G. Risk Factors

Standard Risk Factors

a. Standard Risk Factors for investments in Mutual Fund

- Investment in Mutual Fund Units involve investment risks such as trading volumes, settlement risks, liquidity risks, default risks, including the possible loss of principal.
- Mutual Funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
- As the price/value/interest rates of the securities in which the Scheme(s) invest fluctuates, the value of your investments in the Scheme(s) may go up or down. The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme(s) beyond the contribution of an amount of Rs. 22.2 lakhs collectively made by them towards setting up the Fund and such other accretions and additions to the corpus set up by the Sponsors.
- The Scheme(s) do not in any manner indicate either its quality or its future prospects and returns.

- With respect to Exchange Traded Fund (ETF), there can be no assurance that an active secondary market will develop or be maintained.
- The NAV of the Scheme(s) may be affected by changes in the general level of interest rates and trading volumes.
- The NAV of the Scheme(s) may be affected by settlement periods and transfer procedures.
- In the event of receipt of inordinately large number of redemption requests or of a restructuring of the Scheme's portfolios, there may be delays in the redemption of Units.
- The Liquidity of the Scheme's investments is inherently restricted by trading volumes.
- Investors in the Scheme(s) are not being offered any guaranteed returns.
- Mutual funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Scheme's investments include, but are not limited to, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc.
- The past performance of the mutual funds managed by the Sponsors / Mutual Fund / Asset Management Company and their associates does not guarantee future performance of the Scheme(s).
- Investment decisions made by the AMC may not always be profitable.
- From time to time and subject to the Regulations, the Sponsors, the Mutual Funds and investment companies managed by them, their associate companies, subsidiaries of the Sponsors, and the AMC and the scheme(s) managed by the AMC may invest either directly or indirectly in any or all the Schemes. The funds managed by these associates, the Sponsors, subsidiaries of the Sponsors and /or the AMC may acquire a substantial portion of the Scheme's Units and collectively constitute a major investor in the Scheme. Accordingly, redemption of Units held by such funds, associates and Sponsors might have an adverse impact on the Units of the Scheme because the timing of such redemption may impact the ability of other Unit holders to redeem their Units.
- Further, as per the Regulation, in case the AMC invests in any of the Schemes managed by it, it shall not be entitled to charge any fees on such investments.
- The Scheme(s) may invest in other schemes managed by the AMC or in the schemes of any other Mutual Funds, provided it is in conformity with the investment objective of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments and the aggregate inter-scheme investment made by all Schemes of the Fund or in Schemes under the management of other asset management companies shall not exceed 5% of the Net Asset Value of the Mutual Fund.
- Two-Factor Authentication and Third – Party Payments will be carried out in line with paragraph 16.5 of the Master Circular. In case of unsuccessful Two-Factor Authentication the redemption request might get rejected.

- **Infectious Illness Risk:** An outbreak of an infectious illness, caused by a novel virus may result in travel restrictions, disruption of healthcare systems, prolonged quarantines, cancellations, supply chain disruptions, lower consumer demand, layoffs, ratings downgrades, defaults and other significant economic impacts. Certain markets may experience temporary closures, extreme volatility, severe losses, reduced liquidity and increased trading costs. Such events can have an impact on the underlying Schemes and could impact their ability to purchase or sell securities or cause elevated tracking error and increased premiums or discounts to the NAV.

Cybersecurity Risk: The Scheme(s) are susceptible to operational, information security and related “cyber” risks both directly and through external stakeholders. Similar types of cybersecurity risks are also present for issuers of securities in which the Scheme invests, which could result in material adverse consequences for such issuers and may cause the Scheme’s investment in such issuers to lose value. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber incidents include, but are not limited to, gaining unauthorized access to digital systems (e.g., through “hacking” or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyberattacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users). Geopolitical tensions may increase the scale and sophistication of deliberate attacks, particularly those from nation-states or from entities with nation-state backing. Cybersecurity failures by, or breaches of, the systems of the external stakeholders (including, but not limited to, index and benchmark providers, fund accountants, custodians, RTA, etc.), have the ability to cause disruptions and impact business operations. While there may be business continuity plans in the event of, and risk management systems to prevent, such cyber incidents, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified, that prevention and remediation efforts will not be successful or that cyberattacks will go undetected.

- **Geopolitical Risks:** Geopolitical risks have emerged as a significant and increasingly complex factor influencing investment landscapes, leading to heightened market volatility and uncertainty. Events such as international conflicts, trade disputes, sanctions, political instability, and policy shifts can trigger widespread disruptions across global economies. These events may impact supply chains, influence commodity prices, cause currency fluctuations, and lead to shifts in investor sentiment, potentially resulting in capital outflows from certain markets and asset price declines. While the long-term fundamentals of Schemes may remain sound, geopolitical developments can introduce short-term shocks and increase the overall risk profile of mutual fund portfolios, particularly those with significant international exposure or concentrated holdings in sensitive sectors.

b. General Risk Factors associated with investing in Derivatives:

- The Schemes may use various derivative products as permitted by the Regulations. Use of derivatives requires an understanding of not only the underlying instrument but also of the derivative itself. Other risks include the risk of mis-pricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The Scheme may use derivatives instruments like Stock Index Futures, Interest Rate Swaps, Forward Rate Agreements or other derivative instruments for the purpose of portfolio balancing, as permitted under the Regulations and guidelines. Usage of derivatives will expose the Schemes to certain risks inherent to such derivatives.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
- Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value.
- The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.
- The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:
 - The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
 - Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place
 - Basis Risk: This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying asset being hedged
 - Exchanges could raise the initial margin, variation margin or other forms of margin on derivative contracts, impose one sided margins or insist that margins be placed in cash. All of these might force positions to be unwound at a loss, and might materially impact returns.
 - The derivative contracts at times are undertaken with various counterparties. These counterparties may not be able to meet the obligations under such derivative contracts. This would lead to credit risk in derivative transactions,

Hence, derivative trades are undertaken with approved counterparties or through exchanges. This mitigates credit risk on derivative transactions.

- c. **Risk factors of not maintaining average AUM of Rs. 20 crores on half yearly rolling basis (Applicable only for open ended debt oriented schemes):** As per the relevant paragraph of the Master Circular, in the interest of investors it is important that debt oriented schemes have an adequate corpus to ensure adherence to the investment objectives and compliance with investment restrictions specified under SEBI (Mutual Funds) Regulations, 1996. Such Scheme(s) shall maintain an average AUM of Rs. 20 crores on half yearly rolling basis. In case, the average AUM falls below Rs. 20 crores, the AMC shall scale up the AUM of such Scheme within a period of six months so as to maintain the average AUM of Rs. 20 crore on half yearly rolling basis.

Risk Factors pertaining to Investments in units of Corporate Debt Market Development Fund (CDMDF)

Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus, this backstop facility will help fund managers of the scheme to better generate liquidity during market dislocation to help the schemes fulfil liquidity obligations under stress situation.

In accordance with the requirement of Regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with relevant paragraph of SEBI Master circular on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the schemes as stated below shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

The trading mechanism of the Stock Exchange(s) is configured to accept and process transactions for mutual fund Units in both Physical and Demat Form. The allotment and/or redemption of Units through the recognized Stock Exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing/settlement, etc. upon which the Fund has no control. The Unitholder would be required to provide a Base Installment Amount that is intended to be transferred to the Target Scheme.

The actual amount of transfer to the Target Scheme will be linked to the Equity Valuation Index (hereinafter referred to as EVI) which is a proprietary model of ICICI Prudential Asset Management Company Limited (the AMC). The EVI is derived by assigning equal weights to Price to Earnings (PE), Price to book (PB), (G-Sec x PE) and Market Cap to Gross Domestic Product (GDP) or such other factors as may be determined by the AMC from time to time. Based on the EVI and the corresponding trigger value, the actual amount of STP will be derived for transferring the amount to the Target Scheme.

Key Features of Booster STP:

- b) The minimum value for the Booster STP base installment at the time of registration shall be Rs. 1,000/- and in multiples of Rs.1/-.

- f) In any case the Booster STP instalment amount will not exceed trigger value of 5 / trigger value of 10 of the base instalment amount as per the option selected.
- g) In case the amount to be transferred is not available in the Source Scheme in the unit holder's account, the residual amount will be transferred to the Target Scheme.
- h) In case the day/date of transfer falls on a Non-Business Day or on a date which is not available in a particular month, the immediate next Business Day will be considered for the purpose of determining the applicability of NAV.
- i) In case of nil balance in the Source Scheme, Booster STP installment for that particular due date will not be processed and Booster STP will cease to be active upon five consecutive unsuccessful transactions.
- j) The AMC reserves the right to cease the Booster STP without prior intimation, including but not limited to receipt of intimation of death of Unit holder or in any scenario as per AMC discretion.

Thus, they can limit the amount which will be transferred under the Booster STP facility. In case target amount is opted by the Investors, the default end date will be updated as December 31, 2099. The Investor may note that such amount shall be transferred to the Target Scheme until the cumulative amount has reached the maximum amount as specified by the investor OR the default end date, whichever is earlier.

A. EQUITY AND RELATED SECURITIES

Assets	Methodology
Traded Equity and Equity Related securities and Preference Shares	<p>Traded securities shall be valued at the last quoted closing price on the principal stock exchange. The AMC has selected NSE as principal stock exchange, for all schemes other than Index based Funds/ETF, which invest in domestic equity and equity related securities/preference shares. For index based schemes/ETF the Principal stock exchange would be the exchange where the underlying benchmark index has been set up. If no trade is reported on the principal stock exchange on a particular valuation date, traded securities shall be valued at the last quoted closing price on other recognised stock exchange. For this purpose only NSE and BSE shall be considered as the recognized stock exchanges.</p> <p>When a security is not traded on any stock exchange on a particular valuation day, the value at which it was traded on the selected stock exchange or any other stock exchange, as the case may be, on the earliest previous day shall be used provided such date is not more than thirty days prior to the valuation date.</p> <p>In case the security is traded in periodic call auction session, the security shall be valued as per last quoted closing price of such periodic call auction session.</p>

Assets	Methodology
Thinly Traded / Non-Traded	<p>When a security(other than Futures & Options) is not traded on any recognized stock exchange for a period of thirty days prior to the valuation date, the scrip must be treated as a 'non-traded' security</p> <p>Futures & Options are considered as Non-Traded, when such Futures & Options are not traded on respective stock exchange as on valuation date.</p> <p>Equity / equity-related security (other than Futures & Options) shall be considered to be thinly traded when the value of the trades of that security in a month is less than Rs. 5 lacs by value and the total volume of the trades in that security is less than 50,000 shares. In order to determine whether a security is thinly traded, the volumes traded in NSE and BSE shall be considered.</p>

Assets	Methodology
Non-Traded Thinly	<p>Thinly Traded / Non-traded equity shares shall be valued as below:</p> <p>Based on the latest available Balance Sheet, net worth shall be calculated as follows: Net Worth per share = [share capital + reserves (excluding revaluation reserves) – Misc. expenditure and Debit Balance in P&L A/c] Divided by number of Paid up Shares.</p> <p>Average capitalisation rate (P/E ratio) for the industry based on NSE or BSE data, shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share of the latest audited annual accounts shall be considered for this purpose.</p> <p>The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 10% for ill-liquidity so as to arrive at the fair value per share.</p> <p>If the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalized earning.</p> <p>Where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.</p> <p>Where an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5% of the total net assets of the scheme, it should be valued by the procedure above and the proportion which it bears to the total net assets of the scheme on the date of valuation shall be taken into account.</p> <p>In order to ensure fair valuation, the AMC, after providing suitable justification to and due approval from the Valuation Committee, may decide to value non-traded/thinly traded equity share at a price lower than the value derived using the aforesaid methodology.</p>

Assets	Methodology
Unlisted Equity shares:	<p>Unlisted equity shares of a company shall be valued on the basis of the valuation principles given below:</p> <p>(a) Based on the latest available audited balance sheet, net worth shall be calculated as lower of (i) and (ii) below:</p> <ol style="list-style-type: none"> Net worth per share = [share capital plus free reserves (excluding revaluation reserves) minus miscellaneous expenditure not written off, deferred revenue expenditure, intangible assets and accumulated losses] divided by Number of Paid up Shares. After taking into account the outstanding warrants and options, net worth per share shall again be calculated and shall be = [share capital plus consideration on exercise of Option/Warrants received/receivable by the Company plus free reserves (excluding revaluation reserves) minus miscellaneous expenditure not written off, deferred revenue expenditure, intangible assets and accumulated losses] divided by {Number of paid up shares plus number of shares that would be obtained on conversion/exercise of outstanding Warrants and Options} <p>The lower of (i) and (ii) above shall be used for calculation of net worth per share and for further calculation in (c) below.</p> <p>(b) Average capitalisation rate (P/E ratio) for the industry based on NSE or BSE data shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share of the latest audited annual accounts will be considered for this purpose.</p> <p>(c) The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 15% for illiquidity so as to arrive at the fair value per share.</p> <p>The above methodology for valuation shall be subject to the following conditions:</p> <ul style="list-style-type: none"> -All calculations as aforesaid shall be based on audited accounts. -In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero. -If the net worth of the company is negative, the share would be marked down to zero. -In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalized earning.

