**** PAST PERFORMANCE MAY OR MAY NOT BE SUSTAINED IN THE FUTURE.** Performance of the IDCW Option for the investor would be net of dividend distribution tax, as applicable. Pursuant to payment of IDCW, the NAV of the IDCW Option falls to the extent of IDCW payout and statutory levy (if applicable).

Hence, in order to calculate total returns, the above returns are computed based on the NAV of only the Growth Option, since there are no IDCW payouts thereunder. The returns provided are Absolute Returns where the Schemes have been in existence for less than one year and Compounded annualised where the Schemes have been in existence for more than one year.

IDCW – Income Distribution cum Capital Withdrawal – Not Applicable

RISK FACTORS

1. Standard Risk Factors

a. Standard Risk Factors for investments in Mutual Funds

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal
- As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the scheme can go up or down depending on various factors and forces affecting capital markets and money markets.
- Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee the future performance of the Scheme.
- The name of the Scheme does not in any manner indicate its quality or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme. In addition, the scheme does not guarantee or assure any Income distribution cum Capital Withdrawal (IDCW) and also does not guarantee or assure that it will make any IDCW distribution, though it has every intention to make the same in the distributions of Income Distribution cum Capital Withdrawal option. All IDCW distributions of Income Distribution cum Capital Withdrawal will be subjected to the investment performance of the Scheme.

b. Risk factors of not maintaining average AUM of Rs. 20 crores on half yearly rolling basis (Applicable only for open ended debt-oriented schemes of Shriram Mutual Fund)

The Scheme(s) shall maintain an average AUM of Rs. 20 crores on half yearly rolling basis. In case, the average AUM falls below Rs. 20 crores, the AMC shall scale up the AUM of such Scheme within a period of six months so as to maintain the average AUM of Rs. 20 crores on half yearly rolling basis, failing which the Scheme shall be wound up in accordance with the provisions of Regulation 39 (2) (c) of SEBI (Mutual Funds) Regulations, 1996 as amended from time to time.

c. Risks Associated with Derivatives

The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional instruments. Such risks include mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount.

Derivative products are highly leveraged instruments that require investment techniques and risk analyses different from those associated with traditional securities such as shares or bonds. Investment in derivatives also requires the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly.

The options buyer's risk is limited to the premium paid, while the risk of an options writer is unlimited. However, the gains of an options writer are limited to the premiums earned.

The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price. The loss can be unlimited as underlying asset can increase to any levels. The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price and the loss is limited to strike price.

Investments in futures face the same risk as the investments in the underlying securities. The extent of loss is the same as in the underlying securities. However, the risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.

The derivatives are also subject to liquidity risk as the securities in the cash markets. The derivatives market in India is nascent and does not have the volumes that may be seen in other developed markets, which may result in volatility in the values.

Risk associated with Covered Call

If the underlying price rises above the strike, the short call loses its value as much as the underlying stock gains and as a result the upside of the stock always gets capped. This is a lost opportunity risk.

- a) Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strategy, the profits from call option writing is capped at the option premium, however the downside depends upon the increase in value of the underlying equity shares. This downside risk is reduced by writing covered call options.
- b) The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity, or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.
- c) The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is more than the option premium received the scheme would be at a loss.
- d) The total gross exposure related to option premium paid and received must not exceed the regulatory limits of the net assets of the scheme. This may restrict the ability of Scheme to buy any options.

Risk Factors associated with Investments in Other Commodities and Exchange Traded Commodity Derivatives (ETCD) of various commodities:

- **Commodity risks:** The Scheme may invest in commodities markets and may therefore have investment exposure to the commodities markets and one or more sectors of the commodities markets, which may subject the Scheme to greater volatility than investments in traditional securities, such as stocks and bonds. Volatility in the commodities markets may be caused by changes in overall market movements, domestic and foreign political and economic events and policies, war, acts of terrorism, changes in domestic or foreign interest rates and/or investor expectations concerning interest rates, 15 domestic and foreign inflation rates, investment and trading activities of mutual funds, hedge funds and commodities funds, and factors such as drought, floods, weather, livestock disease, embargoes, tariffs and other regulatory developments, or supply and demand disruptions. Because the Scheme's performance is linked to the performance of volatile commodities, investors should be willing to assume the risks of potentially significant fluctuations in the value of the Scheme's shares.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of investment strategies depends upon the ability of the fund manager(s) to identify such opportunities which may always not be available. Identification and execution of the strategies to be pursued by the fund manager(s) involve uncertainty and decision of fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies.

The AMC within the regulatory guidelines and room given in Scheme information document, may use derivative on commodities (like Futures and Options). The use of derivatives may affect the performance of the scheme.

- **Systemic risks** which may be witnessed while trading in Indian Commodities Market are Liquidity risk, Price risk in terms of volatility, Exchange Risk and counterparty risks.
- **Liquidity Risk:** While ETCDs that are listed on an exchange carry lower liquidity risk, the ability to sell these contracts is limited by the overall trading volume on the exchanges. The liquidity of the Schemes' investments is inherently restricted by trading volumes of the ETCD contracts in which it invests. Additionally, change in margin requirements or intervention by government agencies to reduce overall volatility in the underlying commodity could lead to adverse impact on the liquidity of the ETCD.
- **Price risk:** ETCDs are leveraged instruments hence, a small price movement in the underlying security could have a large impact on their value. Also, the market for ETCDs is nascent in India hence, arbitrages can occur between the price of the physical commodity and the ETCD, due to a variety of reasons such as technical issues and volatile movement in prices.

This can result in mispricing and improper valuation of investment decisions as it can be difficult to ascertain the amount of the arbitrage.

- **Settlement risk:** ETCs can be settled either through the exchange or physically. The inability to sell ETCs held in the Schemes' portfolio in the exchanges due to the extraneous factors may impact liquidity and would result in losses, at times, in case of adverse price movement. Wherein the underlying commodity is physically delivered in order to settle the derivative contract, such settlement could get impacted due to various issues, such as logistics, Government policy for trading in such commodities.
- If the Commodities futures position passes its last square off date or the 'Intention' is missed to be provided before the Delivery Intention period, the buyer or the seller will be allocated delivery of the commodity. Thus, there emerges a risk of holding goods in physical form at the warehouses. Though the commodity is inclusive of insurance cost, there is a small deductible in each claim which is not payable by the Insurance company.

d. Other Risk Factors

Country Party Risk:

As the equity related securities such as warrants could be subjected to counter party risk as these rank equally among themselves and with all other unsecured obligations of the issuer in case of liquidation of the issuer. Therefore, the value of the Fund's assets will, and may always, depend entirely on the credit risk of the issuer held by the Fund. In the event of liquidation or default of the issuer and that a replacement issuer cannot be appointed, dealing of the Units of the ETF may be suspended and the Fund may ultimately be terminated, in which case, the Fund may redeem all outstanding Units at the Net Asset Value which may differ from the trading price on the exchange which is affected by secondary market trading factors.

Risks Associated with Equity and Equity related Investments:

- Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, changes in law/ policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors.
- Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Settlement Risk

Different segments of financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Portfolio to make purchases in intended securities due to settlement problems could cause the Portfolio to miss certain investment opportunities.

Regulatory Risk

The value of the securities may be affected by uncertainties such as changes in government policies, changes in taxation, and other developments in the laws and regulations.

Risk Associated with Unlisted Securities

Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The underlying scheme may choose to invest in unlisted domestic securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Risks Associated with Debt & Money Market Instruments

Interest Rate Risk / Price Risk

From the perspective of coupon rates, debt securities can be classified in two categories, i.e., Fixed coupon bearing securities and Floating coupon bearing securities. In Fixed coupon bearing securities, the coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the floating coupon bearing securities, on the other hand, the coupon rate changes – ‘floats’ – with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury bill.

Fixed income securities (such as Government Securities, bonds, debentures and money market instruments) where a fixed return is offered, run price-risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, the payment-frequency of such coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in interest rates in the financial system and liquidity. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof.

Reinvestment Risk

Investments in fixed income securities may carry reinvestment risk as interest rates prevailing in the market may differ from the original coupon of the bond. Consequently, the proceeds from regular coupon and principal payments on due date may get invested at a lower rate.

Credit Risk

Credit Risk comprises three components.

-Default Risk

Securities carry a risk of repayment of principal or interest by the borrower. This is called as default risk. The default risk depends on micro economic factors such as financial soundness and ability of the borrower and macro-economic factors such as industry performance, competition, trade barriers etc.

Downgrade Risk

It is the risk that credit rating agency downgrades the rating of an issuer based on earnings and cash flows generating capacity. The credit rating migration of issuance leads to increase in the credit spread and thus reduces the price of corporate bond.

Spread Risk

Though the sovereign yield curve might remain constant, investments in corporate bonds are exposed to the risk of spread widening between corporate bonds and gilts. Typically, if this spread widens, the prices of the corporate bonds tend to fall and so could the NAV of the Debt Schemes. Similar risk prevails for the investments in the floating rate bonds, where the benchmark might remain unchanged, but the spread over the benchmark might vary. In such an event, if the spread widens, the price and the NAV could fall.

Prepayment Risk

The Borrower may prepay the receivables prior to their respective due dates. This may result in a change in the yield and tenor for the scheme.

Liquidity Risk

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of these investments. Different segments of the Indian financial markets have different settlement periods, and such periods may be extended significantly by unforeseen circumstances. The length of time for settlement may affect the Scheme in the event it has to meet an inordinately large number of redemption or of restructuring of the Scheme's investment portfolio.

Risk associated with investments in Overseas ETFs:

Subject to necessary approvals, in terms of all applicable guidelines issued by SEBI and RBI from time to time and within the investment objectives of the Scheme, the Scheme may invest in overseas ETFs which carry a risk on account of fluctuations in the foreign exchange rates, nature of securities market of the country concerned, repatriation of capital due to exchange controls and political circumstances.

Risks Associated with Overseas Investments:

Subject to necessary approvals, in terms of all applicable guidelines issued by SEBI and RBI from time to time and within the investment objectives of the Scheme, the Scheme shall invest in overseas markets and securities which carry a risk on account of fluctuations in the foreign exchange rates, nature of securities market of the country concerned, repatriation of capital due to exchange controls and political circumstances.

Currency risk

The foreign securities are issued and traded in foreign currencies. As a result, their values may be affected by changes in exchange rates between foreign currencies and the Indian Rupee as well as between currencies of countries other than India. Restrictions on currency trading that may be imposed by developing market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries.

Risk associated with Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes stock lending under the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

Risks associated with segregated portfolio

- Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
- Security comprises of segregated portfolio may not realize any value.
- Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risk associated with Securitized Debt

Securitized debt papers carry credit risk of the Obligor and are dependent on the servicing of the PTC/Contributions etc. However, these are offset suitably by appropriate pool selection as well as credit enhancements specified by Rating Agencies. In cases where the underlying facilities are linked to benchmark rates, the securitized debt papers may be adversely impacted by adverse movements in benchmark rates. However, this risk is mitigated to an extent by appropriate credit enhancement specified by rating agencies. Securitized debt papers also carry the risks of prepayment by the obligors. In case of prepayments of securities debt papers, it may result in reduced actual duration as compared to the expected duration of the paper at the time of purchase, which may adversely impact the portfolio yield. These papers also carry risk associated with the collection agent who is responsible for collection of receivables and depositing them. The Investment team evaluates the risks associated with such investments before making an investment decision. The underlying assets in the case of investment in securitized debt could be mortgages or other assets like credit card receivables, automobile/vehicle/personal/commercial/corporate loans and any other receivables/ loans/debt. The risks associated with the underlying assets can be described as under:

Credit card receivables are unsecured. Automobile/vehicle loan receivables are usually secured by the underlying automobile/vehicle and sometimes by a guarantor. Mortgages are secured by the underlying property. Personal loans are usually unsecured.

