D. BALANCE PLAN(S) TO BE LAUNCHED UNDER HDFC FIXED MATURITY PLANS - SERIES 22 - 5 Plans

Each Plan under the Scheme will be denoted by a specific Plan Name e.g. Plan launched in May 2012 having a maturity of 90 Days will be identified as HDFC FMP 90D May 2012 (1) or having a maturity of 3 Months will be identified as HDFC FMP 3M May 2012 (1). This naming pattern may be changed by the AMC from time to time. The Trustee reserves the right to change the frequency of launching the Plans or not to launch a particular Plan under the Scheme.

The New Fund Offer for all the Plans will commence within 6 Months from April 9, 2012 i.e. the date of no observation letter for the Scheme Information Document received from SEBI.

Information with respect to the New Fund Offer for the Plan(s) under the Scheme (launched subsequent to the New Fund Offer of the Scheme) will be communicated to the investors by a notice displayed at Investor Service Centres and issue of advertisement in 2 newspapers i.e. in one national English daily newspaper circulating in the whole of India and in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated. The notice will be published at

The Trustee / AMC may close the New Fund Offer of any Plan under the Scheme by giving at least one-day notice in one daily newspaper.

Each Plan will be compulsorily and without any further act by the Unit holder(s) redeemed on the Maturity / Final Redemption Date. On the Maturity / Final Redemption Date of the Plan, the Units under the Plan will be redeemed at the Applicable NAV.

The Plan(s) under the Scheme seek to generate income through investments in Debt / Money Market Instruments and Government Securities. The Plan(s) will invest in such securities which mature on or before the date of the maturity of the Plan(s).

Each HDFC Fixed Maturity Plan will be managed as a separate portfolio.

I. INTRODUCTION

A. RISK FACTORS

■ Standard Risk Factors

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on the various factors and forces affecting the capital markets and money markets.
- Past performance of the Sponsors and their affiliates / AMC / Mutual Fund does not guarantee future performance of the Scheme(s) of the Mutual Fund.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of ₹1 lakh each made by them towards setting up the Fund.
- The present Scheme is not a guaranteed or assured return scheme.

■ Scheme Specific Risk Factors

Some of the specific risk factors related to the Scheme include, but are not limited to the following:

Risk factors associated with investing in Fixed Income Securities

- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the respective Plan(s) under the Scheme can go up or down because of various factors that affect the capital markets in general.
- The NAV of the respective Plan(s) will be affected by changes in the general level of interest rates. The NAV of the respective Plan(s) is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Money market securities, while fairly liquid, lack a well developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- Investment in Debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.
- Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is

already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.

- Different types of fixed income securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme risk may increase or decrease depending upon its investment pattern.
- As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Scheme incurring losses till the security is finally sold.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted securities that offer attractive yields. This may increase the risk of the portfolio.
- At times, due to the forces and factors affecting the capital market, the Scheme may not be able to invest in securities falling within its investment objective resulting in holding the monies collected by it in cash or cash equivalent or invest the same in other permissible securities amounting to substantial reduction in the earning capability of the Scheme.
- Performance of the Scheme may be affected by political, social, and economic developments, which may include changes in government policies, diplomatic conditions, and taxation policies.

Risk factors associated with investing in Derivatives

- The AMC, on behalf of the respective Plan(s), may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unitholders' interest. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risk factors associated with Securities Lending

As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

Risk Factors associated with Market Trading

- Although Units of the respective Plan(s) as mentioned in this Scheme Information Document are to be listed on the Exchange, there can be no assurance that an active secondary market will develop or be maintained.
- Trading in Units of the respective Plan(s) on the Exchange may be halted because of market conditions or for reasons that in view of Exchange Authorities or SEBI, trading in Units of the respective Plan(s) is not advisable. In addition, trading in Units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Units of the respective Plan(s) will continue to be met or will remain unchanged.
- Any changes in trading regulations by the Stock Exchange(s) or SEBI may inter-alia result in wider premium/ discount to NAV.
- The Units of the respective Plan(s) may trade above or below their NAV. The NAV of the respective Plan(s) will fluctuate with changes in the market value of Plan's holdings. The trading prices of Units of the respective Plan(s) will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the respective Plan(s).
- The Units will be issued in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund on the maturity date / final redemption date will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.
- The market price of the Units of the respective Plan(s), like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the Unit (or NAV), and (2) demand and supply of Units in the market. Sizeable demand or supply of the Units in the Exchange may lead to market price of the Units to quote at premium or discount to NAV.
- As the Units allotted under respective Plan(s) of the Scheme will be listed on the Exchange, the Mutual Fund shall not provide for redemption / repurchase of Units prior to maturity / final redemption date of the respective Plan(s).