Assets	Methodology
	<p>- In case an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5% of the total assets of the scheme, it should be valued in accordance with the procedure as mentioned above on the date of valuation.</p> <p>In order to ensure fair valuation, the valuation committee of the AMC may decide to value an unlisted equity share at a price lower than the value derived using the aforesaid methodology.</p>
Valuation of Partly Paid-up Equity Shares	<p>Valuation of Partly Paid-up Equity Shares</p> <p>(a) <u>Traded Partly Paid-up Equity Shares</u> - In case the partly paid-up equity shares are traded in the market separately, the partly paid-up equity shares would be valued at last quoted closing price. (like any other Equity instrument).</p> <p>(b) <u>Non-Traded /Suspended /Thinly Traded Partly Paid-up Equity Shares</u></p> <p>(i) Such partly paid-up equity shares shall be valued at its last quoted closing price provided the date of last quoted closing price is not more than 30 days prior to the valuation date.</p> <p>(ii) In the event the last quoted closing price is more than 30 days prior to the valuation date, the partly paid-up equity shares shall be valued at value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable on partly paid-up equity shares. Suitable illiquidity discount, if deemed necessary, shall be applied with approval from the Valuation Committee.</p> <p>(c) <u>Unlisted Partly Paid-up Equity Shares</u></p> <p>Such partly paid-up equity shares shall be valued at value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable. Suitable illiquidity discount, if deemed necessary, shall be applied with approval from Valuation Committee.</p> <p>Further, after reviewing the valuation of such partly paid-up equity shares, if the prices as per the above methodology does not represent fair price or in case</p>

Assets	Methodology

If value of the share of demerged company is equal or in excess of the value of the pre de merger share, then the resulting company share is to be valued at zero.</p> <p>Where none of the demerged company and resulting company is immediately listed/ traded, the shares of new companies shall be valued by allocating combined valuation existing as on date of the corporate action to the new companies after taking into consideration the pro-rata shares allotted and other relevant factors as per the decision of the Valuation Committee.</p> <p>Further, after reviewing the valuation as listed above, if the prices as per the above methodology does not represent fair price or in case necessary details to value the same are not available, the Valuation Committee will determine fair value based on available information.</p>

The Valuation Committee may apply illiquidity discount other than 10% after recording suitable rationale.</p>

For this purpose only NSE and BSE shall be considered as the recognized stock exchanges.</p> <p>c) When units of InvIT and REIT is not traded on any stock exchange on a particular valuation day, the value at which it was traded on the selected stock exchange or any other stock exchange, as the case may be, on any day immediately prior to valuation day or latest NAV declared by the investment manager of the trust, whichever is later, shall be considered for valuation provided that such date is not more than thirty days prior to the valuation date.</p> <p>d) Where units of InvIT and REIT are not traded on any stock exchange for a continuous period of 30 days then the valuation for such units of InvIT and REIT will be determined based on the price provided by an independent valuation agency(ies). The selection of the independent valuation agency(ies) will be approved by the Valuation Committee.</p> <p>e) Where the valuation for units of InvIT and REIT is not available from any independent valuation agency(ies), the valuation will be determined by the Valuation Committee based on the principles of fair valuation.</p>

Further, after reviewing the valuation of Units of InvITs / ReITs, if the prices as per the above methodology does not represent fair price then the same may be ignored and the valuation in such cases would be decided by the Valuation Committee.

Assets	Methodology
Exchange Traded Commodity Derivatives (ETCDs) (For Gold, Silver, Copper, Aluminium, Zinc & Cash Settled ETCDs)	<p>Exchange Traded Commodity Derivatives (ETCDs) shall be valued at the last quoted closing price on the exchange where such ETCD Contracts are Listed.</p> <p>In the event the last quoted closing price as referred above is not available, such ETCD contracts shall be valued at the Settlement price of the respective stock exchange.</p> <p>In case necessary details to value ETCDs are not available or if the prices as per above do not represent fair price, the valuation committee, in order to ensure fair valuation, will determine price, based on the available information.</p>
Physical Commodities other than Gold & Silver	<p>Physical stocks/Commodities received from the exchange accredited warehouse in the location (as notified and determined by the exchanges) will be valued based on latest spot market price of the respective location as published by the respective commodity exchanges.</p> <p>If on any day the spot market prices as above are not available due to holiday, then the prices of immediately preceding day will be considered for the purpose of valuation of such commodity.</p> <p>In case necessary details to value such commodities are not available or if the prices as per above do not represent fair price, the Valuation Committee, in order to ensure fair valuation, will determine price, based on the available information.</p>

Annexure II

Policy for Inter-Scheme Transfer ('IST'):

1. IST of equity and related securities

IST of equity and equity related securities shall be done at the price determined by the exchange at the time of transfer.

Where the IST of equity and equity related securities cannot be done as per the foregoing, the IST shall be executed based on Volume Weighted Average Price (VWAP) on NSE, or where the equity shares are not listed in NSE, then VWAP price on BSE will be considered.

2. Policy for IST of debt and money market securities (including Government Securities)

IST will be executed based on average of the prices provided by the agency(ies) appointed by AMFI if prices are received within the pre agreed turn-around-time(TAT).

If price from only one agency is received within pre-agreed TAT, IST may be executed at that Price.

Further, after reviewing the IST prices of the securities, if the prices provided by the agency(ies) appointed by AMFI does not represent fair price or If IST Prices are not received from any of the agencies within the agreed TAT, in such cases IST would be carried out at the price as approved by the Valuation Committee in the following order of priority:

(i) in accordance with clause 3(a) of Seventh Schedule of SEBI (Mutual Funds) Regulations,1996.

(ii) as per the available information in accordance with the principle of fair valuation.

Annexure III

Waterfall Mechanism for valuation of money market, debt and Government securities

SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 has laid down broad principles for considering the traded yields for valuation of Debt, money market and government securities. The said circular prescribes AMFI shall ensure valuation agencies have a documented waterfall approach for valuation of Debt & money market securities.

The extract from AMFI best practices circular (135/BP/83/2019-20) dated November 18, 2019 pertaining to the waterfall mechanism is as under:

Part A: Valuation of Money Market and Debt Securities other than Government Securities (G-Secs)

1. Waterfall Mechanism for valuation of money market and debt securities:

The following shall be the broad sequence of the waterfall for valuation of money market and debt securities:

- i. Volume Weighted Average Yield (VWAY) of primary reissuances of the same ISIN (whether through book building or fixed price) and secondary trades in the same ISIN;
- ii. VWAY of primary issuances through book building of same issuer, similar maturity (Refer Note 1 below);
- iii. VWAY of secondary trades of same issuer, similar maturity;
- iv. VWAY of primary issuances through fixed price auction of same issuer, similar maturity;
- v. VWAY of primary issuances through book building of similar issuer, similar maturity (Refer Note 1 below);
- vi. VWAY of secondary trades of similar issuer, similar maturity;
- vii. VWAY of primary issuance through fixed price auction of similar issuer, similar maturity;
- viii. Construction of matrix (polling may also be used for matrix construction);
- ix. In case of exceptional circumstances, polling for security level valuation (Refer Note 2 below)

Note 1

Except for primary issuance through book building, polling shall be conducted to identify outlier trades. However, in case of any issuance through book building which is less than INR 100 Cr, polling shall be conducted to identify outlier trades.

Note 2

Some examples of exceptional circumstance would be stale spreads, any event/news in particular sector/issuer, rating changes, high volatility, corporate action or such other event as may be considered by valuation agencies. Here stale spreads are defined as spreads of issuer which were not reviewed/updated through trades/primary/polls in same or similar security/issuers of same/similar maturities in waterfall approach in last 6 months.

Further, the exact details and reasons for the exceptional circumstances which led to polling shall be documented and reported to AMCs. Further, a record of all such instances shall be maintained by AMCs and shall be subject to verification during SEBI inspections.

Note 3

All trades on stock exchanges and trades reported on trade reporting platforms till end of trade reporting time (excluding Inter-scheme transfers) should be considered for valuation on that day.

Note 4

It is understood that there are certain exceptional events, occurrence of which during market hours may lead to significant change in the yield of the debt securities. Hence, such exceptional events need to be factored in while calculating the price of the securities. Thus, for the purpose of calculation of VWAY of trades and identification of outliers, on the day of such exceptional events, rather than considering whole day trades, only those trades shall be considered which have occurred post the event (on the same day).

The following events would be considered exceptional events:

- i. Monetary / Credit Policy
- ii Union Budget
- iii Government Borrowing / Auction Days
- iv Material Statements on Sovereign Rating
- v. Issuer or Sector Specific events which have a material impact on yields
- vi Central Government Election Days
- vii Quarter end days

In addition to the above, valuation agencies may determine any other event as an exceptional event. All exceptional events along-with valuation carried out on such dates shall be documented with adequate justification.

2. Definition of tenure buckets for Similar Maturity

When a trade in the same ISIN has not taken place, reference should be taken to trades of either the same issuer or a similar issuer, where the residual tenure matches the tenure of the bond to be priced. However, as it may not be possible to match the exact tenure, it is proposed that tenure buckets are created and trades falling within such similar maturity be used as per table below.

Residual Tenure of Bond to be priced	Criteria for similar maturity
Upto 1 month	Calendar Weekly Bucket
Greater than 1 month to 3 months	Calendar Fortnightly Bucket
Greater than 3 months to 1 year	Calendar Monthly Bucket
Greater than 1 year to 3 years	Calendar Quarterly Bucket
Greater than 3 years	Calendar Half Yearly or Greater Bucket

In addition to the above:

a. In case of market events, or to account for specific market nuances, valuation agencies may be permitted to vary the bucket in which the trade is matched or to split buckets to finer time periods as necessary. Such changes shall be auditable. Some examples of market events / nuances include cases where traded yields for securities with residual tenure of less than 90 days and more than 90 days are markedly different even though both may fall within the same maturity bucket, similarly for less than 30 days and more than 30 days or cases where yields for the last week v/s second last week of certain months such as calendar quarter ends can differ.

b. In the case of illiquid/ semi liquid bonds, it is proposed that traded spreads be permitted to be used for longer maturity buckets (1 year and above). However, the yield should be adjusted to account for steepness of the yield curve across maturities.

c. The changes/deviations mentioned in clauses a and b, above, should be documented, along with the detailed rationale for the same. Process for making any such deviations shall also be recorded. Such records shall be preserved for verification.

3. Process for determination of similar issuer

Valuation agencies shall determine similar issuers using one or a combination of the following criteria. Similar issuer do not always refer to issuers which trade at same yields, but may carry spreads amongst themselves & move in tandem or they are sensitive to specific market factor/s hence warrant review of spreads when such factors are triggered.

- i. Issuers within same sector/industry and/or
- ii. Issuers within same rating band and/or
- iii. Issuers with same parent/ within same group and/or
- iv. Issuers with debt securities having same guarantors and/or
- v. Issuers with securities having similar terms like Loan Against Shares (LAS)/ Loan Against Property (LAP)

The above criteria are stated as principles and the final determination on criteria, and whether in combination or isolation shall be determined by the valuation agencies. The criteria used for such determination should be documented along with the detailed rationale for the same in each instance. Such records shall be preserved for verification. Similar issuers which trade at same level or replicate each other's movements are used in waterfall approach for valuations. However, similar issuer may also be used just to trigger the review of spreads for other securities in the similar issuer category basis the trade/news/action in any security/ies within the similar issuer group.

4. Recognition of trades and outlier criteria

i. Volume criteria for recognition of trades (marketable lot)

Paragraph 1.1.1.1(a) of SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 on Valuation of money market and debt securities, prescribes that the marketable lots shall be defined by AMFI, in consultation with SEBI. In this regard, marketable lot is defined as under. The following volume criteria shall be used for

Page 169 of 271

recognition of trades by valuation agencies:

Parameter	Minimum Volume Criteria for marketable lot
Primary	INR 25 cr for both Bonds/NCD/CP/ CD and other money market instruments
Secondary	INR 25 cr for CP/ CD, T-Bills and other money market instruments
Secondary	INR 5 Cr for Bonds/NCD/ G-secs

Trades not meeting the minimum volume criteria i.e. the marketable lot criteria as stated above shall be ignored.

ii. Outlier criteria

It is critical to identify and disregard trades which are aberrations, do not reflect market levels and may potentially lead to mispricing of a security or group of securities. Hence, the following broad principles would be followed by valuation agencies for determining outlier criteria.

a. Outlier trades shall be classified on the basis of liquidity buckets (Liquid, Semi-liquid, Illiquid). Price discovery for liquid issuers is generally easier than that of illiquid issuers and hence a tighter pricing band as compared to illiquid issuers would be appropriate.

b. The outlier trades shall be determined basis the yield movement of the trade, over and above the yield movement of the matrix. Relative movement ensures that general market movements are accounted for in determining trades that are outliers. Hence, relative movement over and above benchmark movement shall be used to identify outlier trades.

c. Potential outlier trades which are identified through objective criteria defined above will be validated through polling from market participants. Potential outlier trades that are not validated through polling shall be ignored for the purpose of valuation.

d. The following criteria shall be used by valuation agencies in determining Outlier Trades

Liquidity classification	Bps Criteria (Yield movement over Previous Day yield after accounting for yield movement of matrix)		
	Up to 15 days	15-30 days	Greater than 30 days
Liquid	30 bps	20 bps	10 bps
Semi-Liquid	45 bps	35 bps	20 bps
Illiquid	70 bps	50 bps	35 bps

The above criteria shall be followed consistently and would be subject to review on a periodic basis by valuation agencies and any change would be carried in consultation with AMFI.

e. In order to ensure uniform process in determination of outlier trades the criteria for liquidity classification shall be as detailed below.

Liquidity classification criteria - Liquid, semi-liquid and Illiquid definition

Valuation agencies shall use standard criteria for classifying trades as Liquid, Semi-Liquid and illiquid basis the following two criteria

- a. Trading Volume
- b. Spread over reference yield

Such criteria shall be reviewed on periodic basis in consultation with AMFI.

Trading Volume (Traded days) based criteria:

Number of unique days an issuer trades in the secondary market or issues a new security in the primary market in a calendar quarter

- Liquid→ $\geq 50\%$ of trade days
- Semi liquid → $\geq 10\%$ to 50% trade days
- Illiquid→ $< 10\%$ of trade days

Spread based criteria:

Spread over the matrix shall be computed and based on thresholds defined, issuers shall be classified as liquid, semi liquid and illiquid. For bonds thresholds are defined as upto 15 bps for liquid; $>15-75$ bps for semi-liquid; > 75 bps for illiquid. (Here, spread is computed as average spread of issuer over AAA Public Sector Undertakings/Financial Institutions/Banks matrix), For CP/ CD- upto 25 bps for liquid; $>25-50$ bps for semiliquid; > 50 bps for illiquid. (Here, spread is computed as average spread of issuer over A1+/AAA CD Bank matrix).

The thresholds shall be periodically reviewed and updated having regard to the market.

The best classification (liquid being the best) from the above two criteria (trading volume and spread based) shall be considered as the final liquidity classification of the issuer. The above classification shall be carried out separately for money market instruments (CP/ CDs) and bonds.