Corporate loans could be unsecured or secured by a charge on fixed assets/receivables of the company or a letter of comfort from the parent company or a guarantee from a bank/financial institution. As a rule of thumb, underlying assets which are secured by a physical asset/guarantor are perceived to be less risky than those which are unsecured. By virtue of this, the risk and therefore the yield in descending order of magnitude would be credit card receivables, personal loans, vehicle/automobile loans, mortgages and corporate loans assuming the same rating.

Liquidity in Securitized Debt may be affected by trading volumes, settlement periods and transfer procedures. These factors may cause potential losses from being not able to sell the securitized debt instruments at its fair value. Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risks. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than government securities. Further, even among corporate bonds, bonds which are AAA rated

are comparatively less risky than bonds which are AA rated.

Risk Associated with structured obligations and credit enhancement

The Scheme may invest in domestic structured obligations such as corporate / promoter guarantee: Securities which have a structure with a guarantee from the corporate / promoter, may see an adverse effect if there are any signs of stress at the promoter / group level, even though the standalone borrowing entity's debt servicing capability and repayments may not see any material impact, from a future cash flow perspective.

Where equity shares are provided as collateral there is the risk of sharp price volatility of underlying securities which may lead to erosion in value of collateral which may affect the ability of the fund to enforce collateral and recover capital and interest obligations. Also, there is a possibility of guarantor going insolvent which also can impact the recovery value of exposure. In case of credit enhanced structures backed by equity share the liquidity of the underlying shares may be low leading to a lower recovery and a higher impact cost of liquidation. In case of other assets provided recovery, value and enforce ability of asset can also be a risk factor which can lower the recovery value.

Risk factors associated with instruments having special features

- The scheme may invest in certain debt instruments with special features which may be subordinated to equity and thereby such instruments may absorb losses before equity capital. The instrument is also convertible to equity upon trigger of a pre-specified event for loss absorption as may be decided by the RBI.
- The debt instruments with special features are considered as Non-Convertible Debentures, may be treated as debt instruments until converted to equity.
- The instruments are subject to features that grant issuer a discretion in terms of writing down the principal/coupon, to skip coupon payments, to make an early recall etc. Thus debt instruments with special features are subject to "Coupon discretion", "Loss Absorbency", "Write down on Point of Non-viability trigger (PONV) event" and other events as more particularly described as per the term sheet of the underlying instruments.
- The instrument is also subject to Liquidity Risk pertaining to how saleable a security is in the market. The particular security may not have a market at the time of sale due to uncertain/insufficient liquidity in the secondary market, then the scheme may have to bear an impact depending on its exposure to that particular security.

Risk Factors Associated with Investments in REITs and InVITs

- **Risk of lower than expected distributions:** The distributions by the REIT or InVITs will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/InVITs receives as dividends on the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate primarily based on the below, amongst other things:
 - Success and economic viability of tenants and off-takers
 - Economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
 - Force majeure events related such as earthquakes, floods, etc. rendering the portfolio assets inoperable
 - Debt service requirements and other liabilities of the portfolio assets
 - Fluctuations in the working capital needs of the portfolio assets
 - Ability of portfolio assets to borrow funds and access capital markets
 - Changes in applicable laws and regulations, which may restrict the payment of dividends by portfolio assets
 - Amount and timing of capital expenditures on portfolio assets
 - Insurance policies may not provide adequate protection against various risks associated with operations of the REIT/InVITs such as fire, natural disasters, accidents, etc.
 - Taxation and regulatory factors
- **Price Risk:** The valuation of REIT/InVITs units may fluctuate based on economic conditions, fluctuations in markets (e.g. Real estate) in which the REIT/InVITs operates and resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events, etc. REITs and InVITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders' rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian Law in the event of insolvency or liquidation of any of the portfolio assets.
- **Market Risk:** REITs and InVITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable,

as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.

- **Liquidity Risk:** As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.
- **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital.

Risks Associated with Repo in Corporate Debt

Illiquidity Risk

The repo market for corporate debt securities is over the counter (OTC) and illiquid. Hence, repo obligations cannot be easily sold to other parties. Therefore, to mitigate such risks, it has been stipulated that gross exposure to Repo in corporate bonds would be limited to 10% of net assets of the concerned scheme. Further, the tenor of repo would be taken based on nature and unit holders' pattern of the scheme.

Counter-party risk

Credit risk would arise if the counter-party fails to repurchase the security as contracted or if counterparty fails to return the security or interest received on due date. To mitigate such risks, the schemes shall carry out repo transactions with only those counterparties, which has a credit rating of 'A1+' or 'AA and above'. In case of lending of funds as a repo buyer, minimum haircuts on the value of the collateral security have been stipulated, and we would receive the collateral security in the scheme's account before the money is lent to the counterparty. Overall, we would have a limited number of counter-parties, primarily comprising of Mutual Funds, Scheduled Commercial banks, Financial Institutions and Primary dealers. Similarly, in the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter-party may hurriedly dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Scheme. Thus, the Scheme may suffer losses in such cases. Sufficient funds flow management systems are in place to mitigate such risks.

Collateral Risk (as a repo buyer)

Collateral risks arise due to fall in the value of the security (change in credit rating and/or interest rates) against which the money has been lent under the repo arrangement. To mitigate such risks, we have stipulated the minimum credit rating of the issuer of collateral security.

('AA' for long-term instruments/A1+ for money market instruments), maximum duration of the collateral security (10 years) and minimum haircuts on the value of the security.

Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus, this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with Chapter 16A of SEBI Master Circular dated June 27, 2024 on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the aforementioned schemes shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases

there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

We would further like to bring to the notice of the investors that investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Risks associated with investing in Tri-Party Repo through CCIL (TREPS)

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Triparty Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus, reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall". As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non defaulting members. Thus, the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the aforementioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower. Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

Risk Management & Liquidity Management tools:

Potential Risk Matrix (PRC) & Risk-o-meter: Investors are requested to review this scheme's Potential Risk Matrix (PRC) to understand the maximum risk that this scheme will run as per design and & Risk-o-meter to understand periodical measurement of that risk on a regular basis. Investors are suggested to read about various disclosures under the section "PERIODIC DISCLOSURES" pertaining to "Potential Risk Class Matrix" & "Product Labelling and Risk-o-meter" to understand in detail the disclosure frequency and remedial measures in case of breaches in the boundaries

Mandatory Liquidity requirement: The scheme adopts the Liquidity Risk Management framework mandated by SEBI and AMFI which helps estimates liquidity requirement by determining liquidity risk arising from the liability side and tries to covers all potential liquidity risk scenarios up to agreed confidence interval and has mandated remedial measures both for managing the risk on an ongoing basis (LRaR & LCRaR) as well as action plan in case there is a difference between actual outcome and projected outcome. Investors can refer to the Chapter of 4 of SEBI Master Circular dated June 27, 2024 for detail understanding on the Liquidity Risk Management Framework.

Further Investment manager also evaluates and monitors the Asset Liability Mismatch (ALM) which addresses the gap in the estimated potential liquidity requirement over a 90-day period and schemes investment / assets liquidity to meet the potential requirement and best ensures that scheme has necessary liquidity to meets its liability obligations.

Stress testing the scheme portfolio: The investment manager periodically stress tests the scheme portfolio to address the asset side risk from an Interest Rate, Credit and Liquidity Risk perspective at an aggregate portfolio level and evaluate the stress in terms of its impact on the NAV of the scheme. The stress test is performed using the methodology and periodicity as mandated by AMFI in consultation to SEBI.

Swing Pricing: The AMC has a Swing Pricing policy in place to help in case of severe liquidity stress at an AMC level or a severe dysfunction at market level, the Swing Pricing offers the contingency plan in case of extreme exigencies. Investors are suggested to read the detail disclosure pertaining to this policy in "**Swing Pricing Framework**".

RISK CONTROL:

The Investment Manager endeavours to invest in REITs/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third party

research. This involves one to one meeting with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions etc.

Risk Mitigation Measures

Concentration Risk

The AMC will mitigate this risk by investing in sufficiently large number of issuers spread across the sectors so as to maintain optimum diversification and keep issuer/sector specific concentration risk relatively low.

Liquidity Risk

The Schemes will invest in debt instruments and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Schemes will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.

Credit Risk - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.

II. Systematic Transfer Plan

This facility enables Unit Holders to transfer fixed sums from their Unit accounts in the Scheme to the existing schemes or other schemes launched by the Fund from time to time. The transfer will commence from the date mentioned by the Unit Holder in the Application Form for the facility. A minimum period of 5 days shall be required for registration under STP. The Units will be allotted / redeemed at the Applicable NAV of the respective dates of the Scheme on which such transfers are sought from the Scheme. In case the day on which the transfer is sought is a non-Business Day for the Scheme, then the application for the facility will be deemed to have been received on the immediately following Business Day. The facility of STP will not be available from any existing equity / equity oriented schemes to a non-equity scheme of the Fund. STP is not available for investments under lock-in period and for investments which are pledged.

Methodology:

The Unitholder has to ensure to maintain minimum balance in accordance with Plans selected in the Transferor Scheme on the transfer date / execution date under Systematic Transfer Plan.

In case of insufficient balance on the date of transfer in the folio, STP for that particular due date will be processed based on the clear balance available in the scheme. In such cases where STPs are processed due to insufficient balance, the criteria for minimum application amount in the transferee scheme shall not apply except in case of Shriram ELSS Tax Saver Fund. However such residual transfer due to insufficient balance shall be done only once during the tenure of STP. For future STPs, in case the unitholder has sufficient balance, the amount as mentioned in the STP form shall be processed.

However, future STPs will continue to be active. This will help the investor to continue his STP facility seamlessly. Moreover, if the investor continues to have insufficient balance / unclear units for 3 consecutive months, the STP will be discontinued.

III. Systematic Withdrawal Plan (SWP)

This facility enables the Unit Holders to withdraw sums from their Unit accounts in the Scheme at periodic intervals through a one-time request. The withdrawals will commence from the Start Date mentioned by the Unit Holder in the Application Form for the facility. A minimum period of 5 days shall be required for registration under SWP. The Units will be redeemed at the Applicable NAV of the respective dates on which such withdrawals are sought. However, if any of the dates on which the redemption is sought is a non-Business Day, the Units will be redeemed at the Applicable NAV of the next Business Day.

Options available and Minimum Amount Fixed withdrawal: Investors can withdraw fixed amount of Rs.500/- each and above at regular intervals.

- SWP is not available for investments under lock-in period and for investments which are pledged.
- The SWP payouts will be processed at the requested frequency. The investor can opt for direct credit of the redemption proceeds to their registered bank accounts. For investors banking with any other bank apart from above mentioned bank, the AMC / MF will endeavour to credit the payout directly to that registered bank account through available electronic mode(s) (i.e., NEFT/RTGS). The AMC / MF shall not be responsible if payout through electronic mode(s) (NEFT/RTGS) does not get affected due to incomplete or incorrect information or any other destination bank technical /operational reasons. The AMC / MF reserve the right to use any other mode of payment as deemed appropriate, however the preferred mode will always be NEFT/RTGS.
- In case of Fixed Withdrawal, if the amount of instalment is more than the amount available in that account for redemption, the entire available amount will be redeemed and the SWP will get terminated automatically. In case of Appreciation Withdrawal, appreciation will be calculated on the units available for redemption at the time of the SWP instalment.