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The individual Plan(s) under the Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Plan(s). These conditions will be complied with immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfillment with the condition of minimum 20 investors, the Plan(s) shall be wound up in accordance with Regulation 39 (2) (c) of SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25% holding by a single investor on the date of allotment, the application to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within 5 Business Days from the date of closure of the New Fund Offer.

C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS? ASSET ALLOCATION:

The respective Plan(s) under the Scheme shall not (i) invest in securitised debt and (ii) undertake repo / reverse repo transactions in Corporate Debt Securities.

Subject to be above, the respective Plan(s) may enter into repos/ reverse repos as may be permitted by RBI/SEBI. From time to time, the respective Plan(s) may hold cash. A part of the net assets may be invested in the Collateralised Borrowing & Lending Obligations (CBLO) or repo or in an alternative investment as may be provided by RBI to meet the liquidity requirements.

The respective Plan(s) may take derivatives position (fixed income) based on the opportunities available subject to the guidelines issued by SEBI from time to time and in line with the investment objective of the Scheme. The maximum derivative position will be restricted to 20% of the Net Assets of the respective Plan(s).

Subject to the SEBI (MF) Regulations, as applicable from time to time, the Scheme seeks to engage in Stock Lending. Stock Lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation in order to enhance returns of the portfolio. 2. Not more than 5% of the net assets of the respective Plan(s) under the Scheme can generally be deployed in Stock Lending to any single approved intermediary.

The Scheme may not be able to sell such lent out securities and this can lead to temporary illiquidity.

Pending deployment of funds of the respective Plan(s) in securities in terms of the investment objective, the AMC may park the funds of the respective Plan(s) in short term deposits of scheduled commercial banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as amended from time to time.

It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions may vary substantially depending upon the perception of the AMC, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and only for defensive considerations.

In the event of the asset allocation falling outside the limits specified in the asset allocation table, the Fund Manager will endeavour to review and rebalance the same within 5 days for Plans having maturity upto 35 Days, 15 days for Plans having maturity upto 92 Days and 30 days for all the remaining Plans.

Interest Rate Swaps (IRS)

All swaps are financial contracts, which involve exchange (swap) of a set of payments owned by one party for another set of payments owned by another party, usually through an intermediary (market maker). An IRS can be defined as a contract between two parties (Counter Parties) to exchange, on particular dates in the future, one series of cash flows, (fixed interest) for another series of cashflows (variable or floating interest) in the same currency and on the same principal for an agreed period of time. The exchange of cashflows need not occur on the same date. It may be noted that in such hedged positions (fixed v/s floating or vice versa), both legs of the transactions have interest rate volatility as underlying.

Forward Rate Agreement (FRA)

A FRA is an agreement between two counter parties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date, based on a notional amount, for an agreed period. In short, in a FRA, interest rate is fixed now for a future period. The special feature of FRAs is that the only payment is the difference between the FRA rate and the Reference rate and hence are single settlement contracts. As in the case of IRS, notional amounts are not exchanged.

The Mutual Fund /AMC shall make investment out of the NFO proceeds only on or after the closure of the NFO period.

E. WHAT ARE THE INVESTMENT STRATEGIES?

INVESTMENT STRATEGY AND RISK CONTROL

The net assets of the Plan(s) under the Scheme will be invested in Debt, Money market instruments and Government Securities maturing on or before the maturity date of the respective Plan(s). The primary objective of the Plan(s) under the Scheme is to generate income through investments in Debt / Money Market Instruments and Government Securities maturing on or before the maturity date of the respective Plan(s).