5.Process for construction of spread matrix

Valuation agencies shall follow the below process in terms of calculating spreads and constructing the matrix:

Steps	Detailed Process
Step 1	Segmentation of corporates- The entire corporate sector is first categorised across following four sectors i.e. all the corporates will be catalogued under one of the below mentioned bucket: <ol style="list-style-type: none"> 1. Public Sector Undertakings/ Financial Institutions/Banks;

Page 171 of 271

Steps	Detailed Process
	<ol style="list-style-type: none"> 2. Non-Banking Finance Companies -except Housing Finance Companies; 3. Housing Finance Companies; 4. Other Corporates
Step 2	<p>Representative issuers – For the aforesaid 4 sectors, representative issuers (Benchmark Issuers) shall be chosen by the valuation agencies for only higher rating (i.e. "AAA" or AA+). Benchmark/Representative Issuers will be identified basis high liquidity, availability across tenure in AAA/AA+ category and having lower credit/liquidity premium. Benchmark Issuers can be single or multiple for each sector.</p> <p>It may not be possible to find representative issuers in the lower rated segments, however in case of any change in spread in a particular rating segment, the spreads in lower rated segments should be suitably adjusted to reflect the market conditions. In this respect, in case spreads over benchmark are widening at a better rated segment, then adjustments should be made across lower rated segments, such that compression of spreads is not seen at any step. For instance, if there is widening of spread of AA segment over the AAA benchmark, then there should not be any compression in spreads between AA and A rated segment and so on.</p>
Step 3	<p>Calculation of benchmark curve and calculation of spread</p> <ol style="list-style-type: none"> 1. Yield curve to be calculated for representative issuers for each sector for maturities ranging from 1 month till 20 years and above. 2. Waterfall approach as defined in Part A (1) above will be used for construction of yield curve of each sector. 3. In the event of no data related to trades/primary issuances in the securities of the representative issuer is available, polling shall be conducted from market participants 4. Yield curve for Representative Issuers will be created on daily basis for all 4 sectors. All other issuers will be pegged to the respective benchmark issuers depending on the sector, parentage and characteristics. Spread over the benchmark curve for each security is computed using latest available

Steps	Detailed Process
	<p>trades/primaries/polls for respective maturity bucket over the Benchmark Issuer.</p> <p>5. Spreads will be carried forward in case no data points in terms of trades/primaries/polls are available for any issuer and respective benchmark movement will be given.</p>
Step 4	<p>1. The principles of VWAY, outlier trades and exceptional events shall be applicable while constructing the benchmark curve on the basis of trades/primary issuances.</p> <p>2. In case of rating downgrade/credit event/change in illiquidity or any other material event in Representative Issuers, new Representative Issuers will be identified. Also, in case there are two credit ratings, the lower rating to be considered.</p> <p>3. Residential tenure of the securities of representative issuers shall be used for construction of yield curve.</p>

Part B : Valuation of G-Secs (T-Bill, Cash management bills, G-Sec and SDL)

The following is the waterfall mechanism for valuation of Government securities:

- VWAY of last one hour, subject to outlier validation
- VWAY for the day (including a two quote, not wider than 5 bps on NDSOM), subject to outlier validation
- Two quote, not wider than 5 bps on NDSOM, subject to outlier validation
- Carry forward of spreads over the benchmark
- Polling etc

Note:

1. VWAY shall be computed from trades which meet the marketable lot criteria stated in Part A of these Guidelines.
2. Outlier criteria: Any trade deviating by more than +/- 5 bps post factoring the movement of benchmark security shall be identified as outlier. Such outlier shall be validated through polling for inclusion in valuations. If the trades are not validated, such trades shall be ignored.

COMPUTATION OF NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date. The Fund shall value its investments according to the valuation norms, as specified in Schedule VIII of the Regulations, or such norms as may be prescribed by SEBI from time to time and as stipulated in the valuation policy and procedures of the Fund, provided in Statement of Additional Information (SAI).

The NAV of the Scheme shall be rounded off upto two/four (depending on the nature of Scheme, kindly refer SID for details) decimals

NAV of units under the Scheme shall be calculated as shown below:

Market or Fair Value of Scheme's investments + Current Assets
- Current Liabilities and Provision NAV (Rs.)

No. of Units outstanding under Schemes

The NAV will be calculated as of the close of every Business Day of the respective Scheme(s). The valuation of the Scheme(s)' assets and calculation of the Scheme(s)' NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Illustration on computation of NAV:

If the net assets of the Scheme are Rs.10,45,34,345.34 and units outstanding are 10,00,0000, then the NAV per unit will be computed as follows:

$10,45,34,345.34 / 10,00,0000 = \text{Rs. } 10.45 \text{ p.u.}$ (rounded off to two decimals, may vary to 4 decimals depending on the SID of the scheme)

B. Policy for computation of NAV in foreign securities -Kindly refer to the valuation policy.

C. Procedure in case of delay in disclosure of NAV

The NAV of the schemes shall be declared as per timelines stated in the respective SID on AMC and AMFI website.

In case of any delay, the reasons for such delay would be explained to AMFI and SEBI by the next day. If the NAVs are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons and explaining when the Fund would be able to publish the NAVs.

V. TAX & LEGAL & GENERAL INFORMATION

Taxation Information

TAXATION ON INVESTING IN MUTUAL FUNDS

The following outline of tax implications is provided for general information purposes only, based on the law prevailing as at the date of this document and also incorporating the amendments made by the Finance Act, 2025. These implications should be considered in light of the specific facts of each individual case. Furthermore, in the event of periodic amendments to the relevant legislation, the nature and / or quantum of these benefits / implications are subject to change.

Accordingly, it is recommended that each unit holder should appropriately consult its tax consultant with respect to the specific tax implications arising out of their participation in the scheme.

I. To the Mutual Fund:

Income in the hands of the Mutual Fund

The entire income of a Mutual Fund registered under the Securities and Exchange Board of India Act, 1992 or any regulations made thereunder is exempt from income tax in accordance with the provisions of section 10(23D) of the Income-tax Act, 1961 ('the Act').

Income received by a Mutual Fund is not liable for the deduction of income tax at source as per the provisions of section 196(iv) of the Act. Where the Mutual Fund receives any income from investments made in overseas jurisdictions, this income may be subject to withholding in the relevant jurisdiction. As the income of the Mutual Fund is exempt from tax in India, credits/ refunds in relation to these foreign taxes may not be available in India.

Distribution of income by the Mutual Fund to the unit holders

Distribution of income by the Mutual Fund to the unitholders will be taxed directly in the hands of the unitholders of the mutual fund at the tax rates applicable to them. Further, the taxpayer can claim a deduction of interest expenditure only under section 57 of the Act which shall be restricted to 20% of the gross dividend income.

II. To the unit holders:

Deduction from total income

Under section 80C of the Act, an assessee, being an individual or HUF, is eligible to claim a deduction up to an aggregate of Rs. 1.50 lakhs on account of sums paid as subscription to units of an Equity Linked Savings Scheme ('ELSS')*.

** Provided that the Assessee is not opting for default tax regime under section 115BAC of the Act.*

ELSS refers to a scheme formulated under Equity Linked Savings Scheme, 2005, as notified by the Central Board of Direct Taxes, Ministry of Finance vide notification dated 3 November 2005 as amended vide notification dated 13 December, 2005.

Securities Transaction Tax

Under chapter VII of the Finance (No. 2) Act, 2004, the unit holder is liable to pay Securities Transaction Tax ('STT') on any 'taxable securities transaction' at the applicable rate. Taxable securities transactions include sale of units of an equity oriented fund, entered into on the stock exchange or the sale of units of an equity oriented fund to the Mutual Fund.

The purchaser of the units of an equity oriented fund is not liable to pay STT, where the purchase is entered into on a recognized stock exchange and the contract for the purchase of such units is settled by the actual delivery or transfer of such units.

The seller of the units of an equity oriented fund is liable to pay STT at 0.001%, where the sale is entered into on a recognized stock exchange and the contract for sale of such units is settled by the actual delivery or transfer of such units.

At the time of the sale of units of an equity oriented fund to the Mutual Fund, the seller is required to pay STT @ 0.001%.

STT is not applicable on purchase / sale / redemption of units other than equity oriented units.

STT is not deductible for the computation of capital gains. However, if it is held that gains on the sale of securities are in the nature of business profits, then for the purpose of computing the business income, an amount equivalent to the STT paid on the transaction value will be allowed as a deduction from the gains earned, under section 36 of the Act.

We have tabulated below the STT rates applicable on sale/ purchase of various securities for your ease of reference:

Transactions/Particulars	Payable by Purchaser	Payable by Seller
Delivery based purchase/sale transaction in equity shares entered into in a recognized stock exchange	0.1%	0.1%
Non-delivery-based sale transaction in equity shares or units of equity-oriented fund entered in a recognised stock exchange	N.A.	0.025%
Delivery based sale transaction of unit of equity-oriented fund	N.A.	0.001%

Page 176 of 271

Transactions/Particulars	Payable by Purchaser	Payable by Seller
Sale of options in securities	0.125% of the difference between the strike price and settlement price of the option (In case option is exercised)	0.1%
Sale of futures in securities	N.A.	0.02%
Sale of unlisted shares under an offer for sale to the public	N.A.	0.2%
Sale of a unit of an equity-oriented fund to the Mutual Fund	N.A.	0.001%

Incomes from units

Income in the nature of dividends (IDCW) distributed by mutual funds will be taxable in the hands of the unitholders under section 56 of the Act under the head 'Income from Other Sources' at the applicable rates. Further, the taxpayer can claim a deduction of interest expenditure only under section 57 of the Act which shall be restricted to 20% of the gross dividend income.

Tax deduction at source (TDS) on income distributed by mutual funds

Resident unitholders

Section 194K provides that mutual funds are required to withhold tax on income in respect of units at the rate of 10% on income (in excess of INR 10,000) paid to a resident. It has been clarified that the provisions of section 194K of the Act shall apply only in respect of income in the nature of dividends distributed (IDCW) by the mutual fund and shall not apply in respect of income which is in the nature of capital gains on units of mutual fund.

Non-resident unitholders

Section 196A of the Act requires mutual fund to withhold taxes on income in respect of units at the rate of 20% (plus applicable surcharge and health and education cess) or the rates provided in the tax treaty on any income paid to a non-resident

Gains on transfer / redemption of units

Gains arising on transfer / redemption of units, as well as from switching between schemes will be chargeable to tax under the Act. The characterization of income from investments in securities as 'business income' or 'capital gains' should be examined on a case-by-case basis.

Any securities held by a Foreign Institutional Investor ('FI')² which have invested in such securities in accordance with the regulations made under Securities and Exchange Board of India Act, 1992, should be regarded as capital assets. Thus, gains arising on transfer/redemption of units by FIIs should be characterized as capital gains.

The CBDT has issued Circular No. 6 of 2016, dated February 29, 2016 providing that listed shares / securities held for more than 12 months would be treated as capital gains unless the tax payer himself treats the same as stock in trade; in other cases, involving sale of listed shares / securities, the characterisation of income would be decided on the basis of previous circulars and instructions issued by the CBDT on this subject. The Circular also provides that a position once adopted by the taxpayer would not be allowed to be changed and it would be applicable for the subsequent assessment years. It is however clarified that the principles as outlined in the circular shall not be applicable in cases where the genuineness of the transaction itself is questionable.

- **Business Income**

Where the units of the Mutual Fund are regarded as business assets, then any gains arising from the transfer / redemption of units would be taxed under the head of "Profits and gains of business or profession" under section 28 of the Act. The gain / loss is to be computed under the head of "Profits and gains of business or profession" after allowing for normal business expenses (inclusive of the expenses incurred on the transfer).

Business income is chargeable to tax at the following rates:

The section further provides that if any sum is credited to any account, whether called "suspense account" or by any other name, in the books of the buyer liable to pay such income, such credit of income shall be deemed to be the credit of such income to the account of the payee (i.e. seller) and the provisions of this section shall apply accordingly.

The provisions of this section shall not apply to a transaction on which—

However, the provisions of this section shall not apply to a non-resident who does not have permanent establishment in India.

- **Dividend stripping**

As per section 94(7) of the Act, loss arising on sale of units which are bought within 3 months of the record date and sold within 9 months after the record date, shall be ignored for the purpose of computing income chargeable to tax to the extent of exempted income received or receivable on such units.

In the Finance Act, 2022 the said provision is applicable to securities as well and the definition of unit has also been modified, so as to include units of business trusts and AIF, within the definition of units. This amendment will take effect from 01 April 2022.

- **Bonus stripping**

As per section 94(8) of the Act, units purchased within a period of 3 months prior to record date of entitlement of bonus and sold within a period of 9 months after such date, the loss arising on the transfer of original units shall be ignored for the purpose of computing the income chargeable to tax.

The amount of loss ignored shall be deemed to be the cost of purchase / acquisition of the bonus units.

In the Finance Act, 2022, sub-section 8 of the section 94 has modified the definition of unit, so as to include units of business trusts and AIF, within the definition of units.

⁶ As amended by Finance Act 2023 w.e.f. 1 July 2023.

- **Religious and Charitable Trust**

Investments in units of the Mutual Fund will rank as an eligible form of investment under section 11(5) of the Act read with Rule 17C of the Income-tax Rules, 1962 for Religious and Charitable Trusts.

- **New pension scheme**

Any income, including gains from redemption of Mutual Fund units, received by any person for, or on behalf of, the New Pension System Trust (as established under the provisions of Indian Trust Act, 1882, on 27 February, 2008), is exempt in the hands of such person under section 10(44) of the Act.

STT is not leviable in respect of taxable securities transactions entered into by any person for, or on behalf of, the New Pension System Trust referred to in section 10(44) of the Act.

- **Deemed Income**

Under section 56(2)(x) of the Act, receipt of shares and securities without consideration or without adequate consideration, the difference (if exceeding fifty thousand rupees) between the aggregate FMV and such consideration is taxable as income in the hands of any person being recipient of such shares and securities.

Further the above provision of section 56(2)(x) shall not apply to any units/shares received by the donee:

- (a) From any relative; or
- (b) On the occasion of the marriage of the individual; or
- (c) Under a will or by way of inheritance; or
- (d) In contemplation of death of the payer or donor, as the case may be; or
- (e) From any local authority as defined in the Explanation to clause (20) of section 10 of the Act; or
- (f) From any fund or foundation or university or other educational institution or hospital or other medical institution or any trust or institution referred to in clause (23C) of section 10 of the Act; or
- (g) From any trust or institution registered under section 12AA of the Act.
- (h) Transaction not regarded as transfer under clause (i), (vi), (via), (viaa), (vib), (vic), (vica), (vicb), (vid), (vii) of section 47.
- (i) from an individual by a trust created or established solely for the benefit of relative of the individual.

The term 'relative' shall mean:

A] In the case of an Individual –

- (i) The spouse of the individual
- (ii) The brother or sister of the individual

- (iii) The brother or sister of the spouse of the individual
- (iv) The brother or sister of either of the parents of the individual
- (v) Any lineal ascendant or descendant of the individual
- (vi) Any lineal ascendant or descendant of the spouse of the individual
- (vii) The spouse of the person referred to in clauses (ii) to (vi), and

B] In case of a HUF, any member thereof.