Withdrawal Dates:

Facility	Frequency	Date	Criteria
SWP	Weekly	Any date of every month (between 1st & 28th)	For all schemes except ELSS: i) Rs. 500/- and in multiples of Re. 1/-thereafter for minimum 24 installments ii) Rs. 1000/- and in multiples of Re. 1/-thereafter for minimum 12 installments
	Fortnightly		
	Monthly		For ELSS: i) Rs. 500/- and in multiples of Rs. 500/-thereafter for minimum 24 installments ii) Rs. 1000/- and in multiples of Rs. 500/-thereafter for minimum 12 installments

Interscheme Switching

The Transaction Slip can be used by investors to make inter-scheme switches (during the NFO Period and the ongoing offer period) within the Fund. All valid applications for switch-out shall be treated as Redemption and for switch-in as Purchases with the respective Applicable NAVs of the Scheme / option.

Intrascheme Switching

Investors can switch between different options under the same Plan of the Scheme, at the Applicable NAV. All valid applications for switch-out shall be treated as Redemption and for switch-in as Purchases with the respective Applicable NAVs of the option. No Entry or Exit Loads will be charged for intra- scheme switch of investments from Regular Plan to Direct Plan under the same scheme.

Switch facility from one scheme to another scheme

In the interest of investors, it is hereby clarified that where the switch request has been made from one scheme to another specifying the number of Units or Amount (during NFO as well as ongoing), the request will be processed for the corresponding value of such units or amount and that the allotment in the resultant scheme may be done in fractional units, subject to fulfillment of the minimum purchase amount of the scheme where it is being switched.

Folio Number

Unless otherwise requested by the Unit Holder, a single folio number may be assigned if an investor invests in different schemes of the Fund, and a consolidated account statement will then be provided for investments in all the schemes.

Fractional Units

Since a request for Purchase or Redemption is generally made in rupee amounts and not in terms of a fixed number of Units of the Scheme, an investor may be left with fractional Units. Fractional Units will be computed and accounted for up to three decimal places for the Scheme.

Consolidation of folios

In case an investor holds investments in multiple folios under the Fund, the AMC reserves the right to consolidate all the folios belonging to the same investor into one folio.

Transaction through electronic mode

The AMC may from time to time offer various facilities to the unit holders through electronic mode such as internet, mobile phones CAMS etc. to facilitate transactions in units of the scheme. The AMC may enter into such arrangements / agreements as it may deem fit to give effect to the above.

However, investors intending to take benefit of these facilities should note that they should use these services at their own risk. The Fund, the AMC, the Trustee, along with its directors, employees and representatives shall not be liable for any damages or injuries arising out of or in connection with the use of internet, mobile phones, CAMS etc. or its non-use including, without limitation, non-availability or failure of performance, loss or corruption of data, loss of or damage to property (including profit and goodwill), work stoppage, computer failure or malfunctioning, or interruption of business; error, omission, interruption, deletion, defect, delay in operation or transmission, computer virus, communication line failure, unauthorized access or use of information.

Is switch-transaction permissible if the units are held in Demat?

Yes, demat switch transactions are processed in demat holding also through exchange/clearing corporation. The mechanism is same as in case of normal redemption and subscription. Post processing of switch-out redemption, switch-in (subscription) is processed and equivalent units are settled to clearing house for on-ward credit to the investor's DP account.

However, Systematic Transfer Plan & Systematic Withdrawal Plan are not permitted in demat.

Procedure for change in investor's profile / bank account details etc. in respect of units held in demat mode

In case of any modifications of bank account, address, contact details etc in the demat folios, the investor needs to update in his/her Demat account through their respective Depository Participant (DP). DP follows prescribed guidelines for such profile modifications as formulated by respective Depositories (NSDL/CDSL) in their operating manual. There is no need for the investors to submit any Non-Commercial Transaction (NCT) request to RTA as the basic information are shared by both NSDL/CDSL to RTAs on weekly basis.

However, few processes are outlined below based upon the information collated from depositories operating manual. The said process mentioned here is just for information only. Therefore, the investor is advised to approach his DP and provide appropriate documents and information as per depository process.

a. Change in Registered Bank Account

Investors can change bank account details registered in their demat account any time by submitting a written request (prescribed format) to their DP duly signed by all holders. The investor will also need to provide supporting documents for the new bank account such as copy of passbook or account statement or cancelled cheque leaf with account holder's name printed, bank account number,

bank name, IFSC / MICR. DP follows prescribed guidelines for such profile modifications as formulated by respective Depositories (NSDL/CDSL) in their operating manual.

b. Change of address

Investors can change their address in the depository system by submitting a written request (prescribed format) to their DP. Such a request should be duly signed by all holders.

Following documents should be submitted along with the request -

- i. Latest Statement of Transaction (SoT) of the Demat account.
- ii. Self-attested copy of any proof of identity document like PAN card, Passport, Voter identity card, Aadhaar card, Driving license, NREGA card.
- iii. Self-attested copy of any document as proof of new address Passport, Voter's identity card, Aadhaar card, Driving license.

The investor would be required to produce original document for the purpose of verification of photocopy by the DP. The investor or their authorized representative should sign the application once again in the presence of the officials of the Participant. Once the request for change in address is processed in the depository system, an email is sent by NSDL to the account holder(s) informing the update, in addition to intimation from the DP. For more details, you may reach out to respective DP for detailed overview.

V. INVESTMENT VALUATION NORMS FOR SECURITIES AND OTHER ASSETS

1) Valuation of Debt & Money Market Instruments

a) Traded Instruments

Assets	Methodology
Maturity>365days (except for G-Sec)	<p>Instruments shall be valued at the weighted average price (WAP) at which they are traded/reported on the particular valuation day on available public platforms i.e. FIMMDA/NSE/BSE.</p> <p>An instrument will be considered for valuation as traded security if traded prices are available subject to the fulfilment of the following condition:</p> <p>For instruments maturing above 365 Days, the traded price may be taken if there are at least two trades aggregating to Rs. 25 crores or more.</p> <p>If market trades satisfying the above condition/s are not available then AMC's own trades to be considered as traded price available for valuation provided it conforms with the following criteria:</p> <p>Instruments maturing above 1 year - a single trade of Rs.5.00 crores or more</p> <p>Inter- scheme trades are also considered as AMC's own trades provided it conforms to the above criteria.</p> <p>In case there are both viz. qualifying market trades as well as AMC's own trades, then market trades shall be given a higher priority. In case of multiple platforms reporting trades on the same day, the order of preference would be (i) FIMMDA, (ii) NSE WDM, (iii) BSE and (iv) AMC's own trades</p> <p>Wherever the traded price is 'distorted' in case of forward settlement dates (e.g. across a weekend/holidays), the traded yields may be used to arrive at the traded price for valuation. In case of multiple trades, the weighted average price (WAP) may be used for valuation.</p>
Maturity> 60 days and 365days (except for G- Sec and T-Bills)	<p>Valuation methodology same as that for maturity > 365 days (except for G-Sec) except for the qualification criteria.</p> <p>An instrument will be considered for valuation as traded security if traded prices are available subject to the fulfilment of the following condition:</p> <p>For instruments maturing between 61 days and 365 Days, the traded price may be taken if there are at least three trades aggregating to Rs. 100 crores or more.</p> <p>If market trades satisfying the above condition/s are not available then AMC's own trades to be considered as traded price available for valuation provided it conforms with the following criteria:</p> <p>Instruments maturing between 61 days and 365 Days - a single trade of Rs 25 crores or more. (The amounts refer to face value of the securities.)</p> <p>Inter- scheme trades are also considered as AMC's own trades provided it conforms to the above criteria.</p>
Maturity 60 days (except for G-Sec and T-Bills)	Valuation methodology same as that for maturity 60 days and 365 days (except for G- Sec and T-Bills).
Treasury Bills	<p>The average of the prices provided by CRISIL & ICRA or agencies entrusted for the said purpose by AMFI would be considered, however, the traded prices would be considered in case such trades are reported in NSE (WDM).</p> <p>Where the prices are not available, the security will be valued at weighted average traded price available on The Clearing Corporation of India (CCIL) website.</p> <p>T-Bills purchased before issue date is valued at cost price prior to issue date.</p>
Interest Rate Swaps (IRS)	All IRSs will be valued at net present value after discounting the future cash flows. Future cash flows for IRS contracts will be computed daily based on the terms of the contract and discounted by suitable OIS rates available on Reuters/Bloomberg/any other provider, as approved by Valuation Committee.
Pass Through Certificate	<p>If the residual maturity of the security is more than 60 days, then security is valued through Crisil Bond Valuer and if residual maturity of the security is up to 60 days then it is valued at amortization method.</p> <p>Periodical cash flow is considered for valuation of security.</p>
Assets	Methodology
Bills purchased under rediscounted	Bills purchased under rediscount shall be valued at cost plus accrual method (amortization method).
Reverse Repo	The valuation is done on cost plus repo interest. (Interest per day equals to Second Leg minus First Leg divide by numbers of days).