Investors can subscribe (purchase) / redeem (sell) Units on a continuous basis on the NSE / BSE on which the Units are listed during the trading hours like any other publicly traded stock. In view of the nature of the Scheme, there will likely be no turnover in the portfolio (except for change in composition of

portfolio of securities made as per the prevailing market conditions) of the Plan(s).

Though every endeavor will be made to achieve the objectives of the Scheme, the AMC/Sponsors/ Trustees do not guarantee that the investment objectives of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.

RISK CONTROL

Investments made from the corpus of the Plan(s) would be in accordance with the investment objective of the Scheme and the provisions of the SEBI (MF) Regulations. The AMC will strive to achieve the investment objective by way of a judicious portfolio mix comprising of debt, money market instruments and government securities. Every investment opportunity would be assessed with regard to credit risk, interest rate risk and liquidity risk.

Credit Evaluation Policy

The credit evaluation policy of the AMC entails evaluation of credit fundamentals of each investment opportunity. Some of the factors that are evaluated inter-alia may include outlook on the sector, parentage, quality of management, and overall financial strength of the credit. The AMC utilises ratings of recognised rating agencies as an input in the credit evaluation process. Investments in bonds and debenture are usually in instruments that have been assigned high investment grade ratings by a recognized rating agency.

Interest Rate Risk for Fixed Maturity Plans

An interest rate scenario analysis would be performed on an on-going basis, considering the impact of the developments on the macro-economic front and the demand and supply of funds. The Scheme would keep the maturity of its debt assets on or before the maturity/ final redemption date of the scheme. This would limit the market risk of the portfolio.

Liquidity Risk for Fixed Maturity Plans

Since the investors cannot redeem/ Switch units of the Plan(s) under the Scheme directly with the Mutual Fund until the final redemption/ maturity date and the assets would also mature on or before the maturity date, the liquidity risk would be minimized. Please refer to "**Suspension of Sale / Redemption of the Units**", in section '**Restrictions, if any, on the right to freely retain or dispose of units being offered**' on **Page 30**.

Strategies for investment in Derivatives

Some of the strategies involving derivatives that may be used by the Investment Manager, with a aim to protect capital and enhance returns include :

Basic Structure of a Swap

Assume that the Scheme has a ₹ 20 crore floating rate investment linked to MIBOR (Mumbai Inter Bank Offered Rate). Hence, the Scheme is currently running an interest rate risk and stands to lose if the interest rate moves down. To hedge this interest rate risk, the Scheme can enter into a 6 month MIBOR swap. Through this swap, the Scheme will receive a fixed predetermined rate (assume 12%) and pays the "benchmark rate" (MIBOR), which is fixed by the National Stock Exchange of India limited

(NSE) or any other agency such as Reuters. This swap would effectively lock-in the rate or 12% for the next 6 months, eliminating the daily interest rate risk. This usually routed through an intermediary who runs a book and matches deals between various counterparties.

The steps will be as follows -

- Assuming the swap is for ₹ 20 crore June 1, 2011 to December 1, 2011. The Scheme is a fixed rate receiver at 12% and the counterparty is a floating rate receiver at the overnight rate on a compounded basis (say NSE MIBOR).
- On June 1, 2011 the Scheme and the counterparty will exchange only a contract of having entered this swap. This documentation would be as per International Swap Dealers Association (ISDA).
- On a daily basis, the benchmark rate fixed by NSE will be tracked by them.
- On December 1, 2011 they will calculate the following-
 - The Scheme is entitled to receive interest on ₹ 20 crore at 12% for 184 days i.e. ₹ 1.21 crore, (this amount is known at the time the swap was concluded) and will pay the compounded benchmark rate.
 - The counterparty is entitled to receive daily compounded call rate for 184 days & pay 12% fixed.
 - On December 1, 2011, if the total interest on the daily overnight compounded benchmark rate is higher than ₹ 1.21 crore, the Scheme will pay the difference to the counterparty. If the daily compounded benchmark rate is lower, then the counterparty will pay the Scheme the difference.
 - Effectively the Scheme earns interest at the rate of 12% p.a. for six months without lending money for 6 months fixed, while the counterparty pays interest @ 12% p.a. for 6 months on ₹ 20 crore, without borrowing for 6 months fixed.