- **Roll-over of schemes:**

As per Circular No. 6 of 2015 dated 9 April 2015, issued by the Central Board of Direct Taxes, the unit of a mutual fund constitutes a capital asset and any sale, exchange or relinquishment of such unit is a 'transfer' under clause (47) of section 2 of the Act. The roll over in accordance with the Regulation 33(4) of the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996, will not amount to transfer as the scheme remains the same. Accordingly, no capital gains should arise at the time of exercise of the option by the investor to continue in the same scheme. The capital gains will, however, arise at the time of redemption of the units or opting out of the scheme, as the case may be.

Potential U.S tax implications with respect to the U.S investments of ICICI Prudential US Bluechip Equity Fund and ICICI Prudential Nasdaq 100 Index Fund:

The information / benefits discussed below are not exhaustive and it is only intended to provide general information to the investors and is neither designed nor intended to be substitute for professional tax advice. In view of the individual nature of the implications, each investor is advised to consult his or her own tax advisors/authorized dealers with respect to the specific amount of tax and other implications arising out of his or her participation in the schemes. The information provided below sets out the possible tax benefits / implications to the Mutual Fund (also referenced herein as the "Scheme") and its unit holders under the current tax laws presently in force in the US. Several of these benefits are dependent on the Mutual Fund or its unitholders fulfilling the conditions prescribed under the relevant tax laws. Hence, the ability of the Mutual Fund or its unit holders to derive the tax benefits is dependent upon fulfilling conditions, as may be necessary. It may be also kept in mind that the Mutual Fund may or may not choose to fully utilize the benefits. The US Tax Discussion below only discusses US federal tax matters and does not include a discussion of US state or local tax matters. Most of the 50 states have some form of income taxation or other alternative taxation such as a capital tax.

II. INCOME-TAX IMPLICATIONS FOR THE MUTUAL FUND

1. Investment in U.S. listed equity

(i) Capital Gains

Under Section 865(a)(2) of the Internal Revenue Code (the Code) of the U.S., income from the sale of personal property by a non-U.S. resident is sourced outside of the U.S., and thus generally should not be subject to U.S. federal income tax.

In addition, under Section 864(b)(2)(A), trading in stock or securities is generally not considered a U.S. trade or business, except when the taxpayer is a dealer in stocks or securities and effects the trades through U.S. offices directly or through the U.S. office of its agent other than an independent agent (Trading Safe Harbor).

However, if the Scheme invests in any entities that are treated as partnerships for U.S. federal income tax purposes and if these partnerships are engaged in a U.S. trade or business, then the Scheme itself would be treated as engaged in such a U.S. trade or business, would likely be required to file a U.S. income tax return and potentially pay U.S. tax on its distributive share of partnership income, and may be subject to tax and to potential withholding with respect to sales of an interest in such partnership.

Moreover, Section 897(a) may treat gain derived by a non-U.S. resident from the disposition of a U.S. Real Property Interest (USRPI) as income that is effectively connected with the conduct of a U.S. trade or business and thus subject such gain to U.S. federal income tax (and to a requirement to file a U.S. income tax return). Shares of a U.S. Real Property Holding Corporation (USRPHC), i.e. a company that owns substantial U.S. real estate, would generally be treated as USRPI. Likewise, an interest in a publicly traded partnership (PTP) that holds substantial U.S. real estate would generally be treated as a USRPI.

Nonetheless, the definition of a USRPI excludes stock of a U.S. corporation that is regularly traded on an established securities market, but such exclusion only applies if the stock is held by a person who, during the 5-year look-back period, did not actually or constructively own more than 5% of that class of stock. The USRPI exclusion for publicly traded stock for holders of 5% or less of such stock is increased to 10% solely in the case of a publicly traded real estate investment trust (REIT). Moreover, the exclusion would apply for a non-resident holding not more than a 5% interest in a PTP that is also a USRPI.

Generally, a taxpayer's interest in a domestic corporation is not treated as a USRPI held by the taxpayer if the corporation (i) had no USRPI on the date of the taxpayer's disposition of the interest, and (ii) all of the USRPI held by the corporation during the shorter of the taxpayer's holding period, or the five-year period preceding the date of taxpayer's disposition of the interest, was disposed of by the corporation in a transaction in which gain (if any) was fully recognized (or such USRPIs ceased to be USRPIs by reason of the rule described in this sentence). This exception to the definition of USRPI is commonly referred to as the "cleansing rule."

The cleansing rule is inapplicable, where the corporation, or any predecessor to the corporation, was a Regulated Investment Company (RIC) or REIT at any time during the shorter of (i) the period during which the taxpayer held the relevant interest in the corporation, or (ii) the five-year period ending on the date of the taxpayer's disposition of the interest.

As the Scheme should not be considered as having a U.S. trade or business by reasons of its investment activities (provided that it does not invest in partnerships that are engaged in a U.S. trade or business), capital gains derived by the Scheme from the sale of listed U.S. equity should not be subject to tax in the U.S. provided the Scheme holds an interest of 5% or less of any class of stock or 10% in case of a publicly traded REIT, and 5% or less of a PTP that is also USRPI.

In case where the Scheme held, at sometime within the 5-year period ending on the date of disposition, more than 5% of the shares of a publicly-traded company that is also a USRPHC, 10% or more of a publicly traded REIT, or more than 5 % of a PTP that is also a USRPI, gain from disposition of such interest is subject to U.S corporate net income tax at a rate of 21%.

The AMC shall endeavor that the Scheme's exposure in a publicly-traded company that is also a USRPHC shall not exceed 5% or in case of a publicly traded REIT, shall not exceed 10%, or in the case of a partnership interest in a PTP that would be considered a USRPI, shall not exceed 5%, so that the capital gains received by the Scheme are not subject to tax in U.S.

It should be noted that Section 864(c)(8), provides that where a partnership, including a PTP, is engaged in a U.S. trade or business, if a non-U.S. partner disposes of the partnership interest, a portion of gain or loss is treated as connected with the conduct of a U.S. trade or business, and is therefore subject to U.S. tax. Such income also generates a requirement to file a U.S. tax return. Unlike the rules for PTPs that are USRPI, this provision is not subject to a 5% exception. In addition, Section 1446(f) imposes a requirement that when a non-U.S. partner disposes of an interest in such a partnership, the purchaser withholds 10% of the purchase price (as a prepayment of the ultimate tax liability). The IRS had suspended the withholding requirement with respect to interests in PTPs until such time as it finalizes regulations and issued interim guidance on withholding requirements was issued for non-PTP interests. Final regulations (T.D. 9926; November 30, 2020; 85 FR 76910), applicable to non-PTP transfers on or after January 29, 2021, were issued. It requires withholding of 10% of the amount realized on the transfer unless an exception applies. According to Notice 2021-51, the withholding requirement for PTP transfers and Section 1446(f)(4) backup withholding applies only to transfers on or after January 1, 2023. Revised Regulations Section 1.1446-4 were issued to address withholding on PTP distributions under Section 1446(a), effective January 1, 2023.

(ii) Dividend income

Under Section 881(a)(1) of the Code, dividend income received by a foreign corporation from sources within the U.S is subject to a 30% withholding tax. Thus U.S. source dividends received by the Scheme from investment in U.S. listed equities shall be subject to withholding tax of 30%.

US withholding tax should not apply with respect to distributions from Indian companies which issue ADRs/GDRs in the US.

(iii) Income from Notional Principal Contracts (NPC)

The statutory provisions of section 871(m) treat dividend equivalent payments with respect to U.S. equity-based NPCs as U.S.-source dividend income subject to U.S. gross basis and withholding tax by providing categories of "Specified NPCs". Special rules apply to certain so-called dividend equivalent payments which may be subject to 30% US withholding tax.

(iv) Dividend equivalent payments

Dividend equivalent payments are treated as U.S. source dividends. A dividend equivalent is a payment (as defined in Regulations section 1.871-15(c)) that, directly or indirectly, is contingent on, or determined by reference to, the payment of a dividend from U.S. sources. Dividend equivalent payments include the following payments.

- a. A substitute dividend made under a securities lending or sale-repurchase transaction involving a U.S. stock.
- b. A payment that references the payment of a dividend from an underlying security made under a specified notional principal contract (SNPC).
- c. A payment that references the payment of a dividend from an underlying security made to a specified equity-linked instrument (SELI).

(iii) **US Net Basis Taxation (i.e., ECTI)**

- i. If the Scheme is engaged in a US trade or business, it will be subject to US taxation on its ECTI generally at the rate of 21%. In addition, US branch profits tax of 30% will apply to any profits deemed to be distributed by the US trade or business to the Scheme. An analysis will need to be undertaken to determine the income that is considered to be effectively connected with the US trade or business. In general, US source non-FDAP ordinary income automatically will be effectively connected with a US trade or business under a so-called force of attraction rule. Capital gains are generally residence based sourced unless ECI to a U.S. trade or business under an asset use or business activities test. FDAP income is not automatically considered to be effectively connected with a US trade or business, but generally must be analyzed also under an asset use or business activity test to determine if it is effectively connected income. Foreign source FDAP income may also be ECI if attributable to a U.S. office or fixed place of business. The U.S. rules treat ECI FDAP income as wholly ECI and with limited exception applicable to securities dealers, do not apportion such income under transfer pricing principles among multiple locations where material functions may be performed.
- ii. ⁸ In general, there is a trading safe harbor for foreign persons who are trading in shares, securities, commodities or derivatives for their own account, such that the foreign person should not be considered engaged in a US trade or business as long as that person is not considered a dealer or such proprietary trading is effected only through an independent agent. U.S. proposed regulations prohibit foreign dealers from safe-harbor trading in derivatives. In addition, certain investments and activities do not qualify for the trading safe harbor. If a foreign person invests in a partnership, US or foreign, that is engaged in a US trade or business, then the foreign person will be

⁸ [10603198.pdf \(irs.gov\)](#)

considered to be engaged in a US trade or business. Examples of partnership investments include US master limited partnerships and Publicly Traded Partnerships (PTPs) that are classified as partnerships for US tax purposes. Thus, if the Scheme invests in a partnership that is engaged in a US trade or business, the Scheme will be considered to be engaged in a US trade or business and will need to evaluate all of its income to determine the income that is ECTI. In general, gain on the disposition of a partnership interest is treated by the Internal Revenue Service (IRS) as ECTI to the extent that the partnership has assets which generate ECTI. The Scheme does not / will not in future, invest in partnership interests and so should be covered under the trading safe harbor and so, the FDAP income should not be taxable as ECTI.

(v) Investment in US disregarded entities.

US domestic disregarded entities that are wholly owned by the Scheme of the Indian Mutual Fund will be required to comply with the reporting and record keeping obligations under section 6038A.

2. Investment in U.S Treasury bills, notes or bonds

(i) Capital Gains

Under Section 865(a)(2) of the Code, income from the sale of personal property by a non-U.S resident is sourced outside of the U.S. Thus, capital gains derived by the Scheme from the sale of U.S Treasury bills, notes or bonds shall not be subject to tax in the U.S.

(ii) Interest income

Under Section 881(a)(1)(A) of the Code, interest income received by a foreign corporation from sources within the U.S. is subject to a 30% withholding tax. Hence, interest income received by the Scheme shall generally be subject to withholding tax of 30%.

However, Section 881(c) provides that in the case of any portfolio interest received by a foreign corporation from sources within the U.S., no tax shall be imposed under Section 881(a)(1).

Portfolio interest generally means any interest which is paid on an obligation which is in registered form and with respect to which the person who would otherwise be the withholding agent receives a statement from the beneficial owner or a securities clearing organization, bank or other financial institution that holds customers' securities in the ordinary course of business that the beneficial owner of the obligation is not a U.S person. Certain additional requirements may apply. Nonetheless, U.S. Treasury bills, notes and bonds are generally expected to qualify for the portfolio interest exemption.

There are certain exceptions under US internal law, for interest on bank deposits, and short-term obligations (with terms to maturity of 183 days or less). There are also exceptions for certain longer-term debt under the portfolio interest exception which applies to interest income on certain registered obligations as long as the recipient is not a 10% or greater shareholder of the issuer.

Interest generated from US Treasury Securities should not be subject to US withholding tax but Investors can opt to have up to 50% of their Treasury bills' interest earnings

automatically withheld⁹. If income is characterized as interest, for instance income from a repurchase agreement with a term that exceeds 183 days, such income could be subject to a 30% withholding tax unless the repurchase agreement is with respect to qualifying registered portfolio interest indebtedness (e.g. U.S. Treasury securities). Certain contingent indebtedness does not qualify for the portfolio interest exception and is subject to 30% withholding tax on all U.S. source non-ECI contingent interest paid.

Sales of bonds between interest dates - Amounts paid as part of the purchase price of an obligation sold or exchanged between interest payment dates is not subject withholding. This does not apply if the sale or exchange is part of a plan the principal purpose of which is to avoid tax and you have actual knowledge or reason to know of the plan.

Further, as the Scheme shall be primarily investing in securities of companies that are listed on the NYSE and / or NASDAQ, the Scheme shall not be classified as an "Equity Oriented Fund" as per the provisions mentioned in the Income Tax Act, 1961. Hence the tax provisions as applicable to other than Equity Oriented Fund shall be applicable to the unitholders of the Scheme in India.

(iii) US Net Basis Taxation (i.e., ECTI)

As discussed above

3. Investment in U.S. Based Mutual Fund

(i) Capital Gains

As already noted, under Code Section 865(a)(2), income from the sale of personal property by a non-U.S resident is sourced outside of the U.S. Thus, generally capital gains derived by a non-U.S. resident investor from the sale of an investment in a U.S based mutual fund should not be subject tax in the U.S. However, if the mutual fund whose shares are sold is a USRPHC, then the gain arising to the non-U.S. resident is considered to be effectively connected with a U.S trade or business and thus subject to a 15% withholding tax on the gross proceeds received. The non-U.S. resident investor will be required to file a US federal income tax return. The final taxation generally will be 21% of the gain recognized with respect to the disposition of the USRPI, with the 15% withholding tax on gross proceeds functioning as a prepayment of the tax at the time of disposition.

As stated in the above paragraphs, generally, a taxpayer's interest in a domestic corporation is not treated as a USRPI held by the taxpayer if certain conditions are met which is commonly referred to as the "cleansing rule."

The cleansing rule is inapplicable, where the corporation, or any predecessor to the corporation, was a Regulated Investment Company (RIC) or REIT at any time during the shorter of (i) the period during which the taxpayer held the relevant interest in the corporation, or (ii) the five-year period ending on the date of the taxpayer's disposition of the interest.