b) Non Traded Instruments

Assets	Methodology
--------	-------------

Maturity > 30 days (except for G-Sec and T-Bills)	<p>Instruments shall be valued through CRISIL Bond Valuer (CBV) or any other method accepted within regulations. CBV uses average yield computed by averaging the matrix provided by CRISIL and ICRA. For averaging of matrix yield CBV aggregator is used.</p> <p>The approach in valuation of non-traded debt securities is based on the concept of using spreads over the benchmark rate to arrive at the yields for pricing the non-traded security.</p> <p>The Yields for pricing the non-traded debt security would be arrived at using the process as defined below :</p> <p>Step 1 : A Risk Free Benchmark Yield is built using the government securities as the base. Government securities are used as the benchmarks as they are traded regularly; free of credit risk; and traded across different maturity spectrums every week.</p> <p>Step 2 : A Matrix of spreads (based on the credit risk) are built for marking up the benchmark yields. The matrix is built based on traded corporate paper on the wholesale debt segment of an appropriate stock exchange and the primary market issuances. The matrix is restricted only to investment grade corporate paper.</p> <p>Step 3 : The Yields as calculated above are Marked-up/Marked down for ill-liquidity risk Step 4 : The Yields so arrived are used to price the portfolio.</p> <p>Mark-up/Mark-down Yield</p> <p>The Yields calculated would be marked-up/marked-down to account for the illiquidity risk, promoter background, finance company risk and the issuer class risk. As the level of illiquidity risk would be higher for non-rated securities the marking process for rated and non-rated securities would be differentiated as follows :</p> <p>Adjustments for Securities rated by external rating agencies</p> <table><tr><th>Category</th><th>Discretionary mark-up</th><th>Mark down</th></tr><tr><td></td><td>+</td><td>-</td></tr><tr><td>Rated instruments with duration up to 2 years</td><td>100 bps</td><td>50 bps</td></tr><tr><td>Rated instruments with duration over 2 years</td><td>75 bps</td><td>25 bps</td></tr></table> <p>The rationale for the above discount structure is to take cognizance of the differential interest rate risk of the securities. This structure will be reviewed periodically.</p> <p>Adjustments for Internally Rated Securities</p> <p>1. To value an un-rated security, the fund manager shall assign an internal credit rating, which will be used for valuation. Since un-rated instruments tend to be more illiquid than rated securities, the yields would be marked-up by adding discretionary discount as under :</p> <table><tr><th>Category</th><th>Discretionary discount</th></tr><tr><td>Unrated instruments with duration up to 2 years</td><td>Discretionary discount of up to +50 bps over and above mandatory discount of +50 bps</td></tr><tr><td>Unrated instruments with duration over 2 years</td><td>Discretionary discount of up to +50 bps over and above mandatory discount of +25 bps</td></tr></table> <p>2. The benchmark yield/ matrix of spreads over risk free benchmark yield obtained from any agency suggested by AMFI must be applied for valuation of securities on the day of release of such bench mark yield/ matrix of spreads by the aforesaid agency. The Chief Executive Officer (whatever his designation may be) of the AMC shall give prior approval to the use of discretionary mark up or down limit.</p>			Category	Discretionary mark-up	Mark down		+	-	Rated instruments with duration up to 2 years	100 bps	50 bps	Rated instruments with duration over 2 years	75 bps	25 bps	Category	Discretionary discount	Unrated instruments with duration up to 2 years	Discretionary discount of up to +50 bps over and above mandatory discount of +50 bps	Unrated instruments with duration over 2 years	Discretionary discount of up to +50 bps over and above mandatory discount of +25 bps
Category	Discretionary mark-up	Mark down																			
	+	-																			
Rated instruments with duration up to 2 years	100 bps	50 bps																			
Rated instruments with duration over 2 years	75 bps	25 bps																			
Category	Discretionary discount																				
Unrated instruments with duration up to 2 years	Discretionary discount of up to +50 bps over and above mandatory discount of +50 bps																				
Unrated instruments with duration over 2 years	Discretionary discount of up to +50 bps over and above mandatory discount of +25 bps																				
Maturity 30 days (except for G-Sec and T-Bills)	Instruments may be valued by amortization based valuation as referred to in SEBI circular dated February 28, 2012. Further, the amortized price shall be compared with the reference price which shall be the average of the security level price of such security as provided by the agency (ies) appointed by AMFI for said purpose(hereinafter referred to as “valuation agencies”). The amortized price shall be used for valuation only if it is within a threshold of ±0.025% of the reference price. In case of deviation beyond this threshold, the price shall be adjusted to bring it within the threshold of ±0.025% of the reference price.																				
T-Bills Maturity 30days	Security will be valued by amortization																				
T-Bills Maturity > 30days	Aggregate price by CRISIL and ICRA																				

c) Thinly Traded Instruments

Assets	Methodology
Thinly Traded Debt Securities	<p>On a particular valuation day, these securities will be valued at the last quoted closing price on National Stock Exchange of India Limited (NSE). If a security is not traded on NSE, it will be valued at the last quoted closing price on The Bombay Stock Exchange Limited (BSE).</p> <p>If a security is not traded on NSE and BSE, it will be valued at the last quoted closing price on other recognised stock exchange where the security is traded.</p> <p>If the security is traded on more than one recognised stock exchanges (other than NSE and BSE), it will be valued at the last quoted closing price on the stock exchange as may be selected by the Valuation Committee, and the reasons for such selection will be recorded in writing.</p> <p>Once a stock exchange has been selected for valuation of a particular security, reasons for change of the exchange shall be recorded in writing by the asset management company. If a security is not traded on any stock exchange on a particular valuation day, the last quoted closing price on NSE or BSE or other recognised stock exchange (in the order of priority) on the earliest previous day would be used, provided such day is not more than thirty days prior to the valuation day.</p>

d) Specific Securities

Assets	Methodology
G-Sec - Any Maturity	Government securities will be valued at prices for government securities provided by CRISIL & ICRA or any other designated agencies suggested by AMFI to ensure uniformity in calculation of NAVs.

e) Waterfall Mechanism for valuation of money market and debt securities

SEBI, vide its circular no: SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019, prescribed that for arriving at security level pricing, a waterfall approach shall be followed for the valuation of money market and debt securities. In pursuance of the said circular, AMFI has prescribed the following guidelines vide its AMFI Best Practices Guidelines Circular No. 135/BP/83/2019-20 dated November 18, 2019 on valuation approach for traded & non-traded money market and debt securities:

Valuation of money market and debt securities other than G-Secs:

- i. Volume Weighted Average Yield (VWAY) of primary reissuances of the same ISIN (whether through book building or fixed price) and secondary trades in the same ISIN
- ii. VWAY of primary issuances through book building of same issuer, similar maturity (Refer Note 1 below)
- iii. VWAY of secondary trades of same issuer, similar maturity
- iv. VWAY of primary issuances through fixed price auction of same issuer, similar maturity
- v. VWAY of primary issuances through book building of similar issuer, similar maturity (Refer Note 1 below)
- vi. VWAY of secondary trades of similar issuer, similar maturity.
- vii. VWAY of primary issuance through fixed price auction of similar issuer, similar maturity
- viii. Construction of matrix (polling may also be used for matrix construction)
- ix. In case of exceptional circumstances, polling for security level valuation (Refer Note 2 below)

Note 1

Except for primary issuance through book building, polling shall be conducted to identify outlier trades.

However, in case of any issuance through book building which is less than INR 100 Cr, polling shall be conducted to identify outlier trades.

Note 2

Some examples of exceptional circumstance would be stale spreads, any event/news in particular sector/issuer, rating changes, high volatility, corporate action or such other event as may be considered by valuation agencies. Here stale spreads are defined as spreads of issuer which were not reviewed/updated through trades/primary/polls in same or similar security/issuers of same/similar maturities in waterfall approach in last 6 months.

Further, the exact details and reasons for the exceptional circumstances which led to polling shall be documented and reported to AMCs. Further, a record of all such instances shall be maintained by AMCs and shall be subject to verification during SEBI inspections.

Note 3

All trades on stock exchanges and trades reported on trade reporting platforms till end of trade reporting time (excluding Inter-scheme transfers) should be considered for valuation on that day.

Note 4

For the purpose of calculation of VWAY of trades and identification of outliers, on the day of certain exceptional events (occurrence of which during market hours may lead to significant change in the yield of the debt securities), rather than considering whole day trades, only those trades shall be considered which have occurred post the event (on the same day).

The following events would be considered exceptional events:

- i. Monetary / Credit Policy
- ii. Union Budget
- iii. Government Borrowing / Auction Days
- iv. Material Statements on Sovereign Rating
- v. Issuer or Sector Specific events which have a material impact on yields
- vi. Central Government Election Days
- vii. Quarter end days

In addition to the above, valuation agencies may determine any other event as an exceptional event. All exceptional events along with valuation carried out on such dates shall be documented with adequate justification

Valuation of G-Secs (T-Bill, Cash management bills, G-Sec and SDL):

- VWAY of last one hour, subject to outlier validation
- VWAY for the day (including a two quote, not wider than 5 bps on NDSOM), subject to outlier validation
- Two quote, not wider than 5 bps on NDSOM, subject to outlier validation
- Carry forward of spreads over the benchmark
- Polling etc.

Note:

1. VWAY shall be computed from trades which meet the marketable lot criteria stated in Part A of these Guidelines.
2. Outlier criteria: Any trade deviating by more than +/- 5 bps post factoring the movement of benchmark security shall be identified as outlier. Such outlier shall be validated through polling for inclusion in valuations. If the trades are not validated, such trades shall be ignored.

f) Polling Process for Money Market and Debt Securities:

Responsibilities of Mutual Funds in the polling process, as part of the waterfall approach for valuation of money market and

debt securities:

- Valuation agencies shall identify the Mutual Funds who shall participate in the polling process on a particular day, taking into account factors such as diversification of poll submitters and portfolio holding of the Mutual Funds. Mutual Funds who are identified by the valuation agencies shall necessarily participate in the polling process. However, in case any Mutual Fund does not participate in the polling process, detailed reason for the same shall be recorded at the time and subsequently made available during SEBI inspections. In this respect, since a Mutual Fund may have investments in similar securities, a security not forming part of investment universe may not be considered as an adequate reason for not participating in the polling process.
- Polling will be carried out by the valuation agencies on a daily basis and in terms of the aforesaid AMFI guidelines on polling process
- Best efforts should be made by poll submitters to provide fair valuation of a security.
- The polling process will be revalidated by external audit of the valuation agencies with at least an annual frequency
- AMCs shall have a written policy, approved by the Board of AMC and Trustees, on governance of the polling process. The aforesaid policy shall include measures for mitigation of potential conflicts of interest in the polling process and shall identify senior officials, with requisite knowledge and expertise, who shall be responsible for polling. Further, the policy should outline the following aspects:
 - The process of participating in a polling exercise.
 - Identify the roles and responsibilities of persons participating in the polling.
 - Include policies and procedures for arriving at the poll submission
 - Cover the role of the Board of AMC and Trustees, and the periodic reporting that needs to be submitted to them.
 - All polling should be preferably over email. In case for any reason, the polling is done by way of a telephonic call then such a call should be over recorded lines, followed subsequently by an email.
 - AMCs should have adequate business continuity arrangements for polling, with the necessary infrastructure / skill to ensure that consistent delivery of poll submissions is made without material interruption due to any failure, human or technical.
- All polling done will have to be documented and preserved in format approved by the Board of AMC, for a period of eight years, along-with details of the basis of polling (such as market transactions, market quotes, expert judgement etc.).
- AMCs shall ensure that participation in the polling process is not mis-used to inappropriately influence the valuation of securities. The officials of the AMC who are responsible for polling shall also be personally liable for any misuse of the polling process.
- AMCs shall maintain an audit trail for all polls submitted to valuation agencies.

