Day.

NAV shall be calculated in accordance with the following formula:

$$\text{NAV} = \frac{\text{Market Value of Scheme's Investments} + \text{Accrued Income} + \text{Receivables} + \text{Other Assets} - \text{Accrued Expenses} - \text{Payables} - \text{Other Liabilities}}{\text{Number of Units Outstanding}}$$

The computation of Net Asset Value, valuation of Assets, computation of applicable Net Asset Value (related price) for ongoing Sale, Redemption, Switch and their frequency of disclosure shall be based upon a formula in accordance with the Regulations and as amended from time to time including by way of Circulars, Press Releases, or Notifications issued by SEBI or the Government of India to regulate the activities and growth of Mutual Funds. The NAVs of the fund shall be rounded off upto four decimals.

IV. FEES AND EXPENSES

A. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc. Entire NFO expenses will be borne by the AMC. In terms of SEBI circular No. SEBI/IMD/CIR No. 11/115723 /08 dated January 31, 2008, close ended schemes are not permitted to charge NFO expenses to the scheme. Hence, NFO Expenses will not be charged to the Scheme.

B. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated following percentage of the weekly average net assets of the scheme will be charged to the scheme as expenses. For the actual current expenses being charged, the investor should refer to the website of the mutual fund.

Particulars	% of Net Assets		
	Scheme A	Scheme B	Scheme C
Investment Management & Advisory Fee	1.25	1.25	1.25
Custodial Fees	0.10	0.10	0.10
Registrar & Transfer Agent Fees including cost related to providing accounts statement, dividend/redemption cheques/warrants etc.	0.15	0.15	0.15
Marketing & Selling Expenses including Agents Commission and statutory advertisement etc.	0.40	0.40	0.40
Brokerage & Transaction Cost pertaining to the distribution of units	0.10	0.10	0.10
Audit Fees / Fees and expenses of trustees	0.15	0.15	0.15
Costs related to investor communications etc.	0.05	0.05	0.05
Costs of fund transfer from location to location	0.03	0.03	0.03
Other Expenses^	0.02	0.02	0.02
Total Recurring Expenses	2.25	2.25	2.25

^ Expenses related to listing of the schemes.

These estimates have been made in good faith as per the information available to the Investment Manager based on past experience and are subject to change inter-se. Types of expenses charged shall be as per the SEBI (MF) Regulations.

Investment Management fees charged by TAML shall be 1.25% of the weekly average net assets for net assets upto Rs. 100 crores and 1.00% of the weekly average net assets on the balance amount above Rs. 100 crores. This fee shall be conformity with SEBI Regulations & shall be payable at a frequency as agreed between the AMC and Trustees from time to time. TAML shall not charge any fees on its investment in Units of the Funds/Schemes/Plans in TMF or any other Mutual Fund.

The recurring expenses of the Schemes and including management fee shall be as per the limits prescribed under Sub-Regulations (6) of Regulations 52 of the Regulations and shall not exceed the limits prescribed thereunder.

As per the Regulations, the maximum recurring expenses that can be charged to the Scheme shall be subject to a percentage limit of weekly net assets as in the table below:

First Rs. 100 crore	Next Rs. 300 crore	Next Rs. 300 crore	Over Rs. 700 crore
2.25%	2.00%	1.75%	1.50%

The above is the maximum limit under Regulation 52(6) of the SEBI (Mutual Fund Regulations), 1996. The Fund will strive to reduce the level of these expenses so as to keep them well within the maximum limits allowed by SEBI and any expenditure in excess of the above limits shall be borne by Tata Asset Management Limited and /or Tata Trustee Company Limited. Besides only those expenses as given above under the clause "Annual Scheme Recurring Expenses" shall be charged to the Scheme.

C. LOAD STRUCTURE

Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.tatamutualfund.com) or may call at Toll Free No.:1800-209-0101 or your distributor. As per SEBI circular SEBI/IMD/CIR No. 4/168230/09 dated June 30, 2009 there shall be no entry load for all Mutual Fund schemes.

Type of Load Scheme A, B and C	Load chargeable (as %age of NAV)
Entry Load	N.A.
Exit (Upon Maturity)	Nil

Bonus units and units issued on reinvestment of dividends shall not be subject to exit load.

All loads including Contingent Deferred Sales Charge (CDSC) for the Scheme shall be maintained in a separate account and may be utilised towards meeting the selling and distribution expenses. Any surplus in this account may be credited to the scheme, whenever felt appropriate by the AMC.

As per SEBI circular No. SEBI/IMD/CIR No. 4/ 168230/09 dated June 30, 2009 the exit load or Corporate Deferred Sales Charge (CDSC) charged to the investor, a maximum of 1% of the redemption proceeds shall be maintained in a separate account which shall be used by the AMC to pay commissions to the distributor and take care of other marketing and selling expenses Any balance shall be credited to the scheme immediately. This circular will be applicable wef August 01, 2009.

The AMC reserves the right to change/modify exit / switchover load (including zero load), depending upon the circumstances prevailing at any given time. However any change in the load structure will be applicable on prospective investment only. The AMC may charge an exit load for switch of units from one plan/option to another plan/option within the Scheme and/or any other scheme of TMF depending upon the circumstances prevailing at any given time. The switchover load may be different for different plans/options and the switchover load may be different from the entry and /or exit load charged for sale and/or repurchase units. The load charged could also be different for different options in the plans of the Scheme at the same time and different as regards the amount/tenor of investment, etc.

As per SEBI circular dt. May 23, 2008, the mutual fund at the time of changing the load structure, the mutual funds may consider the following measures to avoid complaints from investors about investment in the schemes without knowing the loads:

- The introduction of the exit load/ CDSC along with the details may be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load/CDSC.
- The addendum detailing the changes may be attached to Scheme Information Documents and Key Information Memorandum. The addendum may be circulated to all the distributors/brokers so that same can be attached to all Scheme Information Documents and Key information memoranda already in stock.
- The investor is requested to check the prevailing load structure of the scheme before investing. For any change in load structure arrangement may be made to display the addendum in the Scheme Information Document in the form of a notice in all the investor service centers and distributor/ brokers' office.
- A public notice shall be given in respect of such changed in one English daily newspaper having nationwide circulation as well as in a newspaper publishes in the language of region where the Head office of Mutual Fund is situated.