Further, there is an exception that applies to the mutual fund whose shares are sold is (a) publicly traded and the investor held an interest of 5% or less in the mutual fund at all times

⁹ <https://www.treasurydirect.gov/marketable-securities/tax-forms-and-withholding/#id-paying-taxes-early-through-withholding-292629>

during the year preceding the sale or 10% or less in the case of a REIT (over the course of a 5- year look-back period) (b) the mutual fund is a domestically controlled qualified investment entity. Such exception also applies to the disposition of an interest in a publicly traded partnership (PTP).

Determining whether a REIT or RIC is “domestically controlled”

Regardless whether REIT or RIC stock is or is not publicly traded, stock in a REIT (or a RIC that is a QIE) has never been a USRPI if the REIT or RIC is a “domestically controlled” QIE. The PATH Act made no change to this. “Domestically controlled” QIE was and remains defined as a QIE in which less than 50 percent in value of the stock was held directly or indirectly by foreign persons at all times during the “testing period.”

The testing period is the shorter of (a) the 5-year period ending on the date of disposition, or (b) the period during which the entity was in existence

For the purpose of determining whether a QIE is domestically controlled, the following rules apply:

- A person holding less than 5% of any class of stock of a QIE which is regularly traded on an established securities market in the United States at all times during the testing period will be treated as a U.S. person unless the QIE has actual knowledge that such person is not a U.S. person.
- Any stock in a QIE that is held by another QIE will be treated as held by a foreign person if:
 - f. Any class of stock of such other QIE is regularly traded on an established securities market, or
 - g. Such other QIE is a RIC that issues certain redeemable securities.

Notwithstanding the above, the stock of the QIE will be treated as held by a U.S. person if such other QIE is domestically controlled.

- Stock in a QIE that is held by any other QIE not described above will be treated as held by a U.S. person in proportion to the stock ownership of such other QIE which is (or is treated as) held by a U.S. person.

If a foreign shareholder in a domestically controlled QIE disposes of an interest in the QIE in an applicable wash sale transaction, special rules apply (per section 897)

REIT Stock held by qualified collective investment vehicles not treated as USRPI

Whether publicly traded or not, when the REIT stock is held by a publicly traded foreign collective investment vehicle it will not be considered as USRPI status for REIT stock. It applies only to the extent that the investors in the publicly traded foreign entity are not themselves greater-than-10-percent shareholders (directly or indirectly, including through the publicly traded foreign entity) in the REIT. (Such greater-than-10-percent investors are called “applicable investors.”)

Special rules apply for investment in Real Estate Investment Trust (REITs). In general, the rules discussed above for US taxation of dispositions of USRPIs apply to REITs, however, domestically controlled REITs generally are not subject to US tax under the FIRPTA rules. In addition, a REIT must withhold on distributions of USRPIs to foreign persons at the rate of 21%. Generally, any distribution from a REIT attributable to gain from the sale or exchange

of a USRPI is treated as such gain by the foreign person receiving the distribution. Any distribution by a REIT on shares regularly traded on an established securities market in the United States is not treated as gain from the sale or exchange of a USRPI if the shareholder did not own more than 10% of that stock at any time during the REIT's tax year. These distributions are included in the shareholder's gross income as a dividend from the REIT, not as long-term capital gain.

The AMC shall endeavour that the Scheme's exposure in the a publicly-traded Mutual Fund / ETFs that is also a USRPHC shall not exceed 5% or in case of a publicly traded REIT, shall not exceed 10%,

(ii) Income distributions from U.S mutual funds

Generally, under Code Section 881(a)(1)(A), dividend income received by a foreign corporation from sources within the U.S is subject to 30% withholding tax. A mutual fund that is not subject to the USRPHC-related rules described above may distribute ordinary dividends which should be subject to 30% withholding tax. Dividends designated by a RIC (e.g., a mutual fund) as capital gain dividends are treated as long term capital gains in the hands of the shareholders. Except as described above for mutual funds that otherwise qualify as USRPHCs, because long-term capital gains are sourced to the domicile of the recipient, such capital gain dividends should not be U.S source if the recipient is a non-U.S person, and thus would not be subject to U.S taxation.

Until recently, Code Section 881(e)(1) excluded interest-related dividends received from a RIC (Regulated Investment Company) from the tax imposed by Code Section 881(a)(1). Under Code Section 881(e)(2), short-term capital gain dividends received from a RIC were also excluded from the tax imposed by Section 881(a)(1). However, unless they are retroactively extended, the provisions of Code Section 881(e)(1) and (2) are no longer effective for dividends paid as of January 1, 2015. A RIC will designate by written notice mailed to its shareholders whether a dividend (or part thereof) is a capital gain dividend, or, with respect to prior years, an interest related dividend or a short-term capital gain dividend. Notwithstanding the foregoing, under Code Section 897(h)(1), any distribution to a foreign person or other qualified investment entity by a qualified investment entity to the extent attributable to gain from sales or exchanges by the qualified investment entity of USRPIs is treated as gain from the sale or exchange of a USRPI by the foreign person, unless such distribution is with respect to stock that is publicly traded on a U.S exchange and the foreign person did not own more than 5% (or in the case of a REIT, no more than 10%) of such class of stock at any time during the 1-year period ending on the date of distribution. Where the distribution is treated as gain from the sale or exchange of a USRPI, the distribution is treated as income effectively connected to a U.S trade or business, subject to tax at U.S corporate tax rates and withheld on at a rate of 21% of the distribution. The total amount in tax paid should not exceed the liability as determined by applying the U.S corporate rate.

In addition, where distributions from the mutual fund are characterized as gain from the sale of a USRPI due to Code Section 897(h), discussed above, the income is considered effectively connected with the conduct of a U.S trade or business such that the branch profits tax provisions must be considered. Under Code Section 884(a), dividend equivalent amounts are subject to tax at a rate of 30%. The dividend equivalent amount is equal to a foreign corporation's effectively connected earnings and profits as determined under Code Section

884(b). Code Section 884(d)(2)(C) excludes gain on the disposition of an interest in a USRPHC from the definition of effectively connected earnings and profits. Thus where Code Section 897(h) applies to treat a dividend distribution as the sale of a USRPI and subject it to withholding, there is branch profits tax as well unless the distribution/gain is related to the sale of USRPHC shares by the qualified investment entity.

4. Treaty Benefits to the Mutual Fund

It is likely that the Scheme should be considered as a Person under Indian tax laws and so a tax resident of India and so is likely to be eligible to claim the Double Taxation Avoidance Agreement ('the DTAA' or 'the Treaty') benefits between India and the US on the income earned and tax, if any, payable in the US subject to completion of necessary documentations and the Scheme obtaining a tax residence certificate from the Indian tax authorities. As long as the Scheme is treated as a corporation for US tax purposes, the investors in the Scheme should not directly be subject to US tax. The main benefit of the DTAA is that it reduces the US withholding tax amount with respect to certain U.S. source FDAP payments and may exempt ECTI if it is not attributable to a U.S. permanent establishment.

As per the Treaty:

- (i) The Business income earned by the Scheme in the US should not be taxable in the US if the Fund does not have a permanent establishment in the US; If the Scheme has a permanent establishment in the US, then it will be subject to US tax on profits that are attributable to that permanent establishment. The United States attributes business profits to U.S. permanent establishments of Indian resident corporations under the same ECTI rules applicable to non-treaty residents with respect to the assets and activities conducted in the permanent establishment. A more limited force of attraction rule is also applicable.; The Scheme could be considered to have a permanent establishment in the US if it invests in a partnership that is engaged in a trade or business in the US. However, the scheme does not / will not in future invest in US partnership interest and so its income should not be taxable as ECTI;
- (ii) Capital gains arising on transfer of securities in the US should be taxable in the US as per the US tax laws (to the extent not otherwise exempt under the US tax laws); There is no exception in the DTAA for US taxation of disposition of USRPIs under the FIRPTA rules;
- (iii) In general, dividend income beneficially earned by the Scheme in the US should be taxable at the rate of 25% for portfolio ownership interests below 10%;
- (iv) Interest income beneficially earned by the Scheme in the US should be taxable at the rate of 15% (to the extent not otherwise exempt under US internal rules such as the portfolio interest exception discussed above); and
- (v) Any other income should be taxable in the US as per US tax laws.

5. FATCA Tax

The Foreign Account Tax Compliance Act (FATCA) is a new chapter included in Chapter 4 of the Code. It refers to provisions included in the Hiring Incentives to Restore Employment Act signed into law on March 18, 2010.

If the Mutual Fund is not registered with US IRS under the proposed India US IGA or does not sign an agreement with US IRS (i.e., a foreign financial institution agreement), if required, for FATCA compliance, there may be a withholding tax imposed at the rate of 30% over and

above the withholding tax mentioned above, on the US sourced income (i.e., dividends, interest and the gross proceeds from the sale of shares of US equities).

ICICI Prudential Mutual Fund is registered with the US IRS and has obtained a Global Intermediary Identification Number (GIIN) 54B8M8.99999.SL.356. The Scheme will be identifying foreign reportable unitholders in the scheme and reporting to the Indian Tax authorities under section 285BA of the Indian Income-tax Act for onward reporting by the Indian tax authorities to USA and other overseas jurisdictions.

(6) Income-Tax Implications for The Unit Holders

As long as the Scheme is treated as a corporation for US tax purposes, the unit holders in the Scheme should not be liable to income-tax in the US on the income earned by the Fund in the US.

B. Legal Information

(a) Facility

The SEBI (Mutual Fund) Regulations notifies that the mutual fund shall provide for nomination facility to the unit holders to nominate a person in whose favour the units shall be transmitted in the event of death of the unitholder. Please find below SEBI/ AMFI guidelines to be followed by the AMC on Nomination.

Any new investor, investing in Mutual Fund Units shall mandatorily have to provide nomination or Opt out of nomination through physical or online mode. The requirement of nomination shall be optional for jointly held folios.

The AMC provides both online and offline option for nomination:

The AMC shall comply with the provisions notified under the PMLA Act, 2002 and the circulars issued by SEBI and AMFI from time to time.

(c) Implementation of the Prevention of Money-laundering (Maintenance of Records) Second Amendment Rules, 2017 with respect to seeding of Aadhaar number:

The Prevention of Money-laundering (Maintenance of Records) Second Amendment Rules, 2017 have come into force with effect from June 01, 2017. These Rules, inter alia, make it mandatory for investors to submit Aadhaar number issued by the Unique Identification Authority of India (UIDAI) in respect of their investments.

Pursuant to the direction issued by Hon'ble Supreme Court on March 13, 2018 in Writ Petition (Civil) no. 494/2012, the date for mandatory submission of Aadhaar in respect of the existing mutual fund folios/accounts (including accounts/folios opened up to March 31, 2018) and for new accounts/folios of a new investor (i.e., an investor who is investing for the first time in the Fund and does not have any folio in the Fund), has been deferred till further notice.

Further, pursuant to the notification on Prevention of Money-laundering (Maintenance of Records) Amendment Rules, 2019 dated February 14, 2019, Aadhaar can be accepted as a valid document for proof of address or proof of identity, provided the investor redact or blackout his Aadhaar number while submitting the applications for investments.

(d) Prevention of Tax evasion

a) Foreign Account Tax Compliance Act (FATCA)

FATCA is a United States (US) Federal Law, to improve compliance of US tax citizens who have foreign financial assets and offshore accounts. In terms of FATCA, foreign financial institutions (FFIs) are required to report information about financial accounts held by US taxpayers (even if they hold only non-US assets), or held by foreign entities in which US taxpayers hold a substantial ownership interest.

The Government of India and US Government have signed an Inter-Governmental Agreement (IGA) on July 9, 2015 to implement FATCA. Pursuant to the reporting requirements mandated under FATCA, ICICI Prudential Asset Management Company Limited (the AMC)/the Fund would be required, from time to time:

- To undertake necessary due diligence process by collecting information/documentary evidence about US/Non-US status of the investors/unit holders and identify US reportable accounts; and
- To disclose/report information about the holdings, investments returns pertaining to US reportable accounts to the specified US agencies and/or such Indian authorities as may be specified under FATCA guidelines or under any other guidelines issued by Indian Regulatory Authorities such as SEBI, Income Tax etc. (collectively referred to as 'the Guidelines').

FATCA due diligence will be applicable at each investor/unit holder (including joint holders) level and on being identified as reportable person/specified US person, all folios/accounts will be reported including their identity, direct or indirect beneficiaries, beneficial owners and controlling persons. Further, in case of folio(s)/account(s) with joint holder(s), the entire account value of the investment portfolio will be attributable under each such reportable person. Investor(s)/Unit Holder(s) will, therefore, be required to comply with the request of the AMC/the Fund to furnish such information, in a timely manner as may be required by the AMC/the Fund to comply with the due diligence/reporting requirements stated under IGA and/or the Guidelines issued from time to time.

With respect to individuals, the US reportable accounts would cover those with US citizenship or US residency. One may note that in US, both US citizens and residents are taxed on their worldwide income. With respect to entities, FATCA requires reporting in relation to specified US persons (Eg. US partnerships, private corporations) as well as passive NFFEs in which controlling interest is held by specified US person.

The identification of US person will be based on one or more of the following "US indicia" –

- i. Identification of account holder as a US citizen or resident;
- ii. Unambiguous indication of a US place of birth;
- iii. Current US mailing or residence address (including a US post office box)
- iv. Current US telephone number;
- v. Standing instructions to transfer funds to an account maintained in USA;

Page 210 of 271

- vi. Current effective power of attorney or signing authority granted to a person with a US address; or
- vii. An “in-care of” or “hold mail” address that is the sole address that the Indian Financial Institution has on the file for the account holder.

FATCA provisions are relevant not only at on-boarding stage of investor(s)/unit holder(s) but also throughout the life cycle of investment with the Fund/the AMC. In view of this, Investors should immediately intimate to the Fund/the AMC, in case of any change in their status with respect to FATCA related declaration provided by them previously.

The Fund/AMC reserves the right to reject any application or redeem the units held directly or beneficially in case the applicant/investor(s) fails to furnish the relevant information and/or documentation in accordance with the FATCA provisions, notified.

Investors(s)/Unit holder(s) should consult their own tax advisors to understand the implications of FATCA provisions/requirements. Existing investors of the Fund are also advised to download the FATCA declaration form from the AMC's website (icicipruamc.com) and submit the duly filled FATCA declaration form to the AMC or CAMS for necessary updation in the records.

b) Common Reporting Standard (CRS)

On similar lines as FATCA, the Organization of Economic Development (OECD), along with the G20 countries, of which India is a member, has released a “Standard for Automatic Exchange of Financial Account Information in Tax Matters”, in order to combat the problem of offshore tax evasion and avoidance and stashing of unaccounted money abroad, requiring cooperation amongst tax authorities. The G20 and OECD countries have together developed a Common Reporting Standard (CRS) on Automatic Exchange of Information (AEOI). The CRS on AEOI was presented to G20 Leaders in Brisbane on 16th November, 2014. On June 3, 2015, India has joined the Multilateral Competent Authority Agreement (MCAA) on AEOI.