2) Valuation of securities other than debt and money market securities :

Assets	Methodology
Traded Securities - equity / equity related security (such as convertible debentures, equity warrants, etc.)	<p>On a particular valuation day, these securities will be valued at the last quoted closing price on National Stock Exchange of India Limited (NSE). If a security is not traded on NSE, it will be valued at the last quoted closing price on The Bombay Stock Exchange Limited (BSE).</p> <p>If a security is not traded on NSE and BSE, it will be valued at the last quoted closing price on other recognised stock exchange where the security is traded.</p> <p>If the security is traded on more than one recognised stock exchanges (other than NSE and BSE), it will be valued at the last quoted closing price on the stock exchange as may be selected by the Valuation Committee, and the reasons for such selection will be recorded in writing.</p> <p>Once a stock exchange has been selected for valuation of a particular security, reasons for change of the exchange shall be recorded in writing by the asset management company.</p> <p>If a security is not traded on any stock exchange on a particular valuation day, the last quoted closing price on NSE or BSE or other recognised stock exchange (in the order of priority) on the earliest previous day would be used, provided such day is not more than thirty days prior to the valuation day.</p>
Thinly Traded Securities	<p>When trading in an equity and/or equity related security (such as convertible debentures, equity warrants etc.) in a month is both less than Rupees 5 lacs and the total volume is less than 50,000 shares, the security shall be considered as thinly traded security and valued accordingly.</p> <p>In order to determine whether a security is thinly traded or not, the volumes traded in all recognized Stock Exchanges in India may be taken into account.</p> <p>For example, if the volume of trade is 1,00,000 and value is Rupees 4,00,000, the shares do not qualify as thinly traded. Also if the volume traded is 40,000, but the value of trades is Rupees 6, 00,000, the shares do not qualify as thinly traded.</p> <p>Where a Stock Exchange identifies the thinly traded securities by applying the above parameters for the preceding calendar month and publishes or provides the required information along with the daily quotations, the same can be used by the Mutual Funds.</p> <p>If the shares are not listed on the Stock Exchanges which provide such information, then Mutual Funds shall make their own analysis in line with the above criteria to check whether such securities are thinly traded or not and then value them accordingly.</p>
Suspended equity securities	<p>In case trading in an equity security is suspended up to thirty days, then the last traded price shall be considered for valuation of that security. If an equity security is suspended for more than thirty days, then the AMC(s) or Trustees shall decide the valuation norms to be followed and such norms shall be documented and recorded.</p>

Non-traded / thinly traded equity securities	<p>Based on the latest available Balance Sheet, Net Worth shall be calculated as follows :</p> <p>Net Worth per share = [Share Capital+ Reserves (excluding Revaluation Reserves) - Miscellaneous expenditure and Debit Balance in Profit and Loss Account] / Number of Paid up Shares.</p> <p>Average Capitalization rate (P/E ratio) for the industry based upon either BSE or NSE data (which shall be followed consistently and changes, if any, noted with proper justification thereof) shall be taken and discounted by 75 per cent i.e. only 25 per cent. Of the industry average P/E shall be taken as Capitalization rate (P/E ratio). Earnings per share (EPS) of the latest audited annual accounts shall be considered for this purpose.</p> <p>The value as per the Net Worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 10 per cent for illiquidity so as to arrive at the fair value per share.</p> <p>In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalized earning.</p> <p>In case where the latest Balance Sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.</p> <p>In case an individual security accounts for more than 5 per cent of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5 per cent of the total assets of the scheme, it shall be valued by the procedure above and the proportion which it bears to the total net assets of the scheme to which it belongs will be compared on the date of valuation.</p> <p>To determine if a security accounts for more than 5% of the total assets of the scheme, it would be valued by the procedure above and the proportion which it bears to the total net assets of the scheme to which it belongs would be compared on the date of valuation.</p>
Assets	Methodology
Unlisted Equity Shares	<p>To ensure uniformity in calculation of NAV the following guidelines are issued :</p> <p>Methodology for Valuation - unlisted equity shares of a company shall be valued "in good faith" as below :</p> <p>(a) Based on the latest available audited balance sheet, Net Worth shall be calculated as the lower of item (1) and (2) below :</p> <p>1. Net Worth per share = [Share Capital + Free Reserves (excluding revaluation reserves) - Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] / Number of Paid up Shares.</p> <p>2. After taking into account the outstanding warrants and options, Net Worth per share shall again be calculated and shall be = [Share Capital + consideration on exercise of Option and/or Warrants received/receivable by the Company + Free Reserves (excluding Revaluation Reserves) - Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] / Number of Paid up Shares plus Number of Shares that would be obtained on conversion and/or exercise of Outstanding Warrants and Options.</p> <p>3. The lower of (1) and (2) above shall be used for calculation of Net Worth per share and for further calculation in (c) below.</p> <p>b. Average capitalization rate (P/E ratio) for the industry based upon either BSE or NSE data (which shall be followed consistently and changes, if any, noted with proper justification thereof) shall be taken and discounted by 75 % i.e. only 25% of the industry average P/E shall be taken as capitalization rate (P/E ratio). Earnings per share (EPS) of the latest audited annual accounts will be considered for this purpose.</p> <p>c. The value as per the Net Worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 15 % for illiquidity so as to arrive at the fair value per share.</p> <p>The above valuation methodology shall be subject to the following conditions:</p> <p>a. All calculations shall be based on audited accounts. If the latest Balance Sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero. If the Net Worth of the company is negative, the share would be marked down to zero.</p> <p>b. In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.</p> <p>c. In case an individual security accounts for more than 5 % of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5 % of the total assets of the scheme, it shall be valued in accordance with the procedure as mentioned above on the date of valuation.</p> <p>At the discretion of the AMCs and with the approval of the Trustees, unlisted equity shares may be valued at a price lower than the value derived using the aforesaid methodology.</p>
Equity and Equity related securities under lock in period / pending listing	<p>Illiquidity discount will be Nil for securities where the lock-in is less than 3 months. If the lock-in period for these securities is greater than 3 months, then the Valuation Committee will decide on the illiquidity discount to be applied, on a case to case basis.</p>
Stock Split/ Face value change	<p>In case of stock split, the face value of a stock is reduced and proportionately number of shares is increased. The valuation price will be derived on the basis of the last quoted closing price before the ex-date and adjusted in proportion of stock split, till the new stock split shares are listed and traded on a stock exchange. The cost of one share will be proportionately adjusted in line with stock split change, to derive the new cost of share. On stock split/face value change, in case the company specifies any regulations/ method for cost bifurcation or valuation the same will be adopted.</p>
Preference Shares	<p>On a valuation day, traded securities are to be valued at the last quoted closing price on NSE. NSE will be principal stock exchange and BSE will be the secondary stock exchange. Non traded Preference shares will be valued on the basis of norms governing the valuation of Non Convertible Debentures and Bonds under valuation of Debt Security</p>

	category.
Illiquid Securities	Illiquid securities shall be valued in good faith. Aggregate value of "illiquid securities" of scheme, which are defined as non-traded, thinly traded and unlisted equity shares, shall not exceed 15% of the total assets of the scheme and any illiquid securities held above 15% of the total assets shall be assigned zero value.
Valuation of Convertible Debentures and Bonds	In respect of convertible debentures and bonds, the non-convertible and convertible components shall be valued separately. The non-convertible component should be valued on the same basis as would be applicable to a debt instrument. The convertible component should be valued on the same basis as would be applicable to an equity instrument. If, after conversion the resultant equity instrument would be traded pari passu with an existing instrument which is traded, the value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments, the fact whether the conversion is optional should also be factored in.
Valuation of Warrants	a) In respect of warrants to subscribe for shares attached to instruments, the warrants would be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. A discount similar to the discount to be determined in respect of convertible debentures shall be deducted to account for the period, which must elapse before the warrant can be exercised. b) In case the warrants are traded separately
Value of "Rights" entitlement	a) Until they are traded, the value of the "rights" entitlement would be calculated as : $V_r = n/m \times (P_{ex} - P_{of})$ where V_r = Value of rights; n = no. of rights Offered; m = no. of original shares held P_{ex} = Ex-Rights price; P_{of} = Rights Offer price b) Where the rights are not traded pari-passu with the existing shares, suitable adjustments would be made to the value of rights. Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights would be valued at the renunciation value. c) In case original shares on which the right entitlement accrues are not traded on the Stock Exchange on an ex-right basis, right entitlement should not be recognised as investments. d) Where right entitlements are not traded and it was decided not to subscribe the rights, the right entitlements have to be valued at zero
Assets	Methodology
Foreign Securities (other than units of overseas mutual funds/unit trusts which are not listed), IDR:	American Depository Receipt (ADR) / Global Depository Receipt (GDR) and all overseas securities : If the security is listed in a time zone ahead of ours then the same day closing price on the stock exchange at which it is listed would be used for valuation. If the security is listed in a time zone behind ours then the previous day's price would be used for valuation. In case the security is not traded on the above mentioned days, price of previous day should be used provided the price is not more than 30 days old. Since these prices are in foreign currency these are to be converted in Indian Rupees by applying the closing exchange rate on the date of valuation. This closing price in INR should be used for valuation of ADR/GDR. Alternatively closing price of the security should be converted to INR at last day's closing exchange rate of that currency (i.e. the closing rate of the date of which prices are considered). The closing exchange rate from RBI (RBI reference rate) is used for this purpose. Indian Depository Receipt (IDR) : Valuation of IDRs listed in the Indian Stock Exchange would follow the valuation norms adopted for the listed equity shares. IDR is valued at price at which they are traded on BSE/NSE exchanges. In case the IDRs are classified as thinly traded, the criteria, as laid above for listed Indian Equity shares shall be applied taking into consideration the relevant company's balance sheet.
Valuation of Non-Performing Assets	All Non - Performing Assets shall be valued in accordance with the Guidelines for Identification and Provisioning for Non-Performing Assets (Debt Securities) For Mutual Funds issued by SEBI.
Valuation of Derivative Products :	The traded derivative shall be valued at market price in conformity with the stipulations of sub clause (i) to (v) of clause 1 of the Eighth Schedule to the SEBI Regulations. The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the SEBI Regulations as amended from time to time. Valuation of Equity/Index Futures or options shall be determined based on the market values of traded contracts with respect to the exchange on which it was originally contracted upon. For positions which are not traded, the daily settlement prices in the respective exchanges will be considered for valuation.
Valuation of Repo	Where instruments have been bought on 'repo' basis, the instrument would be valued at the resale price after deduction of applicable interest up to date of resale. Where an instrument has been sold on a 'repo' basis, adjustment would be made for the difference between the Redemption price (after deduction of applicable interest up to date of Redemption) and the value of the instrument. If the Redemption price exceeds the value, the depreciation will be provided for and if the Redemption price is lower than the value, credit will be taken for the appreciation.

Equity and Equity related Securities awaiting listing (Merger/ Demerger)	<p>Merger : In case of merger, when company "X" is merged with company "Y" and company "Y" continues to be listed, the proportionate shares allotted of "Y" company against company "X" will be valued at the last quoted closing price of company "Y" on the stock exchange. The cost of company "X" shares will be added to the cost of company "Y" shares. In case of merger when company "X" and company "Y" are merged to form company "Z" the value of unlisted company "Z" will be the total valuation price of company "X" and company "Y" before the ex-date till the new entity company "Z" is listed and traded on a stock exchange. The cost of company "X" and company "Y" shares will be added to derive the cost of company "Z" shares.</p> <p>Demerger : Where at least one resultant company is not immediately listed, valuation price will be worked out by using cum-price, before demerger reduced for quoted price of the listed resultant company/ies OR in case of a demerger pending listing, the resultant company/ies shall be valued at the intrinsic value arrived at on the date of corporate action.</p>
Initial Public Offering (IPO) Application (prior to allotment)	IPOs will be valued at the bid price
Qualified Institutional Placement (QIP) / Follow on Public Offer (FPO)	Valued at Bid price or Market price, whichever is lesser

3) Inter-scheme transfers (IST):

With respect to Inter-scheme transfers:

AMC shall seek prices for IST of any money market or debt security (irrespective of maturity), from the valuation agencies.

AMFI, in consultation with valuation agencies shall decide a turn-around-time (TAT), within which IST prices shall be provided by the agencies. If prices from the valuation agencies are received within the pre-agreed TAT, an average of the prices so received shall be used for IST pricing. If price from only one valuation agency is received within the agreed TAT, that price may be used for IST pricing.

If prices are not received from any of the valuation agencies within the agreed TAT, AMCs may determine the price for the IST, in accordance with Clause 3 (a) of Seventh Schedule of SEBI (Mutual Funds) Regulations, 1996.

Mutual Fund shall not use their own trades for valuation of debt and money market securities and for Inter-scheme transfers.