The above example illustrates the benefits and risks of using derivatives for hedging and optimizing the investment portfolio. Swaps have their own drawbacks like credit risk, settlement risk. However, these risks are substantially reduced as the amount involved is interest streams and not principal.

Forward Rate Agreement

Assume that on April 30, 2011, the 30 day commercial paper (CP) rate is 5.75% and the Scheme has an investment in a CP of face value ₹ 25 crores, which is going to mature on May 30, 2011. If the interest rates are likely to remain stable or decline after May 30, 2011, and if the fund manager, who wants to re-deploy the maturity proceeds for 1 more month, does not want to take the risk of interest rates going down, he can then enter into a following forward rate agreement (FRA) say as on April 30, 2011:

He can receive 1 X 2 FRA on April 30, 2011 at 5.75% (FRA rate for 1 months lending in 2 months time) on the notional amount of ₹ 25 crores, with a reference rate of 30 day CP benchmark. If the CP benchmark on the settlement date i.e. May 30, 2011 falls to 5.50%, then the Scheme receives the difference 5.75 - 5.50 i.e. 25 basis points on the notional amount ₹ 25 crores for 1 month. The maturity proceeds are then reinvested at say 5.50% (close to the benchmark). The scheme, however, would have locked in the rate prevailing on April 30, 2011 (5.75%) as it would have received 25 basis points more as settlement amount from FRA. Thus the fund manager can use FRA to mitigate the reinvestment risk.

In this example, if the rates move up by 25 basis points to 6% on the settlement date (May 30, 2011), the Scheme loses 25 basis points but since the reinvestment will then happen at 6%, effective returns for the Scheme is unchanged at 5.75%, which is the prevailing rate on May 30, 2011.

Risk Factors of SWAP / Forward Rate Agreement

- **Credit Risk:** This is the risk of defaults by the counterparty. This is usually negligible, as there is no exchange of principal amounts in a derivative transaction.
- **Market Risk:** Market movements may adversely affect the pricing and settlement derivatives.
- **Liquidity Risk:** The risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market.

PORTFOLIO TURNOVER

Investors can subscribe (purchase) / redeem (sell) Units on a continuous basis on the NSE / BSE on which the Units are listed during the trading hours like any other publicly traded stock. In view of the nature of the Scheme, there will likely be no turnover in the portfolio (except for change in composition of portfolio of securities made as per the prevailing market conditions) of the Plan(s).

Settlement of Purchase/Sale of Units of the Scheme on NSE / BSE

Buying/Selling of Units of the Scheme on NSE / BSE is just like buying/selling any other normal listed security. If an investor has bought Units, an investor has to pay the purchase amount to the broker/sub- broker such that the amount paid is realized before the funds pay-in day of the settlement cycle on the NSE / BSE. If an investor has sold Units, an investor has to deliver the Units to the broker/sub-broker before the securities pay-in day of the settlement cycle on the NSE / BSE . The Units (in the case of Units bought) and the funds (in the case of Units sold) are paid out to the broker on the pay-out day of the settlement cycle on the NSE / BSE. The NSE / BSE regulations stipulate that the trading member should pay the money or Units to the investor within 24 hours of the pay-out.

If an investor has bought Units, he should give standing instructions for 'Delivery-In' to his/her DP for accepting Units in his/her beneficiary account. An investor should give the details of his/her beneficiary account and the DP-ID of his/her DP to his/her trading member. The trading member will transfer the Units directly to his/her beneficiary account on receipt of the same from NSE's Clearing Corporation / BSE's Clearing Corporation.

An investor who has sold Units should instruct his/her Depository Participant (DP) to give 'Delivery Out' instructions to transfer the Units from his/her beneficiary account to the Pool Account of his/her trading member through whom he/she has sold the Units. The details of the Pool A/C (CM-BP-ID) of his/her trading member to which the Units are to be transferred, Unit quantity etc. should be mentioned in the Delivery Out instructions given by him/her to the DP.

The instructions should be given well before the prescribed securities pay-in day. SEBI has advised that the Delivery Out instructions should be given at least 24 hours prior to the cut-off time for the prescribed securities pay-in to avoid any rejection of instructions due to data entry errors, network problems, etc.