The CRS on AEOI requires the financial institutions of the “source” jurisdiction to collect and report information to their tax authorities about account holders “resident” in other countries, such information having to be transmitted “automatically” annually. The information to be exchanged relates not only to individuals, but also to shell companies and trusts having beneficial ownership or interest on the “resident” countries.

Appropriate rules have been notified to implement CRS and FATCA. In view of India's commitment to implement the CRS on AEOI and also the IGA with USA, and with a view to provide information to other countries, necessary legislative changes have been made through Finance (No. 2) Act, 2014, by amending section 285BA of the Income –tax Act, 1961. Income tax Rules, 1962 were amended vide notification No. 62 of 2015 dated 7th August, 2015 by inserting Rules 114F to 114H and Form 61B to provide a legal basis for the Reporting Financial Institutions (RFIs) for maintaining and reporting information about the Reportable Accounts.

The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in

breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable NAV on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

The above requirements of minimum number of investors and maximum holdings shall not be applicable for Exchange Traded Funds in accordance with SEBI (MF) Regulations.

21. ASBA disclosure

In accordance with SEBI Master Circular dated June 27, 2024, ASBA facility shall be provided to investors as a supplementary facility in addition to existing facility through cheques or any other mode of electronic payment for subscribing to the units of scheme(s) during the New Fund Offer. Please note that ASBA facility is purely optional and not mandatory. In its continuing endeavor to make the existing New Fund Offer process more efficient SEBI has introduced a supplementary process, viz: the Applications Supported by Blocked Amount (ASBA) facility. ASBA is an application containing an authorization given by the Investor to block application money in his specified bank account towards the subscription of Units offered during the NFO of the Scheme. If an investor is applying through ASBA facility, the application money towards the subscription of Units shall be debited from his specified bank account only if his/her application is selected for allotment of Units.

To avail of the ASBA Facility, an investor must be holding a Bank account with Self Certified Syndicate Bank (SCSB). SCSB means a banker to an issue registered with the SEBI, which offers the facility of ASBA. ASBA applications can be accepted only by SCSBs at their designated branches, whose names appear on the list of SCSBs displayed in SEBI's website (<http://www.sebi.gov.in/pmd/scsb.pdf>).

The SCSB shall then block the application money in the bank account specified in the ASBA, on the basis of an authorisation to this effect given by the account holder in the ASBA. The application money shall remain blocked in the bank account till the allotment of the issue or till withdrawal/rejection of the application, as the case may be. ASBA facility will be available to all the category of investors mentioned under "Who can invest" Section of the respective SID. An investor, who is eligible for ASBA facility, has the option of making application through ASBA or through the existing facility of applying with cheque as mentioned in the SID.

Investors should note that ASBA facility shall be made available to investors only for subscribing to the units of scheme during the New Fund Offer period.

22. Portfolio Turnover Details

Portfolio turnover is defined as the lower of purchases and sales after reducing all subscriptions and redemptions and derivative transactions there from and calculated as a percentage of the average assets under management of the Scheme during a specified period of time.

The AMC's portfolio management style is conducive to a low portfolio turnover rate. However, the AMC will take advantage of the opportunities that present themselves from time to time because of the inefficiencies in the securities markets. The AMC will endeavour to balance the increased cost on account of higher portfolio turnover with the benefits derived there from.

UNDERWRITING BY THE FUND

Subject to the Regulations, the Scheme may enter into underwriting agreements after the Fund obtains a certificate of registration in terms of the Securities and Exchange Board of India (Underwriters) Rules and the Securities and Exchange Board of India (Underwriters) Regulations, 1993, authorizing it to carry on activities as underwriters.

The capital adequacy norms for the purpose of underwriting shall be the net assets of the Scheme and the underwriting obligation of the Scheme shall not at any time exceed the total net asset value of the Scheme.

DISCLOSURE ON SOFT DOLLAR ARRANGEMENTS

In terms of paragraph 10.1.15 of the SEBI Master Circular, soft dollar arrangements between the Asset Management companies (AMCs) and brokers should be limited to only benefits

Page 240 of 271

(like free research report, etc.) that are in the interest of investors and the same should be suitably disclosed.

In this regard, it may be noted that ICICI Prudential Asset Management Company Limited (the AMC) does not have any Soft-Dollar arrangements with any of its brokers. Separately, such brokers may provide research related services which can facilitate in investment decision making process (like research reports, meetings /calls with subject experts, etc.) and / or trade execution related services. Such arrangements are in the interest of investors of ICICI Prudential Mutual Fund (the Fund).

The AMC/Fund is not obliged to use the services of any these brokers for trade execution.

Potential Risk Class (PRC) Matrix

In terms of paragraph 17.5 of SEBI Master Circular all debt schemes are required to be classified in terms of a Potential Risk Class matrix consisting of parameters based on maximum interest rate risk (measured by Macaulay Duration (MD) of the scheme) and maximum credit risk (measured by Credit Risk Value (CRV) of the scheme).

In addition to the above stated requirements, at all points of time, positioning of the aforementioned Index Fund in the Potential Risk Class (PRC) matrix shall be in the same cell as that of positioning of the index in the PRC matrix.

DISCLOSURE ON SWING PRICING:

In terms of paragraph 4.10 of SEBI Master circular, all open ended debt mutual fund schemes (except overnight funds, Gilt funds and Gilt with 10-year maturity funds) are required to follow Swing Pricing Framework.

SEBI has prescribed swing pricing for scenarios related to net outflows from the schemes. Accordingly, a mandatory full swing price framework, during market dislocation times (as and when declared by SEBI), for high-risk open ended debt schemes is being introduced in scheme provisions of all Debt Schemes of the Fund except ICICI Prudential Overnight Fund, ICICI Prudential Liquid Fund, ICICI Prudential Gilt Fund, ICICI Prudential Constant Maturity Gilt Fund and ICICI Prudential Money Market Fund.

The minimum swing factor as given below will be applicable. The NAV will be adjusted downwards for both the incoming and outgoing investors.

Minimum swing factor for open ended debt schemes			
Credit Risk of scheme →	Class A (CRV* \geq 12)	Class B (CRV \geq 10)	Class C (CRV<10)
Interest Rate Risk of scheme ↓			
Class I: (MD \leq 1 year)	NIL	NIL	1.50%
Class II: (MD \leq 3 years)	NIL	1.25%	1.75%
Class III: Any Macaulay duration (MD)	1.00%	1.50%	2.00%

When swing pricing mechanism is triggered and swing factor is made applicable during market dislocation, both the incoming and exiting investors shall get NAV adjusted for swing pricing. Swing pricing shall be made applicable to all unitholders at PAN level, with an exemption for redemptions up to Rs. 2 lakh for each mutual fund scheme for market dislocation.

AMFI vide circular dated November 4, 2024 has prescribed parameters for determination of thresholds for triggering swing pricing for normal times, which shall be followed by the AMCs. The circular also prescribes an indicative range of swing threshold for normal times.

Threshold for Triggering Swing Pricing during Normal Times for all open-ended debt scheme (excluding overnight funds, Gilt funds, and Gilt funds with 10-year maturity):

- 10% net flow from any debt scheme other than Liquid scheme.
- 15% net flow for Liquid scheme.

The thresholds have been kept reasonable to ensure that normal redemption flows should not be penalized with Swing pricing.

At the same time, the floors are not very high to ensure that the Swing pricing would typically get triggered before the LRM allocations are exhausted. Secondly, a moderate floor will also allow individual AMCs to take care of the relative liquidity on the asset side for different type of schemes. These are floor triggers and AMCs are free to set these limits higher, depending on the dynamics of their schemes both on liability side and on asset side.

Triggering Swing Pricing on Re-opening of a Scheme after announcement of winding up

1. In cases of instances where the AMC after making an announcement to wind up a scheme, decides to roll-back the decision to wind up the scheme. Such situations may trigger large scale redemptions and hence it would be prudent to invoke the Swing Pricing mechanism to manage such a situation. In other words, if the AMC decides to reverse its decision to wind up the scheme shall mandatorily invoke the Swing pricing upon re-opening a scheme for subscriptions and redemptions post such announcement.
2. The indicative range of swing pricing for the parameter of "Re-opening of the scheme after announcement of Winding -Up" shall be the same as applicable for swing pricing during normal times as communicated by AMFI from time to time.
3. The swing pricing period in the above instances shall be higher of:-
 - swing period as may be decided by the Board of AMC or
 - minimum period of 7 working days, upon re-opening a scheme for subscriptions and redemptions.

Liquidity Risk Management Framework:

In accordance with SEBI circular and AMFI guidelines (issued from time to time), the AMC has put in place the Liquidity Risk Management Framework which monitors the liquidity risk. As per the prescribed guidelines, the liquidity ratios are calculated and liquid assets are maintained on a daily basis at scheme level for all open-ended schemes (except ICICI Prudential Overnight Fund, ICICI Prudential Gilt Fund and ICICI Prudential Constant Maturity Gilt Fund). These ratios address the potential liquidity risk scenarios upto 99% confidence interval. The guidelines also outline the action plan in case there is a difference between actual outcome and projected outcome. Further, the AMC monitors asset-liability mismatch requirement which addresses potential liquidity requirement over a 90-day period and relevant asset side liquidity to be maintained as prescribed by the SEBI circular.

Stress testing:

In accordance with SEBI circular and AMFI guidelines (issued from time to time), the AMC carries out stress testing for all open ended debt schemes (except overnight scheme). Stress testing covers impact on the scheme NAV on account of interest rate risk, credit risk and liquidity risk.

BENCHMARKING OF PERFORMANCE OF SCHEMES.

Pursuant to the provisions stated by SEBI, the performance of the schemes of ICICI Prudential Mutual Fund shall be benchmarked to the Total Return variant of the Index (TRI) chosen as benchmark for the respective schemes. However, for schemes where TRI data is not available since inception of the scheme, the Mutual funds shall use a composite CAGR figure of the performance of the PRI benchmark (till the date from which TRI is available) and the TRI (subsequently) to compare the performance of the schemes in case TRI is not available for that particular period(s).

F. Information pertaining to Investments by the Schemes of the Fund

➤ **Derivative Strategies**

Trading in Derivatives

The Scheme may use derivatives instruments like Stock/ Index Futures, Interest Rate Swaps, Forward Rate Agreements or such other derivative instruments as may be introduced from time to time for the purpose that may be permitted by SEBI MF regulations from time to time.

The following information provides a basic idea as to the nature of the derivative instruments proposed to be used by the Scheme and the risks attached there with.

Advantages of Derivatives:

The volatility in Indian markets both in debt and equity has increased over last few months. Derivatives provide unique flexibility to the Scheme to hedge part of its portfolio. Some of the advantages of specific derivatives are as under:

Equity Derivative

The Scheme intends to use derivatives for purposes that may be permitted by SEBI Mutual Fund Regulations from time to time. Derivatives instruments may take the form of Futures, Options, Swaps or any other instrument, as may be permitted from time to time. Paragraph 7.5 of the Master Circular specifies guidelines pertaining to Mutual Funds trading in Exchange Traded Derivatives Contracts . All Derivative positions taken in the portfolio would be guided by the following limits:

- Position limit for the Fund in index options contracts
 - The Fund position limit in all index options contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest of the market in index options, whichever is higher per Stock Exchange.
 - This limit would be applicable on open positions in all options contracts on a particular underlying index.
- Position limit for the Fund in index futures contract
 - The Fund position limit in all index futures contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest of the market in index futures, whichever is higher, per Stock Exchange.
 - This limit would be applicable on open positions in all futures contracts on a

particular underlying index.

- Additional position limit for hedging

In addition to the position limits at point (i) and (ii) above, Fund may take exposure in equity index derivatives subject to the following limits:

- Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Fund's holding of stocks.
- Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Fund's holding of cash, government securities, T-Bills and similar instruments.

- Position limit for the Fund for stock based derivative contracts

The Fund position limit in a derivative contract on a particular underlying stock, i.e. stock option contracts and stock futures contracts:-

- The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL).
- The MWPL and client level position limits however would remain the same as prescribed

- Position limit for the Scheme

- The position limits for the Scheme and disclosure requirements are as follow. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a Fund shall not exceed the higher of:

1% of the free float market capitalisation (in terms of number of shares).

Or

5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts).

This position limit shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.

For index based contracts, the Fund shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index."

i) Index Futures:

Benefits

a) Investment in Stock / Index Futures can give exposure to the index without directly buying the individual stocks. Appreciation in Index stocks can be effectively captured through investment in Stock Index Futures.

b) The Fund can sell futures to hedge against market movements effectively without actually selling the stocks it holds.

The Stock / Index futures are instruments designed to give exposure to the equity market indices. BSE Limited and National Stock Exchange of India Limited have started trading in index futures of 1, 2 and 3-month maturities. The pricing of an index future is the function of the underlying index and interest rates.

Illustration

Spot Index: 1070

1 month Nifty Future Price on day 1: 1075

Fund buys 100 lots

Each lot has a nominal value equivalent to 200 units of the underlying index

Let us say that on the date of settlement, the future price = Closing spot price = 1085

Profits for the Fund = $(1085 - 1075) * 100 \text{ lots} * 200 = \text{Rs } 200,000$

Please note that the above example is given for illustration purposes only.

The net impact for the Fund will be in terms of the difference between the closing price of the index and cost price (ignoring margins for the sake of simplicity). Thus, it is clear from the example that the profit or loss for the Fund will be the difference of the closing price (which can be higher or lower than the purchase price) and the purchase price. The risks associated with index futures are similar to the one with equity investments. Additional risks could be on account of illiquidity and hence mispricing of the future at the time of purchase.

Basic Structure of a Stock & Index Future

The Stock Index futures are instruments designed to give exposure to the equity markets indices.

BSE Limited (BSE) and National Stock Exchange of India Limited (NSE) provide futures in select stocks and indices with maturities of 1, 2 and 3 months. The pricing of a stock/index future is the function of the underlying stock/index and short term interest rates.