It is advised to distribute such amount, if it is substantial, to the concerned investors. In case the amount is not substantial, it may be used for the purpose of investor education. The decision as to the determination of substantial amount shall be taken by the Trustees of Mutual Funds after considering the relevant factors including number of investors, amount recovered, cost of transferring funds to investors; among others. In the format of the abridged scheme-wise annual report format prescribed vide SEBI Circular No. SEBI/IMD/CIR No.8/132968/2008 dated July 24, 2008, under notes to accounts, the term "NPA" shall be replaced with "securities classified as below investment grade or default".

These indicative haircuts shall be applied on the date of credit event i.e. migration of the security to sub-investment grade and shall continue till the valuation agencies compute the valuation price of such securities. Further, these haircuts shall be updated and refined, as and when there is availability of material information which impacts the haircuts.</p> <p>AMCs may deviate from the indicative haircuts and/or the valuation price for money market and debt securities rated below investment grade provided by the valuation agencies subject to the following:</p> <p>The detailed rationale for deviation from the price post haircuts or the price provided by the valuation agencies shall be recorded by the AMC.</p> <p>The rationale for deviation along-with details such as information about the security (ISIN, issuer name, rating etc.), price at which the security was valued vis-a-vis the price post haircuts or the average of the price provided by the valuation agencies (as applicable) and the impact of such deviation on scheme NAV (in amount and percentage terms) shall be reported to the Board of AMC and Trustees</p> <p>The rationale for deviation along-with details as mentioned at para (b) above shall also be disclosed to investors. + With respect to an Equity Oriented Fund of Fund, units acquired post 1 April 2023 and sold prior to 31 March 2025 would be considered as units sold of a Specified Mutual Fund (SMF) as mentioned below and hence, any gains arising on transfer of such units would be deemed to be short-term capital gains. However, with respect to units acquired prior to 1 April 2023, gains arising on transfer of such units would not be considered as units sold of a Specified Mutual Fund (SMF) as mentioned below and would continue to be governed by the normal provisions (i.e., long-term or short-term, depending upon period of holding) as mentioned in the table above.

++ As per the amended Finance Bill 2023, a Specified Mutual Fund (SMF) acquired on or after April 1, 2023, shall be deemed to be short-term capital asset and hence, the gains arising on such transfer will be regarded as short-term capital gains (STCG) irrespective of period of holding. - a. Fill up and sign the KYC application form (for individual investors or non-individual investors as appropriate) available on the Funds web site i.e. www.shriramamc.in
- b. At the time of transacting with the Fund, submit, in person, the completed KYC application form along with all the necessary documents as mentioned in the KYC application form with any of the offices of the distributors (qualified as per the following note), Registrar and Transfer Agent of the Fund and the Fund; and
- c. Obtain a temporary acknowledgement for submission of all the documents and completion of IPV;

Note : As per the SEBI circular MIRSD/Cir-26/2011 dated December 23, 2011, it is mandatory for SEBI registered intermediaries to carry out "In- Person Verification" ("IPV") of any investor dealing with a SEBI registered intermediary.

For investments in a mutual fund, the Asset Management Companies, Registrar and Transfer Agents of mutual funds and distributors which comply with the certification process of National Institute of Securities Market or Association of Mutual Funds in India and have undergone the process of "Know Your Distributors" are authorised to carry out the IPV. Unless the IPV process is completed, the investor will not be considered as KYC compliant under the new KYC compliance procedure and hence will not be permitted to make any investment in the Fund.

For investors proposing to invest with the Fund directly (i.e. without being routed through any distributor), IPV done by a scheduled commercial bank may also be relied upon by the Fund. Once all the documents are verified by a KRA, they will send the investor a letter within 10 working days from the date of receipt of necessary documents by them from the Fund or its Registrar and Transfer Agent informing the investor either about compliance by the investor of the new KYC compliance procedure ("final acknowledgement") or any deficiency in submission of details or documents.

On the basis of the temporary acknowledgement or the final acknowledgement the investor would be eligible to deal with any of the SEBI registered intermediaries as mentioned in the above mentioned SEBI circulars. Existing Folio holder cannot open a new folio with Shriram Mutual Fund with the erstwhile centralized KYC.

Once the same is done then the KYC status at CVL-KRA will change to Verified by CVL KRA after due verification. Further, investors investing under a SIP up to Rs. 50,000 per year i.e. the aggregate of instalments in a rolling 12 month period ("Micro SIP"), are also required to comply with the above mentioned KYC procedure. However, they are exempt from the requirement of providing PAN as a proof of identification.

Those investors (including joint holders) subscribing to a micro SIP will be required to submit a photocopy of any one of the following documents along with their micro SIP applications. C. General Information

UNDERWRITING BY THE FUND

Subject to the Regulations, the Scheme may enter into underwriting agreements only after the Fund obtains a certificate of registration in terms of the Securities and Exchange Board of India (Underwriters) Rules and Securities and Exchange Board of India (Underwriters) Regulations, 1993, authorising it to carry on activities as underwriters.

The capital adequacy norms for the purpose of underwriting shall be the net assets of the Scheme and the underwriting obligation of the Scheme shall not at any time exceed the total net asset value of the Scheme.

SECURITIES LENDING AND BORROWING

Subject to the SEBI Regulations, the Mutual Fund may, engage in Securities Lending. Such investments shall be made when in view of the Fund Manager; such investments could provide reasonable returns commensurate with risks associated with such investments and shall be made in accordance with the investment objective of the Scheme. Securities Lending means the lending of Securities to another person or entity for a fixed period of time, at a negotiated compensation in order to enhance returns of the portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period. The lending transactions may require procurement of collateral which would exceed in value, the value of the securities lent. The collateral can be in the form of cash, bank guarantee, government securities or certificate of deposits or other securities as may be agreed. As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent out securities and this can lead to temporary illiquidity. The AMC with a view to protecting the interests of the investors, may increase exposure in stock lending activities as deemed fit from time to time. If permitted by SEBI under extant regulations/guidelines, the scheme may also engage in stock borrowing. The Scheme may also enter into 'Repo/Reverse Repo' transactions, as may be permitted from time to time. Stock borrowing means the borrowing of stock from another person or entity for a fixed period of time, at a negotiated compensation. The securities borrowed will be returned to the lender on expiry of the stipulated period.

BORROWING BY THE MUTUAL FUND

Under the Regulations, the Fund is allowed to borrow to meet its temporary liquidity needs of the Fund for the purpose of repurchase, redemption of Units or payment of interest or dividend to the Unit holders. Further, as per the Regulations, the Fund shall not borrow more than 20% of the Net Assets of the Scheme and the duration of such borrowing shall not exceed a period of six months. The Fund may raise such borrowings after approval by the Trustee from any of its Sponsors/Associate/Group companies/Commercial Banks in India or any other entity at market related rates prevailing at the time and applicable to similar borrowings. The security for such borrowings, if required, will be as determined by the Trustee. Such borrowings, if raised, may result in a cost, which would be dealt with in consultation with the Trustees.

Further, vide its Best Practice Guidelines Circular No. 71/2017-18 dated March 23, 2018 AMFI has recommended that cost of borrowing made to manage redemptions, to the extent of YTM/ running yield of the fund as on previous day, should be charged to the scheme and any access cost over YTM/ running yield of the previous day may be borne by the AMC, and in case of any reversal subsequently, the same should be disclosed separately.

INTER-SCHEME TRANSFER OF INVESTMENTS :

Transfers of investments from one scheme to another scheme in the same mutual fund shall be allowed only if -

(a) Such transfers are done at the prevailing market price for quoted instruments on spot basis.

Explanation : "spot basis" shall have same meaning as specified by stock exchange for spot transactions.

(b) The securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made.

In order to ensure that such Inter Schemes Transfers (ISTs) of securities are in conformity with the above objective, additional safeguards

have been prescribed by SEBI vide its circular no. SEBI/HO/IMD/DF4/CIR/ P/2020/202 dated October 08, 2020. ISTs shall be undertaken in compliance with the guidelines/requirements as specified in the said SEBI circular as well.

For all open ended scheme(s) of Shriram Mutual Fund, it is expected that there would be a number of subscriptions and redemptions on a daily basis. D. Information pertaining to Investments by the Schemes of the Fund

1. Derivative strategies

As part of the Fund Management process, the Trustee may permit the use of derivative instruments such as index futures, stock futures and options contracts, warrants, convertible securities, swap agreements, Forward Rate Agreement (FRA) or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objectives of the scheme.

Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. Index futures/options can be an efficient way of achieving the scheme's investment objective. On the fixed income side, an interest rate swap agreement from fixed rate to floating rate is an example of how derivatives can be an effective hedge for the portfolio in a rising interest rate environment.

Derivatives can be either exchange traded or can be over the counter (OTC). Exchange traded derivatives are listed and traded on Stock Exchanges whereas OTC derivative transactions are generally structured between two counterparties.

Derivatives may be high risk - high return instruments, upon leveraging. As they are highly leveraged, a small price movement in the underlying security could have a large impact on their value and may also result in a loss.

Position Limits :

The schemes may enter into derivative transactions in line with the guidelines prescribed by SEBI from time to time. The schemes may take exposure in derivatives up to a maximum of 50% of its AUM. These limits will be reviewed by the AMC from time to time.

Currently, the position limits for Mutual Funds and its schemes, as permitted by the SEBI Regulations, are as under:

The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme. Exposure due to hedging positions may not be included in the above-mentioned limit subject to the following:

Ø Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.

Ø Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned above.

Ø Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.

Ø The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.

Ø Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned above.

Further, the total exposure related to option premium paid must not exceed 20% of the net assets of the scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.

Mutual Funds shall not write options or purchase instruments with embedded written options.

i. Position limit for Mutual Funds in index options contracts :

1. The Mutual Fund position limit in all index options contracts on a particular underlying index shall be Rs. 250 crore or 15% of the total open interest of the market in index options, whichever is higher, per Stock Exchange.

2. This limit would be applicable on open positions in all options contracts on a particular underlying index.

ii. Position limit for Mutual Funds in index futures contracts :

1. The Mutual Fund position limit in all index futures contracts on a particular underlying index shall be Rs. 1000 crore or 15% of the total open interest of the market in index futures, whichever is higher, per Stock Exchange.

2. This limit would be applicable on open positions in all futures contracts on a particular underlying index.

iii. Additional position limit for hedging :

In addition to the position limits at point (i) and (ii) above, Mutual Funds may take exposure in equity index derivatives subject to the following limits :

1. Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.

2. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of

cash, government securities, T-Bills and similar instruments.

iv. Position limit for Mutual Funds for stock based derivative contracts :

The Mutual Fund position limit in a derivative contract on a particular underlying stock, i.e. stock option contracts and stock futures contracts, stand

modified in the following manner :-

1. For stocks having applicable market-wise position limit (MWPL) of Rs.500 crores or more, the combined futures and options position limit shall be 20% of applicable MWPL or Rs.300 crores, whichever is lower and within which stock futures position cannot exceed 10% of applicable MWPL or Rs. 150 crores, whichever is lower.

2. For stocks having applicable market-wise position limit (MWPL) less than Rs.500 crores, the combined futures and options position limit would be 20% of applicable MWPL and futures position cannot exceed 20% of applicable MWPL or Rs.50 crore whichever is lower.

v. Position limit for each scheme of a Mutual Fund :

The position limits for each scheme of mutual fund and disclosure requirements shall be identical to that prescribed for a sub-account of a FII.