Example using hypothetical figure

1 month NIFTY 50 Index Future

Say, Fund buys 1,000 futures contracts; each contract value is 50 times futures index price

Purchase Date: April 01, 2019

Spot Index: 6036.25

Future Price: 6081.90

Say, Date of Expiry: April 24, 2019

Say, Margin: 20%

Assuming the exchange imposes total margin of 20%, the Investment Manager will be required to provide total margin of approx. Rs. 6.08 Cr (i.e. $20\% * 6081.90 * 1000 * 50$) through eligible securities and cash.

Date of Expiry

Assuming on the date of expiry, i.e. April 24, 2019, Nifty 50 Index closes at 6100, the net impact will be a profit of Rs 9,05,000 for the fund i.e. $(6100 - 6081.90) * 1000 * 50$

Futures price = Closing spot price = 6100.00

Profits for the Fund = $(6100 - 6081.90) \times 1000 \times 50 = \text{Rs. } 9,05,000$

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity.

The net impact for the Fund will be in terms of the difference of the closing price of the index and cost price. Thus, it is clear from the example that the profit or loss for the Fund will be the difference of the closing price (which can be higher or lower than the purchase price) and the purchase price. The risks associated with index futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mispricing of the futures.

ii) Buying Options:

Benefits of buying a call option:

Buying a call option on a stock or index gives the owner the right, but not the obligation, to buy the underlying stock / index at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option.

Illustration

For example, if the fund buys a one month call option on ABC Limited at a strike of Rs. 150, the current market price being say Rs.151. The fund will have to pay a premium of say Rs. 15 to buy this call. If the stock price goes below Rs. 150 during the tenure of the call, the fund avoids the loss it would have incurred had it straightaway bought the stock instead of the call option. The fund gives up the premium of Rs. 15 that has to be paid in order to protect the fund from this probable downside. If the stock goes above Rs. 150, it can exercise its right and own ABC Limited at a cost price of Rs. 150, thereby participating in the upside of the stock.

Benefits of buying a put option

Buying a put option on a stock originally held by the buyer gives him/her the right, but not the obligation, to sell the underlying stock at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option.

Illustration

For example, if the fund owns ABC Limited and also buys a three month put option on ABC Limited at a strike of Rs. 150, the current market price being say Rs.151. The fund will have to pay a premium of say Rs. 12 to buy this put. If the stock price goes below Rs. 150 during the tenure of the put, the fund can still exercise the put and sell the stock at Rs. 150, avoiding therefore any downside on the stock below Rs. 150. The fund gives up the fixed premium of Rs. 12 that has to be paid in order to protect the fund from this probable downside. If the stock goes above Rs. 150, say to Rs. 170, it will not exercise its option. The fund will participate in the upside of the stock, since it can now sell the stock at the prevailing market price of Rs. 170.

Basic Structure of an Equity Option

An option gives a buyer the right but does not cast the obligation to buy or sell the underlying. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts an obligation for which he

Page 249 of 271

receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

In India, National Stock Exchange (NSE) became the first exchange to launch trading in options on individual securities. Trading in options on individual securities commenced from July 2, 2001. All stock/index Option contracts are European style (w.e.f. January 2011) and cash settled as stipulated by the Securities and Exchange Board of India (SEBI).

Example using hypothetical figures on Index Options:

Market type: N

Instrument Type: OPTIDX

Underlying: Nifty

Purchase date: April 01, 2019

Expiry date: April 24, 2019

Option Type: Put Option (Purchased)

Strike Price: Rs. 6,000.00

Spot Price: Rs. 6036.00

Premium: Rs. 84.00

Lot Size: 50

No. of Contracts: 100

Say, the Fund purchases on April 01, 2019, 1 month Put Options on Nifty on the NSE i.e. put options on 5000 shares (100 contracts of 50 shares each) of Nifty.

Date of Exercise

As these are European style options, they can be exercised only on the exercise date i.e. April 24, 2019. If the share price of Nifty falls to Rs.5,500 on expiry day, the net impact will be as follows:

Premium expense = $\text{Rs.}84 \times 100 \times 50$ Rs. 4,20,000

Option Exercised at = Rs. 5,500

Profits for the Fund = $(6000.00 - 5,500.00) \times 100 \times 50$ = Rs. 25,00,000

Net Profit = Rs. 25,00,000 – Rs. 4,20,000 = Rs. 20,80,000

In the above example, the Investment Manager hedged the market risk on 5000 shares of Nifty Index by purchasing Put Options.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity. Certain factors like margins have been ignored. The purchase of Put Options does not increase the market risk in the fund as the risk is already in the fund's portfolio on account of the underlying asset position. The premium paid for the option is treated as an expense. Additional risks could be on account of illiquidity and potential mis-pricing of the options.

In case of Equity and Derivatives Fund:

The fund will use derivatives instruments for the purpose hedging or portfolio rebalancing or for any other stock and / or index derivative strategies as allowed under the SEBI regulations.

Example of Hedging using Index Futures

The scheme holds stock at current market price of Rs. 100. To hedge the exposure, the scheme will sell index futures for Rs. 100.

The stock will make a gain or a loss subject to its relative out-performance or underperformance of the markets.

Stock A falls by 10% and market index also falls by 10%.

Profit/(Loss) on stock A will be = (Rs. 10)

Profit/(Loss) on Short Nifty futures = Rs. 10

Net Profit/(loss) = Nil

Therefore, hedging allows the scheme to protect against market falls.

Please note that the above examples are only for illustration purposes.

Various Derivatives Strategies:

➤ If and where Derivative strategies are used under the scheme the Fund Manager will employ a combination of the following strategies:

Index Arbitrage:

As the Nifty 50 Index derives its value from fifty underlying stocks, the underlying stocks can be used to create a synthetic index matching the Nifty Index levels. Also, theoretically, the fair value of a stock/ index futures is equal to the spot price plus the cost of carry i.e. the interest rate prevailing for an equivalent credit risk, in this case is the Clearing Corporation of the NSE.

Theoretically, therefore, the pricing of Nifty Index futures should be equal to the pricing of the synthetic index created by futures on the underlying stocks. However, due to market imperfections, the index futures may not exactly correspond to the synthetic index futures.

The Nifty Index futures normally trades at a discount to the synthetic Index due to large volumes of stock hedging being done using the Nifty Index futures giving rise to arbitrage opportunities.

The fund manager shall aim to capture such arbitrage opportunities by taking long positions in the Nifty Index futures and short positions in the synthetic index. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of-capital.

Objective of the Strategy

The objective of the strategy is to lock-in the arbitrage gains.

Risks Associated with this Strategy

- Lack of opportunity available in the market
- A. The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices:
 - **Execution Risk:** The prices which are seen on the screen need not be the same at which execution will take place.

Cash Futures Arbitrage: (Only one way as funds are not allowed to short in the cash market).

The Scheme would look for market opportunities between the spot and the futures market. The cash futures arbitrage strategy can be employed when the price of the futures exceeds the price of the underlying stock.

The Scheme will first buy the stocks in cash market and then sell in the futures market to lock the spread known as arbitrage return.

Buying the stock in cash market and selling the futures results into a hedge where the Scheme have locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts. The future contracts are settled based on the last half an hour's weighted average trade of the cash market. Thus there is a convergence between the cash market and the futures market on expiry. This convergence helps the Scheme to generate the arbitrage return locked in earlier. However, the position could even be closed earlier in case the price differential is realized before expiry or better opportunities are available in other stocks. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of-capital.

Objective of the Strategy

The objective of the strategy is to lock-in the arbitrage gains.

Risk Associated with this Strategy

- a. Lack of opportunity available in the market.
- B. The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place

Hedging and alpha strategy: The fund will use exchange-traded derivatives to hedge the equity portfolio. The hedging could be either partial or complete depending upon the fund managers' perception of the markets. The fund manager shall either use index futures and options or stock futures and options to hedge the stocks in the portfolio. The fund will seek to generate alpha by superior stock selection and removing market risks by selling appropriate index. For example, one can seek to generate positive alpha by buying an IT stock and selling Nifty IT Index future or a bank stock and selling Bank Index futures or buying a stock and selling the Nifty Index.

Objective of the Strategy

The objective of the strategy is to generate alpha by superior stock selection and removing market risks by hedging with appropriate index.

Risk Associated with this Strategy

- b. The stock selection under this strategy may under-perform the market and generate a negative alpha.
- c. The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- d. Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place.

Other Derivative Strategies: As allowed under the SEBI guidelines on derivatives, the fund manager will employ various other stock and index derivative strategies by buying or selling stock/index futures and/or options.

Objective of the Strategy

The objective of the strategy is to earn low volatility consistent returns.

Risk Associated with this Strategy

1. The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices
2. Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place.

Debt Derivatives

The Scheme may use derivatives instruments like Interest Rate Swaps, Forward Rate Agreements or such other derivative instruments as may be introduced from time to time for the purpose that may be permitted by SEBI Mutual Fund Regulations from time to time.

1. Advantages of Derivatives

The volatility in Indian debt markets has increased over last few months. Derivatives provide unique flexibility to the Scheme to hedge part of their portfolio. Some of the advantages of specific derivatives are as under:

ii) Interest Rate Swaps and Forward rate Agreements

Benefits

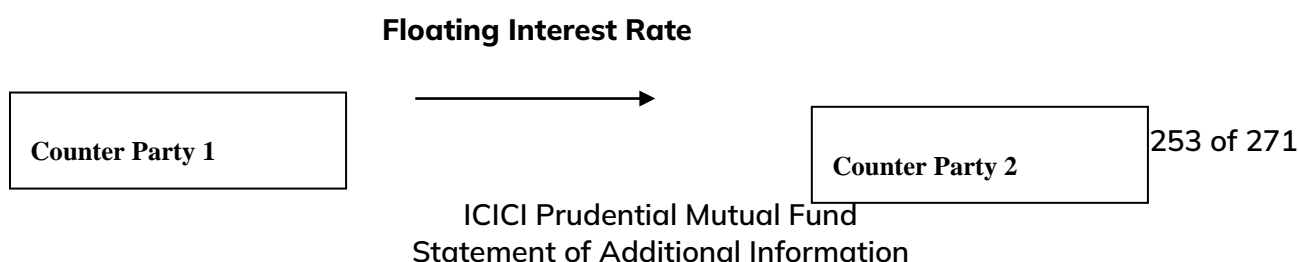

Bond markets in India are not very liquid. Investors run the risk of illiquidity in such markets. Investing for short-term periods for liquidity purposes has its own risks. Investors can benefit if the Fund remains in call market for the liquidity and at the same time take advantage of fixed rate by entering into a swap. It adds certainty to the returns without sacrificing liquidity.

Interest rate swap is a strategy in which one party exchanges a stream of interest for another party's stream. Interest rate swaps are normally 'fixed against floating', but can also be 'fixed against fixed' or 'floating against floating' rate swaps. Interest rate swaps will be used to take advantage of interest-rate fluctuations, by swapping fixed-rate obligations for floating rate obligations, or swapping floating rate obligations to fixed-rate obligations.

Illustration

The following are illustrations how derivatives work:

Basic Structure of an Interest Rate Swap

Fixed Interest Rate

In the above illustration,

Basic Details: Fixed to floating swap

Notional Amount: Rs. 5 Crores

Benchmark: NSE MIBOR

Deal Tenor: 3 months (say 91 days)

Documentation: International Securities Dealers Association (ISDA).

Let us assume the fixed rate decided was 10%.

At the end of three months, the following exchange will take place:

Counter party 1 pays: compounded call rate for three months, say 9.90%

Counter party 2 pays fixed rate: 10%

In practice, however, the difference of the two amounts is settled. Counter party 2 will pay:

$\text{Rs } 5 \text{ Crores} \times 0.10\% \times 91/365 = \text{Rs. } 12,465.75$

Thus the trade off for the Fund will be the difference in call rate and the fixed rate payment and this can vary with the call rates in the market. Please note that the above example is given for illustration purposes only and the actual returns may vary depending on the terms of swap and market conditions.

Mutual Fund Schemes can enter into IRS contracts either over the counter with a counter party or through an electric trading platform offered by Clearing Corporation of India Ltd (CCIL), where CCIL is considered as central counterparty.

iii) Interest rate futures (IRF):

IRF means a standardized interest rate derivative contract traded on a recognized stock exchange to buy or sell a notional security or any other interest bearing instrument or an index of such instruments or interest rates at a specified future date, at a price determined at the time of the contract.

Hedging using interest rate futures could be perfect or imperfect, subject to applicable regulations.

Currently, exchange traded Interest Rate Futures traded on exchange are standardized contracts based on 10-Year Government of India Security and 91 day Treasury bill. IRF contracts are cash settled.

IRFs give an opportunity in the fixed income market to hedge interest rate risk or rebalance the portfolio by using them. By locking into a price, the IRF contract can help to eliminate the

interest rate risk. Thus, in order to protect against a fall in the value of the portfolio due to falling bond prices, one can take short position in IRF contracts.

Example:

Date: April 01, 2019

Spot price of the Government Security: Rs.108.83

Price of IRF– April contract: Rs. 108.90

On April 01, 2019, Fund buys 1000 units of the Government security from the spot market at Rs. 108.83. Subsequently, it is anticipated that the interest rate will rise in the near future. Therefore to hedge the exposure in underlying Government security, Fund sells April 2019 Interest Rate Futures contracts at Rs. 108.90.

On April 15, 2019 due to increase in interest rate:

Spot price of the Government Security: Rs. 107.24

Futures Price of IRF Contract: Rs.107.30

Loss in underlying market will be $(107.24 - 108.83) \times 1000 = \text{Rs. } 1,590$

Profit in the Futures market will be $(107.30 - 108.90) \times 1000 = \text{Rs. } 1,600$

Illustration for Imperfect Hedging

Scenario 1 and 2

Assumption: Portfolio whose duration is 3 years, is being hedged with an IRF whose underlying securities duration is 10 years

Portfolio Duration: 3 year

Market Value of Portfolio: Rs 100 cr

Imperfect Hedging cannot exceed 20% of Portfolio

Maximum extent of short position that may be taken in IRFs is as per below mentioned formula:

$$\text{Portfolio (security) Modified Duration} \times \text{Market Value of Portfolio (security)} / (\text{Futures Modified Duration} \times \text{Futures Price/PAR})$$

Consider that we choose to hedge 20% of portfolio

$$(3 \times (0.2 \times 100)) / (10 \times 100/100) = \text{Rs } 6 \text{ cr}$$

So we must Sell Rs 6 cr of IRF with underlying duration of 10 years to hedge Rs 20 cr of Portfolio with duration of 3 years.