Therefore, the scheme-wise position limit/disclosure requirements shall be -

1. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme

of a mutual fund shall not exceed the higher of: 1% of the free float market capitalisation (in terms of number of shares)

Or

5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts)

2. This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.

3. For index based contracts, Mutual Funds shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

Valuation :

The traded derivatives shall be valued in accordance with the valuation method specified for traded securities (other than money market & debt securities) under sub clauses (i) to (v) of clause 1 of the Eighth Schedule to the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 as amended from time to time.

The valuation of untraded derivatives shall be done in accordance with the valuation method specified for non-traded securities (other than money market & debt securities) prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 as amended from time to time.

Stock and Index Options :

Option contracts are of two types - Call and Put, the former being the right, but not obligation, to purchase a prescribed number of shares at a specified price before or on a specific expiration date and the latter being the right, but not obligation, to sell a prescribed number of shares at a specified price before or on a specific expiration date. The price at which the shares are contracted to be purchased or sold is called the strike price. Options that can be exercised on or before the expiration date are called American Options, while those that can be exercised only on the expiration date are called European Options. In India, all individual stock options are American Options, whereas all index options are European Options. Option contracts are designated by the type of option, name of the underlying, expiry month and the strike price.

Strategies that employ Options :

Buying a Call Option : Let us assume that the Fund buys a call option of XYZ Ltd. with strike price of Rs. 1000, at a premium of Rs. 25. If the market price of ABC Ltd on the expiration date is more than Rs. 1000, the option will be exercised. The Fund will earn profits once the share price crosses Rs. 1025 (Strike Price + Premium i.e. 1000+25). Suppose the price of the stock is Rs. 1100, the option will be exercised and the Fund will buy 1 share of XYZ Ltd. from the seller of the option at Rs 1000 and sell it in the market at Rs. 1100, making a profit of Rs. 75. In another scenario, if on the expiration date the stock price falls below Rs. 1000, say it touches Rs. 900, the Fund will choose not to exercise the option. In this case the Fund loses the premium (Rs. 25), which will be the profit earned by the seller of the call option.

Risks :

In case of buying options either call/put, the maximum loss would be the premium paid in case of options expiring out of the money.

Buying a Put Option : Let us assume the Fund owns the shares of XYZ Ltd, which is trading at Rs. 500.

The fund wishes to hedge this position in the short-term as it perceives some downside to the stock in the short-term. It can buy a Put Option at Rs. 500/- by paying a premium of say Rs. 10/- In case the stock goes down to Rs. 450/- the fund has protected its downside to only the premium i.e Rs 10/- instead of Rs. 50/-. On the contrary if the stock moves up to say Rs. 550/- the fund may let the Option expire and forego the premium thereby capturing Rs. 40/- upside. The strategy is useful for downside protection at cost of foregoing some upside.

Risks :

In case of buying options either call/put, the maximum loss would be the premium paid in case of options expiring out of the money.

Stock and Index Futures :

The Stock Exchange, Mumbai and the National Stock Exchange have introduced Index futures on BSE Sensex (BSE 30) and Nifty (NSE-50). Generally, three futures of 1 month, 2 months and 3 months are presently traded on these exchanges. These futures will expire on the last working Thursday of the respective month.

There are futures based on stock indices as mentioned above as also futures based on individual stocks. Individual stock futures are also widely used derivative instruments for enhancing portfolio returns. Stock futures trade either at a premium or at discount to the spot prices, usually the level of premium reflective of the cost of carry. Many a times the stock-specific sentiments too have a bearing on Futures as speculators may find futures as a cost-effective way of executing their view on the stock. However, such executions usually increase the premium/discount to the spot significantly, thereby giving rise to clean arbitrage opportunities for a fund.

Strategies that employ Index Futures :

Illustrative list of strategies that can employ index futures :

(a) The fund has an existing equity portion invested in a basket of stocks. In case the fund manager has a view that the equity markets are headed downwards, the fund can then hedge the exposure to equity either fully or partially by initiating short futures positions in the index. A similar position in the long direction can also be initiated by the fund to hedge its position of cash and permissible equivalents. The extent to which this can be done is determined by existing guidelines.

(b) To the extent permissible by extant regulations the scheme can initiate a naked short position in an underlying index future traded on a recognized stock exchange.

In case the Nifty near month future contract trading at say, 1850, and the fund manager has a view that it will depreciate going forward, the fund can initiate a sale transaction of nifty futures at 1850 without holding a portfolio of equity stocks or any other underlying long equity position. Once the price falls to 1800 after say, 20 days the fund can initiate a square-up transaction by buying the said futures and book a profit of 50. Correspondingly the fund can take a long position without an underlying cash/ cash equivalent subject to the extant regulations.

Risks :

The risks associated with index futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

The Long position in the Nifty will have as much loss as the gain in the short portfolio if hedged completely and would be vice versa if we were holding long portfolio, short Index.

Strategies that employ Stock Futures :

Sell Spot Buy Future : To illustrate, let us assume the fund holds the stock XYZ Ltd which is trading @ Rs. 100/- at the spot market. If for some reasons the stock trades at Rs. 98 in the futures, the fund may sell the stock and buy the futures. On the date of expiry, the fund may reverse the transactions (i.e. Buy Spot & Sell futures) and earn a risk-free Rs. 2/- (2% absolute) on its holdings. Since this is done without diluting the fund's view on the underlying stock, the fund will benefit from any upside move i.e. if on the date of futures expiry, the stock is trading at Rs. 110/- the futures too will be trading at Rs. 110/- and the fund will capture the 10% upside the stock provided and along with it the 2% arbitrage too, thereby enhancing returns to 12%.

Risks :

While Futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time for schemes to purchase or close out a specific futures contract.

The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures.

Buy Spot Sell Future : If the fund holds a stock XYZ Ltd which trades @ Rs 100/- at the spot market and is trading at Rs. 102/- in the futures market.

The fund may buy the spot and sell the futures and earn the premium of Rs.2 /- which is risk-free. However this strategy can be used only when the fund

is sitting in cash and is looking at enhancing the returns on the cash.

Risks :

While Futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points

in time for schemes to purchase or close out a specific futures contract.

The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures.

Sell Future : This helps in shorting the market and taking a direct short position in the market. Futures facilitate a short position if fund manager has a bearish view in the market. Sold Futures can be repurchased any time up to the date of its expiry. If not re-purchased, it is automatically squared-off on the expiry date at Spot Rate.

Risks :

The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures and the inability of derivatives to correlate perfectly with underlying assets, rates and

indices.

Buy Future : If the fund wants to initiate a long position in a stock whose spot price is at say, Rs. 100/- and futures is at Rs. 98/-, the fund may just buy the futures contract instead of the spot thereby benefiting from a lower cost option.

Risks :

The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Interest Rate Swaps :

The Indian markets have faced high volatility in debt and equity markets. An interest rate swap is a contractual agreement between two counter-parties to exchange streams of interest amount on a notional principal basis. In this, one party agrees to pay a fixed stream of interest amount against receiving a variable or floating stream of interest amount. The variable or floating part is determined on a periodical basis. Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI.

Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.

Let us look at an example of an interest rate swap :

Entity A has a Rs.20 crores, 3 month asset which is being funded through call. Entity B, on the other hand, has deployed in overnight call money market a Rs.20 crores, 3 month liability. Both the entities are taking on an interest rate risk.

To hedge against the interest rate risk, both the entities can enter into a 3 month swap agreement based on say MIBOR (Mumbai Inter Bank Offered Rate). Through this swap, entity B will receive a fixed pre agreed rate (say 8%) and pay NSE MIBOR ("the benchmark rate") which will neutralize the interest rate risk of lending in call. Similarly, entity A will neutralize its interest rate risk from call borrowing as it will pay 8% and receive interest at the benchmark rate.

Assuming the swap is for Rs. 20 crores 1st September to 1st December, Entity A is a floating rate receiver at the overnight compounded rate and Entity B is a fixed rate receiver. On a daily basis, the benchmark rate fixed by NSE will be tracked by them.

On December 1, they will calculate as explained below:

Entity A is entitled to receive daily compounded call rate for 92 days and pay 8% fixed. Entity B is entitled to receive interest on Rs.20 crores @ 8% i.e. Rs.40.33 lakhs, and pay the compounded benchmark rate.

Thus on December 1, if the total interest on the daily overnight compounded benchmark rate is higher than Rs.40.33 lakhs, entity B will pay entity A the difference and vice versa.

Forward Rate Agreement (FRA)

A FRA is basically a forward starting IRS. It is an agreement between two parties to pay or receive the difference between an agreed fixed rate (the FRA rate) and the interest rate (reference rate) prevailing on a stipulated future date, based on a notional principal amount for an agreed period. The only cash flow is the difference between the FRA rate and the reference rate. As is the case with IRS, the notional amounts are not exchanged in FRAs.

Example : Let us assume that a scheme has an investment of Rs.10 crore in an instrument that pays interest linked to NSE MIBOR. Since the NSE MIBOR would vary daily, the scheme is running interest rate risk on its investment and would stand to lose if rates go down. To hedge itself against this risk, the scheme could do an IRS where it receives a fixed rate (assume 10%) for the next 5 days on the notional amount of Rs. 10 crore and pay a floating rate (NSE MIBOR). In doing this, the scheme would effectively lock itself into a fixed rate of 10% for the next five days. The steps would be :

1. The scheme enters into an IRS on Rs. 10 crore from December 1, 2001 to December 6, 2001. It receives a fixed rate of interest at 10% and the counter party receives the floating rate (NSE MIBOR).

The scheme and the counter party exchange a contract of having entered into this IRS.

2. On a daily basis, the NSE MIBOR will be tracked by the counterparties to determine the floating rate payable by the scheme.

3. On December 6, 2001, the counterparties will calculate the following :

The scheme will receive interest on Rs. 10 crore at 10% p.a. for 5 days i.e. Rs.1,36,986/-

The scheme will pay the compounded NSE MIBOR for 5 days by converting its floating rate asset into a fixed rate through the IRS.

If the total interest on the compounded NSE MIBOR rate is lower than Rs. 1,36,986/-, the scheme will receive the difference from the counterparty and

vice-versa. In case the interest on compounded NSE MIBOR is higher, the scheme would make a lower return than what it would have made had it not undertaken IRS.

Risks :

Interest rate swaps and FRA require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that the derivative adds to the portfolio and the ability to forecast failure of another party (usually referred to as the "counter-party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives, the credit risk where the danger is that of a counter-party failing to honour its commitment, liquidity risk where the danger is that the derivative cannot be sold at prices that reflect the underlying assets, rates and indices, and price risk where the

market price may move in adverse fashion.

As is clear from the above examples, engaging in derivatives has the potential to help the scheme in minimising the portfolio risk and/or improve the overall portfolio returns.

Please note these examples are hypothetical in nature and are given for illustration purposes only.

The actual returns may vary depending on the market conditions.

The AMC retains the right to enter into such derivative transactions as may be permitted by the applicable regulations from time to time.

2. Swing Pricing

A. Swing Pricing Framework for market dislocation:

Swing pricing refers to a process for adjusting a fund's Net Asset Value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e. flows into or out of a scheme) to the investors associated with that activity. It is aimed at reducing the impact of large redemptions on existing investors by reducing dilution of the value of a fund's units.