Scenario 1

If the yield curve moves in a way that the 3 year moves up by 10 bps and the 10 year moves up by 5bps, which means that the short end has moved up more than the long end

Amount of Security in Portfolio (LONG): Rs 20cr

If yields move up buy 10 bps then the price of the security with a modified duration of 3 years will move down by;

Formula: (Yield movement * Duration) * Portfolio Value

$$((0.001 * 3) * 20,00,00,000) = - 6,00,000$$

Underlying IRF (SHORT): Rs 6crs

If yields move up buy 5bps then the price of the security with a duration of 10 years will move down by;

Formula: (Yield movement * Duration) * Portfolio Value

$$(-0.0005 * 10) * 6,00,00,000 = 3,00,000$$

Since we have sold the IRF, this movement is positive and hence the total loss will be reduced to:

$$-6,00,000 + 3,00,000 = -3,00,000$$

Due to IRF, the overall impact on the portfolio due to interest rate movement has been reduced.

Scenario 2

If the yield curve moves in a way that the 3 year does not move and the 10 year moves down by 5 bps, which means that the yield curve has flattened.

If yield does not move then the price of the security with a duration of 3 years will remain flat:

Formula: (Yield movement * Duration) * Portfolio Value

$$(0 * 3) * 20,00,00,000 = 0$$

Underlying IRF (SHORT): Rs 6cr

If yields moves down by 5bps then the price of the security with a duration of 10 years will move up by;

$$(0.0005 * 10) * 6,00,00,000 = -3,00,000$$

In this scenario, the imperfect hedge created on the portfolio would create a loss on the total position.

Debt Derivatives

The Scheme may use derivatives instruments like Interest Rate Swaps, Forward Rate Agreements or such other derivative instruments as may be introduced from time to time for the purpose that may be permitted by SEBI Mutual Fund Regulations from time to time.

Risk Factor:

The risk arising out of uses of the above derivative strategy as under:

- Lack of opportunities available in the market.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity. Additional risks could be on account of illiquidity and potential mis-pricing of the options.

- **Interest Rate Futures:**

IRF means a standardized interest rate derivative contract traded on a recognized stock exchange to buy or sell a notional security or any other interest bearing instrument or an index of such instruments or interest rates at a specified future date, at a price determined at the time of the contract.

Example:

Price of IRF– April contract: Rs. 108.90

On April 01, 2021, Fund buys 1000 units of the Government security from the spot market at Rs. 108.83. Subsequently, it is anticipated that the interest rate will rise in the near future. Therefore, to hedge the exposure in underlying Government security, Fund sells April 2021 Interest Rate Futures contracts at Rs. 108.90.

On April 15, 2021 due to increase in interest rate:

Spot price of the Government Security: ` 107.24

Futures Price of IRF Contract: Rs.107.30

Loss in underlying market will be $(107.24 - 108.83) \times 1000 = (\text{Rs. } 1,590)$

Profit in the Futures market will be $(107.30 - 108.90) \times 1000 = \text{Rs. } 1,600$

Illustration for Imperfect Hedging

Assumption: Portfolio whose duration is 3 years, is being hedged with an IRF whose underlying securities duration is 10 years

Portfolio Duration: 3 year

Market Value of Portfolio: Rs 100 cr
Imperfect Hedging cannot exceed 20% of Portfolio

Maximum extent of short position that may be taken in IRFs is as per below mentioned formula:

Portfolio (security) Modified Duration * Market Value of Portfolio (security) / (Futures Modified Duration * Futures Price/PAR)

Consider that we choose to hedge 20% of portfolio
 $(3 * (0.2 * 100)) / (10 * 100/100) = \text{Rs } 6 \text{ cr}$

So we must Sell Rs 6 cr of IRF with underlying duration of 10 years to hedge Rs 20 cr of Portfolio with duration of 3 years.

Scenario 1

If the yield curve moves in a way that the 3 year moves up by 10 bps and the 10 year moves up by 5bps, which means that the short end has moved up more than the long end

Since we have sold the IRF, this movement is positive and hence the total loss will be reduced to:

$-6,00,000 + 3,00,000 = -3,00,000$

Due to IRF, the overall impact on the portfolio due to interest rate movement has been reduced.

Scenario 2

If yield does not move then the price of the security with a duration of 3 years will remain flat:

$$(0.0005 \times 10) \times 6,00,00,000 = -3,00,000$$

In this scenario, the imperfect hedge created on the portfolio would create a loss on the total position.

Risks associated with imperfect hedging:

Basis Risk: The risk arises when the price movements in derivative instrument used to hedge the underlying assets does not match the price movements of the underlying assets being hedged. Such difference may potentially amplify the gains or losses, thus adding risk to the position.

Price Risk: The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Risk of mismatch between the instruments: The risk arises if there is a mismatch between the prices movements in derivative instrument used to hedge, compared to the price movement of the underlying assets being hedged. For example when IRF which has government security as underlying is used, to hedge a portfolio that contains corporate debt securities.

Correlation weakening and consequent risk of regulatory breach: SEBI Regulation mandates minimum correlation criterion of 0.9 (calculated on a 90 day basis) between the portfolio being hedged and the derivative instrument used for hedging. In cases where the correlation falls below 0.9, a rebalancing period of 5 working days has been permitted. Inability to satisfy this requirement to restore the correlation level to the stipulated level, within the stipulated period, due to difficulties in rebalancing would lead to a lapse of the exemption in gross exposure computation. The entire derivative exposure would then need to be included in gross exposure, which may result in gross exposure in excess of 100% of net asset value.

➤ Valuation of Derivative Products

The traded derivatives shall be valued at market price in conformity with the valuation policy of the Mutual Fund.

The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the SEBI (Mutual Funds) Regulations, 1996 as amended from time to time.

➤ Swing Pricing

In terms of paragraph 4.10 of SEBI Master circular, all open ended debt mutual fund schemes (except overnight funds, Gilt funds and Gilt with 10-year maturity funds) are required to follow Swing Pricing Framework.

SEBI has prescribed swing pricing for scenarios related to net outflows from the schemes. Accordingly, a mandatory full swing price framework, during market dislocation times (as and when declared by SEBI), for high-risk open ended debt schemes is being introduced in scheme provisions of all Debt Schemes of the Fund except ICICI Prudential Overnight Fund, ICICI Prudential Liquid Fund, ICICI Prudential Gilt Fund, ICICI Prudential Constant Maturity Gilt Fund and ICICI Prudential Money Market Fund.

The minimum swing factor as given below will be applicable. The NAV will be adjusted downwards for both the incoming and outgoing investors.

Minimum swing factor for open ended debt schemes			
Credit Risk of scheme →	Class A (CRV*≥12)	Class B (CRV≥10)	Class C (CRV<10)
Interest Rate Risk of scheme ↓			
Class I: (MD≤1 year)	NIL	NIL	1.50%
Class II: (MD≤3 years)	NIL	1.25%	1.75%
Class III: Any Macaulay duration (MD)	1.00%	1.50%	2.00%
*CRV: Credit Risk Value			

When swing pricing mechanism is triggered and swing factor is made applicable during market dislocation, both the incoming and exiting investors shall get NAV adjusted for swing pricing. Swing pricing shall be made applicable to all unitholders at PAN level, with an exemption for redemptions up to Rs. 2 lakh for each mutual fund scheme for market dislocation.

AMFI vide circular dated March 23, 2022 has prescribed parameters for determination of thresholds for triggering swing pricing for normal times, which shall be followed by the AMCs. The circular also prescribes an indicative range of swing threshold for normal times.

➤ Provisions on creation of Segregation portfolio/Side Pocketing

SEGREGATION OF PORTFOLIOS

The AMC may create a segregated portfolio of debt and money market instruments in a mutual fund scheme, wherein provisions for creation of segregated portfolios are available in the scheme information document of the scheme, in case of a credit event and to deal with liquidity risk.

In this regard, the term 'segregated portfolio' shall mean a portfolio comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme and the term 'main portfolio' shall mean the scheme portfolio excluding the

segregated portfolio. The term 'total portfolio' shall mean the scheme portfolio including the securities affected by the credit event.

A segregated portfolio may be created in a mutual fund scheme in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

- Downgrade of a debt or money market instrument to 'below investment grade', or
- Subsequent downgrades of the said instruments from 'below investment grade', or
- Similar such downgrades of a loan rating.

In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as detailed above and implemented at the ISIN level.

Segregated portfolio may be created of unrated debt or money market instruments by mutual fund schemes of an issuer that does not have any outstanding rated debt or money market instruments. Such segregated portfolio can be created only in case of actual default of either the interest or principal amount.

Process for creation of segregated portfolio

- a) The AMC shall decide on creation of segregated portfolio on the day of credit event, as per the process laid down below:
- The AMC shall seek approval of Trustees, prior to creation of the segregated portfolio.
 - The AMC shall immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. It shall also be disclosed that the segregation shall be subject to trustee approval. Additionally, the said press release shall be prominently disclosed on the website of the AMC.
 - The AMC shall ensure that till the time the Trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.
- b) Upon receipt of approval from Trustees:
- (i) The segregated portfolio shall be effective from the day of credit event
 - (ii) The AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.
 - (iii) An e-mail or SMS should be sent to all unit holders of the concerned scheme.
 - (iv) The NAV of both segregated and main portfolio shall be disclosed from the day of the credit event.
 - (v) All existing investors in the scheme as on the day of the credit event shall be allotted equal number of units in the segregated portfolio as held in the main portfolio.
 - (vi) No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall

Page 262 of 271

enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.

- c) If the trustees do not approve the proposal to segregate portfolio, the AMC shall issue a press release immediately informing investors of the same.
- d) Notwithstanding the decision to segregate the debt and money market instrument, the valuation shall take into account the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder.
- e) All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing circular on applicability of NAV as under:

A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
 - b. Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the scheme.

provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

- g) In order to ensure timely recovery of investments of the segregated portfolio, the Trustees to the fund would continuously monitor the progress and take suitable action as may be required.
- h) TER for the Segregated Portfolio
 - a. AMC shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
 - b. The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
 - c. The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
 - d. The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Investors may also note that the process followed by the AMC/Trust regarding creation of segregated portfolios shall be in accordance with the provisions laid down by SEBI in this regard, from time to time.

Benefits and Features of Creation of Segregated Portfolio:

- 1) Creation of Segregated portfolio helps ensuring fair treatment to all investors in case of a credit event and helps in managing liquidity risk during such events;
- 2) Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio;
- 3) Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV;
- 4) A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio;
- 5) Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the scheme; and
- 6) The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Risk factors associated with creation of segregated portfolios

- b. Liquidity risk – A segregated portfolio is created when a credit event occurs at an issuer level in the scheme. This may reduce the liquidity of the security issued by the said issuer, as demand for this security may reduce. This is also further accentuated by the lack of secondary market liquidity for corporate papers in India. As per SEBI norms, the scheme is to be closed for redemption and subscriptions until the segregated portfolio is created, running the risk of investors being unable to redeem their investments. However, it may be noted that, the proposed segregated portfolio is required to be formed within one day from the occurrence of the credit event.

Investors may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall list the units of the segregated portfolio on a recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. There is no assurance that a deep secondary market will develop for units of segregated portfolio listed on the stock exchange. This could limit the ability of the investors to resell them.

- c. Valuation risk - The valuation of the securities in the segregated portfolio is required to be carried out in line with the applicable SEBI guidelines. However, it may be difficult to ascertain the fair value of the securities due to absence of an active secondary market and difficulty to price in qualitative factors.

In order to ensure timely recovery of investments of the segregated portfolio, trustees shall ensure that:

- f) The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
- g) Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
- h) An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every trustee meeting till the investments are fully recovered/ written-off.
- i) The trustees shall monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

➤ Short Selling / Stock Lending

STOCK LENDING BY THE MUTUAL FUND

Subject to the SEBI Regulations and the applicable guidelines, the Scheme and the Plans thereunder may, if the Trustee permits, engage in stock lending up to certain percentage of the net asset of the Scheme. Stock lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation. The securities lent will be returned by the borrower on expiry of the stipulated period. The AMC shall report to the Trustee on a quarterly basis as to the level of lending in terms of value, volume and the names of the intermediaries and the earnings/losses arising out of the transactions, the value of collateral security offered etc. The Trustees shall offer their comments on the above aspect in the report filed with SEBI under sub-regulation 23(a) of Regulation 18.

SHORT SELLING BY THE MUTUAL FUND

In accordance with the framework specified by SEBI, the Scheme and the Plans thereunder may, if the Trustee permits, may engage in short selling of securities. Short-selling is the sale of shares which are not owned by the seller at the time of trade. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock he shorted and returns the stock to close out the loan. If the price of the stock corrects, Short seller can buy the stock back for less than he received for selling it and earn profit (the difference between higher short sale price and the lower purchase price). If the price of stock appreciates, short selling results in loss. Thus, Short positions carry the risk of losing money and these losses may grow theoretically unlimited if the price increases without limit and shall result into major losses in the portfolio

BORROWING BY THE MUTUAL FUND

Under the Regulations, the Fund is allowed to borrow to meet its temporary liquidity needs of the Fund for the purpose of repurchase, redemption of units or payment of interest or IDCW to the Unitholders. Further, as per the Regulations, the Fund shall not borrow more than 20% of the Net Assets of the Scheme and the duration of such borrowing shall not exceed a period of six months. The Fund may raise such borrowings after approval by the Trustee from any of its Sponsors/Associate/Group Companies/Commercial Banks in India or any other entity at market related rates prevailing at the time and applicable to similar borrowings. The security for such borrowings, if required, will be as determined by the Trustee. Such borrowings, if raised, may result in a cost, which would be dealt with in consultation with the Trustees.

j) Transaction Charges and Stamp Duty

Transaction Charges

No transaction charges to be levied on the investment amount from transactions/applications (including SIPs) received through distributors (i.e. for Regular

Plans). Accordingly, payment of transaction charges to the distributors has been discontinued.

Stamp Duty

Pursuant to Notification No. S.O. 1226(E) and G.S.R. 226(E) dated March 30, 2020 issued by Department of Revenue, Ministry of Finance, Government of India, read with Part I of Chapter IV of Notification dated February 21, 2019 issued by Legislative Department, Ministry of Law and Justice, Government of India on the Finance Act, 2019, a stamp duty @ 0.005% of the transaction value would be levied on applicable mutual fund transactions. Accordingly, pursuant to levy of stamp duty, the number of units allotted on purchase transactions (including IDCW reinvestment) to the unitholders would be reduced to that extent. In case of ICICI Prudential Liquid ETF, in the course of subscription transactions the stamp duty for creation of units levied by the Depositories and during redemption of units on the stock exchange, the stamp duty levied and collected by the stock exchange shall be charged to the scheme under the head 'Transaction Cost'."