Accordingly, mandatory full swing during market dislocation times shall apply as under:

- Swing pricing framework will be applicable only for scenarios related to net outflows from the schemes.
- Market dislocation will be determined by SEBI either based on AMFI's recommendation or suo moto. Once market dislocation is declared, it will be notified by SEBI that swing pricing will be applicable for a specified period.
- Thereafter, mandatory swing pricing will be applicable to Schemes which:
 - a. have 'High' or 'Very High' risk on the risk-o-meter (as of the most recent period at the time of declaration of market dislocation); AND
 - b. classify themselves in the cells A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix
- **Swing factor** as per below matrix shall be made applicable to the above mentioned schemes and the NAV will be adjusted for the swing factor.

Swing factor				
	Max Credit Risk of the scheme→ Max Interest Rate Risk of the scheme↓ Class I: (Macaulay Duration <=1 year) Class II: (Macaulay Duration <=3 years) Class III: Any Macaulay Duration *CRV – Credit Risk Value	Class A (CRV>=12)	Class B (CRV>=10)	Class C (CRV<10)
		--	--	1.5%
		--	1.25%	1.75%
		1%	1.5%	2%

- Once swing pricing framework is triggered and swing factor is made applicable, both the incoming and outgoing investors shall get NAV adjusted for swing factor.
- Swing pricing shall be made applicable to all unitholders at PAN level with an exemption for redemptions upto Rs. 2 lacs for each scheme of MAMF.
- The scheme performance shall be computed based on unswung NAV.
- **Disclosures:** Disclosures pertaining to NAV adjusted for swing factor along with the performance impact shall be made by the AMC in the SID, Scheme wise Annual Reports and Abridged summary and on website prominently if swing pricing framework has been made applicable for the said mutual fund scheme.
- **Illustration:** Below is the example on how the swing pricing framework works, under which circumstances it is triggered and the effect on the NAV for incoming and outgoing investors:

Impact of Swing Pricing on incoming and outgoing unitholders/investors:

1. Unswung NAV – Rs.100/- (This is before applying the swing factor).
2. Mandatory Swing Factor - 1.50%
3. NAV after Adjustment of swing factor : $(100 - 1.5\% \text{ of } 100) = (100 - 1.50) = \text{Rs. } 98.50$

Subscription Amount	Rs.100,00,000/-
No of units to be allotted	$(100,00,000/98.50) = 101,522.843$
Redemption Amount	Rs.100,00,000/-
No of units to be redeemed	$(100,00,000/98.50) = 101,522.843$

Further, in line with the aforesaid SEBI circular, the inclusion of above-mentioned provisions pertaining to mandatory swing factor would not be considered as a Fundamental Attribute change. However, optional swing factor or higher than as specified in the Table above shall be considered as a Fundamental Attribute change of the Scheme in terms of Regulation 18(15A) of SEBI (Mutual Funds) Regulations, 1996.

Swing Pricing during normal times

The threshold for Triggering Swing Pricing is 10% net flow from the Scheme on a business day. The amount of Swing factor based on the PRC matrix of the Scheme is 0.10%.

The AMC shall use its discretion to trigger swing pricing during normal times.

B. Introduction of Mandatory Swing Pricing in case of ‘Re-opening of the scheme after announcement of winding-up’

SEBI vide its letter No. SEBI/HO/IMD/PoD-1/OW/P/2024/24219/1 dated July 30, 2024 (“SEBI Letter”) advised AMFI to add ‘Re-opening of scheme after announcement of winding up’ as one of the parameters for mandatorily triggering swing pricing and to prescribe an indicative range of swing factor for the same. AMFI has announced the norms for the same vide its Best Practice Guideline No. 135/BP/96-A/ 2024-25 dated October 25, 2024 (“AMFI Best Practice Circular”).

In accordance with the aforementioned AMFI Guidelines, the below mentioned provision’s reference shall be added be included in the Scheme Information Documents (SID) of open-ended debt schemes (except Shriram Overnight Fund) of SMF:

Re-opening of Scheme after announcement of Winding Up:

a) In cases of instances where the AMC after making an announcement to wind up a scheme, decides to roll-back the decision to wind up the scheme. Such situations may trigger large scale redemptions and hence it would be prudent to invoke the Swing Pricing mechanism to manage such a situation. In other words, if the AMC decides to reverse its decision to wind up the scheme shall mandatorily invoke the Swing pricing upon re-opening a scheme for subscriptions and redemptions post such announcement.

b) The minimum swing factor based on PRC Matrix for the parameter of “Re-opening of the scheme after announcement of Winding-Up” as per latest AMFI Best Practice circular is as follows:

	A	B	C
1	0.00%	0.05%	0.20%
2	0.05%	0.10%	0.40%
3	0.10%	0.20%	0.60%

The minimum swing factor applied would be higher of the swing factor suggested by the Board of AMC or as per suggestion in the AMFI Best Practice Circular as shown above.

c) The swing pricing period in the above instances shall be higher of:

- swing period as may be decided by the Board of AMC or
- minimum period of 7 working days, upon re-opening a scheme for subscriptions and redemptions.

3. Provisions on creation of Segregated portfolio/Side pocketing

In order to ensure fair treatment to all investors in case of a Credit Event and to deal with liquidity risk, SEBI as per Para 4.4.1 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, as amended from time to time has allowed creation of Segregated Portfolio of debt and money market instruments by mutual fund schemes.

The AMC may create a segregated portfolio of debt and money market instruments in a mutual fund scheme in case of a credit event and to deal with liquidity risk.

In this regard, the term segregated portfolio shall mean a portfolio comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme and the term main portfolio shall mean the scheme portfolio excluding the segregated portfolio. The term total portfolio shall mean the scheme portfolio including the securities affected by the credit event.

The AMC at its discretion may create Segregated Portfolio in the Scheme, with the approval of the Trustees, subject to the following: A segregated portfolio may be created in a mutual fund scheme in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

- a. Downgrade of a debt or money market instrument to below investment grade., or
- b. Subsequent downgrades of the said instruments from below investment grade., or
- c. Similar such downgrades of a loan rating.

In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as detailed above and implemented at the ISIN level.

In terms of Para 4.4.3.3 of SEBI Mutual Funds Master Circular No SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, segregated portfolio may be created of unrated debt or money market instruments by mutual fund schemes of an issuer that does not have any outstanding rated debt or money market instruments. Such segregated portfolio can be created only in case of actual default of either the interest or principal amount.

Process for creation of Segregated Portfolio:

1. The AMC shall decide on creation of segregated portfolio on the day of credit event, as per the process laid down below:

- a. The AMC shall seek approval of Trustees, prior to creation of the segregated portfolio.
- b. The AMC shall immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. It shall also be disclosed that the segregation shall be subject to trustee approval. Additionally, the said press release shall be prominently disclosed on the website of the AMC.
- c. The AMC shall ensure that till the time the Trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.

2. Upon receipt of approval from Trustees:

- a. The segregated portfolio shall be effective from the day of credit event
- b. The AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.
- c. An e-mail or SMS should be sent to all unit holders of the concerned scheme.
- d. The NAV of both segregated and main portfolio shall be disclosed from the day of the credit event.
- e. All existing investors in the scheme as on the day of the credit event shall be allotted equal number of units in the segregated portfolio as held in the main portfolio.
- f. No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.

3. If the trustees do not approve the proposal to segregate portfolio, the AMC shall issue a press release immediately informing investors of the same.

Valuation and processing of subscriptions and redemptions:

1. Notwithstanding the decision to segregate the debt and money market instrument, the valuation shall take into account the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder
2. All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing circular on applicability of NAV as under:

- a. Upon trustees' approval to create a segregated portfolio
- i. Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
- ii. Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
- b. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

Periodic Disclosures:

In order to enable the existing as well as the prospective investors to take informed decision, the following shall be adhered to:

- a. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
- b. Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the scheme.
- c. The Net Asset Value (NAV) of the segregated portfolio shall be declared on daily basis.
- d. The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.
- e. The scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The scheme performance should clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, shall be disclosed as a footnote to the scheme performance.
- f. The disclosures at paragraph (d) and (e) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
- g. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

3. TER for the Segregated Portfolio

- a. AMC shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro rata basis only upon recovery of the investments in segregated portfolio.
- b. The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
- c. The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery.
However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- d. The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Investors may also note that the process followed by the AMC/Trust regarding creation of segregated portfolios shall be in accordance with the provisions laid down by SEBI in this regard, from time to time.

Benefits and Features of Creation of Segregated Portfolio:

- 1. Creation of Segregated portfolio helps ensuring fair treatment to all investors in case of a credit event and helps in managing liquidity risk during such events;
- 2. Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio;
- 3. Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV;
- 4. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio;
- 5. Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the scheme; and
- 6. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

- . Investors who invest / subscribe to the units of the Scheme post creation of segregated portfolio shall be allotted units in the Main Portfolio only.
- . Investors redeeming their units post creation of segregated portfolio will get redemption proceeds based on NAV of main portfolio and will continue to hold units in Segregated portfolio.
- . No redemption and / or subscription shall be allowed in the Segregated Portfolio.
- . Units of Segregated portfolio shall be listed on a recognised stock exchange.

Monitoring by Trustees:

In order to ensure timely recovery of investments of the segregated portfolio, trustees shall ensure that:

- a. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
- b. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
- c. An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every trustee meeting till the investments are fully recovered/ written-off.
- d. The trustees shall monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

Risk factors associated with creation of Segregated Portfolios:

1. Liquidity risk . A segregated portfolio is created when a credit event occurs at an issuer level in the scheme. This may reduce the liquidity of the security issued by the said issuer, as demand for this security may reduce. This is also further accentuated by the lack of secondary market liquidity for corporate papers in India. As per SEBI norms, the scheme is to be closed for redemption and subscriptions until the segregated portfolio is created, running the risk of investors being unable to redeem their investments. However, it may be noted that, the proposed segregated portfolio is required to be formed within one day from the occurrence of the credit event.

Investors may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall list the units of the segregated portfolio on a recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. There is no assurance that a deep secondary market will develop for units of segregated portfolio listed on the stock exchange. This could limit the ability of the investors to resell them.

2. Valuation risk - The valuation of the securities in the segregated portfolio is required to be carried out in line with the applicable SEBI guidelines. However, it may be difficult to ascertain the fair value of the securities due to absence of an active secondary market and difficulty to price in qualitative factors.

4. Short selling / stock lending

"Stock Lending" means lending of securities to another person or entity for a fixed period of time, at a negotiated compensation in order to enhance returns of the portfolio

The Schemes of the Fund may engage into the short selling of securities in accordance with the framework relating to short selling and securities lending and borrowing specified by the Board.

Subject to the SEBI (MF) Regulations and in accordance with Securities Lending Scheme, 1997, Para 12.11 of SEBI Mutual Funds Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 , as may be amended from time to time, the Scheme seeks to engage in Securities Lending.

The AMC shall adhere to the following limits should it engage in Stock Lending.

1. Not more than 20% of the net assets of the Scheme can generally be deployed in Securities lending.
2. Not more than 5% of the net assets of the Scheme can generally be deployed in Securities Lending to any single approved intermediary level.
3. The Mutual Fund may not be able to sell such lent-out securities, and this can lead to temporary illiquidity

Risks associated with Short Selling & Securities Lending: Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon. Short-selling is the sale of shares or securities that the seller does not own at the time of trading. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock/security he shorted and returns the stock/security to the lender to close out the loan. The inherent

risks are Counterparty risk and liquidity risk of the stock/security being borrowed. The security being short sold might be illiquid or become illiquid and covering of the security might occur at a much higher price level than anticipated, leading to losses.
